RESOLUTION ON THE ANNUAL GENERAL ADMINISTRATION REPORT OF THE BURDWAN DIVISION FOR THE YEAR 1894-95.

GENERAL DEPARTMENT—MISCELLANEOUS—No. 224T.G.

Darjeeling, the 29th August 1895.

RESOLUTION.

THE Lieutenant-Governor directs the publication of the Commissioner's Report on the General Administration of the Burdwan Division for the year 1894-95, for general information.

2. The Officiating Commissioner, Mr. Bourdillon, has summed up in his closing paragraph the most important questions which have come under the attention of the officers of the Division during the year. In addition to these the Lieutenant-Governor desires to draw special attention to Mr. Bourdillon's remarks in paragraphs 82, 113 and 134, on the Ghatwali Settlement, paragraphs 105-109, on the character and conduct of the Regular Police, and in paragraph 127 on the imperfection of the register of holdings in Khas Mahals.

3. The statements in Appendix B, showing the up and down imports and exports by rail of the Burdwan, Birbhum and Hooghly districts, are based on information supplied for the first time by the East Indian Railway Company, and have been compiled on a new system. It probably reached the Commissioner too late for the statistics to be utilised in the report. This information will henceforth be supplied for every railway station in the Province, and, combined with the registration of boat traffic, it will enable District Officers to form an accurate idea of the internal trade of the country.

By order of the Lieutenant-Governor of Bengal,

C. E. BUCKLAND,

Secretary to the Govt. of Bengal.

INDEX.

ANNUAL GENERAL ADMINISTRATION REPORT OF THE BURDWAN DIVISION FOR 1894-95.

No. 190J.G., dated Burdwan, the 16th July 1895.

From—J. A. BOURDILLON, Esq., Offg. Commissioner of the Burdwan Division,
To—The Secretary to the Government of Bengal, General Department.

I HAVE the honour to submit the Annual General Administration Report of the Burdwan Division for the year 1894-95.

2. The district reports were received in this office on the dates noted below:—

Burdwan	... 31st May 1895.	Midnapore	... 3rd June 1895.
Birbhum	... 3rd June "	Hooghly	... 30th May "
Bankura	... 3rd " "	Howrah	... 1st June "

The reports, however, were generally incomplete, and further information had to be called for, which has not yet been received in all cases. Many of the appendices to the district reports were badly prepared, and more than 30 letters calling for explanation or for further information had to be addressed to district officers. I mention these facts rather in explanation of the delay which has occurred in submitting this report than as a complaint against the hard-worked district officers of this division.

3. The following paragraphs discuss the prescribed subjects in the usual order.

I.—CHARGE.

(a) Charge of the division.

4. Mr. Power was in charge of the division up to the middle of April 1894, when he retired from the service, and was succeeded by Mr. Romesh Chandra Dutt, C.I.E., who officiated as Commissioner throughout the remainder of the year. I took over charge from the latter on the 8th April 1895.

(b, c) Charge of districts and subdivisions.

5. The subjoined tables give details of the changes which occurred among the district and subdivisional officers during the year under report:—

District.	Name of Officer.	Period of Incumbency.	
		From	To
1	2	3	4
Burdwan	Mr. R. C. Dutt	1st April	14th April 1894.
	" W. H. Vincent	15th April	4th December 1894.
	" T. Inglis	5th December 1894	31st March 1895.
Birbhum	" E. F. Growse	1st April 1894	8th November 1894.
		11th December 1894	17th March 1895.
	" J. H. Temple	9th November	10th December 1894.
	" E. G. Drake-Brockman	18th March	31st March 1895.
Bankura	" R. Cornish	1st April 1894	27th February 1895.
	" W. H. Vincent	28th February	31st March 1895.
Midnapore	" D. B. Allen	1st April	7th December 1894.
		2nd January	31st March 1895.
	" C. H. Bompas	8th December 1894	1st January 1895.

		7th January	31st March 1895.
	" E. W. Collin	1st May 1894	6th January 1895.

District.	Subdivision.	Name of Officer.	Period of Incumbency.	
			From	To
1	2	3	4	5
Burdwan	Raniganj	Mr. J. E. Webster	1st April	16th May 1894.
			31st May 1894	31st March 1895.
		Babu Gopal Chunder Mookerjee	17th May	30th May 1894.
	Kalna	,, Mahendra Nath Mookerjee	1st April 1894	31st March 1895.
	Katwa	,, Sashi Bhusan Dutt	1st April	12th ditto.
		,, Banku Bihari Singh	13th March 1895	31st ditto.
Birbhum	Rampur Hât	Mr. E. F. Ainslie	1st April 1894	16th October 1894.
			17th December 1894	31st March 1895.
		,, J. Craven (Junior)	17th October	16th December 1894.
Bankura	Vishnupur	Babu Rajendra Nath Ghosh	1st April 1894	31st March 1895.
Midnapore	Contai	,, Jagat Bandhu Bhattacharjee	1st ditto	31st ditto.
	Tamluk	,, Kedar Nath Biswas	1st ditto	26th April 1894.
		,, Nanda Lal Bagchi	27th April 1894	31st March 1895.
	Ghatal	,, Kedar Nath Dutta	1st April 1894	16th July 1894.
		,, Surendra Nath Ghosh	17th July 1894	31st March 1895.
Hooghly	Serampore	Mr. F. N. Fischer	1st April 1894	19th July 1894.
			3rd November 1894	31st March 1895.
		,, S. C. Mookerjee	20th July 1894	2nd November 1894.
	Jahanabad	Babu Narayan Chandra Sen	1st April	2nd February 1895.
		,, Surendra Nath Majumdar	3rd February	31st March 1895.
Howrah	Ulubaria	,, Bhupati Chakravarti	1st April 1894	14th May 1894.
		,, Srish Chandra Ghosh	15th May 1894	31st March 1895.

It will be seen from the above that in no district in the division did the same officer hold charge throughout the year, and that the same remark applies to all the subdivisions except three.

II.—TOURS AND INSPECTION OF OFFICES.

6. Mr. Dutt, who was in charge of the division almost throughout the year, has left the following note of his tours and inspections of offices:—

(a) Tours and inspection of offices by Commissioner.

"I was out on tour for 119 days, not including the days that I was in Calcutta to attend meetings of the Bengal Council, and the more frequent meetings of Select Committees in February and March last. All the districts were fully inspected.

"In July I visited Bankura district and the subdivision of Vishnupur. I inspected the offices at both places and the Municipality of Vishnupur, and paid special attention to the question of settling ghatwali lands, which has been before Government in one form or another since many years past. The action which has been taken in this matter forms the subject of separate correspondence, and will be briefly alluded to in this report under the head of Police. I also paid particular attention to the working of the Certificate Act and to the road cess revaluation work, which is approaching completion in this district. I discovered that the Revaluation Deputy Collector had, under a misinterpretation of the law, committed serious mistakes in treating ordinary raiyats as tenure-holders for the purpose of the assessment. The matter was referred to the Board of Revenue, and the mistakes are now under correction. The subject will be referred to under the head of Land Revenue Administration in this report.

"In August I inspected Howrah district, visited the worst portions of the Municipality of Howrah in company with the Magistrate, and inspected Bally Municipality. I had a talk with the Municipal Commissioners of Bally about the sanitary condition of the town, and found them willing to introduce the sanitary provisions of the law into the whole of the town, which has since been done.

"In September I went to Hooghly, and inspected all the offices of that district and the Hooghly-Chinsura Municipality; and I also inspected Uttarpara and Kotrung Municipalities in this district. During my inspections I specially enquired into the Dankuni drainage assessment, and had a conference with the Collector and the Drainage Deputy Collector on the subject. I also looked specially into the road cess revaluation work, which has been completed in this district. Petty rent-free tenures above the annual value of Rs. 16 have not been incorporated with the parent estates in this district. The subject has been brought to the notice of the Board of Revenue, and will be referred to further on. Before leaving Hooghly I paid a visit to the Bansberia Municipality.

"In October, after the expiration of the Puja holidays, I inspected the Municipality of Howrah, and then visited and inspected Ulubaria subdivision in Howrah district. From Ulubaria I went up the Rajapur canal as far as Seddeswar to see the drained area. The crops were excellent.

"In November I went to Midnapore, and inspected that district and the Municipality of Midnapore, and then the subdivision of Contai. The Court of Wards' Department required and received my special attention in this district. The road cess revaluation work, which is approaching completion, also required my attention, as the same mistakes as I had found in Bankura had been committed here, and had not been corrected after I had pointed them out. And both at Midnapore and at Contai I enquired into the work of the certificate offices and the establishments required. The work is very heavy in Contai, owing to the management of the Majnamutha estate being in our hands. There is no provision for having transfers of holdings promptly recorded in our books, our registers therefore are to some extent obsolete, and this adds to the work of the Certificate Department.

"In January I had a conference at Howrah about the settlement of ghatwali lands in Bankura, disposed of an appeal against the settlement proceedings preferred by Raja Sir Sourendra Mohan Tagore, and reported to His Honour the Lieutenant-Governor the completion of work in reference to one of the ghâts. I then proceeded to Birbhum district, inspected the district offices, and paid a visit to Hetampur and Dubrajpur, where there are a thana and a munsifi. I had a talk with the Chairman of the Suri Municipality about the sanitary arrangements of the town and about the revised assessment. The road cess revaluation work has lately been completed in this district, and the certificate work is not heavy.

"In February I inspected the offices of Burdwan district, and specially enquired into the road cess revaluation work, which is nearly completed here, and into the working of the Public Demands Recovery Act.

"In March I concluded my tours by paying another visit to Hooghly and inspecting the subdivisions of Serampore, Rampur Hát, and Raniganj."

7. The details of tours made by the district officers have been tabulated in the subjoined statement:—

(b) Tours of Collectors.

															60	

(a) Including 39 days in June and in September to November 1894.

8. All the district officers spent the prescribed number of days in camp.

9. Mr. Vincent inspected all the subdivisional offices and sub-treasuries in Burdwan. His tour was principally confined to the Raniganj subdivision and to the western portion of the Sadar subdivision. He inspected the police stations and outposts, sub-registry offices, schools, factories, cooly depôts, collieries, dispensaries, district and village roads, pounds, and excise shops. He also enquired into the state and prospects of crops, the condition of the people, and the registration of vital statistics. Mr. Inglis began his tour in January by visiting that part of the district which lies between the Hooghly district and the railway line, as well as the subdivisions of Kalna and Katwa. At the end of February he went to Jamalpur in order to reach Rayna, which police station had not been inspected for some years. During his tours he inspected the subdivisional offices at Kalna and Katwa and the Local Board and Municipal offices in those subdivisions; police stations, sub-registry offices, schools, and pounds likewise received his attention. He also made a point of attending chaukidari parades and instructing and questioning the men on parade.

Burdwan.

10. Mr. Growse has summarized his tour in the following words:—"I have inspected every thana and outpost in the district, most of them twice. I have been over nearly all the principal roads, and recorded long notes about most of them. I have given special attention to panchayets' accounts and chaukidari matters generally, as it is of great importance to make a good start and to get the panchayets into good habits now that Act VI (B.C.) of 1870 is being systematically introduced. I have spoken to people of all classes as often as possible, and may say that on the whole the district had had a prosperous year, with good crops and with no occurrence sufficiently important to make history."

Birbhum.

11. Mr. Cornish, Magistrate of Bankura, visited all parts of the district, inspecting the Court of Wards' office at Maliara, registration offices, municipal offices, schools, and patshalas, excise shops, roads, and pounds. He also paid special attention to the punctual payment of wages to the chaukidars and to the accounts kept by panchayets.

Bankura.

12. Mr. Allen, Magistrate of Midnapore, visited the different parts of his district, inspecting thanas, municipal offices, and the offices of the Manager under the Court of Wards. The duty of giving a practical training in settlement work to the two assistants, Messrs. Walmsley and Platel, was also properly attended to. Mr. Bompas, who acted for a short time during Mr. Allen's absence, made a useful tour. He inspected many registration offices, pounds, police outposts, and excise shops, made enquiries about village unions and chaukidari matters, supervised crop experiments, and recorded his remarks in a very full and interesting diary.

Midnapore.

13. Mr. Duke's tour was distributed throughout the year. He visited all the rural thanas, outposts, and registration offices, and almost all the dispensaries in his district. Roads, schools, and the principal khas mahals also received a proper share of his attention. His inspections were in all cases marked by a thoroughness which is the distinguishing characteristic of his work. He could not inspect all the municipal offices, owing, it is explained, to much pressure of work towards the end of March, caused by his preparations for leaving the district on furlough.

Hooghly.

14. Mr. Collin, who was in charge of the district of Howrah for over eight months, spent only 29 days in camp, principally in the south of the district. Mr. Grierson rejoined the district early in January, and found that more than half the required amount of camping still remained to be done. Mr. Grierson writes:—"Under ordinary circumstances this would have been easy, but owing to my eight months' absence there were several important subjects of which I had to pick up the threads, or which had been left over by my *locum tenens* for my decision. I thus found it impossible to do more than 10 days in January and 20 days in February. Owing to the numerous demands of the municipality upon me, it is very difficult to get away from head-quarters for more than a few days at a time."

Howrah.

Mr. Grierson's tour was principally in the north of the district, but he and Mr. Collin between them inspected all the registration offices, district roads, and police stations, as well as some of the outposts, several factories, many schools and patshalas, and excise shops. Mr. Grierson remarks that the repression of crime and the conduct of the police and chaukidars absorbed a considerable share of his enquiries.

(c) Tours of subdivisional officers.

15. The following statement shows the number of days spent by the subdivisional officers on tour:—

16. All the subdivisional officers spent the prescribed number of days on tour, except the subdivisional officer of Katwa, Babu Sashi Bhusan Dutt, who was in charge of that subdivision almost throughout the year. He explains that his shortcomings were due to continued bad health. This is undoubtedly true, and the explanation may be accepted.

17. There is nothing deserving of special attention in the tour diaries of the subdivisional officers, who in moving through their subdivisions occupied themselves with the usual subjects, viz. roads, pounds, chaukidari accounts, excise shops, schools, patshalas, crops, and the condition of the people.

18. The subjoined table shows the various dates on which the Commissioner and the various district officers inspected the district offices and treasuries:—

(*d*) Inspection of district offices and treasuries.

DISTRICT.	DATES OF INSPECTION BY COMMISSIONER—		DATES OF INSPECTION BY DISTRICT OFFICERS—	
	Of office.	Of treasury.	Of office.	Of treasury.
1	2	3	4	5
Burdwan ...	21st February to 1st March 1895.	27th February 1895.	24th July to 30th October 1894. 5th March to 1st April 1895.	2nd October 1894. 31st March 1895.
Birbhum ...	29th January 1895	28th January 1895	26th September 1894 26th March 1895 and following days.	2nd May 1894. 30th September 1894.
Bankura ...	17th July 1894 ...	13th and 14th July 1894.	2nd April 1894 ... 25th September 1894	7th November 1894. 31st March 1895.

Hooghly ...	September 1894 ...	11th September 1894.	16th September 1894 5th February 1895 ...	30th March 1894. 15th November 1894.
Howrah ...	20th to 22nd August 1894.	22nd August 1894	By the Collector of Hooghly— 21st August 1894 and 13th March 1895. By the Magistrate and Covenanted Deputy Collector— 28th September 1894. 20th October 1894. 22nd March 1895.	1st October 1894. 29th March 1895.

19. My predecessor, Mr. Dutt, inspected all the district offices and treasuries. During his inspection of the Bankura Treasury he discovered that the treasurer was in the habit of temporarily misappropriating public money by falsifying certain totals of the daily balance sheet, so that it might appear that the amount removed was actually in the joint custody of himself and the treasury officer under double lock in the treasury. The matter was reported to Government through the Board of Revenue. The treasurer was prosecuted and convicted at the sessions, but was acquitted by the High Court. The management of the wards' estates and the condition of the wards' office in Midnapore came under the unfavourable notice of Mr. Dutt.

(1) By Commissioner.

20. All the Collectors made thorough inspections of their offices and treasuries twice during the year. Some few irregularities and omissions were noticed during the inspections, but with the exception of that noticed above, none were of a serious nature.

(2) By Collectors.

21. The following table shows the different dates on which the subdivisional offices and treasuries were inspected by the Commissioner and the district officers:—

(*e*) Inspection of subdivisional offices and treasuries by—
(1) Commissioner.
(2) Collectors.

DISTRICT.	Subdivision.	DATES OF INSPECTION BY COMMISSIONER—		DATES OF INSPECTION BY COLLECTOR-MAGISTRATE—

22. Mr. Dutt inspected most of the important subdivisions, but did not visit Kalna, Katwa, Tamluk, Ghatal, and Jahanabad.

23. All the subdivisional offices and treasuries except Raniganj were inspected twice by the Collectors. Mr. Inglis visited Raniganj in March last and made a summary inspection of the offices, but had no time to make a formal inspection of the sub-treasury before his transfer to Patna.

III.—WEATHER AND CROPS.

24. The subjoined table shows the average rainfall in each district during the past three years:—

District.	Rainfall in Inches in—		
	1892-93.	1893-94.	1894-95.
1	2	3	4
Burdwan ..	52·21	62·25	56·04
Birbhum ...	52·72	60·98	61·73
Bankura ...	50·80	72·21	58·58
Midnapore ...	52·59	72·46	64·76
Hooghly ...	53·82	72·86	54·15
Howrah ...	48·45	69·46	49·13
Divisional average ...	51·76	68·37	57·39

25. The monsoon set in late, but the rainfall was evenly distributed, as in the preceding year, and was favourable to the crops, except in parts of Burdwan and Midnapore, which suffered from floods. The outturn of crops in this division was above the average.

26. In Burdwan the monsoon broke late, and the rainfall in May and June was less than in the preceding year; but this deficiency was more than compensated by the abundant falls in July and August, and the whole area available was planted with paddy. About 500 acres of land in the Kalna subdivision suffered from floods, and the winter rice on the land suffered in consequence. The outturn of the aman crop was over 15 annas, and that of the aus, which is not extensively grown in this district, nearly 14 annas. The rabi crops suffered in part from the rains of October and November, and again from want of water in December. The outturn on the whole was better than that of the preceding year. Mr. Windsor reports that, owing to the obstinate conservatism of the cultivators, the experiment of growing Buxar wheat, which has repeatedly been tried and of which some result might have been expected, proved a failure.

27. In Birbhum too the rains set in late, and the sowings of rice were consequently somewhat retarded. The rainfall was above the average in most parts of the district towards harvest time. The outturn was estimated at 18 annas.

28. In Bankura the monsoon broke about the usual date in June. The rainfall, which was above the average, was evenly distributed. The aman or haimanta rice yielded more than an average outturn, viz. 18 annas. The aus, which is not of much importance in this district, suffered from the heavy rainfall in September, and yielded no more than an average crop of 16 annas. The winter crops suffered more or less from want of rain towards the close of the year, and the outturn was generally below the average. Sugarcane, which is pretty extensively grown in this district, suffered from heavy rainfall and yielded 10 to 12 annas.

29. In Midnapore the rainfall was on the whole seasonable. The outturn of the rice crop was over 12 annas. Excessive rainfall in July injured small areas in Contai and Tamluk, the water not subsiding immediately. The raiyats in the affected parts had no reserve of seed-grain for fresh sowings, and had to buy it at exorbitant rates from outside the district.

30. Mr. Duke, the late Magistrate of Hooghly, has left the following note on the rainfall and crops of that district during 1894-95:—

"The season was one of short but peculiarly timely rainfall. The total rainfall was only 54·15 inches against 72·86 in the previous and 53·82 in the next preceding year. The rains began rather early in June, but were light throughout. By the end of October they stopped, and an apparently full crop was on the ground. Had it matured without further rainfall, it would probably have been very light in the ear. At the beginning of November, however, there was a cyclonic disturbance with exceedingly heavy rainfall * * * * but as a matter of fact I do not believe that 1 anna of damage was done in any part of the district, while in many cases the crop was enormously benefited. It was almost universally acknowledged to be the finest crop taken off the ground for the last 20 years. In the low lands, especially the small local *bils*, and above all in the Dankuni *bil*, the crop was so heavy that the people could not get it cut * * * * This, however, is due not only to the good season, but to the improvement in the drainage system, which previously did not touch that part of the *bil*."

The food-stocks of the district, which had been very low since 1892, are said to have been completely replenished, and rice, and still more straw, which had been extraordinarily dear, are now cheaper than they have been for three years past. The rabi crops, potatoes, and sugarcane yielded good outturns: pulses and mustard were injured in some parts.

31. In Howrah the total rainfall was about 4 inches below the average of the preceding five years, but it was not insufficient. As to the effect of the rain on the crops, it is said that it could not have been better distributed. Both the monsoon crops and the winter rice gave an excellent outturn. The rabi crops suffered from want of rain in February, but there is not much rabi grown in this district. The outturn of the sugarcane was magnificent.

IV.—PUBLIC HEALTH.

32. The following statement shows the number of deaths from different diseases reported during the year 1894 as compared with the preceding two years:—

DISTRICT.	Population.	Number of deaths from fever.			Number of deaths from cholera.			Number of deaths from bowel-complaints.		
		1892.	1893.	1894.	1892.	1893.	1894.	1892.	1893.	1894.

* Separate figures not furnished.

It will appear from the above figures that the past year was marked by a large amount of mortality, and all the district officers agree in characterizing it as remarkably unhealthy. As usual, by far the largest number of deaths occurred from fever and cholera. The increase is most marked in the case of Burdwan, Birbhum, and Bankura.

33. In Burdwan the year appears to have been the most unhealthy since 1881. Malarial fever raged throughout the district, except in the Raniganj subdivision, which enjoyed a comparative immunity from this disease. The riparian tract bordering on the Bhagirathi river, especially Dainhat, suffered most. Cholera also visited almost every part of the district, and it is stated that there was not a single month in the year in which deaths from cholera were not registered. Municipal and rural areas were equally affected; parts of the Katwa and the Kalna subdivisions suffering most severely, it is said, on account of the want of good drinking water; small-pox broke out all over the district, and is said to have been imported from Calcutta.

34. In Birbhum the Bolpur thana as usual returned a high mortality from fever, and chiefly for this reason a charitable dispensary was opened there in October 1894. Deaths from cholera increased from 380 in 1893 to 2,517 in the year under report. It raged in epidemic form in the Rampur Hát subdivision, where 1,985 deaths took place from this cause in spite of the efforts of the Subdivisional Officer, Mr. Ainslie, who did all he could to enforce sanitary measures during the outbreak.

35. In Bankura fever appeared in almost all the villages and towns in the district, but disappeared after the cold weather set in. Cholera also broke out in different parts of the district, causing a greater mortality than in the preceding year. Its prevalence was most marked in thanas Gangajalghati and Onda and in the town of Sonamukhi. Special measures were adopted by the Commissioners of the Sonamukhi Municipality in conjunction with the District Board of Bankura, and a native doctor with a stock of medicines was sent out to the affected tracts.

36. In Midnapore fever and cholera prevailed throughout the district, and a wave of influenza during the earlier half of the year added largely to the number of deaths recorded under the head of fever. Cholera appeared as an epidemic over the greater part of the district, but more extensively in the Tamluk and Contai subdivisions, where two extra native doctors and one extra Civil Hospital Assistant were deputed to afford medical aid to the sufferers. The town of Midnapore also was attacked by the disease, the origin of which could not be ascertained, though it was probably introduced by the Puri pilgrims. The Municipal Commissioners took prompt measures to arrest the progress of the disease, but the drinking water-supply could not be easily improved; filthy tanks which could not be adequately protected abounding all over the town. Small-pox, which was said to have been imported from Calcutta, was reported from almost all the thanas in Midnapore.

37. In Hooghly the mortality both from fever and cholera was very large: cholera prevailed in the towns of Hooghly, Jahanabad, and Serampore, and in other parts of the district, but it nowhere assumed an epidemic form. In Serampore it lasted throughout the year, and is said to have been due to the short rainfall of the year and to want of good drinking water.

38. In Howrah the mortality from fever has been increasing slowly during the last three years, but that from cholera in 1894 shows a marked advance as compared with that of the preceding year. Cholera is said to be endemic in this district, but rarely appears in an epidemic form.

Sanitary works.

39. The Municipality of Burdwan spent more than Rs. 8,000 in preliminary operations for extending the water-supply of the town; it also spent a small sum in the preparation of a drainage scheme. The Municipal Commissioners of Dainhat spent Rs. 458 in acquiring land for a tank. The District Board of Burdwan granted Rs. 1,083 to the owners of four tanks towards the cost of re-excavating and cleansing them. Advances under the Land Improvement Act were also made to private individuals for the re-excavation of tanks. One well was sunk and another repaired in a Government estate for the supply of good drinking water to travellers.

40. In Birbhum the Municipal Commissioners of Suri induced the owners of three tanks to reserve them for drinking purposes, and a well has been sunk with the same object. Every village in this district, as well as elsewhere in the division, abounds with cess-pits, which are the hot-beds of disease, and there are no tanks reserved for drinking purposes. Mr. Growse during his cold weather tour tried to induce the proprietors of tanks in many villages to make them over to the District Board for reservation under section 90 of the Local Self-Government Act, but no one came forward to execute and register the necessary deeds of transfer.

41. Bankura is naturally a healthy district, and the town is situated on a ridge between two rivers, consequently the necessity for a regular system of drainage has not been urgently felt. In Sonamukhi, which though well situated is not well drained, steps are being taken to improve the drainage.

42. The Midnapore Municipality made some efforts to carry out suggestions made for sanitary improvements.

43. The conservancy arrangements in the several municipalities of the Hooghly district are said to be good, but much yet remains to be done in improving their sanitary condition. All the municipalities in this district have under consideration schemes of systematic drainage. The Municipality of Serampore has not yet been able, to connect the internal drains of the town with the main drainage channel, excavated at a cost of Rs. 20,000, but provision has been made for the purpose in the budget of the current year. There has been great waste of money over this scheme. The want of good drinking water is much felt by people living at some distance from the Hooghly, which is the principal source of water-supply in the riparian municipalities, and this obviously has much to do with the outbreak of cholera in the dry season. The Municipal Commissioners of Hooghly have arranged, in conjunction with the railway authorities, to supply river water to parts of the town; but while these attempts are being made in the towns, no efforts are made to improve the sanitary condition of the rural area. Mr. Dutt remarks that what is wanted is to drain such portions of the country as are water-logged, and then to connect all villages with the main drainage channels and remove all obstruction; but this is obviously a counsel of perfection, and I agree with Mr. Dutt that no systematic attempt in this direction can possibly be made with our present resources.

44. The Magistrate of Howrah has not furnished any information as to the sanitary work carried out by the Municipalities or the District Board in his district.

Vaccination.

45. The following table shows the number of persons vaccinated during the last two years:—

District.	Number of persons vaccinated.	
	1893-94.	1894-95.
1	2	3
Burdwan	32,263	40,275
Birbhum	15,107	22,892
Bankura	31,849	27,928
Midnapore	60,168	64,244
Hooghly	20,561	28,472
Howrah	18,064 (*a*)	24,132 (*a*)
	178,012	207,943

(*a*) Figures for calendar year.

Vaccination has been making fair progress, and every year sees a larger number of persons vaccinated. The increase in the year under report was contributed by all the districts except Bankura, where the prevalence of fever and measles is said to have hindered the progress of the work. The Muhammadans generally, and among Hindus the Ugra Khetryas in Burdwan, still entertain

prejudices against vaccination, but many of the Muhammadans in Howrah came in voluntarily through fear of the epidemic in Calcutta.

46. Calf vaccination was tried in Midnapore, and 72 calves were vaccinated, 63 successfully: 1,890 person swere vaccinated from the calves. There was no opposition on sentimental or religious grounds to calf vaccination in this district. The Magistrates of other districts do not furnish any information under this head, and it is possible that the experiment was not carried on in their districts.

V.—MATERIAL CONDITION OF THE PEOPLE.

47. Except in parts of Midnapore, which were affected by heavy floods in July last, the rice crops produced an abundant harvest throughout the division. As a consequence of this, and of the excellent crops of the two preceding years, the material condition of the people throughout the division is reported to have been remarkably good. There is no doubt that the rise in the price of rice and other crops has put into the pockets of the cultivating classes an amount of ready money they never possessed before. Evidence of this prosperity is met with in every direction. The standard of living has risen considerably among them, and many things which were formerly accounted as luxuries are now treated as articles of ordinary and every-day use. The labouring classes too have benefited from the growing demand for labour created by the expansion of the coal trade, the increase in the number of factories, and the opening up of new industries.

48. The only classes who do not share in this prosperity are those who have to depend entirely on the small salaries they receive as the wages of skilled labour, specially those who work as clerks and muharrirs in Government and private employ. Debarred from manual labour by custom and tradition, with prices rising, and the purchasing power of the rupee declining, not to mention the ever-increasing difficulties in the way of obtaining work, the struggle for existence in this section of the community is very severe indeed. Of any improvement in their material condition I see very little prospect so long as the army of competitors for clerkly employment is swollen every year by the recruits from our schools and universities, and so long as exaggerated notions of self-importance and excessive devotion to old customs and traditions continue to prevail among these classes, preventing them from seeking a livelihood in occupations which they have hitherto despised, but which, though unfamiliar, are not necessarily degrading and may be made lucrative.

VI.—EMIGRATION AND IMMIGRATION.

49. Emigrants were registered in the districts of Burdwan, Bankura, and Midnapore in considerable numbers, and to a lesser degree in Howrah. The subjoined table shows the numbers registered in each district during the last two years, but these figures take no note of the much more important free emigration.

District.	For the Colonies.						For the Tea Districts.					
	1893-94.			1894-95.			1893-94.			1894-95.		
	Coolies.	Dependants.	Total.	Coolies.	Dependants.	Total.	Coolies.	Dependants.	Total.	Coolies.	Dependants.	Total.
1	2	3	4	5	6	7	8	9	10	11	12	13
Burdwan ...	...	...	642	...	...	21	478	108	586	858	229	1,087
Birbhum ...	...	...	...	...	...	...	...	...	...	...	...	...
Bankura ...	...	..	...	...	...	...	303	208	511	130	79	209
Midnapore ...	...	...	...	...	...	...	387	214	601	357	177	534
Hooghly ...	...	...	...	...	...	...	...	...	...	...	...	...
Howrah ...	...	...	28	28	...	28	...	...	...	...	...	...
Total ...	...	...	670	...	...	49	1,168	530	1,698	1,345	485	1,830

The Magistrate of Burdwan has offered no explanation of two noticeable points in the statistics for his district, viz. (1) the increase in the number of emigrants to the tea districts, and (2) the decrease in that of coolies bound for the colonies. He has, however, pointed out a considerable fall in the number of free emigrants, viz. from 14,000 in 1893-94 to about 5,400 in 1894-95. This decrease is attributed partly to good harvests in the districts from which coolies migrate, and partly to the growing importance of Purulia, Chaibassa, and other western towns, which, being nearer to the recruiting districts, and now on or near a line of rail, are used more and more as centres from which coolies are registered and taken to the tea districts. He adds that while labour is so liberally paid as it now is in the coal mines, iron works, and potteries of Raniganj, inhabitants of the Burdwan district have little or no temptation to emigrate.

50. The Magistrate of Birbhum believes that many bad characters disappear in the guise of emigrants when the surveillance of the police becomes irksome, and the theory is inherently probable, besides being capable of proof.

51. The Magistrate of Bankura attributes the decrease in the number of registered emigrants to the development of the system of free emigration and to the prosperous condition of the people on account of the good harvests they have reaped during the last two years.

52. The Magistrate of Midnapore has offered no explanation of the decrease in his district. It is probably due to the causes mentioned by the Magistrate of Bankura.

54. Statements showing criminal cases connected with emigration, which were prescribed by Government order No. 1848, dated 21st April 1892, have been separately submitted. A large number of cases occurred in Burdwan, but only one of them deserves separate mention. In this case four girls, aged from about 13 to 17 years, and a boy were abducted to Purulia, where they were taken to some depôt, and when rejected there they were taken away to the jungles; here the two youngest were allowed to depart, the rest being for some time concealed in the jungle out of the way of the police, who were searching for them. Out of the four accused persons in this case two were sentenced by the Sessions Court to rigorous imprisonment for two years and one month, a third to two months' rigorous imprisonment, and the fourth was acquitted.

55. During 1894-95 11 rest-houses and 41 cooly depôts were in existence in the districts of this division. With the exception of two rest-houses in Birbhum, which were inspected once only, all the rest-houses and cooly depôts were inspected two or more times. Great attention was paid to the inspection of these depôts in Burdwan, where four of them were inspected more than eight times. The instructions given at inspections are said to have been duly attended to, except in one instance at Raniganj, where Mr. Mackertich, a depôt-holder, did not comply with the suggestions made by the subdivisional officer, to the effect that he should open certain registers and provide separate accommodation for sardari and colonial emigrants until threatened with the cancelment of his license. Local medical practitioners are attached to the depôts in Raniganj and Midnapore to attend to the coolies. No such arrangement exists in the depôts in Bankura. The health of the emigrants was good during the year, and blankets and warm clothing were supplied to them when necessary.

56. There was no registered immigration into any of the districts of this division, but it is a well-known fact that people from the Chota Nagpur Division, Bihar, and the North-Western Provinces come in large numbers to Burdwan, Hooghly, and Howrah. In Burdwan they find employment in the fields at the time of cultivation and harvesting, in brick-making, and in excavating tanks. A considerable portion serve in the mills in the districts of Hooghly and Howrah. These are temporary immigrants, and do not settle in the district.

VII.—PRICES OF FOOD AND LABOUR.

57. Grain was cheap and the prices of labour kept high throughout the year, which things mean unusual prosperity for the labouring classes.

58. The good harvests of the year served to reduce the price of common rice, the average rate for the division during the year having been 17 seers 10 chitaks per rupee against 14 seers 12 chitaks in 1893-94. The average rate in the different localities in the division from which returns were received varied from 13 seers in Hooghly to 21 seers in Contai, the discrepancies being largely due to the sufficiency or the reverse of means of communication. The winter crops, however, were not so universally good as the rice crop, so that the price of wheat and grain ruled higher than in the preceding year.

59. The wages of labour remained almost stationary, except in Howrah, where the rate has increased. The Magistrate of Howrah reports that with an increase in the number of mills and an ever-increasing demand for labour in them, the coolies are becoming independent, so much so that there have been one or two petty strikes. All this tends in his opinion to make wages rise still higher, but he has omitted to add that so long as the supply of labourers continues to be unlimited, as it practically is, this rise must only be temporary: it is impossible in the present state of the labour market to conceive a combined strike for higher wages being successful in the long run.

VIII.—MANUFACTURES AND MINES.

60. The local industries of the division consist of the manufacture of silk, tasar, jute, cotton, molasses, shell-lac, rope, brass and hardware, indigo, paper, pottery and iron.

Silk.

61. The manufacture of silk is carried on to some extent in every district. In Burdwan the industry is flourishing, though unobtrusive, and the value of the outturn has been returned as Rs. 1,66,783 against Rs. 1,62,681 in 1893-94. Birbhum nearly recovered the ground it lost in 1893. In Midnapore the figures for all the factories are not available, but as far as they go they indicate a decline. In Bankura the manufacture of the material called "kutni" is said to be dying out for want of any outside demand for it. Tasar silk is chiefly manufactured in Bankura, Birbhum, and Hooghly, but it is said that the industry is gradually waning.

Jute and cotton.

62. As is well known, there are many large jute mills in the districts of Hooghly and Howrah in which gunny-bags and cloth are manufactured, as well as cotton mills in the latter district. As the figures for all the mills are not available, no comparison of the results with those of the previous year is possible. Out of the four cotton mills in Howrah, the statistics for one have not been received; of the remaining three, one shows a decrease and the other two a large increase in production.

Cotton cloth.

63. Cotton cloth is manufactured in the villages throughout every district of this division. The industry is steadily declining owing to the difficulty found by the weavers in competing with the cheap European goods so largely imported, and it is reported that the weaver caste are taking to other trades. The hât at Ramkrishnapur in the town of Howrah, which is the principal cloth mart in the division, maintained its importance throughout the year. It is said that at this place a lakh of rupees is turned over every hât day.

Molasses.

64. Molasses prepared from sugarcane are manufactured in all districts, but the preparation of those from the date-palm is confined to the districts of Burdwan, Hooghly, and Howrah. Mills of the well-known Bihia pattern are said to be extensively used in pressing sugarcane in Burdwan.

Shell-lac.

65. There was a fall in the industry in Birbhum, but the manufacturers in Bankura appear to have done a good business during the year.

Rope.

66. The outturn of rope, which is manufactured in the districts of Hooghly and Howrah, increased greatly during the year. The two roperies in Howrah turned out Rs. 7,70,400 worth of rope against Rs. 7,35,320 in the preceding year.

Brass, bell-metal, and hardware.

67. The manufacture of these articles is carried on in all the districts of this division. The demand for them is gradually declining in Burdwan and Hooghly. The Magistrate of Burdwan attributes this decadence to the import and use of enamelled utensils or those made of zinc or tin. In the towns of Kharar and Chandrakona in the district of Midnapore the industry is carried on extensively.

Indigo.

68. Indigo, which is manufactured in the districts of Bankura and Midnapore, has partially recovered the check it sustained in 1893.

Paper.

69. Paper is manufactured chiefly in the two mills at Raniganj and Bally: the outturn in the former is gradually increasing; in the latter it has somewhat decreased. In Hooghly 14,450lbs. of hand-made paper were produced.

Pottery.

70. The outturn of the pottery works belonging to Messrs. Burn & Co. at Raniganj is decreasing every year. Bricks, tiles, and pantiles are very largely manufactured on the river bank in the district of Howrah.

Iron.

71. There was a change in the supervising staff of the Barakar Iron Works in the district of Burdwan, and it is reported that an attempt has been made to improve the outturn by new machinery. The amount and value of the outturn of the four iron works in the Howrah district have much increased.

Mats.

72. Mats are manufactured on an extensive scale in the district of Midnapore. Those known as *masland* are the best, and are much valued for their fine make and finish.

73. The preparation of sticks and other articles from ebony is a considerable industry in the Jahanabad subdivision, and *hukas* are largely manufactured in the villages of Begri and Andul in the district of Howrah. Jute twist, fishing nets, cane and bamboo baskets are also manufactured in Howrah and exported in large quantities to Calcutta and elsewhere.

74. The subjoined table shows the outturn of some of the principal articles of manufacture :—

District.	Articles.		Outturn in—		
			1892-93.	1893-94.	1894-95.

Coal mines.

75. Mining operations are confined to the districts of Burdwan and Bankura. In Burdwan they are carried on very extensively in the Raniganj subdivision; in Bankura only two collieries are worked. The Magistrate of Burdwan reports that the importance of coal mining is steadily increasing. The rise in the price of coal in the Calcutta market has given a great stimulus to the trade. The competition for coal lands has become keener than ever in spite of the exploitation of extensive coal-fields elsewhere; and several more or less serious disputes have ensued between rival claimants. The existing companies are making every endeavour to extend their operations.

76. The visit of Mr. Grundy, the Government Inspector of Mines, to the Raniganj subdivision in the early part of the year is reported to have been a matter of great interest to the mining community, who for the most part are averse to any Government interference by legislation or otherwise. Mr. Windsor thinks that the large companies, with well-paid and experienced managers and with collieries worked on sound principles and equipped with the proper mechanical appliances, can be trusted to maintain a proper efficiency in their own interests; but for private collieries worked by cheap and inexperienced agency and with inferior machinery, he thinks some supervision necessary, especially as the number of these small concerns is increasing. The reports that I have seen of the condition of some of these small mines leave no room for doubt that supervision is urgently required, but I am of opinion that no distinction should be made in the matter of inspection between collieries worked by large companies and those worked by private individuals. This and many other questions will be considered by the Mines Commission now sitting, and need not be further discussed here.

IX.—TRADE AND COMMERCE.

77. The East Indian Railway, passing through every district in the division except Bankura and Midnapore, together with its feeders, the branch line from Sheoraphuli to Tarakeswar and the important road from Raniganj to Midnapore *viâ* Bankura, serves as the main artery of trade and commerce in the division. The Magra-Tarakeswar Railway has been an important addition to the existing facilities for communication. The riparian tracts along the rivers of the division are served by the steamers which regularly ply in the Hooghly and the Rupnarain, and also by country boats. The Midnapore canal, in addition to the service which it renders to the district as an irrigation canal, was largely used throughout the year as one of the principal navigation channels and routes of traffic from the Hooghly to the west and south-west. An important change in the lines of traffic has been caused by the construction of the Bengal-Nagpur Railway, since goods and passengers to and from Purulia and the neighbouring districts no longer pass through Bankura *viâ* Raniganj, and the importance of Bankura as a trade centre has already begun to decline.

78. The principal articles of trade in this division were the same in 1894-95 as in the preceding year, and are as follows:—

Exports.

Rice, paddy, pulses, lime, hides, oilseeds, brass and bell-metal utensils, shell-lac, tasar and silk, coal, potatoes, molasses, timber and paper.

Imports.

European piece-goods, twist and yarn, tobacco, salt, kerosine oil, pulses, spices, ghi, gunny-bags, and food-grains.

79. Statements B to M, as detailed below, prepared in the form prescribed by Government in the Statistical Department circular No. 2 of the 16th April 1895, have been separately submitted to Government:—

(B) The "up" and "down" import and export traffic carried by rail in the districts of Burdwan, Birbhum, and Hooghly.
(C) The import and export traffic of the Kalna and the Katwa subdivisions by road and river.
(D) The import and export boat traffic of the district of Burdwan carried along the Nadia rivers.
(E) The import and export boat traffic of the Hooghly district carried along the Nadia rivers.
(F) The trade of the Hooghly district with Calcutta carried by country boats along the Calcutta and Eastern canals.
(G) The import and export traffic of the Hooghly district carried by country boats along the Midnapore, Hijili, and Orissa Coast canals.
(H) The import and export traffic of the Burdwan district carried by country boats along the Calcutta and Eastern canals.
(I) The import and export traffic of the district of Burdwan carried by country boats along the Midnapore canal.
(J) The import traffic by rail and canal to Howrah.
(K) The export traffic by rail and canal from Howrah.
(L) The import and export traffic of the district of Midnapore by country boats along the Midnapore, Hijili, and the Orissa Coast canals.
(M) The trade of the Midnapore district with Calcutta carried by country boats along the Calcutta and the Eastern canals.

Rice.

80. The exportation of rice was very brisk in Burdwan, a district which exports largely. In Bankura, notwithstanding the plentiful harvests of the past two years, the exportation of rice was limited. When rice is everywhere plentiful and cheap, it is obvious that in districts off the line of rail and with no water routes exportation must fall off. Accordingly, the total quantity exported from Bankura did not exceed 1,40,000 maunds, and, as has been already stated, the glut in the market resulted in the average price of rice being 21 seers per rupee in this district for

the year. In Birbhum the exportation during the year increased by more than 4 lakhs of maunds, due to a succession of good harvests, which the railway has enabled the cultivators to utilize to the full.

81. European piece-goods are largely imported into every district. The supply of kerosine oil is believed to have increased owing to its cheapness and to its having come more than ever into general use. Refined sugar is now imported to a large extent, and the Magistrate of Birbhum reports that the prejudice against it is gradually dying out. The import of tasar cocoons in Burdwan and Bankura has diminished. In Burdwan this is due to purchase of silk thread from Calcutta, and in Bankura to the opening of the Bengal-Nagpur Railway, which, as already pointed out, has diverted the course of traffic with Manbhum and Singhbhum.

X.—ADMINISTRATIVE CHANGES.

82. The following were the principal administrative changes which took place during the year:—

(1) In pursuance of the policy of Government, as contained in its order No. 3020J., dated 23rd July 1894, steps were taken in every district to replace the chaukidars under Regulation XX of 1817 by those under Act VI (B.C.) of 1870. Commissioners under section 58 of Act VI (B.C.) of 1870 were appointed to assist in the resumption and settlement of chakran lands.

(2) Arrangements were made for the formation of Union Committees under the District Boards in all districts of the division.

(3) Steps were taken for the gradual resumption and settlement of ghatwali lands in Bankura, with a view to the ultimate abolition of the ghatwali system in that district.

(4) Two new sub-registry offices were experimentally opened in the district of Burdwan at Jamalpur and Khandghosh.

(5) The experiment of appointing a sardar chaukidar on slightly higher pay to supervise the work of the other chaukidars was tried in Burdwan with success.

(6) A rainfall-registering station was opened at Labhpur in Birbhum.

(7) Two police outposts in the district of Bankura were abolished on the recommendation of the Police Redistribution Committee.

(8) The Municipal Bench at Tamluk was abolished under Government order No. 512J.D., dated 26th May 1894.

(9) An Honorary Magistrate was appointed at Dantun in the district of Midnapore for the disposal of cases under the Puri Lodging-house Act and the bye-laws framed thereunder.

(10) The police outpost of Singti, consisting of 42 villages, was transferred from the jurisdiction of thana Khanakul in the Jahanabad subdivision, district Hooghly, to that of thana Ampta in the Ulubaria subdivision of the Howrah district.

XI.—STATISTICAL ENQUIRIES.

83. The subjoined table shows the reported birth and death-rates per mille in the several districts of this division for the last two years. The figures are for both rural and urban areas combined.

DISTRICT.	Birth-rate per mille.		Death-rate per mille.	
	1893.	1894.	1893.	1894.
1	2	3	4	5
Burdwan ...	34·79	29·44	26·00	34·59
Birbhum ...	40·62	32·49	29·04	35·95
Bankura ...	32·69	32·6	22·18	30·91
Midnapore ...	31·02	29·2	26·44	27·76
Hooghly ...	35·80	...	31·19	...
Howrah ...	34·34	31·62	25·63	27·49

84. Births and deaths were registered as before by the police. The Magistrate of Burdwan while on tour checked some of the entries in the birth and death registers. The Magistrate and the District Superintendent of Police, Midnapore, inspected the several registering circles in the district. The attention of all district and subdivisional officers will again be called to the necessity of checking these statistics when on tour. Both birth and death-rates are probably much below the real facts, and it is only by continual insistence that we can hope to improve the accuracy of these statistics.

85. The recorded death-rate exceeds the recorded birth-rate in Burdwan, Birbhum, and Hooghly. The Magistrate of Burdwan ascribes the fact to the general bad state of health of the people throughout the district. Mr. Dutt, Magistrate of Hooghly, thinks there must be something wrong in the figures, and considers it improbable that the number of deaths should have exceeded that of births by about 8,000. The Magistrate of Birbhum has made no attempt to explain the figures supplied by him.

86. The increase in the death-rate in 1894 is, Mr. Grierson thinks, due not to increased deaths, but improved registration. He writes: "The registration in the mufassal is in the hands of the police, who are dependent upon the chaukidars. * * * I lay great stress in my thana inspections on good registration of deaths, as if the chaukidars omit to report deaths, they will omit to report other things. The death registration of a thana is therefore a useful index of the degree to which a Sub-Inspector has his chaukidars in hand"

87. I feel certain that the system of registration is gradually improving and receiving more attention on the part of the police, and therefore as regards the registration of both births and deaths there is no doubt that some increase is due to better reporting, but nevertheless the figures afford terrible proof of the unhealthiness of the year 1894, both in the increase of the death-rate and the falling off of the birth-rate, which are observable in conjunction in every district. In an unhealthy year not only do large numbers of potential parents die, but when, as in this division, the prevalent disease is malarial fever, the reproductive powers of the survivors are greatly impaired. Doubtless the effect on births of a bad year is most clearly seen in that which succeeds it, but to a considerable extent the effects are immediate. The theory just stated has been still further illustrated in a paper prepared for the Medical Congress by Surgeon-Captain Dyson, Deputy Sanitary Commissioner in the Panjab, which shows to demonstration the sterilizing effect of subsoil saturation and malarial fever upon the population exposed to those malign influences.

88. The number of prosecutions under Act IV (B.C.) of 1873 was 1 in Burdwan, 44 in Bankura, 104 in Midnapore, and 85 in Hooghly. In Midnapore one of the accused was sentenced to imprisonment.

89. The following statement shows the number of births and deaths registered within municipal areas in the several districts of the division during the last two years:—

District.	Name of Municipality.	Population.	Deaths registered.				Births registered.			
			1893.	1894.	Rate per mille.		1893.	1894.	Rate per mille.	
					1893.	1894.			1893.	1894.

90. As these figures have been fully examined in the annual report of the Sanitary Commissioner and the Government Resolution thereon, detailed comment on my part is unnecessary. I would only indicate the following points:—

(*a*) Death registration has been carried out with somewhat greater accuracy. No municipality returns the absurd figures which sometimes disfigure the returns from other parts of the province. Most of the increase, which is practically universal, is doubtless due to the great unhealthiness of the year, but some also is due to better registration. The figures for Ghatal, Tamluk, and Bally are incredibly low, and the attention of the Chairmen of those municipalities will be drawn to the fact. In the face of all that has been written of the insanitary condition of Howrah, it is difficult to believe that its death-rate has been correctly returned at less than 26 per mille; but it has to be remembered that, like Calcutta, Howrah contains a population of which an unusually large proportion is in the prime of life, and that from this town, as from Calcutta, numbers of persons depart when overtaken by illness. The last consideration, however, is itself subject to limitation, for account has to be taken of the considerable number of sick who are brought into the town to die on the banks of the Hooghly. It is difficult to estimate the number of strangers thus dying in Howrah, but the Magistrate considers that it is too large to be neglected, and he is making arrangements to have the information recorded for the current year.

(*b*) The unhealthiness of the year and the special need for sanitary reform in certain places are both denoted by the following death-rates:—

Bhadreswar	... ...	63·59 per mille.
Bansberia	... ...	60·74 „
Dainhat	... ...	54·82 „
Katwa	... ...	51·05 „

while nine others return death-rates of more than 40 per mille, and the divisional death-rate is 35·83 as against 29·18 in 1893.

(c) Birth registration has not been so well done. When every allowance has been made for the observations made in paragraph 87 above, which would not apply with so much force to urban as to rural tracts, and when it has been remembered also that in towns an undue proportion of the population consists of males, still it is discreditable to the administration that only five municipalities should return birth-rates of 25 and upwards per mille, while nine of them have the following incredible figures below 20 per mille:—

Bally ...	13·11	Khirpai ...	16·9
Kalna ...	14·25	Baidabati ...	17·13
Raniganj ...	16·19	Midnapore ...	18·1
Chandrakona ...	16·5	Kotrung ...	19·36
Burdwan ...	19·59		

91. Statistics regarding forecasts of crops, prices of rice and food-grains continued to be collected by Sub Deputy Collectors and kanungoes. Enquiries regarding the import and export traffic were made by the same agency and sometimes by the nazir.

XII.—CIVIL JUSTICE.

92. The District Judges as usual have kindly furnished me with the necessary statistics of the work disposed of by the Civil Courts.

93. There was a decrease in the number of cases disposed of during the year, which was 89,209 against 90,209 in 1893. The decrease occurred in ordinary cases, and is shared by every district except Burdwan. All the districts show an increase in the disposal of Small Cause Court cases. Of the 89,209 cases disposed of during the year, 17,634, or 19·7 per cent., were contested against 17,178 in the preceding year. The following statement shows the number of cases disposed of in the Civil Courts of the several districts of this division during 1894 as compared with those of the preceding year:—

Statement showing the Civil Work disposed of by Judges and Munsifs during the years 1893 and 1894.

District.	1893.								1894.								Remarks.
	Number of cases disposed of.		Cases in columns 2 and 3 how disposed of.		Classes of cases in columns 2 and 3.			Number of witnesses examined.	Number of cases disposed of.		Cases in columns 10 and 11 how disposed of.		Classes of cases in columns 10 and 11			Number of witnesses examined.

It will be seen that while disposals under the head of title suits increased, the number of rent and money suits decided show a decrease. The general decrease in rent cases is presumably due to the prosperous condition of the raiyats and to the good harvests they have reaped, which enabled them to pay their rents without compelling the landlords to resort to legal compulsion. There was an increase in contested cases in all the districts except Birbhum and Midnapore. In Birbhum the figures were 1,891 against 2,016. In Midnapore they were almost stationary. The District Judge of Birbhum has noticed that, with a decrease in the institution of suits under the Tenancy Act, the number of cases defended has also largely diminished. Mr. Gordon writes:—"It is a possible explanation that this may be the result of the settlement and record of rights operation which have been carried on for several years until lately." The reference is to the operations in the Hukmapur and Mollarpur estates.

XIII.—CRIME.

94. During the year under report there was a slight decrease both in cognizable and non-cognizable crime, the figures being 11,534 and 17,219 respectively against 11,586 and 18,540 of the preceding year. In cognizable crime Burdwan and Midnapore show some increase, which is counterbalanced by a decrease in Bankura and Howrah. In the other two districts crime was almost stationary. Greater activity displayed by the police in proceeding against breaches of the Excise and the Arms Act accounts for the increase in cases in Burdwan: in Midnapore it is ascribed to the better reporting of crime.

95. Offences against the person and against property have apparently decreased greatly. Possibly this may be due to the general prosperity of the year, but it is also due, I think, to more accurate reporting and more careful investigation. There were 37 dacoities reported against 62 in the preceding year. I venture to think that many cases of a doubtful character were formerly accepted which, even if true, were only technically dacoity, and had nothing in common with the serious gang robberies properly called dacoities. The decrease is marked in Bankura and Midnapore, where the number of cases fell from 21 and 27 to 6 and 16 respectively. The police of Bankura were not successful in dealing with these cases, which in the opinion of the late Magistrate, Mr. Cornish, require a class of officers decidedly superior to the general run of Sub-Inspectors. In Midnapore some of the gangs of dacoits, one of which had long been carrying on depredations under the protection of a zamindar, were broken up during the year. There was an increase in burglaries and thefts, contributed chiefly by the districts of Midnapore and Howrah. The increase in the former district is ascribed to the better reporting of cases, and in Howrah to the visits of Bediyas and burglars from Calcutta, many of whom were arrested and convicted.

96. In Bankura an organized gang of bad characters, amongst whom were some ghatwals and chaukidars, was detected. Proceedings were taken under section 176, Penal Code, against some, and under section 110, Criminal Procedure Code, against others, and ended successfully.

False cases.

97. Only 697 cases were declared false against 713 in the preceding year. The divisional percentage of false cases to cases reported rose from 3·4 in 1893 to 3·6 in 1894. Prosecutions under section 211, Indian Penal Code, were instituted in 97 cases, of which 27 ended in the conviction of the accused. The result was most lamentable in Burdwan, where out of 11 prosecutions not a single case ended in conviction. In Hooghly there were 2 prosecutions, which were both unsuccessful. There was, however, some improvement in Birbhum and Bankura, where convictions were obtained in 11 cases in the former and 6 cases in the latter district against only a single conviction in each in the preceding year.

98. Mr. Inglis, late Magistrate of Burdwan, remarks:—"The prosecution of charges under section 211 is a vexed question. I have sent up cases for trial myself, and tried many with almost unfailing want of success. It is easy to say a case is false, but very hard to prove it, as, apart from the difficulty in finding convincing proof that the charge is false, we have often to support the prosecution with the evidence of witnesses who will not tell the truth and decline to disclose the cause why the false charge was brought." Mr. Duke, late Magistrate of Hooghly, writes:—"So far as section 211 is concerned, the reasons are not very recondite. The incompetent head constables, with whom so many thanas have been filled during the transition stage, are neither anxious nor able to prosecute complaints under section 211, and accordingly they make a point of stating to begin with that no such prosecution can succeed. Inexperienced Court Sub-Inspectors and new District Superintendents are not in a position to look out for and check this practice, and naturally when the Magistrate does order further enquiry, as has been done in many cases, the police being committed to the opposite view, evidence is not found to support a prosecution." Both these officers have correctly stated some of the reasons why so great a proportion of prosecutions under section 211 fails, but the question is a large one, and is now worn somewhat threadbare. It is held by many officers that prosecutions should be sanctioned or ordered whenever there is a *primâ facie* case, for the reason that even when no conviction is obtained, the expense and inconvenience to which the accused has been exposed will prove a salutary lesson to himself and

to his friends, but the supporters of this view fail to take into account the fact that the prosecutor and his witnesses also undergo much harassment, and that the glory of ultimate victory blinds the public to the precedent inconvenience. On the whole, then, it seems the wiser course to accept the inevitable and to recognize that it is impossible to eradicate by criminal prosecution a fault which has been inherent in oriental nations since the time of the Decalogue.

Compensation under section 560, Criminal Procedure Code.

99. Compensation was awarded in 88 cases only. I consider this result very lamentable and indicative of apathy and timidity on the part of subordinate Magistrates, notwithstanding that their attention was drawn to the subject by the District Magistrates. The propriety of passing orders more frequently under this very useful section will again be brought prominently to their notice.

Remands.

100. More than 51 per cent. of the year's cases were disposed of at the first hearing and less than 10 per cent. remanded more than four times. Hooghly shows the best result, as more than 73 per cent. of the cases tried in that district were disposed of at the first hearing. I am inclined to believe that the insistence of Government upon the disposal of cases without unnecessary delay is at last beginning to bear fruit, and that the business of Magistrates' courts is now usually disposed of with much greater promptitude than formerly, remands being granted only when it is necessary to prove previous convictions or produce other necessary evidence.

Sessions trials.

101. The result of sessions trials was unfavourable, especially in the districts of Bankura and Burdwan, where the percentages of acquittals to cases disposed of rose from 26·92 and 31·25 in 1893 to 38·09 and 53·84 respectively in 1894. The District Superintendents of Police supervised the prosecution personally in a very small number of cases. In Midnapore not a single case was so supervised either before the committing Magistrate or at the sessions. In Mr. Allen's opinion such supervision was in no instance necessary.

Reported cases not enquired into.

102. The number of cases in which the police refused enquiry under section 157, Criminal Procedure Code, has decreased in Burdwan, Bankura, and Hooghly; the other districts show an increase. This section, to use a colloquial expression, is a good servant, but a bad master. On the one hand its provisions are very useful and well calculated to save the police much unnecessary trouble, if properly worked. At the same time it is the duty of Magistrates to see that the power given by it is not abused so as to lead to the easy and wholesale suppression of crime, and I have drawn the attention of some of the district officers to the matter.

Bad livelihood cases.

103. There was a decrease of these cases observable in all the districts of the division; but the results of trials show a decided improvement.

Arms Act.

104. The number of licenses granted under the Act was 11,811 against 11,103 in the preceding year. The increase is shared by all the districts. Arms are generally kept for self-protection or sport, but a considerable number of persons keep them as signs of respectability, while in the more jungly portion of the division, such as parts of Bankura, Birbhum, and Midnapore, they are really wanted to protect the crops against the incursions of wild animals. There were in all 181 prosecutions under sections 19-23 of the Act with 163 convictions against 210 prosecutions with 199 prosecutions in the preceding year. The decrease in prosecutions is no doubt due to some extent to a better appreciation by the people of their responsibilities under the Act, but it is principally attributable to a desire on the part of the district officers to avoid, as far as possible, the institution of prosecutions, which were accordingly confined as a general rule to the worst cases. Out of [illegible] resort to legal commission. sums aggregating Rs. [illegible] cases in [illegible] fines imposed, amounting to Rs. 965, division [illegible] in Birbhum the [illegible] were granted as rewards in all the districts of the [illegible] they were almost [illegible] regarding which no information is available. that, with except Midnapore, to persons living in the [illegible] facilitate the issue of licenses in Form VIII to forward licenses through the interior, the Magistrate of Burdwan has arranged to forward licenses through the subdivisional officers—a procedure which is being adopted in other districts.

XIV.—POLICE.

105. From the comments made on the subject by district officers, it is very clear either that the police worked with different results in different districts, or that their work was regarded with very different eyes by the various district officers. Mr. Inglis, late Magistrate of Burdwan, observes:—"Charges of bribery and corruption have been brought against a good many of the station officers, and the standard of honesty in the force is far from being an elevated one. Without exception I found station officers incapable of utilizing the services of the chaukidars, whose attendance was the reverse of satisfactory." Mr. Allen, late Magistrate of Midnapore, observes that there was during the year an improvement in the discipline of the force. Mr. Duke, late Magistrate of Hooghly, writes:—"I should be inclined to say that the principal characteristic is want of fibre. The police in Hooghly are perhaps less actively mischievous than in some places, and they are similarly less energetic and interested in their duties here than in some districts." Mr. Growse, late Magistrate of Birbhum, complains of want of enthusiasm on the part of the district police, which he ascribes to want of sympathy between the then District Superintendent and his subordinates—remarks which are endorsed by Mr. Drake-Brockman, the present Magistrate. Mr. Grierson, Magistrate of Howrah, reports that the conduct of the police was on the whole satisfactory. Mr. Vincent, Magistrate of Bankura, also gives the police of his district a good character.

106. To these criticisms I can add no comment of my own, but the following remarks are extracted from the notes left by Mr. Dutt:—

Police.

"The additional grants allotted for improving the police of these provinces are likely to be attended with beneficial results, but the results are not yet apparent. The allowances granted to station officers and to Court Sub-Inspectors are likely to attract a better class of men to those posts. It is a pity that this opportunity was not taken to abolish the post of fifth grade Sub-Inspectors altogether. That grade was, I believe, created some 15 years ago, and had the result of lowering the initial pay of a Sub-Inspector from Rs. 50 to Rs. 30. This, I think, was a move in the wrong direction. With the spread of English education it is possible to get men with some English education on Rs. 30 or even on Rs. 20 a month, but it is not possible to get on that pay the class of men whom we want as Sub-Inspectors and investigating officers. Their duties are very much more responsible than those of a clerk or even of a head-clerk, and require some strength of character, presence of mind, zeal for work, and a great deal of judgment and cleverness. Men possessing such qualifications will not enter service on Rs. 30 a month. If the post of fifth grade Sub-Inspector were abolished altogether, we could hope, by offering Rs. 50 as the initial pay and the allowances now granted, to enlist a superior class of men, such as are wanted for performing the work of station officers and Court Sub-Inspectors. I hope it may yet be found possible to make this change.

107. "Court Sub-Inspectors are expected now to have some legal training and to be able to prosecute cases. District Magistrates generally think that they fail in this duty—at least in important cases. I do not think it possible for these officers, in addition to their other duties, to acquire such a knowledge of law and procedure as will enable them to prosecute important cases before Magistrates when the ablest men in the local Bar are engaged for the defence. It is of importance, therefore, as I remarked in the Annual Administration Report for 1893-94, to appoint junior Government pleaders to prosecute all important cases before subordinate Magistrates. They will be expected to study police papers, to consult the District Magistrate and the District Superintendent of Police, if necessary, and to place before the court all the evidence for the prosecution in the manner in which it should be placed. In the absence of such trained prosecutors, the trying Magistrate often fails to grasp the case for the prosecution, and failure of justice in important cases is often the result.

108. "And lastly I must repeat a remark I made before that the whole police force of a district should be handled and guided more intelligently than is now done. A recent circular of the Government points out and condemns the indiscriminate manner in which fines and punishments are inflicted on police officers, often for trifling reasons, and I am convinced the stopping of this

practice will be productive of much good and will improve the *morale* of the police. On the other hand, really inefficient or dishonest work should be put down more strictly than it is at present. Sub-Inspectors should feel that they are being judged by their work; they should feel a zeal for doing good, honest work, and a confidence that their good work will be appreciated. I have not always found District Superintendents able to inspire their subordinates with this feeling, or to discriminate between good workers and bad workers. And yet I feel sure this could be done, and that by handling the police force with greater intelligence, with more sympathy and consideration, and also with more strictness in all important matters, it would be possible to inspire Sub-Inspectors with a zeal for doing good honest work, which at present does not generally exist."

109. I believe that the removal of the defects pointed out in the foregoing paragraphs depends in a great measure upon the importation into the upper grades of the force of a better class of men, superior in point of social status and education to those which now form the bulk of them. The proposals of the Police Commission will, I trust, if carried out, gradually bring about this result. It is true that the initial pay of a Sub-Inspector, viz. Rs. 30, is in itself not much, but with allowances and fair prospects of promotion it ought to be enough to attract such men as we want. I consider the training school for Sub-Inspectors at Chinsura, to which I paid a visit of inspection in May last, to be an institution of great merit, and likely to improve materially the capacity of our Sub-Inspectors of the future. The cadets are thoroughly instructed in every branch of a Sub-Inspector's duties, and the plan on which this is done is a perfectly sound one. I have every hope that Sub-Inspectors thus trained will be more fitted to act as prosecuting and investigating officers than the generality of those by whom that duty is now being performed. I attach much importance to a considerate and sympathetic treatment of their subordinates by District Superintendents, not only for the sake of those already employed in the service, but as a means of attracting a better class of recruits. The matter is receiving attention at the hands of District Magistrates and District Superintendents throughout the division; and although complete figures on the subject are not available, unnecessary and inordinately severe punishments are as a rule avoided.

Rural police.

110. Commissioners under section 58 of Act VI of 1870 for the resumption of chaukidari lands have been appointed, and some progress in this matter has been made in every district of the division, though the progress is not everywhere so great as it might have been. In Burdwan the number of Regulation chaukidars of all designations was 10,495, and that of Act VI chaukidars 328 up to the end of the calendar year. The Magistrate fears that on the abolition of the Regulation chaukidars they will be dispossessed of their lands by the zamindars, but this should not have prevented his predecessor from carrying out the transformation with greater vigour than he did. In Midnapore there were 4,400 Act VI chaukidars against 5,000 chaukidars, paiks, &c., under the Regulations. The pharidari lands are being resumed on the lines followed in Hooghly. In Bankura there were 1,773 chaukidars under Act VI and 801 under the Regulations, besides a large number of ghatwals employed mostly as road patrols. In Birbhum Act VI was introduced into 72 out of 2,625 villages and the lands of 220 chaukidars were resumed. There were 758 chaukidars under Act VI and 5,538 under Regulation XX. In Hooghly 289 Act VI chaukidars were appointed during 1894 and 92 chakran chaukidars abolished.

111. There is a strong consensus of opinion as to the inefficiency and incompetence of the Regulation chaukidars. The only officer who differs from this view is Mr. Grierson, the Magistrate of Howrah, who considers Regulation chaukidars are best suited—at least for Howrah. He adds that "the best-worked thanas are those in which there are most chakran chaukidars."

112. The inutility of the ghatwali system, which exists in Burdwan, Bankura, and Birbhum, has long been recognized, and steps were taken during the year towards the resumption of the ghatwali lands in Bankura. These operations are still in progress, and it is hoped that by the end of the current year the obsolete, inconvenient, and useless ghatwali system may have been terminated in this district—at any rate in what are known as the "43 sarkari" ghâts.

113. The following remarks on the rural police are quoted from Mr. Dutt's notes:—

Ghatwals.

"The ghatwals are scarcely rural police; they were appointed over a century ago to protect the country from Mahratta invaders and local bad characters, and lands were assigned for the service. The necessity for the institution has long ceased to exist, and the ghatwals have long degenerated into an idle, good-for-nothing class, and much of the dacoities and robberies in some districts like Bankura is attributed to them or to their connivance. District Officers have recommended the abolition of the service for over a quarter of a century, and the first practical steps for carrying this recommendation into effect have been taken within the year under report. It is unnecessary to repeat here all that has been said in special reports on the subject as regards the measures which have been adopted. Briefly, our plan is this: The lands which were detached from zamindaries for the maintenance of ghatwals are to be re-attached to the parent estates; the present ghatwals are to hold these lands on payment of a rent to the zamindars in lieu of the service now required of them; and one-half of the rental so obtained is to be paid by the zamindars to Government as the value of the service to which Government was entitled from the ghatwals. A Special Deputy Collector has been appointed to Bankura district to carry on work on these lines, and the completion of the work in two ghats in the district, viz. *Bankaduha* and *Jaybelia*, was reported before the end of the year."

XV.—CRIMINAL JUSTICE.

114. The total number of cases disposed of by the Stipendiary as well as the Honorary Magistrates was 23,531 against 25,166 in the preceding year; the latter disposing of over 37 per cent. of the total number. Out of 29,411 accused in the above cases, 20,470, or 69·5 per cent., were convicted against 68·6 per cent. in the preceding year. The subjoined tables show the number of cases decided by the Stipendiary and the Honorary Magistrates in each district and subdivision and the results of those cases:—

A.—*Cases before Stipendiary Magistrates.*

District.	Subdivision.	Number of officers.	Cases disposed of.	Persons disposed of.	Ratio per cent. of persons convicted to those disposed of.	Number of witnesses examined. 	Divisional Total for 1893.	49	11,509	12,415	78·03	14,676	5·5	56·9	39	1	236·3	1·2	2·5

115. It will be seen from the above tables that the percentage of convictions in cases tried by Stipendiary Magistrates was more favourable, as is usually the case, than that in cases tried by Honorary Magistrates. The percentage in the former varies from 47·6 to 84·5, while in the latter it ranges from 28·5 to 89·8. The worst percentage was returned by the Bankura Sadar Bench. The percentages returned by the Kalna, the Rampur Hát, the Vishnupur and the Tamluk Benches are also bad, being much below 50. The best results are shown both by the Stipendiary and the Honorary Magistrates at Howrah. The unsatisfactory result of trials by the Benches in the district of Bankura is said to be mainly due to the fact that most of the cases made over to them were of a petty nature and were often compounded either in or out of Court, but the Magistrate also notices an undue tendency to acquit.

116. The number of witnesses examined during the year was 58,455, of whom 2,267, or a little over 3 per cent., were detained over two days against 4·3 in the preceding year. The Stipendiary Magistrates detained 3·7 per cent. and the Honorary Magistrates 4·4 per cent. of the witnesses for more than two days. These figures indicate an improvement as compared with the previous year, and show that with a few exceptions the Magistrates generally take care to discharge a witness on his first appearance. The Benches in the districts of Burdwan and Bankura show a tendency to procrastinate proceedings, which is by no means commendable. The Magistrate of Bankura explains that this state of things was chiefly brought about by the absence on account of illness or other cause of particular Honorary Magistrates who partly heard some of the cases.

117. The Benches at the head-quarter stations of Burdwan and Howrah sat daily during the year.

Benches.

118. The abolition of the Hooghly and the Bansberia Municipal Benches and their amalgamation with the Hooghly General Bench was effected on the 1st May 1894. The first

and second Benches at Serampore were reconstituted and additional Honorary Magistrates were appointed. The Municipal Benches at Midnapore, Tamluk, and Ghattal were abolished during the year. The practice of forming a dependent Bench at Contai by detaching some of the Honorary Magistrates of the independent Bench with a Stipendiary Magistrate to preside over them has been discontinued.

119. The following summary shows the attendance of the Honorary Magistrates of each Bench in the districts of this Division during the year:—

District.	Number of times the Honorary Magistrates were asked to attend.	Number of times they actually attended.	Number of times they were absent— With leave or notice.	Without leave or notice.	Total.	Percentage of attendance to summons.	Remarks.
1	2	3	4	5	6	7	8
Burdwan	2,108	1,230	245	633	878	58·3	* The difference between the figures in column 2 and those in columns 5 and 6 is due to attendance over invitations by three Honorary Magistrates.
Birbhum	424	353	28	43	71	83·2	
Bankura	815	518*	59	248	307	63·5	
Midnapore	1,856	1,114	307	435	742	60·	
Hooghly	2,227	1,772	265	190	455	79·5	
Howrah	1,718	1,072	142	504	646	62·3	
Divisional Total for 1894	9,148	6,059	1,046	2,053	3,099	66·2	
Do. for 1893 ...	10,904	7,261	1,117	2,501	3,618	66·5	

As noticed last year, there has been a gradual improvement in the attendance of Honorary Magistrates in all the districts, except Bankura and Howrah, which show a falling off. The attention of Honorary Magistrates has been repeatedly drawn to the necessity of regular attendance and to the inconvenience caused to their colleagues and to parties and witnesses by their absence without previous intimation, but I regret to observe that the number of absences without leave or notice far exceeds that of those with leave or after notice. Some of the Honorary Magistrates in Bankura and Howrah continued to be irregular in attendance, notwithstanding the repeated warnings of the District Officers, and in Howrah several of these gentlemen have since resigned at Mr. Grierson's suggestion. There are, however, many honourable exceptions, among whom may be mentioned Shahzada Amiruddin Mohammed and Babus Kedar Nath Nath and Bhudeb Chatterjee, whom the Magistrate of Hooghly commends for the regularity of their attendance and the zeal displayed by them in their work. On the whole, the Honorary Magistrates worked well during the year. They took a fair share in the criminal administration of the Division and rendered very useful assistance by relieving Stipendiary Magistrates of a large amount of work. I have no doubt that the quality of their work will improve with experience, and that in time it will be possible to entrust them generally with larger powers than is now the case.

120. Mr. Duke, Magistrate of Hooghly, brought to notice the difficulty of getting police officers well up in law and experience to prosecute cases before the Magistrates. This difficulty, which is also felt elsewhere, is due to the fact that frequently just as a Court Sub-Inspector acquires sufficient experience to be useful and really efficient in this duty, his turn for promotion comes, and he is transferred to some other post. More than one scheme has been proposed to remove the difficulty, and the matter is still under consideration: separate proposals will be submitted if I find them to be necessary.

Fines.

121. Fines amounting to Rs. 93,271 were imposed during the year against Rs. 96,219 in the preceding year. Including Rs. 34,284, which sum represents the balance outstanding at the close of the year 1893, the total realisable demand amounted to Rs. 1,27,555, of which Rs. 80,406 were realised and Rs. 17,301 remitted during the year, leaving an outstanding balance of Rs. 29,848 at its close. Midnapore shows the heaviest balance of unrealised fines. A large portion of the fines imposed in excise cases in Bankura and Hooghly will have to be written off as irrecoverable. Mr. Vincent, Magistrate of Bankura, observes that he has found the punishments imposed in these cases as a rule unduly light and frequently inadequate. He

recommends that the Excise Act should be so amended as to render imprisonment awardable for a first offence. He adds that the majority of the offenders in his district are fined, and go to jail when unable to pay the fines, and that all subsequent attempts to realise them necessarily entail great hardship on their families. Mr. Dutt, Magistrate of Hooghly, also mentions that the defaulters are often men of no substance and have no assets, and that as the offenders in opium cases are generally residents of French Chandernagore, it is difficult to realise the fines due from them. No explanation has been offered by the Magistrate of Midnapore of the heavy outstanding balance in his district. I have drawn the attention of the Magistrates to this matter, and have asked them to write off after proper enquiry fines which are really irrecoverable.

XVI.—REGISTRATION OF DEEDS.

122. The subjoined table shows at a glance the chief features of the administration of the Registration Department in the various districts of this Division during each of the last two years:—

District.	1893-94.				1894-95.			
	Number of deeds registered.	Receipts.	Expenditure.	Surplus credit to Government.	Number of deeds registered.	Receipts.	Expenditure.	Surplus credit to Government.
1	2	3	4	5	6	7	8	9
		Rs.	Rs.	Rs.		Rs.	Rs.	Rs.
Burdwan	34,599	41,102	24,661	16,501	36,774	41,517	25,491	16,026
Birbhum	17,014	18,704	10,568	8,196	17,578	18,647	10,623	8,024
Bankura	23,889	24,835	15,451	9,381	22,507	22,212	14,325	7,88[illegible]
Midnapore	65,422	62,061	35,883	26,178	67,922	61,541	38,365	23,176
Hooghly	26,276	29,712	18,653	11,059	28,284	30,216	19,903	10,3[illegible]
Howrah	17,987	22,905	11,091	11,814	18,484	21,206	11,034	10,172
Total ..	185,187	1,99,439	1,16,310	83,129	191,549	1,95,339	1,19,741	75,598

123. The figures show a steady increase in the number of deeds. The increase during the year under report was contributed by all the districts, except Bankura, which shows a decrease. In the absence of any special cause for this advance, we may be permitted to fall back upon the stock explanation that the increase is due generally to the greater appreciation by the public of the advantages of registration, and in particular in Burdwan to the facility for registration afforded by the opening of two more registry offices. The reduction of the *ad valorem* fees from 12 to 8 annas may also partly account for the increase in the number of registrations, though I personally do not believe that the 4 annas which have now been taken off ever deterred any one who wished to do so from registering a deed. The decrease in the number of registrations in Bankura is probably one of the results of the good harvests of the year and the consequent diminution of loan transactions.

124. There was a falling off in the receipts in all the districts, except Burdwan and Hooghly, due to reduction of the *ad valorem* fee. The increased expenditure in Burdwan, Midnapore, and Hooghly is accounted for by the increased rate of commission allowed to Sub-Registrars for the large number of deeds registered during the year and also by the entertainment in Hooghly of extra establishment under Registration Circular No. 22 of 1893.

125. The system of taking thumb impressions to secure identification of the executants has been tried in some offices, and the cautious opinion is offered that in time it may prove efficacious. It has been so conspicuously successful in the identification of criminals that I have no doubt whatever that it should be

largely used in the Registration Department. In this connection it is interesting to notice that a conviction in a case of false personation at the Goghat sub-registry office in the Jahanabad subdivision was obtained mainly on the thumb impression of the accused. Another case of false personation occurred in Birbhum, in which the two persons implicated have been convicted.

XVII.—CONDITION OF THE DIVISION AS REGARDS LAND AND LAND REVENUE ADMINISTRATION.

126. There was no change in the system of administering the land revenue. The total number of estates exceeded that of the previous year by 25, the increase being chiefly due to the resumption and settlement of *pharidari* lands in Burdwan and Hooghly. The total demand in the several districts of the Division was Rs. 86,31,768, of which Rs. 82,47,986 were collected and Rs. 7,725 remitted, leaving a balance of Rs. 3,76,057. The percentage of total collection on total demand was practically the same as that of 1893-94, being 95·5 against 95·2. The percentage of collections in Burdwan, Birbhum, and Bankura was over 99 per cent. In Hooghly it fell from 97 to 96·8, while in Midnapore it was only 88·1 per cent. The falling off in Hooghly was nominal, being due to a sum of Rs. 20,021 having been received by transfer receipt too late to be credited within the year. The decrease in Midnapore was chiefly in class III (estates under direct management), and is attributed partly to the failure of the winter paddy in certain khas mahals in consequence of heavy rainfall and partly to bad collections. I am inclined to think that the present system of collection in these properties requires reform.

127. The following remarks on the khas mahals in the Division are quoted from the notes left by Mr. Dutt:—

Khas mahals.

"The number of khas mahals in Hooghly district, including Howrah, is over 300, and proposals have been submitted for the sale of 240 of these and the partial sale of 4. The largest estate in the Division under our direct administration is the Majnamutha estate in Midnapore. The collection work is in the hands of a special officer, who works under the supervision of the Subdivisional Officer. A difficulty in the realisation of arrears arises from the fact that transfers of holdings effected by raiyats are not registered by them, and our registers are therefore not up to date. When we take out a certificate against a defaulter according to the name recorded in our registers, we often find that the man named has long ceased to be the owner of the holding. The certificate under the circumstances is valueless, because only the right and interest of the judgment-debtor named in a certificate (and not the holding) can be sold in execution thereof. Both Mr. Power and I were of opinion that in such cases we should go to the Civil Court and get rent decrees to sell up the holdings, and the Subdivisional Officer of Contai has been advised accordingly. In spite of these and other difficulties the Subdivisional Officer, Babu Jaga Bandhu Bhattacharjee, has successfully administered this large Government estate, and manages one of the heaviest subdivisions in Bengal with great ability, vigour and judgment."

128. The number of estates and shares of estates in this Division governed by the sale laws was 21,192, and taking the number of instalments in which their revenue was payable at about three each, the number of opportunities for default was about 60,000. In only 1,387 instances, or 2 per cent. of the whole, did estates and shares of estates became liable to sale during the year for non-payment of Government dues. Out of this number only 123, or 8·8 were actually sold against 137, or 7·6 per cent.. in the previous year. These figures show that the sale laws were administered in the Division with great, if not excessive, moderation.

Road and public works cesses.

129. The cess demand during the year was Rs. 10,97,705 against Rs. 10,59,814 in 1893-94, showing an increase of Rs. 37,891. The demand increased in the districts of Burdwan, Birbhum, and Hooghly, and decreased in Bankura and Midnapore. The increase in Burdwan is mainly due to an increase in the demand from coal mines and in Birbhum and Hooghly to the revaluations having been given

effect to last year. The demand in Hooghly will undergo some change when all objections against double assessments, increased assessments, &c., have been disposed of. The decrease in Bankura is too small to call for any explanation, and that in Midnapore is ascribed. to permanent abatements. The total collections show some improvement; the percentage of balance was reduced from 19·2 to 18·9. The improvement is confined to the districts of Birbhum, Bankura, and Midnapore; Burdwan and Hooghly showing a falling off in the collections. No satisfactory explanation has been given of the decrease in the former district. In Hooghly it is said to be due to the inclusion at the last revaluation of rent-free holdings paying cess up to one rupee in Part IV of the zamindars' returns. In the case of many such holdings no payments have yet been made either by the zamindars or by the owners of the holdings. The latter have been directed not to pay cess into the treasury direct, while the zamindars do not seem to have received any revised or additional rolls for holdings thus included, so that they are ignorant of what they have to pay on account of them.

130. I reproduce below the remarks which Mr. Dutt has left on the revaluation operations in the Division:—

Road cess revaluation.

"The work of revaluation had been completed in Birbhum and Hooghly before the commencement of the year under report, and was in progress during the year in Burdwan, Bankura, and Midnapore. It was completed in Burdwan within the year.

"Advantage was taken of this revaluation to incorporate all petty rent-free tenures of the annual value of less than Rs. 100 in some districts and of less than Rs. 50 in other districts in the parent estates. In Birbhum, I believe, such tenures of all values have been so incorporated, while in Hooghly only tenures of the annual value of less than Rs. 16 have been incorporated.

"The inclusion of petty tenures in the parent estates is a move in the right direction. It saves us the trouble of collecting small cesses from tens of thousands of tenure-holders, and it saves the tenure-holders from much harassment consequent on our system of collection. In Burdwan district the number of such petty rent-free tenures was said to be about 40,000, but many of these tenures, reckoned as single tenures, comprised lands in different villages, and if each separate holding was separately numbered, the total number would probably come to a 100,000. It is perfectly obvious that our system is unsuited to the task of realising small cesses from such enormous numbers of petty tenure-holders in each district, and the best thing under the circumstances was to include the petty holdings in the parent estates, and this has been done.

"I only regret that this has not been done in Hooghly district to the same extent as in other districts. As I have stated above, only tenures under the annual value of Rs. 16 have been included in the parent estates in Hooghly, and this leaves on our hands the task of collecting cesses from about 16,000 tenure-holders, paying one rupee or upwards annually as cesses. The thing was done before the commencement of the year under report, but the facts have since been brought to the notice of the Board of Revenue, and the question of re-opening the work with a view to the inclusion of the petty tenures up to the value of Rs. 40 is now under consideration.

"In Bankura district it came out during my inspection of the revaluation office that the Deputy Collector, Babu Bipin Bihari Pramanik, had in numerous instances treated petty cultivating raiyats as tenure-holders for the purposes of the revaluation. This brought about an increase in the assessment, but was wholly illegal; and under the orders of the Board of Revenue the mistake is now under correction. Suspecting that the same incorrect procedure might have been followed in other districts also, I issued the requisite instructions to all District Officers. When I visited Midnapore district some months after this, I noticed with regret that the Deputy Collector, Babu Jagat Chandra Shome, had not only made the same mistake as had been committed in Bankura, but that he had persisted in the mistake in spite of the instructions issued. Babu Jagat Chandra had left the district before my arrival there, and the explanation he forwarded to me was wholly unsatisfactory. I directed the mistakes to be corrected by his successor.

"I have stated before that the revaluation work has been completed in Birbhum, Hooghly, and Burdwan. The work is expected to be completed in Bankura and Midnapore within the current year."

131. With reference to the above remarks it remains for me to add that Mr. Duke, the late Collector of Hooghly, has in an able, thorough and lucid memorandum successfully defended the system pursued in his district for assessing petty tenures, and has shown to the complete satisfaction of the Board that a revision of the assessments so as to include in the parent estates a larger number of petty tenures is both unnecessary and inadvisable. It should also be added that further enquiries into the revaluation proceedings in Midnapore have disclosed more irregularities which have been reported to the Board of Revenue for orders. I fear that the correction of them, which must be undertaken, will still further delay the revaluation of this important district.

Irregularity in the tauzi accounts of Burdwan and Hooghly.

132. The examination of the tauzi accounts in Burdwan and Hooghly, which is being conducted by a special establishment sanctioned for the purpose, has brought to light numerous mistakes and frauds in making entries and carrying forward balances in the estates ledger. The result of the enquiries, so far as they have proceeded, has been to show that large amounts are due to Government both on account of short payments and of misappropriations.

133. As an instance of these, it may be mentioned that the Hon'ble Mr. C. C. Stevens, the Senior Member of the Board, when inspecting during March 1895 the working of the special establishment entertained in Hooghly, found that the accounts of two estates belonging to the French Government showed regular credits of land revenue in 1883-84, 1884-85, and 1885-86 in the ledger, but no corresponding credits in the accountant's register of land revenue receipts. The register of letters issued showed that receipts were given to the French Government from the tauzi office. On further examination of the accounts of these two estates the Collector reports that revenue was paid by the French Government in accordance with the following procedure. After the close of every quarter the treasury officer used to write a letter to the French Government enclosing a receipt for the amount of revenue due, and asking that the amount might be paid to the tauzi navis who was the bearer of the letter, and whose duty it then was to bring the money and credit it into the treasury. The payments on account of these estates as shown by the tauzi navis in the ledger are not traceable in the accountant's register of land revenue receipts—a fact which leaves little room for doubt that the money, though actually realised, has been misappropriated by the tauzi navis, and not paid into the treasury. The total amount realisable on account of these estates from 1881-82 to 1892-93 is Rs. 16,005, of which only Rs. 8,832 have been traced as credited into the treasury in the accountant's register of Land Revenue receipts. The difference, viz. Rs. 7,173, is evidently the amount misappropriated. The Board have recently authorised the institution of criminal proceedings against those concerned in receiving the money from the French Government. The result will be reported in due course.

Settlements.

134. No important settlement of Government estates was effected during the year. The settlement of the 18 temporarily-settled estates of Pataspur in the district of Midnapore under Chapter X of the Bengal Tenancy Act is still in progress. The settlement of the ghatwali lands in Bankura was undertaken during the year under the supervision of a Deputy Collector. This settlement is one of great interest and importance, as it aims at nothing less than the abolition of the old service tenures by which the ghatwals have held their lands for about a century, the substitution of ordinary village police in place of the ghatwals, and the settlement of the service lands with the zamindar, the ghatwal dropping into the status of an ordinary raiyat in most cases with occupancy rights. By the introduction of the Village Chaukidari Act VI (B.C.) of 1870, chakran lands are being transferred to zamindars in all districts. As has already been noticed in paragraph 110 above, the process of conversion has not been so rapid as it should have been in some districts.

Public Demands Recovery Act.

135. The number of certificates pending from the previous year was 23,325; the number filed during the year was 28,761 against 30,711 in the preceding year, showing a

decrease of 1,950 cases, or over 6 per cent. The decrease occurred in all classes of demands except those under section 5 and for rent due to Government. The decrease was confined to the districts of Burdwan and Birbhum. In the former the institutions fell from 9,559 to 3,086 during the year. This large decrease is attributed to the restrictions imposed on the issue of requisitions for the recovery of arrears of cesses due from petty rent-free holdings. The disposals were in advance of the institutions in those two districts, but the reverse was the case in other districts. It is satisfactory to notice that out of 29,857 cases disposed of recourse was had to the extreme measure of sale in 465 cases only, which is equivalent to a percentage of 1·89. In nearly 30 per cent. of the cases in which certificates were issued, the demands were satisfied on mere issue of notices.

136. Mr. Dutt has left the following remarks on the working of the Act:—

"The principal defects in the working of this Act were pointed out by me in the Annual Administration Report for 1893-94. Provisions have been made in the amended Act, which has lately been passed by the Bengal Council, to remove these defects. To prevent the indiscriminate issue of certificates, a provision has been made requiring the Certificate Officer to satisfy himself as to the justness of the demand in each case, and it is proposed to issue executive orders requiring a post-card to be sent to the defaulter before a certificate is made. The District Collector has also been allowed some discretion in the service of notices, and, if he thinks fit to do so, he can direct that such notices will be issued through the post office."

Partitions.

137. Operations under the Partition Act are practically unknown in this Division. Three cases were instituted, however, during the year in Burdwan. Out of the two cases pending in Hooghly from previous years, the final report of one has recently been received, and the other instituted in 1892-93 is still pending.

Land registration.

138. The number of applications during the year was 3,135 against 3,387 in 1893-94. The decrease was principally in Bankura, where it fell from 664 to 393. This decrease is attributed to measures taken in previous years to enforce registration of changes of interest, but this explanation assumes that there is some relation between the number of transfers and the number of registrations. I fear that there is nothing of the kind, and the negligence of proprietors in registering their names is illustrated by the fact that over 200 notices had to be issued under section 65 of the Land Registration Act in each of the districts of Burdwan, Midnapore and Hooghly. When it is remembered that these were cases in which the transfer had come to the Collector's notice, it may be inferred how great is the number of transfers of which he has no cognizance. I am glad to be able to report that Sub-Registrars have reported a large number of omissions to apply in time for registration. Several cases also were reported by Deputy Collectors in charge of road cess and land registration, but a few cases only were brought to notice by the Civil Courts. The fees realised in the Division during the year amounted to Rs. 748.

Land acquisition.

1. Rest camp at Asansol.
2. Staff quarters at Asansol, Bengal-Nagpur Railway.
3. Burjola section of the Rajapur drainage scheme.
4. Construction of a channel from Kumral sluice to Gopinagore.
5. Railway station at Radhanagore.

139. Act X of 1870 was repealed in March 1894 by Act I of 1894. Proceedings for the acquisition of a total of 99 acres of land in the several districts of this Division were confirmed by the Board. The most important of the projects in which proceedings were confirmed are noted in the margin. The total cost of acquisition was Rs. 55,096. Annual abatements of revenue, amounting to Rs. 17-4-10, were allowed on account of land acquired for Government, and Rs. 1-13-9 and Rs. 2-5-6 in respect of land acquired for municipalities and railways, respectively. The average cost per acre of land was Rs. 556 against Rs. 470 in the preceding year. The increase in the average was due to the high price (Rs. 33,552) paid in one case for 30 acres of land required at Asansol, partly for a rest camp, and partly for the staff quarters of the Bengal-Nagpur Railway. During the proceedings for the acquisition of a parcel of land in Serampore required for the intake of the Howrah water-works, Mr. Graham, a Barrister-at-Law, and a tenant of premises which had to be acquired,

contested the validity of the proceedings, on the ground that the notice served upon him was written in an old form and the heading "Act X of 1870" was not corrected. The matter was referred to the Legal Remembrancer, and on the receipt of his opinion that the proceedings were legal, possession was taken of the house. Mr. Graham has further sent notice of suit against Mr. Duke, the late Collector of Hooghly, and Mr. Fischer, late Subdivisional Officer of Serampore, claiming damages for trespass and other misdemeanours.

Working of the Bengal Tenancy Act.

140. The Act seems to have worked smoothly and without incident in all the districts of this Division, except Midnapore, where there was a considerable amount of activity in applying under section 40 for the commutation of rents in kind to money rents. Mr. Whitmore, late District Judge of Birbhum, remarks:—"Hitherto, every year, since the passing of the Tenancy Act, has yielded a higher and still higher percentage of defended suits to undefended, but a change took place in the year under review. Not only was there a smaller number of institutions, but there was also a falling off in the proportion of defended cases." This may be the result of the settlement and record of rights which have been carried on for several years.

141. As noticed above, the number of applications filed under section 40 of the Act was very large in Midnapore, being 250 against 2 in the preceding year. As far as I can discover no dispute between landlord and tenant set the current of agricultural feeling in this direction, but the increase in institutions appears to be due to the fact that the rates of money rent fixed in certain of the earlier cases were considered to be advantageous to the raiyats, and a rush was made to take advantage of what were considered the favourable provisions of this section. These cases have aroused a good deal of interest in Midnapore, and, as Mr. Bompas who tried most of them has pointed out, seem likely to produce an agricultural revolution in the district. Appeals have been filed in about 50 per cent. of these cases, and, as most of them are pending in my Court, it would be improper for me to offer any further remarks on the merits of the movement. I may add, however, that to the best of my belief the raiyat has been the original applicant in every instance, and the appellant has usually been the landlord.

142. Mr. Dutt has left the following remarks on the general working of the Act in the Division:—

"In my report for the Burdwan Division for the year 1893-94, I brought to the notice of Government some instances in which the insecurity of a raiyat's right to his homestead land had come prominently to notice. A further enquiry into the matter was directed, and the facts, as far as they have been ascertained, have been now placed before the Board of Revenue.

"There were many applications during the year for survey and settlement under the Tenancy Act. Most of these applications were for the survey of very small areas, sometimes only a few hundred bighas, and often comprising scattered plots away from the district head-quarters. It does not seem that zamindars are anxious to have large estates surveyed under the provisions of the law, and the obvious inference is that no real difficulty in settling and realising rents is generally felt in these parts. It is only in cases of petty villages where a dispute has been going on, or where the landlord is a new-comer or an auction-purchaser, that the assistance of the law is invoked.

"The number of applications for the commutation of rents into money suddenly increased in Midnapore district during the last cold weather, and a large number of appeals were filed from the judgment of the lower Court to the Commissioner. Such cases are expected to multiply in backward parts where rent is still paid in kind. The price of paddy increases as new means of communication are opened out, and it is to the interest of the cultivator to have the rent commuted into money once for all."

Embankments.

143. No work of importance coming under the description of embankments was executed in any of the districts of this Division during 1894-95. In Birbhum out of the total cost of Rs. 1,777 advanced for the repair of a schedule D embankment at Muhammad Bazar, the instalments recoverable during the year, viz. Rs. 71 principal and Rs. 94 interest, were realised. In Bankura an embankment constructed by certain zamindars within the prohibited area of the Damodar

embankment was removed during the year. In Midnapore the charges incurred in maintaining embankments are recovered from zamindars under the contract system as well as under the Embankment Act. The period of the first contract for 20 years expired in 1893-94, and an extension of the system over a further period of seven years from 1894-95 has been sanctioned, but has not yet come into operation. In Hooghly out of Rs. 24,867 realisable on account of certain works, Rs. 618 were realised from the recorded proprietors. Rupees 995 due from the Burdwan Raj estate will be adjusted under the agreement with the proprietor of that estate, and the balance is in course of realisation.

Drainage.

144. There are four drainage schemes in this Division, all in the district of Hooghly, viz., those of Dankuni, Howrah, Rajapur, and Amta. The first three have been completed, and the last is still under the consideration of the Public Works Department.

Dankuni scheme.

145. The net recoverable demand on account of the original cost including maintenance charges up to the time of capitalisation was Rs. 5,06,642: this sum was collected about two years ago, and the accounts which were in great confusion were examined and adjusted, except in two cases which are still pending. As soon as these two cases have been disposed of the accounts of the original cost will be finally closed. The capitalised maintenance charges of this project were Rs. 65,344, of which the sum of Rs. 60,923 was collected between January 1891 and March 1895. The collection of the balance will be made within the estimated period of six years allowed for the purpose.

Howrah scheme.

146. The net recoverable demand both for original cost and capitalised maintenance charges was Rs. 5,24,924, and the amount collected up to the close of March 1895 was Rs. 53,992, the amount covered by engagements being Rs. 1,31,969. The payments due on account of the petty rent-free holdings included in this project have been assessed on the zamindars under the provisions of section 50 of the Drainage Act, but an appeal against assessment on this principle has been preferred by Maharaja Sir Jotendra Mohan Tagore, and is pending before the Board. Other landholders who have been similarly assessed are watching the result of the case.

Rajapur scheme.

147. The survey operations in this scheme were completed during the year and the records were prepared. Preliminary apportionments have also been made and confirmed by the Drainage Commissioners.

Advances under the Land Improvements and Agriculturists Loans Acts.

148. A sum of Rs. 26,500 was allotted to this Division, and was distributed among the several districts, except Birbhum, according to their requirements. Out of the large sum allotted only Rs. 11,600 were advanced, viz., Rs. 11,350 under the Land Improvements Act and Rs. 250 in Burdwan under the Agriculturists Loans Act. Very few applications were made, as the excellent harvest of the year enabled the people to carry out improvements out of their own sources and to obtain advances from local money-lenders. The amount realisable during the year was Rs. 50,961, of which Rs. 35,323 were collected and Rs. 1,317 remitted, leaving a balance of Rs. 14,321. The balances were highest in the districts of Burdwan and Bankura. In Hooghly the demand was collected in full, and in Midnapore out of a demand of Rs. 8,637, Rs. 8,320 were collected, leaving a balance of Rs. 316 only. The whole of the unrealised balance is in course of realisation under the certificate procedure.

XVIII.—ATTACHED ESTATES, INCLUDING COURT OF WARDS.

149. The following note recorded by Mr. Dutt on the Attached and Court of Wards' estates in the Division is so full that I have little to add to it beyond supplying particulars in connection with the estates released during the year in the district of Midnapore:—

Burdwan.

"Raja Ban Bihari Kapur continued to be the sole manager of the Burdwan Raj estate, which is under the management of the Court of Wards. The Raja is keenly

alive to the interests of the estate and possesses tact, ability, and judgment, and his management shows signs of steady improvement. There is room, however, for further improvement, specially in the matter of accounts and expenditure. Advances made several years ago and found irrecoverable are being written off now, but much time is taken by the Manager's office in the submission of the remission statements. Much time is also taken in submitting explanations called for by the Audit Deputy Collector who audits the Raj estate accounts, and it is not seldom found that expenditure has been irregularly incurred under the head of advances or some similar heads. Signs of gradual improvement are perceptible, however, in all these matters.

"A European companion has been appointed for the young Maharaj Kumar. He is an intelligent boy, but it is desirable that he should at this age take a lively interest in games or active exercises or other healthy pursuits. He seems to be moving too much in a prescribed narrow grove, and I doubt if this is the best training that could be given to a healthy, active lad.

"The work of settlement of the Burdwan Raj khas mahals was going on during the year, and is nearly completed. Babu Sukumar Haldar is the Settlement Officer. The Manager does not seem to estimate the benefits of this settlement very highly. The settlement of ghatwali lands in Bankura district with the Raj estate is also proceeding, and, as I have stated elsewhere, the work has been completed with regard to two ghats, *Bankadaha* and *Jaibelia*. Deputy Collector Babu Jnan Sankar Sen who is doing this work has shown tact, ability and judgment.

"Sujamutha estate in Midnapore district has been a source of loss to the Raj estate from year to year. After a great deal of trouble an amicable settlement was effected with the raiyats by Raja Ban Behari Kapur some four years ago, and the Settlement Officer accepted the arrangement. The crops of the estate have, however, been seriously damaged year after year since that date, and the realisation is therefore exceedingly poor. The Manager seriously doubts whether it is worth while keeping this estate for the Raj.

Bankura and Howrah.

"The Maliara estate in the district of Bankura has been excellently managed by the Manager, Babu Chunder Kumar Ghosh, who deserves much credit for his work. Sankarpur estate in Howrah is managed from the Rajshahi Division.

Midnapore.

"The estates named below were released from the administration of the Court of Wards during the year under report in Midnapore district:—

Moheshpur.

"This estate was released on the application of the mother of the minor proprietor. Both the Collector and my predecessor, Mr. Dutt, were satisfied that the lady was perfectly competent, with the help of her father, to manage the property. The estate had no encumbrances when it was released.

Belki estate.

"Our management of this estate has been most unfortunate. When we took charge of the estate it was valued at Rs. 52,329, and its liabilities amounted to Rs. 10,243. We sold portions of the estate till its value was reduced to Rs. 22,422, and yet all we could do was to reduce the debt to Rs. 10,216 only. To add to our difficulties, the aunt of the minor instituted a suit for possession of half of the estate, and her claim was considered valid by the Government Pleader. Suits were also brought by some of the creditors. When affairs had come to this pass, the minor proprietor, who was 18 years of age at the time, and seemed to possess a competent knowledge of zamindari business, applied for the release of the estate, which was accordingly made over to him.

Baraberia Estate.

"The management of this estate was equally disastrous to the proprietor. When brought under the Court of Wards in 1881 it was valued at Rs. 60,175. When released in March last on the minor attaining his majority, the estate was worth Rs. 9,890 only with liabilities amounting to Rs. 10,216.

Jellamutha.

"This estate was attached for non-payment of Government revenue due from a Court of Ward's estate which had been released in 1893-94. After full satisfaction of the Government demand the estate was released on the 23rd February last.

"Among the estates which have been left on our hands, Malighati and Turka are large and solvent estates, and each of these is managed by a separate Manager. I have been pleased with the work of the Manager of the Turka estate, but have had to find fault with the Manager of the Malighati estate on more than one occasion during the year in connection with his administration.

"It is a pity that the Jambani estate was ever brought under our administration. The estate was deeply involved in debts and litigation, and the mother of the minor was competent to manage it and desired to manage it, but her prayer was rejected, and the estate was brought under our management. Early in the year there was a case before the District Judge about a will supposed to have been left by the minor's father. The will was not found to be genuine, and probate was refused. Later on the minor's mother applied to the Board for release of the property on the ground of her competency to manage it and on other grounds. I recommended the release, both because I found her on examination to be familiar with zamindari work, and because I thought she could deal with the numerous pending cases more economically and perhaps successfully than we could. I also took exception to the conditions on which the Collector had granted a lease of the indigo lands in the estate immediately after assuming administration of the estate. Before the Board of Revenue passed any orders in the matter, one of the pending cases, which we were managing for the minor in Midnapore, was decided against the minor, and the result of this decision was that the whole of the property passed to the plaintiff, and the estate which we had undertaken to administer for the minor disappeared, so far as that minor was concerned. The plaintiff further obtained the orders of the Civil Court to obtain possession of the whole zamindari, and if these orders stand, we are out of possession, and our administration comes to a violent end. This was the state of things at the close of the year.

"For some years past our administration of several estates brought under the Court of Wards in Midnapore district has not been as successful as it ought to be, and several estates have been released in a very involved or in a hopelessly insolvent condition. The administration of the year under report is not a bright exception to this rule."

XIX.—EXCISE.

150. The total number of shops of all kinds settled during the year was 2,983 against 2,938 and 2,827 in the two preceding years. The figures for 1893-94 as compiled from the district reports show an increase of 8 shops as compared with those given in the Divisional General Administration Report for that year, viz., 7 in Howrah under head Tari and 1 in Birbhum under that of Imported wines.

151. The settlement of tari shops by auction has been abandoned, and the Madras system of taxing each tari-producing tree has been experimentally introduced. The Collector of Burdwan states that no real progress has been made in the matter. Mr. Grierson, however, observes that some further progress was made during the year in the introduction of the system. Licenses were settled on applications accompanied by schedules showing the number and position of the date and palmyra trees that a vendor intended to tap during the year, and a condition was inserted in the license forbidding the sale of the juice of any tree not entered in the schedule. As there were several candidates for one shop, the licenses were settled with the person who returned the largest number of trees in his schedules.

152. The total excise revenue of the Division derived from all sources amounted to Rs. 12,32,360 during the year against Rs. 11,72,190 in the previous year, showing in the aggregate an increase of Rs. 60,170. The rise in the revenue was general under all heads except Tari and Ganja. The increase of revenue from pachwai and country spirit was very marked, the receipts being Rs. 2,57,627 and Rs. 3,31,858 against Rs. 2,35.082 and Rs. 3,10.984 respectively received during the preceding year. In the case of

pachwai it is due partly to agricultural prosperity and the consequent improvement in the circumstances of the people and partly to better management and more careful supervision. Partly also I have no doubt to a growing taste for pachwai, which is a cheaper and more wholesome beverage than distillery spirit. In the case of country spirit the increase was highest in Midnapore, and the Collector attributes it partly to the re-opening of the Ghatal and Tamluk depôts from January 1894 and partly to better settlement owing to competition.

153. Under the head of Tari the revenue fell from Rs. 77,218 to Rs. 75,742. The falling off in Howrah alone amounted to Rs. 1,826. The Covenanted Deputy Collector states that the revenue from this article increased steadily year by year almost without interruption till it reached its maximum in 1893-94. The fall in the revenue of last year was entirely due to the practice followed by the tappers in the service of the Howrah town vendors of engaging all the trees along the borders of the municipality and carrying on illicit sales, thus leaving our shops unsettled to the great injury of the revenue. He reports that unless the tree license system be introduced in Calcutta or the tappers' passes be taxed, there is no way to make up the fall in the revenue.

154. The incidence of excise revenue per head of the population during the year was 2 annas 2 pie against 2 annas 6 pie in the previous year.

155. Mr. Dutt has left on record the following remarks on the administration of the Excise Department:—

"The most important measure that was adopted during the year, or rather immediately on its close, in the administration of excise in this Division, was the reduction of duty on distilled liquor for Jahanabad subdivision from Rs. 4 to Rs. 2. It was suspected on very good grounds that there was a great deal of illicit distillation in Jahanabad subdivision, and special preventive measures were adopted within the year. A special police force was appointed in January last, and they succeeded in detecting a good number of important cases in a short time. Illicit distillation was thus greatly checked, and there was a marked increase in the consumption of licit liqour. It was unnecessary, I think, to reduce the duty on licit liquor after this, but the measure was adopted with effect from the 1st April last. I am willing to admit that such a reduction would be desirable if it was the only way open to us to stamp out illicit distillation. It would be, however, a confession of administrative weakness to say that illicit distillation could not be stopped otherwise, and as a matter of fact illicit distillation was greatly checked, and the consumption of licit liquor went up to a marked extent in consequence of the measures adopted in January, February, and March last. There was no necessity after that to reduce the duty on liquor in Jahanabad subdivision from Rs. 4 to Rs. 2 the gallon; and I hope the Excise Department, while strongly insisting on preventive and detective measures, will find it possible to raise the duty again to Rs. 4 the gallon, which is the prevailing rate all over Bengal. It is undesirable to cheapen liquor in one particular subdivision in Bengal, where the temptations to drunkenness are already so great. The consumption of distilled liquor was about 80 gallons in April 1894; it went up to 376 gallons in April 1895 after the reduction of duty."

156. In regard to these criticisms, I need only say that the matter was fully considered by Government, and that it was the deliberate opinion of the Lieutenant-Governor that the great abuses prevailing in Jahanabad could not be checked by detective and preventive operations alone, but that a simultaneous reduction of the duty was imperatively necessary. The figures quoted by Mr. Dutt may, with equal force, be utilised to prove not that drinking has increased more than fourfold, but that the consumption of licit liquor has replaced that of illicit liquor to that extent.

XX.—STAMPS.

157. The total revenue from the sale of stamps during the year amounted to Rs. 19,49,534, including Rs. 33,449 realised from the sale of plain paper, against Rs. 19,61,616 obtained in the preceding year; the result is a decrease of Rs. 12,082, or ·6 per cent. The following statement shows the revenue

derived from the sales of stamps of different descriptions in the several districts of the Division during the year:—

DISTRICT.	Court fees.	Copies.	Non-judicial adhesive (notarial).	Receipts.	Non-judicial impressed.	General.	Court paper.	Total.	REMARKS.
1	2	3	4	5	6	7	8	9	10
	Rs.	Rs.	Rs.	Rs	Rs.	Rs.	Rs.	Rs.	
Burdwan ...	2,88,894	20,418	...	4,981	75,275	4,432	6,337	4,00,337	
Birbhum ...	1,39,182	9,502	...	2,284	34,249	1,572	3,660	1,90,449	
Bankura ...	1,69,815	13,543	1	1,320	38,365	1,600	3,488	2,28,132	
Midnapore ...	4,17,403	24,612	1	4,571	1,10,643	3,655	11,175	5,72,060	
Hooghly ...	2,89,404	18,506	13	3,482	48,138	4,175	4,635	3,68,353	
Howrah ...	1,37,535	7,604	3	3,903	35,311	1,692	4,155	1,90,203	
Divisional total for 1894-95.	14,42,233	94,185	18	20,541	3,41,981	17,125	33,449	19,49,534	
Divisional total for 1893-94.	14,55,161	92,134	24	20,313	3,43,865	16,828	33,291	19,61,616	

158. This decline in the revenue is mainly accounted for by a decrease in the receipts under the head of court-fee stamps, which fell from Rs. 14,55,161 to Rs. 14,42,233, or 8 per cent., a decrease which was accidental, being entirely the result of the sale during 1893-94 of a single stamp of the value of Rs. 24,362 required for a certificate of administration taken out in Burdwan by the executors of the will of the late Lala Bangshgopal Nandi. There was a slight decrease amounting to Rs. 1,587 under the head of non-judicial impressed, including general, stamps. The decrease was nominal, except in Midnapore, and even there the falling off was only 2·5 per cent. on the figures of the previous year. Under the head of one-anna receipt stamps there was an increase of Rs. 228, which is attributed to the more careful observance of the law by all classes of the people. This explanation, if true, is satisfactory, and judged by this test Midnapore seems to be the most virtuous district in the Division. Without trusting too much to this improvement, it is reasonable to propound the more prosaic suggestion that the increase may also denote the development of business in a year of general prosperity.

159. The number of cases in which duty and penalty were levied by the civil courts and the Collectors fell from 159 and 435 to 149 and 376 respectively. Rupees 1,116 were levied as duty and penalty by the civil courts and Rs. 2,756 by the Collectors, making a total of Rs. 3,782 against Rs. 4,193 in 1893-94.

160. The number of prosecutions instituted during the year for breaches of the provisions of the Stamp Law was 77 against 42 in the preceding year. The number of persons brought to trial was 79, of whom 57 were convicted against 42 and 20 in the preceding year. The fines imposed and the rewards paid were Rs. 765 and Rs. 62 against Rs. 169 and Rs. 28 respectively in the preceding year.

161. A most serious case of defalcation of stamps occurred in the Bankura treasury, where one rupee court-fee labels to the value of Rs. 13,140 were fraudulently abstracted from a consignment received from the Superintendent of Stamps. The usual enquiries were made, but the actual thief was not detected. As, however, the occurrence was the consequence of grave breaches of the rules and neglect of ordinary precautions in the treasury, the Treasury Officer and the Treasurer have been jointly made reponsible for the loss.

XXI.—INCOME-TAX.

162. The final demand on account of income-tax stood at Rs. 2,21,036 assessed on 9,566 persons against Rs. 2,12,262 assessed on 9,343 persons in the previous year, showing an increase of Rs. 8,774 and of 223 assessees. There was an increase both in the demand and in the number of persons assessed in the districts of Burdwan, Birbhum, and Midnapore. In Howrah there was a decrease in the number of persons though the demand showed an increase. In Hooghly there was an increase in the number of assessees, but a decrease in the demand. In Bankura there was a decrease under both the

heads. The increase in the demand was principally contributed by Burdwan and Midnapore. The increase is apparently due to the careful revision of assessment in the towns, the principal marts and the centres of trade by the assessing officers. The decrease in the demand in the Hooghly district is due to the fact that the income of one assessee who had paid a tax of Rs. 1,919 on account of accumulated interest for money in the preceding year was considerably less during the year under report. The decrease in Bankura is due to the general falling off of the trade of the district owing to the opening of the Bengal-Nagpur Railway. Since that event occurred, the wants of the west of the district are supplied from Purulia, and its exports go to the same mart, and Bankura has ceased to be a central emporium.

163. The collection of tax during the year amounted to Rs. 2,19,957, and the balance on the 31st March 1895 was Rs. 1,079, of which Rs. 466 are reported to be good and under realisation. The percentage of collection on the final demand on account of tax only was 99·5. The number of objections filed was 1,097 against 1,033 in the preceding year. The increase is said to be due to the assessment of new assessees and to enhancements of tax on revision.

164. Mr. Dutt has left the following remarks on record:—

"Judging from the appeals which came before me for hearing, I cannot say that assessments are made with the same degree of care in all the districts of the Division, but in Burdwan Babu Abinash Chandra Basu, Deputy Collector, performed his work with diligence and care, and endeavoured in each case to ascertain the income of the assessee from such facts as it is possible to obtain.

"There is a tendency on the part of assessors to assess people on vague rumours without any enquiries about the probable income. There is also a tendency on the part of Deputy Collectors to rely on alleged local enquiries made by assessors without finding out if the facts ascertained by such enquiries justify the assessment in each case.

"Assessment in most cases must be guess-work, but it is possible to ascertain facts which will make our guess approximately correct. In the case of shopkeepers the daily sales can be roughly ascertained. In the case of big traders the total transactions during the year can be found out from books, and a probable rate of profit calculated thereon. In the case of money-lenders the whole of the money lent on interest can be easily ascertained from documents and books. In every case it is possible to get at some facts which will make our guess approximately correct. And it is the duty of the officers entrusted with the work of assessment to ascertain such facts in each case and make them the basis of assessment. Deputy Collectors and assessors do not always recognise this duty, and their assessments are therefore sometimes utterly without any foundation on any ascertained facts or calculations."

XXII.—MONETARY ARRANGEMENTS.

165. The following statement shows the value of the currency notes received in and issued from the treasuries of the Burdwan Division during the last two years:—

	1893-94.		1894-95.	
DISTRICT.	Received.	Issued.	Received.	Issued.
1	2	3	4	5
	Rs.	Rs.	Rs.	Rs.
Burdwan ...	24,86,495	23,89,085	23,20,650	23,12,380
Birbhum ...	7,18,605	6,62,205	6,61,975	6,42,090
Bankura ...	1,90,390	2,03,920	4,01,955	4,08,225
Midnapore ...	14,29,595	16,04,375	12,71,560	12,03,265
Hooghly ...	25,04,850	22,34,055	19,24,570	18,79,235
Howrah ...	3,66,635	3,66,140	4,55,535	4,54,970
Total ...	76,96,570	74,59,780	70,36,245	69,00,165

It will be seen that there was a falling off in both receipts and issues, while in 1893-94 as compared with 1892-93 there was an increase under both heads, the figures for that year being Rs. 72,61,770 for receipts and

Rs. 73,68,885 for issues. The fluctuations do not bear a large proportion to the total transactions, and it seems hardly necessary to submit any special explanation for the figures: at any rate, none has been furnished by any District Officer. It is conceivable that they may to a certain extent be due to a better appreciation of the money-order system by the people, but I hardly think so. Remittance by money-order is undoubtedly much safer than by currency notes in an uninsured registered cover, but the remittance of notes by post registered and insured is much cheaper than the employment of the money-order system. At the same time the system is very convenient for the despatch of small sums. This subject would have been further discussed but for the fact that unfortunately some of the District Officers have failed as in former years to give particulars of money-orders of all descriptions. I am compelled therefore to abandon this branch of the subject and confine my remarks to money-orders issued for the payment of revenue and rent.

166. The number of money-orders for the payment of land revenue amounted during the year to 36,209 to the value of Rs. 2,49,342 against 36,725 orders aggregating Rs. 2,45,493 in 1893-94. The figures for the two years are practically identical, the only differences being a slight decrease in the number of money-orders, but an increase in the amount remitted, the variation being 1·03 and 1·5 per cent. respectively. The Collectors of the Division have suggested different explanations of the fluctuations, but I have no doubt that the true reason why the system has not developed is to be sought in the *vis inertiæ* of native conservatism. Moreover, as the Collector of Birbhum has pointed out, the zamindars still prefer to pay their revenue through their agents at head-quarters. It is usually much more convenient to a zamindar to pay through an agent at head-quarters, who may be trusted to remember the due dates, than to have to bear these dates in mind himself, and then to go through the trouble of filling up and despatching a revenue money-order. Furthermore, the agents themselves oppose a passive, if not active, resistance to the introduction of the money-order system, since they find it to their profit to maintain the existing arrangements which enable them to charge a commission on all payments as well as interest on sums advanced when the balance of their accounts is against the zamindar.

167. Complaints continue to be made against the form of the money-order, and more than one case has come before me in appeal in which property has been sold because the space for the entry of payments for land revenue and cesses are so close together as to invite this confusion.

168. There was a falling off both in the number and value of money-orders in payment of rents. Similarly, a falling off is noticeable in the number of refusals, but an increase in the amount refused. All the Collectors of the Division are of opinion that the system has not found favour with the landlords. The great reason of the unpopularity of the system lies in the loss which it entails on the ill-paid amlas of whom every landlord maintains a large number. Speaking generally, I believe that the payment of rent by money-orders is still to the slow moving conservative agriculturist a novel experiment to be regarded with suspicion and to be ventured upon only when for some special reasons the old methods are unsuitable. The consequence is that the development of the practice is usually in inverse ratio to the friendliness of landlord and tenant, and that, special and particular reasons apart, a local increase of payments in this manner should be regarded as the stormy petrel of agrarian disturbance rather than the harbinger of a new dawn of intelligence.

169. To the Collector of a district which sends out an emigrant population an examination of the number, amount and place of issue of money-orders paid in the district will yield much interesting information, and the attention of Collectors will be drawn to the point.

170. As already reported, the Post Office Savings Bank has proved beneficial to the middle classes. The Collectors of Burdwan, Midnapore, and Hooghly not having furnished any figures under this head, the general result of the transactions of the Division cannot be reported or examined. From the figures supplied by the Collectors of Birbhum and Bankura it appears that in both districts the deposits were smaller than in the previous year, and the total amount withdrawn was larger. The co-existence of these two phenomena suggest a reduced appreciation of the system which it may be hoped is temporary only.

The Collector of Birbhum considers it probable that the reduction of the rate of interest from Rs. 3-12 to Rs. 3-2 per annum is the cause of the falling off in the deposits. The figures for Bankura and Birbhum are as follows:—

District.	Amount deposited.		Amount withdrawn.		Remarks.
	1893-94.	1894-95.	1893-94.	1894-95.	
1	2	3	4	5	6
	Rs.	Rs.	Rs.	Rs.	
Birbhum	88,692	75,443	85,784	91,863	
Bankura	1,30,261	1,1‘,922	1,28,641	1,65,503	

XXIII.—RAILWAYS AND OTHER PUBLIC WORKS.

171. The construction of the railway from Tarakeswar to Magra in the district of Hooghly was completed and the line formally opened for traffic on the 2nd April 1895. The Tapasi extension in the district of Burdwan is not yet formally open for passenger traffic, but arrangements to run passenger trains over it are almost complete. A line from the Raniganj railway station running over a distance of two miles was opened to meet the convenience of the paper mills at Raghunath Chak, and it is working solely for the use of those mills. After a good deal of discussion it has practically been decided to open a viaduct station in the town of Hooghly on the branch line which connects the East Indian and the Eastern Bengal Railways by way of the Jubilee Bridge. The municipality have guaranteed the minimum monthly earnings which the East Indian Railway demand as a condition precedent to the opening of the station. Since the close of the year, the long-looked-for Howrah-Amta Tramway has been commenced. A proposal has been made by the District Board of Burdwan to call for tenders for a tramway or railway from Burdwan to Katwa: the traffic on this road is very heavy, and a scheme well planned and economically carried out should certainly prove remunerative.

172. The following table shews the number of accidents and obstructions on the railway during the last two years and the number of casualties:—

District.	Persons— Killed.		Persons— Wounded.		Trains— Accidents.		Trains— Obstructions.	
	1893-94.	1894-95.	1893-94.	1894-95.	1893-94.	1894-95.	1893-94.	1894-95.
1	2	3	4	5	6	7	8	9
Burdwan	31	21	21	10	46	29	...	...
Birbhum	3	1	...	1	...	...	1	1
Hooghly	3	7	7	4	10	10	...	2
Howrah	...	...	...	...	...	...	...	...

The improvement in Burdwan is very marked; but, as the Magistrate does not comment on it, I presume that it is fortuitous only. There were no accidents during the year deserving of special notice, most of the cases which occurred being of a simple character and due to mere negligence on the part of the injured, or to unavoidable accident.

173. No public works deserving of special mention were executed during the year besides those in paragraph 178 below.

XXIV.—COMMUNICATIONS.

174. As remarked last year, this Division is fairly well off as regards means of communication, with the exception of the district head-quarters of Bankura and the two outlying subdivisions of Vishnupur and Jahanabad. The Magra-Tarakeswar branch line, opened during the year, has been a useful addition to the existing means of communication in the district of Hooghly. The East Indian Railway connecting the district head-quarters of Suri, Burdwan, Hooghly, and Howrah and the subdivisional head-quarters of Rampur Hát, Raniganj and Serampore, the steamer service connecting the subdivisions of Katwa, Kalna, Serampore, Uluberia, Ghatal, Tamluk and Contai, all converge upon the town of Howrah.

175. As a large portion of the allotment for roads is absorbed in maintaining the existing roads, the District Boards could not undertake the construction of any new ones. The village roads are generally in a bad state for want of funds. In Burdwan the road from the head-quarters station to Katwa, a distance of nearly 36 miles, is in bad condition and requires a large outlay for the metalling of it, but the work is delayed for want of funds. A scheme for running a steam tramway or a branch railway along this is under consideration. The roads in the Raniganj subdivision are said to be good; those in the Kalna and Katwa subdivisions are mostly unmetalled and become impassable during the rains. The District Boards of Burdwan and Hooghly have co-operated in improving the road from Burdwan to Jahanabad at the suggestion of my predecessor, Mr. Dutt. The roads in the district of Birbhum continued in an extremely bad state of repair, and were fast deteriorating. The District Engineer who had been in the district for about six years, but who has never been fit for his post, has at last received notice of dismissal. The only pity is that the District Board suffered him so long. The roads in the districts of Bankura and Midnapore were generally well kept up. In Hooghly the subdivision of Jahanabad is the most backward in respect of communications, but the metalling of the road from Burdwan to Jahanabad will remove this long-felt want to a great extent. The roads of the Howrah Municipality are said to be in an unsatisfactory condition owing to want of funds. The district roads are also suffering greatly for the same reason.

176. The following statement shows the length of roads maintained by the District and Local Boards and the municipalities in each district:—

District.	Description of roads.	By whom maintained.				Remarks.
		District Board.	Local Board.	Municipality.	Total.	
1	2	3	4	5	6	7
		Miles.	Miles.	Miles.	Miles.	
Burdwan ...	Metalled	266(a)	...	46	312	(a) This includes 103 miles of Provincial roads.
	Unmetalled	252	267¼	36¼	556	
	Total ...	518	267¼	82¼	868	
Birbhum ...	Metalled	129¼	...	14½	143¾	
	Unmetalled	375¾	16¾	...	292¾	
	Total ...	505¼	16¾	14½	536¾	
Bankura ...	Metalled	214	...	31½	245½	
	Unmetalled	337	...	2½	339½	
	Total ...	551	...	34	585	
Midnapore ...	Metalled	306	...	72½	378½	
	Unmetalled	374	420	29½	823½	
	Total ...	680	420	$101\frac{1}{16}$	$1,301\frac{1}{16}$	
Hooghly ...	Metalled	114	...	81¾	195¾	
	Unmetalled	423	249½	120½	702¾	
	Total ...	537	249½	202	988¾	
Howrah ...	Metalled	13½	...	$66\frac{3}{16}$	$79\frac{13}{16}$	
	Unmetalled	61½	114	20¾	$195\frac{3}{8}$	
	Total ...	75	114	86½	275½	
	Divisional Total ...	2,806½	1,067½	$621\frac{13}{16}$	$4,494\frac{13}{16}$	

It will be seen from the above table that the District Boards in this Division have to maintain 1,043 miles of metalled and 1,823 miles of unmetalled road, and that the municipalities of the Division maintain 521 miles of road.

177. The following statement shows the amount expended on roads and other public works in the districts of this Division:—

District.	1893-94. Original works.	Repairs.	Establishment.	Tools and plat.	Water-supply and water-works.	Total expenditure.	Total allotment.	Percentage of expenditure.
1	2	3	4	5	6	7	8	9
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	
Burdwan ...	25,879	1,33,988	17,324	1,332	3,173	1,81,646	1,86,074	97·62
Birbhum ...	8,713	33,292	8,626	435	211	51,277	87,930	58·3
Bankura ...	4,250	34,345	9,990	71	...	48,656	54,104	88·9
Midnapore ...	9,021	97,737(a)	16,681	173	452	1,24,064	1,67,319	74·1
Hooghly ...	4,809	90,917	17,304	264	827	1,14,121	1,40,275	78·91
Howrah ...	10,054	24,778	6,971	305	...	42,108	42,667	98·8
Divisional Total	62,726	4,15,007	70,896	2,580	4,663	5,61,872	6,84,269	82·1

District.	1894-95. Original works.	Repairs.	Establishment.	Tools and plant.	Water-supply and water-works.	Total expenditure.	Total allotment.	Percentage of expenditure.	Remarks.
1	10	11	12	13	14	15	16	17	18
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.		
Burdwan ...	23,978	1,35,968	19,812	1,007	3,418	1,83,683	1,91,036	96·16	
Birbhum ...	8,703	48,888	8,958	726	618	67,873	94,071	71·4	
Bankura ...	4,707	40,724	10,113	...	...	55,544	68,858	80·6	
Midnapore ...	26,963(a)	1,22,366(a)	17,062	202	708	1,67,302	2,01,544	83·01	(a) Includes expenditure for village roads and ferries.
Hooghly ...	17,071	85,791	18,128	291	1,704	1,22,985	1,42,185	86·4	
Howrah ...	3,431	30,435	6,657	822	...(a)	41,345	46,450	89·	
Divisional Total	84,855	4,64,171	80,210	3,048	6,448	6,38,732	7,45,044	85·7	

It will be seen that the expenditure has increased in every district, especially under the head of Repairs. The percentage of expenditure on allotment is below 80 per cent. in Birbhum only.

178. The following are the important public works executed or undertaken during the year by local bodies:—

Burdwan.

(1) Metalling the approaches to the Victoria Bridge.
(2) Reconstruction of some culverts on the Burdwan-Jahanabad road.

Bankura.

(1) Metalling of a portion of the road Indpur to Khatra.

Midnapore.

(1) Construction of bridges on many important roads.
(2) Ditto of roads from Dahijuri to Narainpur, Barda to Samder, and Balichak to Sabong.

179. The amount spent on arboriculture in the several districts in this Division during the year is noted in the margin. The greatest activity was shown by the Boards of Burdwan and Hooghly which planted 1,234 and 800 trees respectively, while in Midnapore their efforts were confined to the preservation of existing trees. Very little information has been given by District Officers as to the kind of trees planted.

	Rs.		Rs.
Burdwan ...	2,063	Midnapore ..	462
Birbhum ...	996	Hooghly ...	1,903
Bankura ...	90	Howrah ...	283

XXV.—WORKING OF THE LODGING-HOUSE ACT.

180. The Act is in force in the towns of Garhbeta and Dantun in the district of Midnapore and in the town of Ulubaria in the district of Howrah. In Garhbeta no work of sanitary improvement was executed during the year, but efforts were made to maintain cleanliness in the village and its environs. The health of the town was fairly good: there were a few cases of cholera, but the disease did not assume an epidemic form. In Dantun the construction of a masonry well was undertaken but not completed within the year. Cholera broke out during the year, and 30 cases were reported in the month of July. Of these 7 were treated in the cholera hospital shed, 6 resulting in recoveries and 1 terminating fatally. The further progress of the disease was checked by the measures taken by the Lodging-house Committee. The

low percentage of fatal cases shows that the attack was of mild type. The administration of the town of Uluberia, which forms the head-quarters of the subdivision of the same name, was satisfactory during the year. The funds at the disposal of the Committees are not large, and their possibilities of usefulness are limited. Considering their small means, they do a good deal towards maintaining cleanliness and enforcing elementary rules of sanitation.

XXVI.—EDUCATION.

181. The total number of schools and patshalas rose from 10,944 in 1893-94 to 11,135 in the year of report, and the number of pupils from 299,187 to 308,501. There was a considerable increase of 506 schools in the district of Midnapore, which more than made good the loss of schools in the other districts. The increase in the number of pupils was contributed by Burdwan, Midnapore, Hooghly, and Howrah, while there was a decrease in Birbhum and Bankura. The details under each class of schools will be examined later on.

Financial results.

182. The total expenditure on education in this Division amounted to Rs. 11,71,531 against Rs. 11,35,578 in the previous year, showing an increase of Rs. 35,953. The expenditure from Provincial revenues rose slightly from Rs. 81,252 to Rs. 81,691, or by Rs. 439, and from all other sources, including district and municipal funds, from Rs. 10,54,326 to Rs. 10,89,840, or by Rs. 35,514. The high schools cost Rs. 2,88,826, the middle schools Rs. 2,48,194, the primary schools Rs. 6,08,563, and the special schools Rs. 25,948 as against Rs. 2,91,990, Rs. 2,42,117, Rs. 5,74,289, and Rs. 27,182, respectively, in the preceding year. It is satisfactory to note that the expenditure on primary education is steadily increasing.

High schools.

183. There was a loss of one high school, but the total number of pupils increased by 50. Hooghly lost 3 schools and 224 pupils, while Birbhum and Howrah show each an increase of 1 school and of 155 and 249 pupils, respectively. In Burdwan, Bankura, and Midnapore there was a slight decrease in the number of pupils.

184. The table below shows the result of the University Entrance examination as compared with that of the preceding year:—

DISTRICT.	1893-94.		1894-95.	
	Number of competitors. (a)	Number of successful students. (b)	Number of competitors. (c)	Number of successful students. (d)
1	2	3	4	5
Burdwan	139	67	151	74
Birbhum	30	14	48	39
Bankura	67	15	68	35
Midnapore	117	48	120	32
Hooghly	210	100	224	119
Howrah	97	44	126	44
Total ...	660	273	737	343

On the whole the result was slightly better than in the previous year, 46 per cent. of the competitors having passed against 41 per cent. In Midnapore and Howrah, however, the result was unfavourable, while there was marked improvement in Birbhum and Bankura. Burdwan passed about 50 per cent. and Hooghly a little more than that proportion.

Middle schools.

185. The number of middle English and vernacular schools increased by 14, and the boys receiving education in these schools by 1,316. The subjoined table compares the results of the middle scholarship examination during the past two years. Fifty-three

per cent. of the competitors were successful in the year under report against 49 per cent. in the preceding year:—

	1893-94.		1894-95.	
	Competed. (a)	Passed. (b)	Competed. (c)	Passed. (d)
1	2	3	4	5
Burdwan	401	185	302	161
Birbhum	113	75	131	80
Bankura	255	93	196	89
Midnapore	256	120	323	184
Hooghly	214	122	243	152
Howrah	117	72	113	69
Total ...	1,356	667	1,308	735

Primary schools.

186. Burdwan, Birbhum, and Bankura show a falling off both in schools and pupils; Hooghly and Howrah lost schools but gained pupils, but on the other hand there was a large increase of 507 schools and 12,003 pupils in Midnapore. The net increase in the number of primary schools in the Division and of boys attending them was 199 and 8,194, respectively. The startling increase in Midnapore is principally due to the fact that a large number of lower primary schools were returned for the first time during the year. The considerable decrease both in schools and pupils in Bankura was due to the prevalence of cholera, small-pox and fever during a considerable portion of the year. Nothing could show more clearly the ephemeral character of some of these village schools.

187. The number of pupils who competed for and were successful at the upper and lower primary examinations is shown below. Figures for the lower primary examinations held in Birbhum, Midnapore, and Howrah have not been furnished:—

	Upper Primary.				Lower Primary.			
	1893-94. (a)		1894-95. (b)		1893-94. (c)		1894-95. (d)	
	Competed.	Passed.	Competed.	Passed.	Competed.	Passed.	Competed.	Passed.
1	2	3	4	5	6	7	8	9
Burdwan	521	261	435	205	1,159	680	1,219	629
Birbhum	242	178	146	53	747	392	...	...
Bankura	438	206	340	162	1,959	953	2,057	856
Midnapore	562	316	587	206	2,330	1,873	...	...
Hooghly	207	146	183	94	1,190	784	1,562	814
Howrah	107	64	112	62	...	...	...	...
Total ...	2,072	1,172	1,803	782	7,385	4,682	4,838	2,299

So far as the figures are available, the results were not so good as in the preceding year. The Magistrate of Birbhum ascribes this to an injudicious selection of candidates, and the Magistrate of Midnapore to the severity of the

questions in the geography paper, a subject which it is said boys generally neglect.

188. In all 20,044 girls received education either in mixed schools or in schools for girls only. Excluding Hooghly, of which the details have not been furnished, the number of schools in this Division for girls only decreased from 322 to 314, and the number of girls attending them from 8,343 to 8,047. Bankura lost 19 schools and 559 pupils. The general unhealthiness of the year is said to have affected these institutions. Burdwan, Birbhum, and Midnapore gained both schools and pupils, and Howrah lost four schools but gained 44 pupils. Mr. Vincent remarks that female education, which is in a backward state in Birbhum, appears to be looking up. It is a striking fact that backward districts like Bankura and Midnapore had 5,655 and 6,264 school-going girls, respectively, while the number of such girls in advanced districts like Hooghly and Howrah does not exceed 3,067 in the former and 1,833 in the latter. The reason of this is that in these districts a large proportion of the girls are not sent to school at all, but are taught at home along with the boys, whereas in districts like Bankura and Midnapore facilities for such private tuition do not exist. The number of girls who appeared at the Uttarpara Hitakari Sava Examination was 35 from Burdwan, 43 from Birbhum, 93 from Midnapore, and 65 from Hooghly. Of these, 30, 34, 82, and 54, respectively, passed the examination; 10 in Burdwan, 8 in Birbhum, and 11 in Midnapore obtaining scholarships. No information on this subject has been furnished by the Magistrate of Hooghly.

Female education.

189. The number of Muhammadan pupils attending schools increased from 30,120 to 31,804, or by 1,684. The increase is confined to Burdwan, Midnapore, and Howrah, and there is a slight decrease in the remaining districts. The progress made in Muhammadan education is shown in the table below:—

Muhammadan education.

1	2		3		4		5	
District.	Population.		Total number of pupils attending schools.		Number of Muhammadan pupils attending schools.		Percentage of Muhammadan pupils to total number of pupils.	
	Total. (a)	Muhammadans. (b)	1893-94. (c)	1894-95. (d)	1893-94. (e)	1894-95. (f)	1893-94. (g)	1894-95. (h)
Burdwan ...	1,391,880	267,224	46,326	47,095	6,482	6,964	13·8	14·7
Birbhum ...	797,833	169,752	25,060	25,567	5,348	5,330	21·3	20·8
Bankura ...	1,069,668	45,312	40,667	39,109	1,661	1,516	4	3·8
Midnapore ...	2,631,516	171,412	106,365	118,964	6,786	6,463	5	5·4
Hooghly ...	1,076,710	192,685	49,465	50,860	7,509	7,438	15	16·9
Howrah ...	721,211	152,806	31,304	27,132	3,334	4,093	10	15
Total ...	7,688,818	999,191	299,187	308,727	30,120	31,804	10	10·3

The proportion of Muhammadan students to the total number of students is 10·3, while the Muhammadan population forms 12·9 per cent. of the entire population. As regards the proportion of Muhammadan boys attending the middle and higher schools, figures have not been received from all the districts; but, judging from those furnished by the Magistrates of Burdwan and Howrah, there is little doubt that the proportion was very low. Mr. Grierson, the Magistrate of Howrah, ascribes this to the fact that the Muhammadans of his district are mostly agriculturists and labourers; and this remark is, I think, applicable more or less to the other districts of the Division. It is satisfactory, however, to find that in Burdwan during the year under notice two Muhammadan students passed the F.A. and three the Entrance examination, whereas during the previous year none passed the former and only one in the latter examination.

190. As in the preceding years there were eight schools of this character in the Raniganj and Barakar coal tracts. They were attended by 178 pupils, of whom 78 were aborigines, 83 low caste Hindus and 17 Muhammadans. The pupils receive free tuition, and Government pays a monthly

Education of Sonthals and other aboriginal races.

stipend of Rs. 8 to each guru. Three Sonthal boys passed the lower primary examination from these schools. The number of schools in Birbhum for the education of aboriginal races was 13 as in previous years, but the number of pupils decreased from 292 to 284. Of these schools 12 were stipendiary enjoying the privilege of earning rewards in addition to stipends at the rate of Rs. 5 a month each. The success achieved by the Sonthal boys was rather remarkable. One stood first in the upper primary examination in the Birbhum district. His age, however, was beyond that at which a scholarship was tenable, and he would have got none had not His Honour the Lieutenant-Governor granted him a special scholarship. Two other Sonthal lads passed the lower primary scholarship examination in the first division. At the reward examination 14 Sonthal lads passed by the A standard and 11 by the B standard.

191. In Bankura the number of aboriginal pupils increased from 1,177 to 1,227. The proportion of Sonthal lads at school to the total number of scholars in this district is 3·1, and their proportion to the number of Sonthal boys of school-going age is 13·1 per cent. The aboriginal races are not yet fully alive to the advantages of education. In order to stimulate education among Sonthals the ordinary rewards allowed to gurus were doubled in the case of successful Sonthal boys. One Sonthal lad passed the upper primary examination out of six candidates, and 17 out of 45 passed the lower primary examination. In the reward examination 73 Sonthal students passed by standard B and 65 by standard A.

192. In Midnapore the number of Sonthal students fell from 1,886 to 1,729. Five pupils belonging to the backward races were successful, namely, three in the middle vernacular and two in the upper primary scholarship examination.

193. In Hooghly 72 non-Christian aborigines attended schools during the year.

Special education.

194. The technical school started in Burdwan in April 1893 is maintained by the District Board of Burdwan, assisted by a contribution of Rs. 240 from the local municipality. Drawing, surveying, carpentry, and blacksmith's work are taught, and the students on the roll numbered 42 at the close of the year against 46 in the previous year. The sum of Rs. 295 was realised by the sale of articles manufactured in the school against Rs. 121 obtained from this source in the previous year. The students receive free tuition. The four guru-training classes attached to the middle schools in Birbhum were abolished in January last under orders of the Director of Public Instruction. In Bankura there were five special schools with 60 boys and 22 girls, but the nature of these schools has not been stated. In Midnapore the number of training and industrial schools decreased from 5 to 2. Two of the guru-training classes were abolished under orders of the Inspector of Schools, and the Baptist Mission Industrial School was converted during the year into an upper primary school. Of the two schools still in existence, one is the Bhimpore Sonthal Normal School under the management of the American Baptist Mission, and the other is the Maisadal Raja's Technical School in the town of Midnapore. The state of this latter institution is unsatisfactory, and the Magistrate reports that its reorganisation and improvement will shortly be undertaken. In Hooghly nine special schools are reported by the Magistrate to have been in existence, but no particulars about them have been furnished.

Indigenous education.

195. There were 34 private schools with 425 pupils in Burdwan. Some of these teach a little Arabic and Persian, some are simply Koran schools, and the rest are elementary schools teaching a vernacular only. They do not conform to the departmental standards. In Bankura the private schools increased from 55 to 66. This increase of 11 schools is due to the establishment of five Sanskrit tols and six maktabs and other elementary schools. In Midnapore there were 63 Sanskrit tols with 549 pupils and 7 maktabs with 66 pupils teaching the Koran only. The number of private institutions in Hooghly was 52. Thirty-one private institutions in Howrah taught Arabic, Persian, Sanskrit, &c.

XXVII.—DISPENSARIES AND HOSPITALS.

196. During the year new dispensaries were opened at Bolpur in Birbhum and at Polba and Tentulia in Hooghly. The total number of patients (both

in-door and out-door) treated in the Division rose from 241,484 in the previous year to 278,835 in the year under report—a result no doubt due to its exceptional unhealthiness.

197. There was a falling off in the income from private subscriptions, endowments, &c., in the districts of Burdwan, Birbhum, and Midnapore. In the last district the expenditure on the Garhbeta, Nayabasan, Dantun and Ramjibanpur dispensaries appears to have exceeded the income. The Magistrate has been asked to report how the excess cost was met. It may be noted that, during the year under review all the District Boards, except Howrah, contributed larger sums towards maintaining medical institutions in their respective districts than in the previous year. The total sum contributed by all the Boards in the Division was Rs. 9,774 against Rs. 4,816 in the previous year, being more than double the previous year's grant.

Burdwan.

198. In the Burdwan dispensary a lady doctor on Rs. 50 per mensem was maintained throughout the year. The managing body take an interest in the affairs of the institution and meet at least once a month. The Civil Surgeon visits it daily, and it is greatly appreciated by the public. The Katwa dispensary is managed by the municipality with considerable success and is a useful institution. The want of a separate hospital for females and for infectious cases is felt. The Raniganj dispensary is reported to have gained in popularity. Infectious diseases are treated in a separate building, but there is no separate accommodation for female patients. The Mankar dispensary is managed by a Committee under the control of the District Board, and is a great boon to the people in the neighbourhood: its financial condition is not as satisfactory as could be desired. The Chakdighi dispensary is supported by Babu Lolit Mohun Sinha Roy, zamindar, and contains a separate ward for females. The Raj hospitals at Burdwan and Kalna are maintained and managed by the Burdwan Raj. There is a separate ward for infectious diseases at Burdwan, but none for females in either of the institutions. Both are well looked after and are largely resorted to.

Birbhum.

199. The Suri dispensary continued to do excellent work under the supervision of Dr. Fleming. The Rampur Hát dispensary has been made over to the Dispensary Committee by the East Indian Railway Company, who have shown greater liberality in the matter, which has been duly acknowledged. The building needs thorough repairs, and the Subdivisional Officer is collecting funds for carrying them out. The Bolpur dispensary, towards the support of which the District Board contributes Rs. 20 per month, was started in October last with a stock of medicines, for the purchase of which a sum of Rs. 138-10 was contributed by that body. Up to the end of December last it afforded out-door relief to 1,200 patients. It supplies a long-felt want in that fever-stricken locality. The dispensary at Hetampur, which is maintained by Raja Ram Ranjan Chakravarti Bahadur, was brought under Government supervision during the year.

Bankura.

200. The municipal dispensaries at Bankura and Vishnupur are both reported to be popular institutions. The sphere of usefulness of the institutions at Maliara and Ajodhya is limited, but they are said to be of considerable benefit to the people. The Magistrate fears that the hospital at Ajodhya will have to be closed if the zamindars do not pay their subscriptions more regularly. The Dufferin female hospital at Bankura which worked throughout the year seems to have risen in popularity. The number of out-door patients who received medical aid from this hospital during the year 1894 is reported to be 4,056. The number of in-door patients was 71—a number by no means discouraging considering the strong caste prejudices entertained by the people. The Magistrate has failed, however, to state what the social status of these patients was. It is comparatively easy to obtain patients from the lower classes, but the aim of the Dufferin hospitals is to attract and relieve female patients of the upper and middle classes, and this end is much more difficult of attainment.

Midnapore.

201. The establishment of a dispensary at Gewankhali, for which the Raja of Maisadal has generously offered to contribute Rs. 4,000 for construction and a grant of Rs. 300 a year will probably be taken up without delay as the District Board

since the close of the year have voted an annual contribution of Rs. 600. The question of the establishment of dispensaries out of the bequest made by the late Babu Kanai Lal Seal was still under consideration when the year closed. The Maharaja of Mohurbhunj has offered to take over the dispensary at Nayabasan and to maintain it at his own cost: final orders on this liberal offer have not yet been passed.

Hooghly.

202. The Imambara hospital was moved to the Chinsurah barracks, and the Branch Dufferin Hospital was established in another block of the same buildings, which have undergone thorough repairs and considerable alterations to suit the wants of these two institutions. The Dufferin Hospital is in charge of a lady doctor working under the supervision of the Civil Surgeon.

Howrah.

203. The income and the usefulness of the Howrah General Hospital are steadily improving. Considerable additions were made to the building during the year under report at Government expense. The natives of Howrah contribute practically nothing to its support. Some few of the richer residents subscribe small sums, but it is very diffcult to get them to pay their subscriptions. In marked contrast to this the Magistrate reports that one native gentleman who has more leisure than available cash has voluntarily undertaken some important clerical work *gratis* for the municipality on condition that the money value of it should be paid to the Howrah hospital as a contribution. A new dispensary was opened in January last at Amraguri, a village in thana Amta. Babu Iswar Chandra Hazra of this village has placed the handsome sum of Rs. 12,000 at the disposal of the District Board for the maintenance of the institution. The financial condition of the Ulaberia dispensary was satisfactory during the year. The Bally dispensary building is reported to be in want of repair, and the Magistrate has drawn the attention of the Municipal Commissioners to the matter. Otherwise it was well managed during the year under report.

XXVIII.—LIBRARIES.

204. There was no addition to the number of libraries in the Division during the year. The districts of Birbhum and Bankura are still without a library. The libraries at Serampore and Uttarpara in Hooghly and the Mechanics' Institute at Howrah are the most useful of these institutions. The financial condition of the Uttarpara library has become worse than ever.

XXIX.—MUSEUMS.

205. There are no museums in this Division.

XXX.—LOCAL SELF-GOVERNMENT INSTITUTIONS.

District Boards.

206. Mr. Inglis, the late Magistrate of Burdwan, has left the following remarks:—

"I can say very little as regards the working of the District Boards. During my incumbency, beyond the question of the introduction of Union Committees, the members did not seem to take much interest in the administration. Even as regards these Unions much apathy was shown, there being a general feeling that the experiment was doomed to failure." Mr. Grierson, the Magistrate of Howrah, remarks:—"The District Board has worked harmoniously throughout the year. It decides broad questions of policy, and leaves their execution to the executive whom it holds responsible. I must cordially acknowledge the support and assistance which its members have given me as their Chairman, and the friendly, or rather intimate, terms on which we all work together. The condition of the roads has greatly improved during the past two years, but I consider, as I have elsewhere stated, that the District Board spends too large a proportion of its income on secondary education, and too small a proportion on its communications. Roads are the crying want of Howrah, while it has a very large number of secondary and high schools." The other District Officers speak well of the work of the District Boards in their respective districts.

207. The following remarks have been left by Mr. Dutt as Commissioner of the Division for the year:—

"The District Boards have done their work fairly well throughout the Division, and no instance of friction or specially bad work came to my notice

within the year. Local Self-Government has been a success in these provinces, and it is distinct gain in the cause of good government to secure the co-operation of representative non-official gentlemen in our administrative work." I am not disposed to go quite so far as my predecessor in these views, for I question whether such material advantage to the administration has been gained by Local Self-Government as he believes. Doubtless much good work has been done by District Boards, but it would probably have been done equally well under the old *régime*. The real advantage of the system lies not in better administration but in the practical education in the management of local affairs which it affords to those who share in the work.

Local Boards.

208. The work of the Local Boards was not so successful chiefly because they have not enough work to interest them. As a reference to the correspondence connected with the introduction of Local Self-Government will show, Local Boards are not really an integral part of the machinery of the scheme, and it has from the first been found difficult to assign them their proper place. If they are to have enough work to interest and employ them, the District Board must divest itself of some important functions which it had usually much better retain. If sufficient powers are not granted them they obviously lag superfluous on the stage, and their consciousness of the fact does not tend to rouse their interest in such duties as do fall to their lot. My predecessor shares these views, but he considers that they can be entrusted with useful and interesting work as soon as the work of village sanitation is begun.

209. At Katwa in Burdwan the affairs of the Local Board fell into great confusion owing to the incompetence of the Chairman, who has since resigned, and to the rascality of the clerk entertained by the Local Board. The latter was prosecuted for embezzlement, but owing to the unsatisfactory condition of the office brought to light during the trial, he was acquitted on appeal. Both in Kalna and Katwa the prompt and regular payment of rents by farmers of pounds and ferries was not insisted on, and in the latter the arrears were heavy. In Raniganj the collection of these rents was satisfactory under an official Chairman. The conditions on which grants-in-aid for roads had been made were continually lost sight of and were never enforced. The Sadar Local Board, in the opinion of Mr. Inglis, worked satisfactorily. Burdwan is the only district in this Division, and indeed almost the only district in the province, in which the control of secondary education has been made over to the Local Boards. I have recently strongly urged the District Board to consider the advisability of withdrawing this power from them.

210. The attendance of members of the Bankura Local Board was not satisfactory. It is reported that most of the mufassal members were irregular in their attendance and showed want of interest in their work. Both the Bankura and Vishnupur Local Boards failed to utilise to the full the allotments for village roads. The pounds were much neglected. The Local Boards, however, afforded useful assistance in matters relating to primary education.

211. A road constructed under the supposed supervision of the Howrah Local Board is reported to have been badly made, and part of the earthwork was paid for twice over. In Howrah, too, the Local Boards grossly mismanaged the pounds made over to them.

212. The Local Boards in the districts of Birbhum, Midnapore, and Hooghly are reported by the Magistrates concerned to have worked well.

Union Committees.

213. Arrangements for forming village unions were definitely taken in hand during the year under review. As an experimental measure a few unions were to be formed in four districts of the Division; and accordingly four unions in Howrah, six in Midnapore, and five in Hooghly have been sanctioned by Government and started since the close of the year. Under instructions from my predecessor based on a scheme he had drawn up when Magistrate of Burdwan, Mr. Inglis submitted for that district proposals for the division of the whole thana of Kalna into unions. As this scheme was not in accordance with the instructions issued by the Lieutenant-Governor in the Local Self-Government Circular of the 5th September last, I have requested the Magistrate to submit a revised scheme for the introduction of one or two unions in each subdivision of the district.

Municipalites.

214. Among municipalities in this Division, Howrah stands pre-eminent for its size and importance. Mr. Grierson, the Chairman, cordially acknowleges the support he has received from the Commissioners. The calls on the municipality, he says, are many, but funds at its disposal are limited. The greatest of its needs are better sanitation and a good water-supply. For the latter a loan has been granted and matters are in train. The Commissioners in former days have not always shown a sufficient alacrity to raise taxation, but better counsels have prevailed of late, and after much discussion the sanitary needs of the town are being more adequately supplied. Very much still remains to be done, but the Commissioners realise the situation, and may be trusted to deal with it.

215. Next in importance to Howrah comes Burdwan. The accounts of this municipality were in a most unsatisfactory condition when the local Auditor made his inspection, and under section 82 of the Municipal Act the Commissioners have been directed by Government to submit all their accounts duly adjusted by the 30th June 1895, failing which a special officer will be appointed. The Commissioners are energetic in conception, but they are already burdened with debt, and this circumstance, complicated by the confusion in their accounts, greatly hampers their action. Raniganj and Dainhat with official Chairmen and Kalna with a non-official Chairman are well managed. The state of affairs at Katwa was unsatisfactory: the collections were bad and the roads worse. The Chairman who was not a strong officer was on leave for some time, and has subsequently resigned. All the municipalities in the Burdwan district are paying some attention to sanitary improvements. The Commissioners of the Burdwan Municipality have applied for a loan required to fill up dirty tanks within the town; but, having regard to their financial condition, it is rather doubtful whether this can properly be granted. In Raniganj a scheme to obtain a supply of pure water from the Damodar is under consideration, and the Municipal Commissioners of Kalna are contemplating a drainage scheme.

216. The late Chairman of the Suri Municipality, Babu Dakhina Ranjan Mukherjee, deceased, used to take much interest in its affairs. Bankura also has a zealous Chairman and Vice-Chairman. At Vishnupur the Commissioners are said to be divided by party factions, and their usefulness is greatly impaired thereby: their Chairman, however, works hard in the office and closely supervises out-door work. The affairs of Sonamukhi were fairly well administered by the official Chairman with the help of the Vice-Chairman. All the municipalities in the district of Midnapore, except Tamluk, have laid themselves more or less open to unfavourable criticism in respect of sanitary matters. Mr. Dutt, Magistrate of Hooghly, states that the municipalities with a non-official Chairman have done well under such supervision and control as the law has vested in the District Magistrate and the Divisional Commissioner. Faction still runs high in Uttarpara, but strange to say the municipality is at the same time well managed, being noted for its cleanliness and the efficient out-door work of its employés.

217. My predecessor has left the following remarks on the municipalities of the Division:—

"I inspected the offices of the municipalities named in the margin during the year under report, and visited some others without regularly inspecting the offices.

(1) Howrah.	(5) Hooghly-Chinsura.
(2) Bally.	(6) Vishnupur.
(3) Uttarpara.	(7) Midnapore.
(4) Kotrung.	

"Excepting Howrah, all the other municipalities named above have a non-official Chairman. I have found them as well as the Municipal Commissioners willing to devote their time and attention to the work they have undertaken, and to accept and act on all reasonable suggestions that we make for improvements. Work is carried on tolerably well and with intelligence and care.

"It is necessary for us to indicate the way in which sanitary improvements can be effected, and to urge on such improvements being effected, so far as is possible within the resources of the municipalities. It is also necessary for us to carefully examine the municipal budgets, as there is a tendency to overestimate income, and also to allow unduly frequent increments to municipal servants. In both these matters District Magistrates have generally done their duty by giving sympathetic advice and making practical suggestions. And with such help local self-government within municipal areas has attained a fair measure of success."

XXXI.—EMPLOYMENT OF MUHAMMADANS.

218. The number of Muhammadans employed in the several offices and courts in the districts of this Division was as follows:—Gazetted officers 9, ministerial officers 91, menials 637. Considering the proportion of the Muhammadan population to the total population and the number of Muhammadans receiving education, it may be said that they have received a fair share of Government appointments. In filling up vacancies the claims of the Muhammadan candidates are duly considered.

XXXII.—POST OFFICE AND TELEGRAPH.

219. There is little worthy of notice in the working of the post office and the telegraph department during the year. As case of misappropriation of postal money is reported from Midnapore. A school-master in charge of the Nandipur post office in that district absconded after misappropriating Rs. 20-4. He is still at large, but the amount has been made good by his sureties. A poddar of the Midnapore post office, who absconded in 1884 after misappropriating Rs. 2,000, has been arrested and sentenced to seven years' rigorous imprisonment.

220. The number of telegraphic messages is increasing. The subjoined table shows the messages received in and issued from Howrah during the last three years and illustrates the rapid development of telegraphic communication :—

Year.	Number of telegrams		Receipts.	Expenditure.
	Received.	Sent.		
1	2	3	4	5
			Rs.	Rs.
1892-93	1,932	2,264	1,935	1,008
1893-94 ...	3,379	6,428	6,328	1,008
1894-95	6,676	8,959	6,315	1,003

If the figures for receipts are correct, they indicate a much larger use of deferred telegrams than formerly; for, though the number of messages sent increased by 2,531, the receipts fell off by Rs. 13.

221. As in the preceding year the telegraphic line from Saintha to Suri in the district of Birbhum was interrupted six times on different dates during the year. The cause could not, however, be ascertained. The Magistrate of Hooghly has again noticed the inconvenience caused by want of telegraphic communication with the Jahanabad subdivision. It is very desirable that this inconvenience should be removed.

XXXIII.—ZAMINDARI DÁK, FAIRS AND POUNDS.

(i) Zamindari dák.

222. New rules were framed by the Board of Revenue during the year under section 11, Act VIII (B.C.) of 1862, with the sanction of Government, and the Collectors of the districts have been appointed in place of the Magistrates to carry out the provisions of the Act. The statement below shows the demand, collection, and balances as well as the cost on account of the zamindari dák in the six districts of this Division. The figures given by the Collector of Midnapore do not include the demand, collection, &c., for the second kist which fell due in January last. He refers to the change of dates prescribed by the new Tauzi Manual as his reason for excluding the amount of the second kist from the year's account. It has recently been pointed out to him that effect should have been given to the new rules from the 1st April last, and not from the 1st January, and he has been requested to submit revised accounts which will be duly submitted through the Board. It would therefore be useless now to compare the Divisional results for

1894 with those of previous years. It will be seen from the statement that the collections were over 95 per cent. in Birbhum, Bankura, and Hooghly, while they were only 82·09 per cent. in Burdwan. Now that the rules have been codified in the new Tauzi Manual, I hope the difficulty felt in recent years in obtaining correct accounts and enforcing a uniform procedure will cease to exist. No inconvenience or difficulty has been represented by any of the District Officers regarding the zamindari dák service:—

Demands, Collections and Balances of Zamindari Dák Cess and the cost of its collection for the year 1894-95.

Division.	District.	Number of estates paying cesses.	Land revenue of the estates shown in column 3.	Ordinary demand.	Arrears due from previous year.	Excess payment made during the previous year.	Remission made during the year.	Net demand.	Collection.	Payment made in advance for next year.	Arrears due.	Classification of arrears shown in column 12: Doubtful and irrecoverable.	Classification of arrears shown in column 12: In process of recovery.	Fines realised under section 9 of Act VIII of 1892.	Percentage of total collections (column 10) on net demand (column 9).	Process fees or talabana.	Cost of collection: Cost of head-quarters establishment.	Cost of collection: Cost of process-serving or other collecting establishment.	Cost of collection: Other cost.	Cost of collection: Total.
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20	21
			Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.		Rs.	Rs.	Rs.	Rs.	Rs.
	Burdwan ...	710	30,00,084	7,500	610	175	..	7,935	6,514	74	1,421	...	1,421	117	82·09	15	300	.	78	438 (Exclusive of the cost of dák service.)
	Birbhum ...	641	9,95,618	4,319	408	391	..	4,060	3,971	241	95	...	95	1·5	97·6	17	586		2,718	3,298

(ii) Fairs.

223. Almost every village of any importance in Burdwan has a petty gathering held within its limits during the year on some such occasion as the Charak Puja, the Rath Jatra, or the Sri Panchami festival, but these gatherings do not call for any special mention. The fairs held at Bagnapara, Jamalpur, Palirhat, Narikeldanga and Kalna in the subdivision of Kalna, though held on a larger scale, did not require special sanitary arrangements (1) because they did not last more than three or four days, and (2) because the visitors generally returned home every evening. The important fairs held at Uddhanpur, Bairagitala, Dadhia and Agradvip in the Katwa subdivision, where 20,000 persons or more assemble every year, took place in January, February, and March. The sanitary arrangements at these fairs were carried out under the supervision of the Subdivisional Officer of Katwa. Wide and open roads were provided with a view to prevent overcrowding and to promote free ventilation in the *méla* ground. Water was also reserved for drinking purposes. Sweepers were engaged for removing daily all refuse and filth. Precautions were taken to prevent, as far as possible, pilgrims or animals suffering from contagious diseases from visiting the fairs and to stop the sale of noxious articles of food. Proper police arrangements were also made.

224. In Birbhum the ancient and important fairs at Bakresvar, Kenduli and Tarapur were well attended. There was a larger gathering at the Bakresvar fair during the year than in any of the preceding three or four years owing to the weather having been fair at the time. The District Superintendent attended the fair. Mr. Growse, the Magistrate, visited the Kenduli *mêla* during his cold-weather tour. At Bakresvar sanitary arrangements were made by the District Board, which sank wells in the bed of the river Bakresvar and constructed latrines.

225. The local gatherings in Bankura were of short duration and little importance. They did not require any sanitary arrangements.

226. As in the previous year a sum of Rs. 25 was advanced by the Midnapore District Board to the Chairman of the Contai Local Board for the purpose of making the necessary sanitary and conservancy arrangements at Hatnagar near

Contai, where a fair was held on the 22nd February 1895. As usual there was a large gathering at the Maisadal car festival. The fairs held at Krishnanagar in Bogra on the occasion of the Ruth, the Rash and Dol Jatra passed off quietly.

227. Special mention has been made of the following fairs in the district of Hooghly by the Collector :—

Name of Fair.	Place where held.
1	2
1. Siva Gajan	Tarakeswar.
2. Siva Ratri	Tarakeswar.
3. Snan Jatra... ...	Mahes and Ballabhpur.
4. Ruth Jatra... ...	Mahes and Ballabhpur.
5. Ditto	Rajbulhat.
6. Ditto	Antpore.
7. Ditto	Rashedpore.
8. Ditto	Kristanagore.
9. Rash Jatra	Mankunda.
10. Muharram	Hooghly Imambara.
11. Uttarayan	Tribeni.
12. Baruni	Tribeni.

As usual the Siva Gajan and the Siva Ratri *mèlas* held at Tarakeswar were attended respectively by about 100,000 and 20,000 people. The usual sanitary arrangements were made at these gatherings under the supervision of the Civil Medical Officer and the Subdivisional Officer of Serampore. The Snan Jatra and the Ruth Jatra festivals at Mahesh and Ballabhpur in Serampore were held on the 18th June and 5th July, respectively, and are estimated to have been attended by about 10,000 and 40,000 persons, respectively. The Uttarayan and the Baruni *mèlas* held at Tribeni were each attended by 25,000 to 30,000 people. Sanitary and police arrangements were made by the Municipal Commissioners of Bansberia in consultation with the Civil Surgeon of Hooghly and the District Superintendent of Police.

228. As reported last year there was no regular fair in the district of Howrah except the weekly cattle market at Ulubaria. The sales of cattle during the year under report and the previous year are said to have been as follows :—

	1893-94.	1894-95.
Cows and bullocks ...	28,984	24,932
Goats and sheep ...	34,999	13,200

At none of these fairs was there any outbreak of disease or any unpleasant incident deserving of notice.

(*iii*) Pounds.

229. As in the previous year the cattle-pounds were administered by the District Boards and Municipalities. The subjoined statement shows the number of pounds and the amount of the collections made in the last two years:—

District.	Number of pounds in—		Collections—	
	1893-94.	1894-95.	1893-94.	1894-95.
1	2	3	4	5
			Rs.	Rs.
Burdwan	200	199	14,074	11,604
Birbhum	71	74	7.946	7,173
Bankura	34	34	2,227	1,638
Midnapore	125	127	12,037*	9,800
Hooghly	93	96	10,250	8,782
Howrah	38	41	2,466	2,449
Total ...	561	571	49,000	41,396

* This amount was shown as Rs. 12.280 in the last year's report ; the Collector's explanation has

It will be seen from the above statement that while the number of pounds increased by 10 during the year, the collections fell from Rs. 49,000 to Rs. 41,396, showing a decrease of Rs. 7,604, a result which is due to decreased competition amongst bidders in Birbhum, Bankura, and Hooghly, the realisation of a large amount of the balances of previous years in 1893-94 in Midnapore, and bad collections made by the Sadar and Katwa Local Boards in Burdwan.

230. Many of the pounds in Burdwan were inspected by the Magistrate and the Subdivisional Officers while on tour and by the Inspectors of Pounds. There was an Inspector of cattle-pounds and ferries for the Kalna and Katwa subdivisions and one for the Sadar subdivision of the Burdwan district. In Birbhum a Pound Inspector was employed during the year for the purpose of seeing that impounded cattle are properly housed, fed, and watered, and for realising pound rents. Sub-Inspectors of Schools were also required in this district to inspect pounds, and some of them were inspected by the District Magistrate himself. The Magistrates of Midnapore, Bankura, Hooghly, and Howrah have said nothing as to how pounds in their districts were inspected.

231. The new pound forms prescribed by Government circular No. 3T.M., dated 22nd May 1893, have proved successful in Burdwan, but the keeping up of the form correctly requires, Mr. Windsor thinks, more knowledge than is possessed by the illiterate persons who are generally left in charge of pounds. The question of acquiring permanent sites for pounds has been before the several Local Boards in Burdwan.

232. As regards pound collections, the Collector of Burdwan (Mr. Windsor) is not satisfied with the way in which they have been made by the Sadar and Katwa Local Boards. Mr. Vincent, Collector of Bankura, says that the pounds he had seen were in bad repair and not properly looked after by the Local Boards, and he doubts the expediency of making over pounds to these local bodies when they are manifestly wanting in energy. Mr. Grierson says that the mismanagement of pounds by the Local Boards in Howrah was disgraceful.

XXXIV.—SOCIAL AND POLITICAL INSTITUTIONS—STATE OF PUBLIC FEELING AND THE PUBLIC PRESS.

233. There are Hari Sabhas and Brahmo Sabhas in almost all the districts of the Division. In Howrah, Hooghly, and Midnapore Rate-payers' Assocations have been formed, having for their object the discussion and criticism of the proceedings of local bodies. Their suggestions are sometimes influenced by party spirit and so far have not been of much value. There are branches of the Indian Associations in the principal towns of Midnapore, but they show little sign of vitality, meeting only to elect delegates to the Congress. The institutions which deserve special mention are the Utterpara Hitakari Sabha, of which the object is the promotion of female education, the Hooghly National Muhammadan Association, which confines itself to the advancement of Muhammadan interests, and the Society for the Prevention of Cruelty to Animals at Howrah, which is reported to have worked well. The year was eminently one of plenty, peace, and contentment. Nothing of general importance occurred to call for any display of popular feeling, and nothing but local politics disturbed the placid surface of village life. The masses take little interest in what does not concern them directly. They possess no knowledge of the questions of the day, and care very little for them. Public feeling is confined to the educated classes, who generally take their opinions from the Calcutta newspapers specially written for their perusal, among which the principal are the *Statesman*, the *Hindu Patriot*, the *Indian Mirror*, the *Amrita Bazar Patrika*, the *Reis and Rayyet*, the *Bangabashi*, the *Dainik*, the *Sanjibani*, and the *Hitabadi*.

234. The papers published in the Division are—(1) the *Burdwan Sanjibani*, which is conducted by a pleader of the local bar and is usually loyal and moderate in its tone; (2) the *Bankura Darpan*, which is reported to have a wide circulation locally on account of the official information for which it claims a speciality; (3) the *Ulubaria Darpan*; (4) the *Darshak*; and (5) the *Chinsura Bartabaha*, both published at the latter place. These do not represent any particular section of the community, are loyal in their tone, and are parochial in their scope. Another paper published at Chinsura is (6) the *Education Gazette*, which is devoted chiefly to matters relating to the Education Department

and is subsidised by Government. The questions of general interest which engaged the attention of the Press of the Division during the year were (1) the Police Bill; (2) the Sanitary Drainage Bill; (3) the Imperial Budget; and (4) the re-imposition of the cotton duties.

235. The outward relations between the Hindus and the Muhammadans continued to be good, and the Division was free from those fanatical outbreaks which disturbed the peace of other parts of the province.

XXXV.—SUBORDINATE EXECUTIVE ESTABLISHMENT AND CHARACTER OF OFFICERS.

Character of officers.

236. Mr. Dutt has left the following remarks on record regarding the character of officers:—

"Among the young officers who acted as Collectors in the Division within the year under report I desire specially to bring to the notice of Government the excellent services of Mr. Duke, who acted at Hooghly. His supervision over all departments under him was close and unremitting, his enquiries and reports were thorough and careful, and his administration generally was as sympathetic and popular as it was able and sucessful.

"Among Subdivisional Officers Mr. Fischer, of Serampore, Mr. Webster, of Raniganj, and Babu Jagabandhu Bhuttacharji, of Contai, deserve special and favourable mention for their excellent work. They are all in charge of heavy subdivisions and have done their work with care, diligence and sound judgment.

"Among the Deputy Magistrates employed in the Sadar stations, I desire to mention the names of four officers. Babu Pyari Mohan Banorjea, employed at Hooghly, is an officer of long service, during which he has earned for himself the reputation of an able executive officer and a sound judicial officer. Babu Atul Chandra Chatterjea, who has been selected to be Personal Assistant to the Commissioner of Burdwan, is an able and experienced officer, thoroughly trustworthy, and much respected for his high personal character. Babu Mahanand Gupta, who has for years been employed in connection with drainage works, is an officer of great abilities, and has performed exceptionally good service in his special work; and the success attained in the work is mainly due to his care and industry. And, lastly, Maulvi Muhammad-ul-Nabi, employed in Hooghly, has distinguished himself by his careful, thorough and intelligent work in every department which is placed in his charge."

XXXVI.—CONDUCT OF ZAMINDARS.

237. The conduct of the zamindars was satisfactory. The Burdwan Raj estate continued to be managed with signal success by Raja Banbihari Kapur. The disagreements between the heirs of Maharani Horosundari of Searsole have not yet been settled. Differences arose between the Bengal Coal Company, and their raiyats in the Raniganj subdivision in consequence of an attempt on the part of the former to assess lakhiraj lands. The matter has, however, been settled. Raja Ram Ranjan Chukerbutty Bahadur, of Hetampur, in the district of Birbhum, maintains his character for moderation and loyalty. The mohunt of Mullarpur, who died in April last, is reported to have been harsh in his dealings with his tenants. In the Rampur Hát subdivision the agents of some of the non-resident zamindars are said to have abused their power. There are no large zamindars in Bankura, and the Collector has recorded no remarks under this head. In Midnapore the relations between Messrs. Watson and Company and their raiyats are reported to have much improved. There is nothing special to notice in regard to the zamindars of the districts of Hooghly and Howrah except that the disputes between the rival claimants to the mohuntship of Tarakeswar gave rise to disturbances during a part of the year.

XXXVII.—GENERAL REMARKS.

238. Having taken charge of the Division after the close of the year, I have little to say under this head from my own experience. As stated elsewhere, the

year was one of good crops, and consequent improvement in the material condition of the people. The effects are apparent in many branches of the administration. There was a decrease in crime. The number of cultivators' holdings transferred fell from 4,333 to 4,013, but the number of documents registered sensibly increased. The allotments, amounting to Rs. 9,000, made to the districts of the Division for advances under the Agriculturists' Loans Act remained undistributed with the exception of Rs. 250. A decrease in ordinary loan transactions is indicated by a decrease in the revenue from non-judicial stamps, while an increase in the sale of revenue stamps denotes the development of trade. The attendance at fairs was larger during the year than in the year before. The revenue from tari advanced from Rs. 2,35,082 to Rs. 2,57,627. The marked increase in the number of commutation cases under section 40 of the Tenancy Act shows how valuable the produce of the land has become in the eyes of the cultivator.

239. Side by side with these signs of material prosperity there is a melancholy record of death and suffering among the people during the year. The attendance at the dispensaries increased largely. The malarial fevers proverbially prevalent in the Division raged with violence in all the districts, and severe outbreaks of cholera were reported from many parts, the result being a marked increase in the death-rate which affected alike rural and municipal areas, and will cause 1894 to be remembered as a very unhealthy year.

240. Judging from statistics the administration of the Division appears to have been successful. The matters which require special attention at the hands of District Officers during the current year are the resumption of chaukidari and pharidari lands and the reorganisation of the village police on a thoroughly sound basis by the substitution of Act VI chaukidars, in place of men under the old Regulation, the careful observance of the new tauzi procedure, the improvement of sanitation in municipalities, the more efficient discharge of their duties by Local Boards, and the successful working of the village unions recently established.

APPENDIX B.

Statement showing the "Up" and "Down" Import and Export of traffic of the several stations in the district of Burdwan, carried by rail, during the Year ending 31*st March* 1895.

Baidyabati.

RESOLUTION ON THE REPORT OF THE BOARD OF REVENUE ON THE ADMINISTRATION OF THE INCOME TAX DEPARTMENT FOR THE YEAR 1894-95.

FINANCIAL DEPARTMENT—SEPARATE REVENUE.

Darjeeling, the 29th August 1895.

RESOLUTION—No. 233T.—F.

Read—

The Report of the Board of Revenue on the financial results of the Administration of the Income-tax for the year 1894-95.

The Report, which has been punctually submitted, is a record of good and steady improvement in the administration of the income-tax throughout the Province. No administrative change of any importance was effected during the year in the working of the Income-tax Act.

2. The following statement compares the financial results of the income-tax during the last two years:—

	1893-94.	1894-95.
	Persons.	Persons.
Number of persons originally assessed, excluding Government servants.	107,741	108,765
Number of persons finally assessed, excluding Government servants	105,476	106,975
Number of persons finally assessed, including Government servants	113,770	115,583
Number of assessees, including Government servants, who paid the tax within the year	110,483	112,874
	Rs.	Rs.
Final demand of income-tax for the current year	43,51,144	44,87,280
Final demand, including penalties, fines, and arrears of previous years	46,66,032	47,20,384
Collections of income-tax within the year ...	41,97,022	43,95,230
Gross receipts	43,48,453	45,61,118
Charges	1,76,272	1,75,703
Percentage of charges on receipts ...	4·1	3·9
Net revenue	41,72,181	43,85,415

The net revenue shows an increase of 5·1 per cent. against an increase of 3 per cent. in the previous year. The gross receipts, including advance payments and excess collections, and making allowance for various adjustments, credited to Government at the close of the year amounted to Rs. 45,61,118, of which Rs. 44,20,612 represent the receipts on account of the current demand for the year.

3. The increase in the final demand occurred in every district, except Champaran, Tippera, Dacca, Chittagong, Noakhali, Darbhanga, Singhbhum, Rajshahi, Hooghly, Jalpaiguri, Bankura, Jessore, the Sonthal Parganas, and Muzaffarpur. The decrease in Champaran and Hooghly is attributed to the diminution of income of certain assessees who had suddenly acquired a large access of income in the preceding year. In Tippera, Chittagong, and Noakhali the decrease was owing to the transfer of payment of income-tax of the employés of the Assam-Bengal Railway to Shillong. Various causes are assigned for the decline in the other districts, which do not call for special notice.

4. *Demand, collections, and balances.*—The following statement shows the original demand, the revised demand, and the percentage of collections from assessees, exclusive of Government servants:—

Year.	Original number of assessees.	Revised number of assessees.	Original demand.	Final demand after revision.	Amount of final demand collected.	Percentage of final demand collected.
1	2	3	4	5	6	7
			Rs.	Rs.	Rs.	
1893-94	107,741	105,476	39,90,291	38,88,026	37,03,904	96
1894-95	108,765	106,975	40,72,041	39,72,351	38,80,301	97

The outstanding balance at the close of the year 1894-95, including penalties and costs, amounted to Rs. 1,62,002, against Rs. 2,66,987 at the close of 1893-94 a creditable result which the Lieutenant-Governor has noticed with satisfaction. Of this balance, Rs. 54,958 are reported to be good and under realization. Rs. 48,239 doubtful, and Rs. 58,805 bad and irrecoverable.

5. The districts which succeeded in collecting the entire demand within the year, were Bogra, Noakhali, Patna, and Malda, closely followed by Puri, Pabna, Tippera, and Chittagong. In the following districts the collections on account of the current and arrear demand were below 95 per cent :—

Manbhum ...	... 94·8	Darbhanga	... 89·5
Dinajpur ...	... 94·7	Khulna ...	... 87·7
Calcutta ...	... 91·5	24-Parganas	... 76·5
Muzaffarpur	... 91·3	Singhbhum	... 75·6

With the exception of Dinajpur, the same districts also failed to attain the prescribed standard in the preceding year. Three of these districts—Singhbhum, 24-Parganas, and Darbhanga—further failed to collect 95 per cent. of the final demand of the current year on account of tax only. The explanation given in the report of short collections cannot in all cases be accepted as satisfactory, and the Lieutenant-Governor must again express the hope that greater care and vigilance will be exercised in future in this important branch of the work. It is observed that the low percentage of collections in the 24-Parganas is again this year attributed in some measure to heavy arrears, chiefly due from the European employés of certain local mills, who, notwithstanding the attempts made by the Deputy Collector to explain the law to them, persist in deferring the payment of their dues till after the expiration of the year or quarter. The Collector must again communicate with the defaulters, and, if necessary, enforce stringently the provisions of the law in their case.

6. *Assessments.*—The number of villages (including streets in Calcutta) visited by the 49 assessors in the Province was 68,461, against 71,534 in 1893-94. The decrease is for the most part more nominal than real, being due to the fact that in some districts villages which were not actually visited, but regarding which enquiries were made in the neighbourhood, were formerly returned as having been visited. The number of persons finally assessed was 106,975, against 105,476 in 1893-94, showing an increase of 1·4 per cent. Gaya shows the largest increase (278 persons), followed by Dinajpur, Midnapore, Pabna, Dacca, and Chittagong, which show an increase ranging from 183 to 102. In a few districts there was a falling off, but in no district, save in Calcutta (208) and Tippera (184), did it exceed 70. In Calcutta, which had shown an increase in 1893-94, the cause of decrease during the year under review has not been explained; in Tippera, scarcity and the transfer of payment of income-tax of certain railway employés to Shillong are said to be responsible for the falling off.

7. *Objections.*—The following table gives statistics of objections to assessment :—

YEAR.	Number originally assessed, excluding Government servants.	Number of objections.	Percentage of objections.	Number of successful objections.	Percentage of successful to total number of objections, column 5 to column 3.
1	2	3	4	5	6
1893-94 ...	107,741	12,269	11·4	4,593	37·4
1894-95 ...	108,765	10,635	9·8	3,486	32·8

The percentage of objections to assessments was again highest in Gaya (35). Puri shows slightly better results, being 20·5 against 23 in 1893-94. Bankura shows a percentage of 23·7. The percentage of successful objections exceeded 40 in Calcutta (53·2), Gaya (45·6), Bankura (43·4), 24-Parganas (41·3), and Saran (40·05). The Lieutenant-Governor is glad to acknowledge the improvement on the results of the previous year, when ten districts had more than 40 per cent. of successful objections, and five of these had more than 50 per cent.

8. *Incidence of the tax.*—The average incidence of the tax in the whole Province (excluding the tax on interest of Government securities and the salaries of Government officials) was Re. 1 to every 17·9 persons, against 18·4 persons in the preceding year. Outside Calcutta, the average incidence was Re. 1 to 34·9 persons, against Re. 1 to 35·7 in 1893-94. Darjeeling continues to show the highest mufassal average—Re. 1 to every 5 persons; while the incidence was lowest in Singhbhum—Re. 1 to 92 persons. The average incidence in Calcutta was Re. 1 to every ·4 persons, and 1 person in every 39 was assessed to the tax. The proportion of persons assessed for the whole of Bengal was 1 to 665, against 1 to 674 in the previous year.

9. The following statement shows for the year under report and for previous years, the distribution of the income-tax and of the other direct taxes which preceded it as between Calcutta and the rest of the province:—

Years.	Act imposing tax.	Number of Persons assessed in—			Amount of tax realised in—		
		Calcutta.	Rest of province.	Total of columns 3 and 4.	Calcutta.	Rest of province.	Total of columns 6 and 7.

* Figures not available.
† Exclusive of the tax on salaries, &c., recovered by the Accountant-General and the tax on the interest of Government securities

The figures show that out of the total collections, nearly one-half (48·9 per cent.) is contributed by Calcutta alone, and that, as was observed last year, the yield of the tax, both in Calcutta and in the mufassal, continues to increase.

10. *Coercive measures.*—The following table exhibits the main facts in connection with the coercive measures which had to be taken for the realization of the tax:—

Year.	Number of persons finally assessed.	Distress warrants.		Cases of distraint.		Cases of sale.	
		Number.	Percentage to column 2.	Number.	Percentage to column 2.	Number.	Percentage to column 2.
1	2	3	4	5	6	7	8
1892-93	103,894	5,569	5·4	2,460	2·4	362	·3
1893-94	105,476	5,920	5·6	2,290	2·2	288	·3
1894-95	106,975	5,036	4·7	1,934	1·8	337	·3

These figures show an improvement on the results of previous years.

The proportion of warrants issued to the number of persons assessed was above 10 per cent. in the districts of Jessore, Singhbhum, Khulna, and 24-Parganas. The first three districts, which also showed a high percentage in

the preceding year, show some improvement. In eight districts no sales took place, while they were most numerous in Jessore, Gaya, and Rangpur. In Calcutta distress warrants were issued in 736 cases, against 1,499 in the previous year, and in no case was sale found necessary.

11. The amount of tax collected under section 9(2) of the Income-tax Act, which permits private employers to undertake the collection of the tax from their employés on receipt of a commission from the Government, was Rs. 2,68,234, against Rs. 2,66,584 in the previous year. The number of companies, &c., who entered into agreements under this section to collect the tax fell from 307 to 303. It was observed in last year's Resolution that the Board were inclined to recommend an increase of the commission allowed, in order to afford greater inducement to the companies to enter into such agreements, but they have since abandoned their proposal. This special provision of the law cannot be expected to work with advantage where the number of employés liable to taxation is very small.

12. *Expenditure.*—The total expenditure for the year amounts to Rs. 1,75,703, against Rs. 1,76,272 in the previous year. This decrease, coupled with the large increase in collections, is very satisfactory, and does credit to the officers engaged in the administration of the Income-tax Act.

13. The system of payment of income-tax by money-order continues to gain in popularity. No serious cases of embezzlement were discovered during the year. Five persons were convicted for personating assessors and illegally collecting the tax. Under an order issued in October last, income-tax assessors are required to learn the numerals of any native language in which accounts are usually kept in the district in which they are employed so as to enable them to form fair estimates of the income of traders whose accounts are kept in that language, and it is reported that all but a few have complied with these orders.

14. The names of the Deputy Collectors specially reported by the Board as having done good service, will be communicated to the Appointment Department.

15. On the question of popular feeling in regard to the income-tax there is nothing new to be said. It is necessarily unpopular, but among the classes which are enlightened enough to appreciate the financial position and prospects of the country, the tendency is to recognise it as an unpleasant but inevitable necessity. If the minimum income could be raised to Rs. 1,000, the unpopularity of the tax would be almost entirely removed.

By order of the Lieutenant-Governor of Bengal,

H. H. RISLEY,

Secretary to the Government of Bengal.

RESOLUTION ON THE REPORT ON THE ADMINISTRATION OF THE POLICE DEPARTMENT FOR THE YEAR 1894.

RESOLUTION—No. 4843J.

POLICE.

Dated Calcutta, the 31st August 1895.

READ—

The Report on the Administration of the Police Department for the year 1894.

Read also—

The Report for the year 1893, and the orders of Government recorded thereon.

MR. E. R. HENRY held the office of Inspector-General for nine months during the year; Mr. A. H. Giles, Deputy Inspector-General, acting during his absence, for three months, on privilege leave. The present Report, due on the 1st July, was received by Government on the 8th July. The reports from Divisional Commissioners, which were due in the Inspector-General's Office on the 20th March, were received within that month, with the exception of those from the Commssioners of the Presidency and Orissa Divisions, which were not received till the 9th and 15th of April, respectively.

2. *Constitution of the Force.*—The sanctioned strength of superior officers at the close of the year was 77, including eight probationers. The sanctioned strength of the subordinate officers and men was 23,142, as compared with 22,739 in the previous year; the difference was due to an increase of 77 Sub-Inspectors, 264 constables, and 108 town chaukidars, and a decrease of 46 head-constables.

3. *Expenditure.*—The following table has been prepared by the Inspector-General of Police as purporting to show the actual expenditure for the financial year 1894-95, under each of the different heads, as compared with that of the preceding year, on the Police under his authority, excluding those in the Chittagong Hill Tracts and the South Lushai Hills; but the figures for 1894-95 are subject to further correction when the Accountant-General has finally closed the accounts of that year:—

Serial No.	Heads of charges.	Actual expenditure for 1893-94.	Actual expenditure for 1894-95.	Increase.	Decrease.
1	2	3	4	5	6
		Rs.	Rs.	Rs.	Rs.
1	Inspecting Agency	1,51,894	1,72,231	20,337	...
2	Pay of District and Assistant Superintendents ...	4,71,921	5,21,470	49,549	...
3	Pay of Executive Police and Establishments, with good-conduct pay and batta allowance, &c. ...	28,77,368	30,64,673	1,87,305	...
4	Travelling Allowance	1,01,598	92,886	...	8,712
5	Fixed Boat Establishment	56,671	57,679	1,008	...
6	Special, Regular and Contract Contingencies ...	5,71,581	5,12,035	...	59,546
7	Government contribution to the Municipal and Railway Police	1,37,290	1,48,362	11,072	...
8	Bengal Military Police	31,413	46,140	14,727	...
	Total ...	43,99,736	46,15,476	2,83,998	68,258
	Net increase ...	...	...	2,15,740	...

4. The largest increase is under the head "Pay of Executive Police and Establishment, &c.," and is due to the expenditure involved in gradually giving effect to the recommendations of the Police Redistribution Committee.

The following were the recommendations of this Commission and the estimated annual cost of giving effect to each of them:—

		Rs.
1.	To raise the pay of constables from Rs. 6 to Rs. 7 in the five Divisions of Burdwan, the Presidency, Rajshahi, Dacca, and Chittagong	49,098
2.	To grant recruits free kits on joining	43,566
3.	To increase the clothing allowance	21,219
4.	To discontinue deductions from the men's pay towards a Superannuation Fund	57,534
5.	To grant special allowances to a prosecuting agency ...	21,120
6.	To grant allowances for the charge of a police-station ...	1,53,240
7.	To grant pony allowances to investigating officers ...	25,020
8.	To increase the number of Sub-Inspectors by reducing that of head-constables	2,82,484
9.	To increase the number of constables	50,343
10.	To reorganise the non-investigating police	30,338
	Total ...	7,33,962

Complete effect has already been given to the first five recommendations as well as partial effect to the remainder except the seventh, which the Inspector-General of Police desires to leave in abeyance for the present. The substitution of Sub-Inspectors for head-constables as investigating officers is to be gradually carried out in ten years by an increased annual allotment of Rs. 28,206. Although the burden imposed on provincial revenues by the large increase in expenditure which has been sanctioned, and which will again show a large increase during the current year, is very great, the Lieutenant-Governor has no doubt that it was unavoidable, and is calculated to produce most valuable benefits to the country by the improvement in police administration. The status of the police has been raised, and the quality of the force correspondingly improved by the increase which has been made in their emoluments, and in the character and position of the officers by whom local investigations are conducted.

5. *Reduction of investigating centres and recruitment of investigating officers.*—Thirty-two investigating centres were reduced during the year, in furtherance of the reorganisation recommended by the Redistribution Committee. Including 145 centres already reduced, 177 centres have been abolished out of 188 recommended for abolition. The Inspector-General observes that some of the remaining few will have to be retained. The system of recruiting the investigating staff by competitive examination, started in 1893, was continued during the year, and 173 candidates were passed at the two examinations held. Mr. Henry says of these officers: "It may be anticipated that in some classes of cases they will not prove as successful detectives as the men they are replacing, for their education and traditions will make them unwilling to adopt devices and methods of working of questionable legality, not wholly unknown to an older generation of police officers. Their obvious failing is lack of experience—a defect time will remedy. They are better educated than their predecessors, and for the most part come from a more respectable section of middle class native society. The course of instruction they undergo will prove invaluable in fitting them for the duties they have to discharge on being posted to districts." They receive a three-months' course of instruction in the Police Code, Law, and Drill. The classes have hitherto been held at Chinsurah and Bankipore, but will in future be held at Bhagalpur, where a Police School has been fitted up for the purpose.

6. *Working of the Town Police.*—Changes made in the town constabulary during the year resulted in a net increase of 108 town chaukidars and a decrease of 75 constables, at an increased cost of Rs. 1,176 per annum. The object of this system is to ensure efficiency, as well as economy, by the appointment of local and acclimatised men, drawing less pay than the constabulary, and with no claim to pension. In districts where wages have risen, little saving in annual expenditure can be effected, but there will be a reduction in the pension charges. The town beats have been revised in several districts, with the object of enabling the watch and ward chaukidars to patrol in pairs, and excellent results are shown to have followed when the system was properly supervised. Twenty burglars in Patna City, 3 in Bankipore, and 1 in Muzaffarpur were

arrested *flagrante delicto* by the men on duty. In the matter of street lighting, the Inspector-General reports that little has been done. In 36 districts, some 667 additional street lamps were erected; but almost everywhere the side streets and lanes are still unprotected. Some progress has been made in the Patna Division, where Mr. Forbes has succeeded in inducing Municipal Commissioners generally to contribute money to supply the police lanterns with oil. As a rule, however, municipalities have not come forward as readily as they should have done in this matter.

7. *Rural Police.*—The further development and improvement of the village police has continuously occupied the attention of Government during recent years, and important changes have been embodied in Act I (B.C.) of 1892 and in separate orders. The object of these changes has been to treat the rural police as a branch of the regular constabulary, to free them from the local fetters which have to a great extent checked their value as an arm of the administration, to encourage a better class of men to enlist in their ranks, to ensure the prompt and full payment of their salaries, and to bring them under the more immediate supervision of the higher police officials. The result of these measures has been the subject of special reports from Divisional Commissioners, who have been able generally to testify to their success.

8. It appears that the total number of chaukidars in the province during the past three years was as follows:—

Class of chaukidars.	1892.	1893.	1894.
Under Act VI of 1870	96,787	101,517	109,870
Under Regulation XX of 1817, salaried ...	53,665	48,696	41,366
Ditto ditto chakran chaukidars ...	18,629	17,911	17,003
Total ...	169,081	168,124	168,239

This statement shows that considerable progress has been made in extending the operation of the Chaukidari Act. Out of 58,369 Regulation chaukidars, no less than 29,913, or more than half, are in the Burdwan Division, where sustained efforts are now being made in all the districts to extend the provisions of Act VI of 1870 to all places to which it is applicable. In the Presidency Division, Regulation chaukidars are confined to a corner of the Murshidabad district, while in the Chittagong, Dacca, and Rajshahi Divisions the provisions of the Chaukidari Act of 1870 have been completely extended. In the Patna Division, Mr. Forbes reports that during the last two years the number of Regulation chaukidars has been decreased by 50 per cent., mainly owing to the energetic measures adopted in the Saran and Shahabad districts. In the Bhagalpur district it is reported that the further extension of Act VI is called for, as the jaghir-holding chaukidars rarely reside within their beats. In Chota Nagpur a special Act (V of 1887) is in force, but there are still 1,357 chaukidars under Regulation XX of 1817. As regards the Orissa Division, the expediency of introducing Act VI of 1870 is still under the consideration of Government in connection with the settlement now proceeding.

More attention has been paid to the important matter of encouraging deserving chaukidars by the grant of rewards, the number of chaukidars who received rewards having risen from 1,444 in 1892 to 2,622 in 1894, and the amount so expended from Rs. 7,644 to Rs. 12,545. The rules issued by Government during the year for the better administration of the District Chaukidari Reward Fund are calculated to lead to further improvement in this respect. The attempts made to recruit the village watch from a better class of society have only met with partial success, but in some districts of the Dacca Division, where the District Officers have exercised a zealous supervision, and the Commissioner, Mr. Luttman-Johnson, has devoted much trouble to the matter, encouraging results have been attained. The reports received lead the Lieutenant-Governor to think that the inherent repugnance on the part of the better classes to perform the duties of chaukidar has been somewhat exaggerated, and justify the opinion that such scruples are chiefly based upon causes which can be removed, and may, to a great extent, be overcome by the exercise of a more personal interest in the condition of the chaukidars. In Rajshahi sufficient attention has not been devoted to the prompt payment of salaries and to the

Government orders in this connection. It was found necessary in August last to lay down a rule insisting on the personal attendance of panchayats at police-stations, and requiring them to pay there the salary of the chaukidar in full in all cases in which the statistics of the previous year show that distress warrants had been issued for the recovery of salaries from the panchayat in default. There is no harshness in the enforcement of this rule which is likely to operate rather as a kindness than as a penalty. It is intended to obviate the necessity of attachment warrants, and if the panchayats dislike personal attendance, they are always in a position to know that they can avoid it by punctual payment to the chaukidar in his village, and by sending in the salary to the police-station, either by deputy or by the hands of the chaukidar himself. In the Nadia district it is reported that over 500 chaukidars do not reside within the limits of their beats—a fact that must render them of little use for purposes of watch and ward. In Jessore two police officers were punished for employing chaukidars upon menial duties, but the orders of Government in this matter are reported to have generally been strictly observed.

Mr. Henry draws attention to the disadvantage which the village police are under in having no immediate superiors or headmen, and suggests that the system which has been introduced in some districts, of appointing a circle chaukidar or dafadar for groups of villages, should be widely extended. The dafadar would be responsible to the station police for the due performance of chaukidari work within his circle. This suggestion has the support of Government, and might be effectively adopted in connection with the establishment of Union Committees, the area of a dafadar's jurisdiction being made conterminous with that of the Village Union. Elsewhere advantage should be taken of the provisions of Act I (B.C.) of 1892 to group together considerable areas as chaukidari villages having a population of about 5,000, with about 9 or 10 chaukidars under one dafadar.

9. *Additional Police.*—Additional police were entertained in four cases in Tippera and Nadia to preserve the peace in some disturbed villages, in Saran to prevent the recurrence of an anti-kine-killing agitation, and in Monghyr to prevent obstruction on the line of railway. The force of extra police at Krokirchar, mentioned in the report for last year, was retained with a slight increase; while that in the Darbhanga district was reduced. The additional police shown in last year's report as quartered in the Murshidabad, Patna, Gaya, and Shahabad districts, were removed during the year.

10. *Special constables.*—Special police were employed during the year in 22 instances, in 16 districts, to the number of 449 men, as compared with 594 in 1892 and 993 in 1893. The Lieutenant-Governor notices that in 10 of these cases the police were entertained for too long a period, and he regards the enrolment of 16 members of panchayats in the Faridpur district, for neglecting to appoint chaukidars, as altogether wrong in principle, and opposed to the orders on the subject of the appointment of special constables which have recently been issued by Government. It has been explained that it is desirable to select leading and influential men, because their authority is likely to be respected by the mass of the population, and that from this point of view it would be reasonable to appoint the ringleaders of contentious factions to be special constables during a period of excitement, as their presence while employed in patrolling the streets or on other duties imposed on them would show that they were not engaged in fomenting the disturbances, but were using their influence to repress them. In regard to the duration of the appointment, it has been pointed out that special constables should only be appointed to meet cases of sudden emergency, and therefore only for the time during which the special cause of disturbance exists, *e.g.*, during a religious festival or the prevalence of a flood which may lead men to cut an embankment which it is essential to preserve. In every case in which a Magistrate finds it necessary to appoint special constables, he is directed without delay to submit to the Commissioner of the Division a report of the fact, showing the number and class of persons appointed, and the period for which the appointment is made. Special constables should not, however, be appointed in the case of disputes regarding rights in land which have to be settled in the civil court. If in such cases the locality is in a disturbed and dangerous condition and the ordinary preventive sections of the Criminal Procedure Code are found to be insufficient for the maintenance of peace, it

may be necessary to appoint additional police under section 15 of Act V of 1861, but not special constables under section 17 of the Act. If the disturbance continues long, application should be made for a settlement and record of rights under the Bengal Tenancy Act, as the quickest and best way of settling the dispute.

11. *Military Police.*—The three companies of Military Police, each 100 strong, with head-quarters at Dacca, Dumka, and Bhagalpur, were maintained at their usual standard of efficiency. Their conduct throughout has been excellent, and their discipline and smartness are creditable. Detachments from the Dacca and Bhagalpur companies were sent to quell a disturbance in the Nayagarh State in November 1894—a service which they accomplished effectively in spite of the fact that 75 per cent. of the men suffered in health. Half of the Dumka company remained throughout the year, and half of the Bhagalpur company for part of the year, at Bankipore, in connection with the anti-kine-killing agitation in the Patna Division. During the year medals and clasps were distributed to men of the Dacca company for their services in the Lushai expedition of 1891-92. The formation of another company of Military Police for Gnatong was sanctioned during the year.

12. *Drill and organisation of Reserves.*—The district police reserves were thoroughly organised, and established upon a footing distinct from the ordinary reserves. They are now not used for escorts or guards, except on emergency and under written orders of the District Magistrate. The whole of the Cuttack and Puri district reserves were in September deputed to Nayagarh, to assist in quelling the disturbances there.

13. *Casualties.*—The following figures show the details of casualties during the past three years:—

	1892.		1893.		1894.	
1. Retirement on pension or gratuity	420 or	1·8 per cent.	412 or	1·74 per cent.	465 or	1·93 per cent.
2. Resignation	722 „	3·1 „	728 „	3·09 „	889 „	3·70 „
3. Dismissal	586 „	2·5 „	624 „	2·66 „	615 „	2·56 „
4. Discharge	125 „	·5 „	220 „	·93 „	161 „	·67 „
5. Desertion	51 „	·2 „	42 „	·18 „	47 „	·19 „
6. Death	551 „	2·4 „	455 „	1·93 „	559 „	2·33 „
Total ...	2,455 or	10·5 „	2,481 or	10·5 „	2,736 or	11·4 „

Casualties during the year amounted to 11·4 per cent. of the sanctioned strength, showing an increase of ·9 per cent. over the previous year's figures, chiefly under the head "Resignation." This increase is ascribed by the Inspector-General to the fact that service in the lower grades of the police is unpopular. The figures have not, however, varied much during the past five years, and resignation has for several years accounted for the largest number of casualties.

14. *Torture and extortion by the police.*—The record of offences under this class is again inconsiderable. The number of cases of torture reported was 15, compared with 17 in 1893 and 32 in 1892. Of these, no less than 4 cases are reported from the district of Bankura. Ten cases were pronounced false, in 4 cases the police officers concerned were discharged, and in 1 case a conviction was had in the lower court, but was set aside on appeal. It is satisfactory to learn that not a single case was ultimately proved. The number of cases of extortion reported rose from 70 in 1893 to 127 in 1894, but the Inspector-General states that only 83 were really charges of extortion, the remaining 44 cases falling under other sections of the Penal Code. Of the 83 charges of extortion, 14 resulted in conviction, 32 in discharge or acquittal, 4 were not tried, 10 were dismissed, and 23 shown as false. Eleven prosecutions under section 211, Indian Penal Code, were instituted, against 14 in the previous year, 3 of which ended in conviction and 6 in acquittal, 2 remaining undecided at the close of the year. Nearly one-fourth of the total number of reported cases of extortion, and all the 44 cases against the police under other sections of the Code, were instituted in the district of Mymensingh. Most of these cases are reported to have been false, and the Inspector-General of Police would seem to have good ground for his opinion that there was something like a combined effort made in this district to terrorise the police. "False complaints were encouraged by the damaging remarks made by Deputy Magistrates against the police—remarks too often based on mere suspicion," and it was not till Mr. Earle took the matter up seriously, and placed all cases of this kind in the hands of the Joint-Magistrate,

dacoity. In another case a writer-constable of Muzaffarpur was sentenced to one year's imprisonment for having demanded money from an informant.

15. *Punishments.*—The following table shows the number of punishments inflicted on members of the force during the past three years:—

YEAR.	JUDICIAL CONVICTIONS UNDER PENAL CODE.			UNDER ACT V.			DEPARTMENTAL PUNISHMENTS.		
	Number.	Percentage of officers.	Percentage of men.	Number.	Percentage of officers.	Percentage of men.	Number.	officers.	Percentage of men.
1	2	3	4	5	6	7	8	9	10
1892	245	·7	1·0	120	·1	·5	4,223	41·0	
1893	237	·4	1·0	126	·3	·5	4,873	42·4	16·7
1894	276	·3	1·2	133	·08	·6	4,638	36·7	16·2

It will be seen that the number of convictions under the Penal Code and the Police Act has increased, while departmental punishments have slightly decreased in number. About 40 per cent. of head-constables and 16 per cent. of constables were punished during the year. These figures, as the Inspector General remarks, are very unsatisfactory, and the enquiries made during the year have shown that District Superintendents frequently exercise their powers with but little discrimination. The Inspector-General considers that punishments were over-numerous and fines unduly large. In connection with the subject of punishment, Mr. Henry has adverted to the quarterly statements submitted under the orders of Government of the comments made by judicial officers on the conduct of the police. "In some instances," Mr. Henry says, "I have had to submit to Government remarks made by both judicial and executive officers, condemning the police in unmeasured terms, although the condemnation was not warranted by any facts elicited, and was based upon an interpretation of motives and conduct which would not commend itself to an impartial or well-balanced judgment. Such comments must necessarily prove demoralising to police officers, and make them dread the fearless discharge of their duty, which may lead to their being placed in a legal pillory from which extrication is a matter of difficulty and uncertainty." Sir Charles Elliott agrees with these remarks. In one case a Sessions Judge remarked of a police officer that "he must either be very corrupt or very stupid. In either case he deserves severe punishment." His Honour is afraid that this is the keynote of the principle on which the police are often punished. It should be unnecessary to point out that a police officer does not deserve punishment for being stupid, but, if any one does, it is the superior officer who appointed or promoted him, although he was stupid. So long as orders are passed in this spirit, there is no hope of having a really efficient police. Such a system of punishment only cows them, and makes them lie to cover their mistakes: it does not teach them. Again in one district he found that 39 Sub-Inspectors, 57 head-constables and 8 constables had been punished in 1894 for "bad office work," which is an instance of a tendency on the part of many officers to treat the shortcomings of the police in quite a different way from that in which the shortcomings of the establishment of any other department are considered. Another instance came to his notice in which a Court Sub-Inspector and a clerk of the Magistrate's office had shown neglect in not bringing a case in which the witnesses were present: the clerk got off with a reprimand, but the Magistrate insisted on the Sub-Inspector being fined. In the Divisional Reports of last year Mr. Nolan and other Commissioners took up the same line and protested against the severe and unreasonable way in which punishments are inflicted on police officers for slight faults, delays in sending up returns, mistakes in reports and so forth, to an extent which is unknown in any other branch of Government service. The Lieutenant-Governor looks to the Inspector-General and his Deputy Inspectors-General to enforce these views, and to examine carefully, when inspecting the offices, whether they are carried out or not.

16. *Conduct of the Police.*—Mr. Henry has dwelt at some length upon the conduct of the police during the year, and has quoted the opinions of several of the most experienced executive officers. Mr. Forbes, Commissioner of the Patna Division, while admitting that in their detective capacity the police have shown little progress, gives them credit for their executive work during the last two trying years in Bihar. He agrees with the Magistrate of

petition Government against the removal of a police-station from their neighbourhood, instead of rejoicing at being freed from police oppression; and he summarises his own views on the subject in the following words: "Few complaints of the inefficiency of the police in discharging their executive duties are received, and I cannot help expressing regret that while censure is so often meted out lavishly, and not always justly, the good work that they do is not as ungrudgingly recognised."

17. *Inspections.*—The Inspector-General and his two Deputies spent a full period of time on tour, but it is observed that whereas, under the orders of Government, the head-quarters of every district ought to be inspected during the year, no inspection was made of the following:—Cuttack, Balasore, Puri, and Hazaribagh. Among District Superintendents of Police, insufficient inspections were made by Mr. Havelock and Maulvi Zinnat Hussain Khan (Birbhum), Mr. Cowie (Bankura), Mr. Wilcox (24-Parganas), Mr. Kemp and Mr. Green (Khulna), Mr. Birch (Darjeeling), Mr. Bertelsen and Mr. Orr (Dacca), Colonel Ramsay and Mr. Faussett (Muzaffarpur), Mr. Meares and Mr. Savi (Purnea); while Mr. Fasson and Mr. Fullerton only spent 16 and 10 days, respectively, on tour in Bogra. Mr. Masters inspected the Bogra office in August, but did not draw attention to Mr. Fasson's neglect and indolence; if he had, Mr. Fullerton, who succeeded Mr. Fasson, would probably have done better.

18. *Crime.*—The following table shows the incidence of crime in Bengal arranged by Divisions:—

DIVISIONS.	Police.	Population according to last census.	Cases of cognizable crime—*vide* columns 4 and 6 of statement A, Part I, *minus cases* refused under section 157, C.P.C., and cases under serial No. 57 in that statement.		Proportion of police to population.		Proportion of police to cases of cognizable crime investigated.				Proportion of cases of cognizable crime investigated to population.			
	1894.		1893.	1894.	1894.		1893.		1894.		1893.		1894.	
1	2	3	4	5	6		7		8		9		10	
					Policeman.	Persons.	Policeman.	Cases.	Policeman.	Cases.	Case.	Persons.	Case.	Persons.
Burdwan ...	3,545	7,688,818	10,121	10,281	1 to	2,168	1 to	2·7	1 to	2·9	1 to	759	1 to	747
Presidency ..	3,584	7,853,568	10,213	10,540	1 "	2,191	1 "	2·9	1 "	2·9	1 "	768	1 "	744
Rajshahi ...	2,593	8,019,187	10,544	10,669	1 "	3,092	1 "	4·2	1 "	4·1	1 "	760	1 "	751
Dacca ...	2,273	9,844,127	11,794	14,119	1 "	4,330	1 "	5·1	1 "	6·2	1 "	871	1 "	697
Chittagong (excluding Chittagong Hill Tracts).	1,107	4,052,795	4,552	4,827	1 "	3,688	1 "	4·2	1 "	4·3	1 "	896	1 "	845
Patna ...	4,586	15,811,014	17,763	19,671	1 "	3,447	1 "	3·9	1 "	4·2	1 "	890	1 "	803
Bhagalpur	2,209	8,582,490	10,289	11,447	1 "	3,885	1 "	4·8	1 "	5·1	1 "	834	1 "	749
Orissa ...	1,504	4,047,352	5,338	5,476	1 "	2,691	1 "	3·4	1 "	3·6	1 "	758	1 "	739
Chota Nagpur ...	1,612	4,628,792	5,818	5,708	1 "	2,871	1 "	3·7	1 "	3·5	1 "	795	1 "	816

From another statement which the Inspector-General has inserted in his report, it appears that the proportion of police to population is lower in Bengal than in the other principal provinces of India, while the comparative figures for 1893 show that the proportion of police to cognizable crime was lower than in the North-Western Provinces, the Panjab, Bombay, Madras, and the Central Provinces. The proportion of cognizable crime to population is also lowest in Bengal, viz., one case to every 820 persons. These figures, however, are of academic interest mainly, and it cannot be deduced from them that the strength of the Bengal Police is insufficient for the task it has to perform. For a consideration of that question the character of the criminal population is the principal element.

19. *Police tests.*—The following figures show the working results during the past three years as disclosed from the principal prescribed tests:—

		Percentage of cases investigated by police to cases reported (*a*1).	Percentage of police cases ending in conviction to cases decided (*a*4).	Percentage of persons convicted in police cases to persons sent up for trial (*b*3).
1		2	3	4
Classes I to V taken together ...	1892	75	70	55
	1893	66	74	59
	[illegible]	[illegible]	74	58

The proportions have remained almost the same as in the preceding year. There are many causes at work which render these tests but an imperfect gauge of comparison between individual districts, but it is observed that Bogra, in which, as already noticed, the duty of inspection was almost wholly negected, occupies the lowest place in the list of districts arranged according to working results.

20. *Reported crime of the Province.*—The following table shows the cognizable and non-cognizable crime reported in the province during the last ten years, with the average price of common rice:—

YEARS.	Cognizable crime.	Non-cognizable crime.	Total reported crime of the province.	Average price of food-grain (common rice) for the rupee.
1	2	3	4	5
				Seers. Ch.
1885	107,410	105,996	213,406	17 4
1886	105,793	112,664	218,457	20 8
1887	101,969	109,254	211,223	21 11½
1888	110,357	112,006	222,363	19 0
1889	119,656	117,407	237,063	15 15
1890	117,443	116,554	233,997	17 7
1891	128,472	119,072	247,544	16 8
1892	146,185	121,624	267,809	13 1
1893	137,898	121,490	259,388	13 11
1894	140,902	118,070	258,972	13 13

The above figures show in a remarkable manner the connection between the price of food-grains and crime, and corroborate the remarks recorded by Government on this subject in the Resolution on the Jail Report. It will be observed that crime has almost invariably increased or decreased according as the average price of common rice rose or fell, being lowest in 1887 when food was cheapest, and highest in 1892 when it was dearest.

21. *False cases.*—The total number of cases declared to be false was 6,634, or 531 cases more than in the previous year, and the percentage of such cases to the number reported was 4·7, against 4·4 in 1893 and 4·2 in 1892. Compensation was awarded in 9 per cent. of the total number of cases declared false, against 11·1 per cent. in 1893. The High Court have recently ruled that although it is not illegal for a Magistrate to sanction or direct a prosecution under section 211, Indian Penal Code, and also to proceed to award compensation under section 560, Code of Criminal Procedure, it is nevertheless an unwise exercise of the discretion vested in him to deal with the same case under both sections. The following table shows the number of cases declared to be false and the result of prosecution during the past four years:—

	1891.	1892.	1893.	1894.
1	2	3	4	5
Number of cases declared to be false ...	6,631	6,253	6,103	6,634
Ditto in which prosecution was instituted.	1,025	743	725	695
Percentage of prosecutions resulting in conviction.	37·1	33·1	37·2	29·5

The figures for 1894 compare unfavourably with those for the previous years, and lead the Lieutenant-Governor to conclude that due attention has not been paid to the orders recorded in the Resolutions passed on the Reports for 1890 and 1891. Mr. Henry alludes to the good results attained in Birbhum, which were due principally to the personal action of the District Magistrate, Mr. Growse; but the results shown in other districts are very unsatisfactory. Sir Charles Elliott takes this opportunity of reiterating the opinion expressed in the Resolution on the report for 1891 that prosecutions should only be instituted where cases are deliberately and malignantly false, but that when

not enquired into, it appears that the instructions of Government explained in the Resolution on the Report for 1891 have been more intelligently understood. The percentage of burglary cases not enquired into was 29·3, compared with 33·9 in 1893 and 38·2 in 1892; and the percentage of theft cases so treated 16·0, against 16·5 in 1893 and 17·5 in 1892. There still, however, exists a wide diversity of practice between district and district and division and division. In the Orissa Division 17·5 per cent. of burglary cases were not enquired into, while in the Patna Division 31·1 per cent. and in Chota Nagpur 40·2 per cent. were refused enquiry. Again, in Hooghly the District Magistrate found it necessary to have enquiry made in all burglary cases, while in Gaya only 53 per cent. and in Monghyr only 42 per cent. were taken up. These two last-named districts are again conspicuous for police omission to enquire into complaints.

23. The following table shows the number and percentage for the whole province of persons convicted and acquitted during the past six years:—

Year.	Convicted—		Total.	Acquitted—		Total.	Total disposed of.	Percentage of convictions.	Percentage of acquittals.
	By Magistrate.	By Sessions.		By Magistrate.	By Sessions.				
1	2	3	4	5	6	7	8	9	10
1889	66,997	1,318	68,315	33,634	1,365	34,999	103,314	66·1	33·9
1890	68,673	1,230	69,903	33,771	1,041	34,812	104,715	66·8	33·2
1891	73,559	1,463	75,022	34,552	1,222	35,774	110,796	67·7	32·3
1892	84,008	1,668	85,676	34,444	1,348	35,792	121,468	70·5	29·5
1893	79,922	1,463	81,385	32,644	1,100	33,744	115,129	70·7	29·3
1894	76,443	1,364	77,807	32,534	817	33,351	111,158	70·	30·

24. *Results of sessions cases.*—The results of trials before the Sessions Courts during the year show that 70·6 per cent. of cases tried resulted in conviction, and 62·5 per cent. of persons tried were convicted, as compared with 69·5 per cent. and 57·0 per cent., respectively, in 1893. The results on the whole are better, and compare favourably with the results of other provinces as shown by the figures for 1893, but the Lieutenant-Governor is convinced that there is still room for improvement. The districts of Jalpaiguri, Pabna, Manbhum, Khulna, Burdwan, Bogra, Hooghly, Murshidabad, and Angul show bad results, the proportion of persons convicted being in each case below 50 per cent. The inference is that a large number of persons were committed for trial to the Sessions who ought to have been discharged by the Magistrate. On the other hand, the results in Faridpur and Champaran and the Patna Division in general are good.

25. The subjoined table shows class by class the number of true cases reported during 1894 and each of the seven preceding years:—

	True cases.							
	1887.	1888.	1889.	1890.	1891.	1892.	1893.	1894.
Class I ...	2,901	2,872	2,818	2,874	2,765	2,817	2,843	2,892
" II ...	4,646	4,622	4,702	4,340	4,824	4,666	4,668	4,794
" III ...	22,234	25,247	27,824	25,085	28,288	33,325	31,463	34,094
" IV ...	2,427	2,405	2,334	2,210	2,220	2,268	2,082	2,412
" V ...	36,131	38,381	41,032	38,078	39,841	44,870	43,098	45,393
" VI ...	27,763	30,189	33,050	38,439	43,903	51,986	47,748	44,684

There has been an increase in each of the first five classes, and a decrease in Class VI. The largest increase is in Class III, chiefly under the burglary sections, and in Class V, chiefly under ordinary theft. The decrease in Class VI is principally under "public and local nuisances."

26. Class I.—*Offences against the State and Public Tranquillity.*—An important coinage case occurred in the district of Khulna, where, owing to information communicated by Maulvi Hamid Ullah, zamindar of Pala, the police succeeded in breaking up a very dangerous gang of coiners, three of whom have been sentenced to long terms of imprisonment. In Burdwan a gang of up-country men were arrested on suspicion of forging currency notes, fragments of a currency note for Rs. 1,000 placed between two sheets of glass and chemicals being found with the leader. The case was pending at the close of the year. In Howrah an old offender was sentenced to five years' imprisonment for being in possession of instruments for coining and counterfeit coins. In Shahabad the District Superintendent of Police, Mr. Munro, succeeded in arresting two coiners in the Arrah town, and both were sentenced to long terms of imprisonment.

There was an increase of 119 true cases of rioting chiefly in the Dacca Division, where there was an increase in all districts. In Mymensingh 5 cases and in Backergunge 13 cases were attended with loss of life. In the latter district guns were used in 7 cases, in 6 of which the guns were unlicensed. In the Patna Division the number of true cases of rioting shows a decrease of 76, owing to the subsidence of the anti-kine-killing agitation. The Commissioner, Mr. Forbes, anticipates a falling off in agrarian riots as soon as the record of rights in the districts of Muzaffarpur, Saran and Champaran has been completed. 6,809 persons were required to give security under section 107, Criminal Procedure Code, and 2,705 under section 106, against 6,231 and 2,812 respectively in 1893. More than half of these cases occurred in the Dacca Division alone, where these sections appear to have been vigorously applied as a preventive measure. Out of the large number of persons bound down under section 107, the Lieutenant-Governor observes that only 87 were imprisoned in default of finding security.

27. CLASS II.—*Serious offences against the person.*—Of 6,761 persons sent up for trial, 961 were tried before Sessions Courts, and the percentage of convictions to persons tried in these cases rose from 52·3 to 56·5. The number of true cases of murder reported rose from 356 to 362, while the percentage of convictions to persons tried fell from 25·5 to 20·7, the same as in 1892. Of 353 cases returned by the police as true murders, exclusive of pending cases, 241 were detected. Of 219 cases disposed of by the Magistrates, 51 were discharged and 168 committed to the Sessions. 136 cases were disposed of finally by the Courts of Session, 71 ending in conviction and 65 in acquittal. These results are no doubt unsatisfactory; but the Inspector-General explains at some length the difficulties which the police have to contend against in this class of cases. He cites a case, which occurred in the Murshidabad district, as illustrating the nature of the combinations frequently formed to defeat the ends of justice by preventing the police from obtaining any information whatever in connection with crime. In this case a zamindar hired two well known lathials to support his action in taking violent possession of the crop on some land to which he laid a disputed claim: certain residents of their village attacked and killed them, cutting up their bodies and distributing the portions to avoid detection. News did not reach the police for some days, and then, although the District Superintendent himself went to the spot, not one villager would give any clue to the facts of the outrage which had been committed. The worst results are reported from the district of Backergunge, where the numbers of true cases of murder have been gradually rising during the last ten years, till they have reached the high figure of 63 in 1894. Of this number no less than 27 remained undetected, and 11 of these were murders by gunshot. The Inspector-General is of opinion that if Magistrates more often personally visited the locality in cases of peculiar difficulty of detection, it is possible they might be able to elicit information which is withheld from the police. In this Sir Charles Elliott agrees, and considers that Magistrates should ordinarily visit the scene of occurrence in such cases where it is within easy access from their head-quarters. There were five cases of murder by dacoits and 15 of murder by robbers, against 5 and 10 respectively in 1893. The results of these cases are bad, only three cases in all resulting in conviction.

28. CLASS III.—*Serious offences against property.*—In this class there has been an increase of 2,641 cases over the figures for 1893, falling almost entirely under the head "Lurking house-trespass or house-breaking, &c.," the difference under the other serials being unimportant. This increase is ascribed to better reporting by chaukidars, a result of the new system of holding parades. The figures of true dacoity cases show an increase from 226 to 236. The percentage of cases ending in conviction rose from 48·6 to 63·9, and the percentage of persons convicted to persons tried from 34·8 to 47·6, results which are better than those of any of the last 10 years. The Inspector-General reports that special efforts were made by the grant of liberal rewards, to induce police officers and the public to co-operate in bringing offenders to justice. In furtherance of this policy, 3 inspectors, 3 sub-inspectors, 3 head-constables, 9 constables, 10 chaukidars, and 51 villagers were specially rewarded for good services. In the Burdwan Division the number of cases fell from 62 in 1893 to 37, but judicial results were very unsatisfactory, especially in Midnapore. In one case in Hooghly, a village school-master was implicated, some of the

stolen property being discovered in his house. The school-master made a confession to the police which he repeated before the Magistrate, but the jury refused to convict, discrediting the confession because some of the articles traced out had not been mentioned in the original information. In the Presidency Division there were 33 cases, of which 16 occurred in the 24-Parganas and 11 in Jessore. In the Rajshahi Division, the largest number of cases occurred in Dinajpur (8) and Pabna (9). One of the cases in the former district, in which 10 men have been convicted since the close of the year, was of considerable importance, the offenders belonging to a well-known gang in the district of Saran. Fifteen cases occurred in Faridpur and 9 in Backergunge, of which 4 and 1, respectively, were prosecuted successfully, results which are discouraging in districts where crime is so rife. Mymensingh shows a decrease from 17 to 5 cases, for which credit is due to the energy of the District Superintendent, Mr. Thomas. In the Patna Division, there was an increase of 10 cases, but judicial results show that 76 persons were convicted and 42 acquitted, against 28 convicted and 111 acquitted in 1893. An important case occurred at Asanpur in the district of Champaran, in which a gang of Nepalese, Saran, and Champaran bad characters who had settled on the Nepal side of the frontier, which they crossed at night, were convicted. Twelve cases occurred in the Orissa Division, with the excellent result that 43 persons in 7 cases were convicted. The Manbhum district accounts for 8 out of 15 cases reported from Chota Nagpur. Of these 8 cases, the police succeeded in obtaining a conviction in only one.

The number of cases of robbery increased from 184 to 225, the highest figure during the past six years. There was an increase of 63 cases of mischief by fire. Of persons tried, 21 per cent. were convicted against 17 per cent. in 1893. Of 458 true cases, as returned for the Province, the large number of 67 cases were reported from the district of Bogra, where little or no success was attained by the Police in suppressing this form of crime.

29. CLASS IV.—*Minor offences against the person.*—The number of true cases under this class rose from 2,082 to 2,412, the increase having occurred in all divisions, except Orissa and Chota Nagpur, chiefly under "Wrongful restraint and confinement." The percentage of convictions in cases and persons tried has again slightly fallen from 28 per cent. and 28·2 per cent. to 27·7 and 27·4 per cent., results being best in the Chittagong Division and worst in Orissa.

30. CLASS V.—*Minor offences against property.*—True cases under this class show an increase of 4,995 cases, of which 2,693 cases fall under "Lurking house-tresspass" and 1,355 under ordinary theft. The increase under the former head has already been alluded to as due to better reporting. 29 per cent. of burglary cases and 15 per cent. of theft cases were not investigated. Of cases investigated, 8 per cent. and 35 per cent., respectively, were prosecuted successfully. In the Patna Division the number of true cases of burglary increased from 8,860 to 10,173, and in two-thirds of these cases no property is reported to have been stolen. 7·5 per cent. of the cases investigated were prosecuted to conviction, the best results being obtained in Patna City, where success is reported to be due to the excellent working of the new system of town police. The figures for Darbhanga are particularly bad, the percentage of convictions being under 4 per cent., but no explanation has been given for this failure.

True cases of theft increased from 29,098 to 30,453, the percentage of convictions remaining almost the same; while in cases of cattle theft and of receiving stolen property, which also show an increase, judicial results are somewhat better. Here again the police in the Rajshahi Division were unsuccessful, the percentage of cases ending in conviction to cases investigated being only 25 per cent.

31. CLASS VI.—*All other cases.*—There has been a net decrease of 3,064 cases under this class, chiefly under "Public and local nuisances" (3,274), Opium (217), Arms Act (121). The number of bad livelihood cases instituted fell from 2,944 to 2,806. Of these, 1,130 cases were tried in the village of the accused, against 1,168 in 1893 and 843 in 1892. The Lieutenant-Governor regrets to notice that in the 24-Parganas, Tippera, Bogra, Midnapore and Lohardaga, an average period of over three months elapsed between the institution and conclusion of proceedings in these cases. Such delay must necessarily mean harassment to the witnesses who come forward on behalf of the Crown, and tend not only to jeopardise the success of such

prosecutions, but must also deter persons from coming forward again to give evidence. In the Rajshahi Division prosecutions for bad livelihood were especially few, the number for the whole Division being less than that for the district of Mymensingh, where credit must be given to Mr. Thomas for the active measures adopted. The number of persons shown on the registers as under surveillance at the close of the year was 40,773, compared with 42,107 at the close of 1893. Excise cases fell from 2,509 to 2,495. There has been an increase of 411 in salt cases mostly in Balasore. The Railway Police have been fairly successful during the year, especially with cases of professional crime. The total number of cases reported was 3,396 against 3,472 in the preceding year; and of 2,946 persons brought to trial, 2,505 were convicted. Thirty-one cases of obstructing the railway line were reported and 11 persons sent up, all of whom were convicted. The Inspector-General should have furnished further details about these cases.

32. *Working of the Arms Act.*—The working of the Arms Act received the careful consideration of Government during the year. Attention was drawn to the inconvenience occasioned to the public by the delay frequently involved in granting renewal of licenses, and the Government of India were moved to empower Sub-divisional Officers to renew licenses on payment of the prescribed fees. As this proposal did not, however, meet with the approval of the Supreme Government, instructions were issued to ensure a more methodical and speedy renewal. A complete list is to be maintained at each police-station of all licensees residing within its jurisdiction, and application for renewal may be made either in person, or by agent, or through the post; also it may be presented at the police-station, or to the Sub-divisional Officer within whose jurisdiction the licensee resided, or to the District Magistrate. The applicant for renewal may either receive the renewed license from the police-station, or office, where it was filed, or attach a registered and stamped envelope, bearing his own address, to the application, and have the license transmitted to him by post direct from the Magistrate's office. It was further ordered that all guns must be marked and numbered before an original license could be granted for their possession. The working of the Act in the district of Backergunge, to which the Inspector-General specially refers in his report, has been the subject of correspondence between Government and the Commissioner of the Division. The peculiar conditions of this district, where no less than 13 murders are reported to have been committed by guns, have necessitated the adoption of exceptional measures, and prosecutions for the possession of unlicensed guns have been carefully resorted to, and in many cases rigorous sentences passed upon conviction. In 25 cases sentences of imprisonment were passed, and the Lieutenant-Governor is not disposed to consider that the measures adopted have been unduly severe when the peculiarly lawless character of the criminal classes in Backergunge is taken into consideration.

33. *Railway cases.*—Thirty-one cases of obstruction on railway lines were reported, and in one serious case near Giridih, where three men placed sleepers on the line, all three received severe punishment. This class of offences is growing in volume and importance, and the Lieutenant-Governor desires that in future reports a map should be inserted showing the locality of all true cases of this kind. A black cross should indicate where an attempt at obstruction was made and frustrated, and a red cross on the map should show where it led to a railway accident, whether fatal or otherwise.

34. *Non-cognizable crime.*—The fluctuations in non-cognizable crime reported during 1894 and the previous year are shown in the table below:—

		Number of cases. 1893.	1894.	Increase.	Decrease.
Class I	...	9,278	9,239	...	39
" II	...	20	31	11	...
" III	...	959	898	...	61
" IV	...	58,252	54,825	...	3,427
" V	...	10,958	10,677	...	281
" VI	...	13,576	13,996	420	...
Special laws	...	28,447	28,404	...	43
Total	...	121,420	118,070	431	3,851
			Net decrease	3,420	

The largest decrease has occurred under Class IV, the number of cases under "Criminal force" having fallen by 3,626. The police were employed in 5·0 per cent. of non-cognizable cases against 4·9 per cent. in 1893. The Lieutenant-Governor again notices that very small success has attended the prosecution of these cases in some divisions. In the Patna Division, of 17,552 persons who actually appeared before the courts, 8,580 were convicted and 8,125 acquitted, while in the districts of Champaran, Muzaffarpur and Darbhanga, 3,201 acquittals are shown against 2,333 convictions—figures which would seem to indicate that complaints were not judiciously sifted before the issue of process.

35. *Remands.*—The following table shows the percentage of remands in Magistrates' Courts in police cases sent up for trial during the past three years:—

	Percentage of A forms disposed of at first hearing.	Percentage of A forms remanded once.	Percentage of A forms remanded twice.	Percentage of A forms remanded three times.	Percentage of A forms remanded four times.	Percentage of A forms remanded five times.	Percentage of A forms remanded six times.	Percentage of A forms remanded more than six times.	Pending.
1	2	3	4	5	6	7	8	9	10
1892	37·8	24·5	15·2	9·0	5·1	2·7	1·5	1·7	2·1
1893	36·8	21·5	15·8	9·1	5·2	2·6	1·3	1·8	2·4
1894	35·7	24·1	15·0	9·4	5·5	3·1	1·8	2·1	2·8

The Lieutenant-Governor regrets to observe a general falling off in this respect from the figures for the previous year. In nine districts of the Province, less than half the cases tried were disposed of on the first two hearings, while in 13 districts above 70 per cent. were so disposed of. Hooghly again stands highest with 81·2 per cent. of cases disposed of on the first two hearings, while Bogra again comes last with the very low percentage of 32·6. The percentage in Darbhanga has fallen from 56·2 to 37·9. The percentage of previous convictions proved against persons convicted of offences under Chapter XVII of the Penal Code has risen from 9·1 to 9·9, the highest figure yet registered, a result which may be attributed to increased attention being paid to this important subject.

36. *Anthropometry.*—The further development of the Bertillon system of anthropometry for the identification of criminals has received unremitting attention from the Inspector-General. At each police-station there is a register which contains full information regarding the convictions of all residents within its jurisdiction, and each subdivisional court sub-inspector has been supplied with a copy of the index to the Conviction Register for a period of 10 to 20 years, so that when an accused is a resident of the district, or, if a resident of another district, gives a correct name and address, the local police are independent of the assistance afforded by anthropometric data. But when an accused conceals his identity, or his identity is doubtful, recourse is had to the central office. During the year the identity of 140 persons was thus established in cases from 32 districts, and the area under the jurisdiction of the Commissioner of Police, Calcutta. Comprehensive instructions for the working of the system have been drawn up in pamphlet form. An officer was deputed to instruct the Bombay police in the Bengal system of anthropometry, and Mr. Paget, District Superintendent of Police, is now on deputation to instruct the police of the North-Western Provinces. Mr. Henry again acknowledges the cordial co-operation of Surgeon-Lieutenant-Colonel Comins and the officers of the Jail Department in facilitating the working of the system.

37. *Summary of changes.*—The Inspector-General has appended to his report a succinct summary of the chief changes introduced during the past four years in all branches of police administration. These changes include the regrading of the superior appointments in the service, the appointment by examination of probationary Assistant Superintendents, a scheme for the creation of a Provident Fund, the redistribution of investigating centres, the better supervision of police cases before the Courts by freeing Court Sub-Inspectors from many duties which prevented their devoting proper attention to the prosecution of cases, the re-adjustment of the strength of the lower grades of

the force, the establishment of District Police reserves, the appointment of Sub-Inspectors by competitive examination, the foundation of a Police Training School, and various and important reforms in chaukidari administration, as well as numerous departmental changes and other reforms which must, if intelligently carried out, ensure improvement in the working of the force.

38. *Character of officers.*—Mr. Henry again brings to the notice of Government the good work done by Messrs. Giles and Pratt, the Deputy Inspectors-General, and acknowledges the services of Messrs. Wilcox and Masters, who officiated for them during their absence. Special praise is also bestowed on Mr. Showers, who acted as Personal Assistant throughout the year, and on Mr. Thomas, Officiating District Superintendent of Police, Mymensingh. The names of the District Superintendents, Assistant Superintendents and Inspectors favourably mentioned in paragraph 41 of the Report will be noted in the Appointment Department. Mr. Henry himself has merited the thanks of Government for his zealous and able administration of the Department, and deserves high commendation for the successful establishment of a system of anthropometry with which his name will always be associated.

ORDER.—Ordered that copies of this Resolution be forwarded to the Inspector-General of Police, the Commissioner of Police, Calcutta, and to all Commissioners of Divisions, for information.

Ordered also that the Resolution be published in the *Calcutta Gazette.*

By order of the Lieutenant-Governor of Bengal,

H. J. S. COTTON,

Chief Secretary to the Government of Bengal.

RESOLUTION ON THE ANNUAL REPORT ON THE GOVERNMENT CINCHONA PLANTATION AND CINCHONA FACTORY IN BENGAL FOR THE YEAR 1894-95.

FINANCIAL DEPARTMENT—MISCELLANEOUS.

Darjeeling, the 2nd September 1895.

RESOLUTION—No. 251T.—F.

READ—

The Annual Report on the Government Cinchona Plantation and Factory in Bengal for the year 1894-95.

There was nothing abnormal in the climatic conditions of the year under review, and the plantation suffered neither from landslips nor from forest fires. The number of trees uprooted at the plantation for their bark was 295,500, against 698,850 in 1892-93, in addition to which 203,000 trees were cut down in the plantation at Nimbong lately purchased by Government from the Bhutan Cinchona Association. The result of the year's operations was that the total number of living cinchona plants at the Government plantations in Sikkim and at Nimbong, excluding the nursery stock, at the close of the year, was 3,927,501. No new trees were planted out during the year, as the purchase of the Nimbong plantation was thought to have put Government in possession of a sufficiently large quantity of bark. Since then however, the demand for quinine has increased owing to the success of the pice-packet system, and Dr. King has ordered two to three hundred acres of land to be prepared for the purpose of being planted out with new trees. It is essential that enough planting should be done every year to maintain the outturn of plantation and factory up to at least 8,000 lbs. of quinine.

2. The crop of the year amounted to 500,534 lbs. of dry bark, of which 295,054 lbs. were obtained from the trees uprooted on the Government plantation in Sikkim, and 205,480 lbs. were collected from the trees uprooted at Nimbong. The bulk of the bark, with the exception of 126,603 lbs. of the red sort, was of the quinine-producing kind. The outturn of bark per tree was over a pound as compared with less than half a pound per tree in the preceding year when the majority of the trees cropped were dwarfed and feeble. The whole crop, less 1,959 lbs. sold to a medical depôt and to other purchasers, was as usual made over to the Cinchona Factory for disposal.

3. The outturn of the factory was 8,318 lbs. of sulphate of quinine, the produce of 393,150 lbs. of yellow bark, and 4,032 lbs. of cinchona febrifuge, the yield from 105,560 lbs. of red bark. The outturn in 1893-94 was 4,765 lbs. of quinine from 230,100lbs. of yellow bark and 3,848 lbs. of the febrifuge from 91,800 lbs. of red bark. Thus, while it took nearly 24 lbs. of red bark to yield a pound of febrifuge in the previous year, 26 lbs. of the bark were required for the manufacture of a pound of febrifuge during the year under review. On the other hand, in order to produce a pound of quinine, 47 lbs. of yellow bark were required during 1894-95, against 48 lbs. in the previous year. As was explained in last year's Resolution, the percentage of quinine in cinchona bark varies very much, and the same may be said of the alkaloids which the red bark yields. The total outturn of quinine and febrifuge was 12,350 lbs., being the highest figure reached since the factory was started.

4. The following statement compares the issues of the year with those of the preceding year:—

	1893-94.				1894-95.			
	Sulphate of quinine.		Cinchona febrifuge.		Sulphate of quinine.		Cinchona febrifuge.	
1	2		3		4		5	
	lbs.	oz.	lbs.	oz.	lbs.	oz.	lbs.	oz.
To Medical Department, Calcutta	1,300	0	500	0	1,000	0	150	0
To Medical Department, Mian Meer	1,500	0	900	0	1,400	0	400	0
To Inspector-General of Civil Hospitals, Bengal (for District Medical Officers, Bengal).	......		295	8	......		265	12
To Inspector-General of Jails, Bengal (for jails and lock-ups in Bengal).	7	0	51	0	5	0	43	8
To Inspector-General of Jails, Bengal (for making into pice-packets)	1,400	0	......		2,025	0	......	
To Inspector-General of Jails, Bengal (for compensation for loss of weight in conversion into pice-packets).	14	12	......		20	4	......	
To Commissariat Department for Port Blair	50	0	......		25	0	......	
Sold to Government officers	2,552	10¾	......		3,085	1	......	
Ditto ditto and to the general public	......		2,453	11	......		2,416	9
Given as samples	2	6¾	0	5	1	8½	0	7
Total ...	6,916	13½	4,200	8	7,561	13½	3,276	4

Dr. King explains that the above figures do not take into account 342 lbs. and 14 oz. of cinchona febrifuge sold for cash to dispensaries under the management of Municipalities and District Boards. The decrease in the issues of cinchona febrifuge is attributed to the low price at which quinine, cinchonine and cinchonidine are now sold in the market. The stock of quinine in hand at the close of the year was 2,140lbs. and of febrifuge 1,455lbs.

5. The revenue derived from the sale of sulphate of quinine, cinchona febrifuge, cinchona bark and other products of the plantation amounted to Rs. 1,44,104 against Rs. 1,43,685 in the previous year:—

	1893-94.	1894-95.
	Rs.	Rs.
By sale for cash	65,808	74,347
By credit from the Medical Depôts and the Commissariat Department	54,370	39,500
By credit from the Inspector-General of Civil Hospitals, Bengal	2,955	2,657
By credit from the Inspector-General of Jails, Bengal—		
For jails	622	515
„ pice-packets	19,930	27,085
Total ...	1,43,685	1,44,104

6. The expenditure on the plantation, excluding the sum of Rs. 50,000, which was paid on account of the second instalment of the purchase money of the Nimbong plantation, amounted to Rs. 73,806 against Rs. 73,235 in the previous year. The total amount spent on account of the factory was Rs. 35,700 against Rs. 54,013 in 1893-94. The large increase in factory expenditure in the previous year was due to the inclusion of the price of quinine taken over from the Bhutan Cinchona Association.

7. The tables in the Report are imperfectly prepared and require revision. For instance, the cost of salaries of European establishment, cooly labour, office establishment, &c., which in the table at paragraph 5 of the Report is lumped together under one head, should in future reports be broken up so as to show separately the cost of European staff and that of native staff classified as clerks, gardeners, coolies, etc.

The expenditure on the factory should be shown in the same detail as is given for the plantation expenditure at paragraph 5. The previous year's figures should also be shown everywhere for the purposes of comparison. Again in the stock account at paragraph 8, it is not understood why the whole of the dry bark (874,787 pounds) collected at Nimbong has not been included. Dr. King has taken the valuation of the Nimbong bark brought into the Government godowns as equal to that of the two instalments which have been paid on account of the Nimbong property, but there is obviously no connection between the stock-taking of the Nimbong bark actually brought in and the two instalments of money paid towards the purchase of the whole property. Further, the table of stock at paragraph 8 in order to be complete should show (1) quantity and value of stock at beginning of the year; (2) quantity and value of stock received during the year; (3) quantity and value of stock expended during the year; (4) quantity and value of stock balance at the end of the year.

8. The net profit on the working of the plantation amounts to Rs. 7,705 against Rs. 1,117 in the previous year. Dr. King observes that the net result of the year under review "can hardly be regarded as of the nature of a profit, for the plantation from which a certain number of trees have been taken, has not been increased by a corresponding number."

9. The scheme for the sale of Government quinine in Bengal through the medium of the Postal Department continues to gain in favour every year. The amount delivered to the Jail Department for conversion into pice-packets was 2,025 pounds against 1,490 pounds in 1893-94. The results of the working of the scheme were lately reviewed in detail in a Resolution separately issued by this Government, and it is unnecessary to dwell upon it further.

10. The thanks of Government are again due to Dr. King and Mr. Gammie for their efficient management of the Department during the year.

By order of the Lieutenant-Governor of Bengal,

H. H. RISLEY,

Secretary to the Government of Bengal.

LIBERALITY OF NAWAB ALI KHAN BAHADUR OF HUSANABAD IN MONGHYR.

No. 236T.—M., dated Darjeeling, the 26th August 1895.

From—H. H. RISLEY, ESQ., C.I.E., Secy. to the Govt. of Bengal, Municipal Dept.,
To—The Commissioner of the Patna Division.

I AM directed to acknowledge the receipt of your endorsement No. 479G., dated the 9th August 1895, forwarding a copy of a letter from the Magistrate of Patna, in which he reports that Nawab Ali Khan Bahadur of Husanabad in Monghyr, has given a donation of Rs. 2,000 towards the construction of a hospital at Rajgir in the district of Patna, of which he is a zamindar, to commemorate the visit of His Honour the Lieutenant-Governor to that place.

2. In reply, I am to request that the thanks of the Lieutenant-Governor may be conveyed to the donor for his liberality.

FINAL FORECAST OF THE JUTE CROP IN BENGAL FOR SEASON 1895.

THE following is published for general information.

REV. DEPT.,
The 2nd September 1895.

C. E. BUCKLAND,
Secy. to the Govt. of Bengal.

DEPARTMENT OF LAND RECORDS AND AGRICULTURE, BENGAL.

Final Forecast of the Jute Crop for season 1895 (*to the middle of August*).

Returns have been received from 26 districts in which jute is grown in these provinces, viz., from Burdwan, Midnapore, Hooghly, all districts of the Presidency, Rajshahi and Dacca Divisions, Tippera, Noakhali, Bhagalpur, Purnea, Malda, Cuttack and Balasore.

Season.—As remarked in the first forecast published on the 29th June 1895, rain was deficient from January to March, but the deficiency does not appear to have impeded the cultivation in the more important jute-growing districts. Throughout the greater part of April the rainfall was well distributed, and was generally above the normal. In the early part of the month of May the rainfall was more copious over the whole province than is usual at the beginning of the month. During the last half of May heavy rain fell in East Bengal, but in other districts there was less than the average fall. For the whole month of May Eastern Bengal received more than the normal, while South-West Bengal, parts of Northern Bengal, and Orissa received less than the normal fall. In June the rainfall was altogether abnormal. East and North Bengal received less than half the usual rain. In Central Bengal the rainfall was short, but Orissa received double the normal fall. In July and the first half of August the rainfall was generally deficient in Central and Western Bengal, but in North Bengal and North Bihar there was excess, and in East Bengal the falls were irregular.

2. *Area sown.*—The estimates of areas sown with jute in 1895, as reported in the first forecast, have been modified by the Collectors of Midnapore, 24-Parganas, Khulna, Dacca, Faridpur, Purnea, Cuttack and Balasore. The total area sown in jute in Bengal during the year under report, as shown in the appended return, is 2,242,700 acres against 2,268,200 acres reported in the first forecast, and as against 2,264,300 acres reported to have been sown in 1894.

Comparing the area under jute cultivation this year with that of 1894, it will be seen that there is a small decrease this year of nearly one per cent.

3. *Character of the crop.*—Taking the eleven most important jute growing districts into consideration, it will be

seen from the appended returns that Tippera, Pabna and Dinajpur return a bumper crop. Rangpur and Rajshahi return an average crop, and for Mymensingh, Dacca, Faridpur, Bogra and Purnea an outturn from 13 to 15½ annas is estimated. Jalpaiguri returns the crop as 15½ annas only. Floods have injured the crop in Bogra, Jalpaiguri and Mymensingh. On the whole six of these districts return a better crop than last year, one an equal crop and four a crop not so good. In the less important jute districts in Central and Western Bengal scanty rainfall at sowing time has reduced the outturn below that of last year. Taking the province as a whole, the outturn of the jute crop may be estimated at 17 annas against 16⅗ths annas estimated last year.

4. *Gross outturn of the crop.*—As in previous years, for the purpose of estimating the gross outturn of jute of the current season, an all-round rate of 1,200 lbs. has been assumed to be the average rate of production of jute per acre for every jute-growing district in Bengal. The outturn of jute in these provinces for the season 1895 is shown in column 9 of the attached statement to have amounted to 6,421,600 bales (of 400 lbs.) against 6,144,300 bales in 1894.

5. *Estimated exports.*—The amount of jute (inclusive of cuttings and rejections) which may be available for export out of this year's crop is estimated to be about 36 lakhs of bales against 25 lakhs of bales exported in 1893, and 36 lakhs of bales exported from last year's crop.

W. C. MACPHERSON,

Director of the Department of Land Records and Agriculture, Ben[illegible].

DARJEELING,
The 27th August 1895.

Final Report on the Jute Crop of Bengal for the year 1895.

District.	Acreage.					Taking 16 annas to represent the average outturn per acre, how many annas will represent this year's outturn (1895)?	Taking 16 annas to represent the average outturn per acre, how many annas represented outturn last year (1894)?	Outturn in bales of 400 lbs.				Percentage by which column 9 exceeds (+) or falls short of (−) outturn in			Remarks by the District Officers.	Remarks by the Department of Land Records and Agriculture, Bengal.
	Of current year's crop.	Of previous year's crop.	Normal.	Percentage by which column 2 exceeds (+) or falls short of (−) area in Column 3.	Percentage by which column 2 exceeds (+) or falls short of (−) area in Column 4.			Estimated yield of current year, *i.e.*, of area in column 2.	Yield of area in column 2 at full standard rate.	Yield of previous year, *i.e.*, of area in column 3.	Normal.	Column 10.	Column 11.	Column 12.		
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17
Burdwan ...	10,900	10,900	11,100	......	−1·80	10	11½	20,400	32,700	24,000	33,300	−37·61	−·15	−38·73	For scanty rainfall the outturn of jute in Sadar and Katwa subdivisions will be less. Owing to timely rainfalls the outturn in the Kalna Subdivision will be the same as it was in last year (12 annas).	
Midnapore ...	11,100	10,800	20,900	+2·81	−46·41	12½	9½	25,500	33,300	19,200	62,700	−23·42	+32·81	−60·92	After the submission of the first forecast a considerable area was brought under cultivation. The outturn is likely to be better owing to seasonable rain.	The Collector estimates the average rate of yield per acre to be 1,140 lbs. A rate of 1,200 lbs. has, however, been taken in this office in calculating the estimates of outturn in columns 9, 10, 11 and 12.
Hooghly ..	12,000	12,500	14,300	4·00	−15·98	8	10	16,000	26,000	23,400	42,900	−0·50	−28·07	−58·04	For want of periodical rains the area cultivated is less than in the previous year. The outturn is also expected to be comparatively low.	

District.	Acreage.					Taking 16 annas to represent the average outturn per acre, how many annas will represent this year's outturn (1895)?	Taking 16 annas to represent the average outturn per acre, how many annas represented outturn last year (1891)?	Outturn in bales of 400 lbs.							Remarks by the District Officers.	Remarks by the Department of Land Records and Agriculture, Bengal.
	Of current year's crop.	Of previous year's crop.	Normal.	Percentage by which column 2 exceeds (+) or falls short of (—) area in				Estimated yield of current year, i.e., of area in column 2.	Yield of area in column 2 at full standard rate.	Yield of previous year, i.e., of area in column 3.	Normal.	Percentage by which column 9 exceeds (+) or falls short of (—) outturn in				
				Column 3.	Column 4.							Column 10.	Column 11.	Column 12.		
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17
24-Parganas ...	35,300	35,400	42,000	—0·28	—15·95	12½	13	82,700	105,900	86,300	126,000	—21·90	—4·17	—34·36	This year's outturn will be less than that of the last year owing to the continued want of rainfall since the sowing time. The difference in the acreage of the current year's crop, as shown in the preliminary forecast, and that shown in the present return is due to the fact that in the preliminary forecast the estimated area sown this year was shown by the Subdivisional Officer of Diamond Harbour to be 210 acres, whereas he now states that the area sown was 1,086 acres.	
Khulna ...	21,600	17,800	22,500	+21·34	—4·00	15½	13½	62,100	64,800	44,100	67,500	—4·16	+40·81	—8·00	The increase in area and outturn is owing to the timely rains. The Subdivisional Officer of Satkhira reports that the rains in May have done good, and the whole normal area is shown as sown in that subdivision.	
Nadia ...	44,000	47,000	47,000	—6·39	—6·39	13	14	107,300	132,000	123,400	141,000	—18·71	—13·04	—23·90	The decrease in this year's outturn as compared with that of last year is mainly due to the want of timely and sufficient rainfall.	
Jessore ...	34,100	33,600	41,500	+1·49	—17·83	14	14	89,500	102,300	88,900	124,500	—12·51	+1·48	—28·11	The outturn is below normal owing to inadequate rainfall.	

Murshidabad...	20,300	21,700	30,600	−6·45	−33·66	11	10	41,900	60,900	40,700	91,800	−31·19	+2·94	−54·35	At the beginning of the season rainfall was deficient, hence reduced area cultivated. But later on the rain suited the jute crop very well, and the rivers also remaining low, and no inundation forcing premature cutting, the outturn is now very promising.
Dinajpur ...	107,500	107,500	99,500	......	+8·04	18	12	362,800	323,500	241,900	298,500	+12·49	+49·97	+21·54	......
Rajshahi ...	103,300	105,200	104,500	−1·81	−1·15	16	14½	369,900	369,900	280,300	313,500	......	+7·12	−1·14	The slight increase in this year's outturn as compared with that shown in the preliminary forecast calls for no special remarks, save and except that it was due to sufficient rainfall in May and June and bright sunshine at times.
Rangpur	273,000	286,200	273,500	−2·87	−0·18	16	14	834,000	834,000	751,300	835,500	......	+11·01	−0·01	The weather up to the period when the preliminary forecast was submitted was very favourable for jute; so more than an average outturn was expected, but insufficient rainfall during the whole of June and the first week of July interfered with the growth of the crop. Hence an average outturn is now estimated.
Bogra ..	100,000	100,000	76,000	......	+31·58	13	14	248,800	360,000	280,600	228,000	−18·73	−7·12	+6·96	Want of sufficient rain in June and a sudden flood in the eastern jute producing parts of the district in early July have damaged the crop to some extent.
Pabna ...	175,500	174,500	180,900	+0·57	−2·98	17	14	559,400	526,500	458,100	542,700	+6·24	+22·11	+3·07	Seasonable weather has prevailed all through the season. The sudden rise of the rivers in July may have affected the quality on the lower lands, but the quantity is not likely to be affected.
Darjeeling (plains).	13,800	13,900	13,900	......	......	10	13	25,900	41,400	31,100	41,400	−37·43	−16·72	−37·43	The growth of jute was checked by heavy rainfall. The outturn is accordingly less.
Jalpaiguri ...	64,900	64,200	64,000	+1·09	+1·41	10½	13½	127,800	194,700	162,500	192,000	−34·36	−20·16	−33·43	The difference in the outturn shown in the preliminary forecast and in this is owing to excessive rainfall in the early stage of cultivation of this crop and to the floods in parts of the Duars.

District.	Acreage.					Taking 16 annas to represent the average outturn per acre, how many annas will represent this year's outturn (1895)?	Taking 16 annas to represent the average outturn per acre, how many annas represented outturn last year (1894)?	Outturn in bales of 400 lbs.				Percentage by which column 9 exceeds (+) or falls short of (—) outturn in			Remarks by the District Officers.	Remarks by the Department of Land Records and Agriculture, Bengal.
	Of current year's crop.	Of previous year's crop.	Normal.	Percentage by which column 2 exceeds (+) or falls short of (—) area in				Estimated yield of current year, i.e., of area in column 2.	Yield of area in column 2 at full standard rate.	Yield of previous year, i.e., of area in column 3.	Normal.					
				Column 3.	Column 4.							Column 10.	Column 11.	Column 12.		
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17
Dacca ...	178,300	211,200	219,300	—15·58	—18·69	14	13	468,000	534,900	514,800	667,900	—12·50	—9·09	—28·86	The area sown this year has been ascertained to be 178,300 acres and not 219,400 as shown in the preliminary forecast. The decrease is only in the Sadar subdivision.	
Faridpur ...	86,000	85,000	86,000	+1·17	......	14	16	225,800	258,000	255,000	258,000	—12·48	—11·45	—12·48	The increase in area is due to transfer of 15 square miles of char lands from Dacca to this district. The outturn at Madaripur has been estimated at 12 annas only. It is due to insufficient rainfall during the sowing season and too much rainfall during the time of growth.	
Backergunge...	6,400	6,400	6,400	...	...	11	12	13,200	19,200	14,400	19,200	—31·25	—8·33	—31·25	The decrease in the outturn is due to deficiency of rainfall.	
Mymensingh	558,000	569,100	570,800	—0·19	—2·24	15½	16	1,621,000	1,674,000	1,572,500	1,712,400	—3·16	+3·08	—5·33	Though some damage has been done in low lands on account of the sudden rise of the rivers, the outturn on the whole will be better than last year's, owing to the very useful rain in May and June.	

Tippera ...	231,300	212,000	225,000	+9·06	−2·73	18	15	780,300	693,600	715,500	675,000	+12·5	+9·05	+15·6	......
Noakhali ...	9,300	9,500	9,500	...	...	14	13	24,900	28,500	23,200	28,500	−12·56	+7·32	−12·36	Owing to the good rainfall, this year's outturn is better than that of last year.
Bhagalpur ...	22,400	22,400	22,400	...	...	16	17	67,200	67,200	71,400	67,200	......	−5·86	......	The rainfall is well distributed this year, hence the outturn is expected to be an average one.
Purnea ...	77500	75,000	62,200	+0·66	+21·38	15	16	212,300	226,500	225,000	186,600	−6·26	−5·64	+13·81	The increase in area is in the Araria Subdivision and is due to better information, having been received after the submission of the preliminary forecast. On account of insufficient rainfall in June last, the outturn will be a little less than that of last year.
Malda ...	35,560	33,500	45,000	...	−21·11	12	14	79,900	106,500	93,200	135,000	−24·97	−14·27	−40·81	Owing to the deficiency of rainfall, the area sown this year is less than the normal area; and the outturn has been less than what was first estimated.
Cattack ...	4,900	4,500	5,50(	+8·88	−10·91	13	10	11,900	14,700	8,400	16,500	−19·04	+41·66	−27·87	For want of sufficient rain the sowing had not been completed when the preliminary forecast was submitted. Hence the difference in area between this report and the first forecast. The excessive rainfall in June last, which brought on floods, caused some damage to crops on low lands. Hence the outturn is below the average.
Balasore .	2,700	2,600	3,600	+3·85	−25·00	12	10	6,100	8,100	4,900	10,800	−24·69	+24·49	−43·52	The area under cultivation this year is estimated to be 2,700 intead of 2,300 as given in preliminary forecast. The decrease in this year's outturn is due to the want of good rain.
Total ...	2,[illegible],700	2,264,300	2,302,800	−0·95	−2·69	(a)17	(a)16½	6,421,600	6,728,160	6,144,500	6,908,400	−4·55	+4·51	−7·05	......

(a) Estimated by the Department of Land Records and Agriculture, Bengal.

N.B.—20 annas represent a bumper crop, 16 annas an average crop, and 12 annas three-fourths of an average crop, and so on.

WEATHER AND CROP REPORT.

For the week ending the 2nd September, 1895.

Burdwan.—Rainfall at Sadar ·43. Weather hot. Harvesting of *aus* rice commenced. Transplantation of *aman* rice still going on in parts. Prospects not good owing to want of rain. Condition of cattle good. Fodder and water sufficient. Common rice sells at an average price of 16½ seers a rupee.

Midnapore.—Rainfall at Sadar 3·37. Weather cloudy. Transplantation of paddy going on. Want of rain felt in Ghatal, Tamluk and Contai. Common rice selling from 14 to 22 seers a rupee at different subdivisions. No want of fodder and water.

24-Parganas.—Rainfall at Sadar 1·56. Weather bright with occasional showers Prospects of *aus* rice, jute and sugarcane fair, of transplanted rice moderate. The harvesting of *aus* and jute proceeding with fair outturn. Transplantation completed with reduced area. Health of cattle-good. Rice sells at—

				Srs.	c.	
Sadar	...	...	...	12 to 14	0	per rupee.
Barasat	...	...	...	15	0	
Basirhat	...	...	...	17	12½	
Diamond Harbour	...	...	...	16	0	

Murshidabad.—Rainfall ·60. Weather hot and cloudy. Harvesting of *bhadoi* paddy going on. Transplantation of *aman* paddy much retarded for want of rain. Prospects of standing crops fair. Fodder sufficient. Common rice sells at 15 seers per rupee.

Khulna.—Rainfall at Khulna ·74, Bagerhat ·59, Satkhira 1·09. Weather hot. Harvesting of *aus* continues; the grain in the ear is not full for want of sufficient rain. Transplantation of *aman* going on. Price of common rice varies from 15 to 22 seers a rupee in the different subdivisions. Fodder and water sufficient.

Dinajpur.—Average rainfall 2·71. Harvesting of *bhadoi* paddy and jute and transplantation of *haimanti* paddy almost over. Price of common rice 15 seers a rupee. No outbreak of cattle-disease, nor any complaint for fodder or drinking water.

Rangpur.—Average rainfall ·77. Weather hot. Transplantation of *aman* and cutting of jute continue. More rain wanted. Common rice selling at 12 to 13 seers per rupee. No cattle-disease. Fodder sufficient.

Pabna.—Rainfall ·76. Weather cloudy and rainy. Rivers have fallen slightly. Prospects of *aman* good. Jute being harvested; quality poor. Fodder and water sufficient.

Dacca.—Rainfall ·94. Weather hot with occasional rain. Cutting of jute continues. Prospects of crops favourable. Common rice selling at 18 seers per rupee. No cattle-disease. Fodder available.

Chittagong.—Rainfall 1·96. Weather hot. Harvesting of *aus* and transplantation of *aman* continue. More rain needed for the latter. Water and fodder sufficient. Sporadic cattle-disease reported from Raujan. Rice sells at 14 seers per rupee.

Patna.—Rainfall ·72 at Sadar. Prospects of *bhadoi* crops favourable. *Marua* and Indian-corn are being harvested. Transplantation of paddy approaching completion. Condition of cattle good. Fodder and water sufficient. Common rice selling at 16 to 18½ seers per rupee.

Gaya.—Rainfall at Sadar 3·41. *Bhadoi* crops are doing well. Transplantation of paddy is nearly completed. Price of common rice at Sadar 14 seers per rupee.

Champaran.—Rainfall at Motihari 1·63. Transplantation of *aghani* not yet completed. *Bhadoi* crops good.

Darbhanga.—Rainfall ·70 at Sadar, ·86 at Madhubani, ·92 at Samastipur. Prospects of *aghani* continue favourable. Fodder and water sufficient. Prices almost stationary.

Bhagalpur.—Rainfall at Sadar 1·84 and at subdivisions above two inches. Weather seasonable. *Bhadoi* crops along the Ganges are exceptionally good in consequence of there having been no flood this year. More rain is wanted in Supaul for paddy. Prospects in other parts of the district are fair and normal. Common rice selling at 18 seers 4 chitaks per rupee at head-quarters. Fodder and water sufficient.

Rainfall at Sadar ·83. Harvesting of *bhadoi* paddy and jute going on. f *aghani* paddy nearly finished. Cattle-disease in Belgachia and Kasba and water sufficient. Common rice selling at 21 seers a rupee.

Cuttack.—Rainfall 6·57. Weather seasonable. Early *beali* paddy is being reaped in places. Weeding and transplantation of *sarad* paddy in progress. Condition of cattle good. Fodder sufficient. Common rice sells at—

	Srs.	c.	
Cuttack	21	0	per rupee.
Jajpur	22	5	
Kendrapara	25	0	
Banki	22	5	

Hazaribagh.—Rainfall at Sadar 2·71, Giridi ·88. More rain wanted in Giridi subdivision. Transplanting operations completed. All crops doing well. Common rice sells at Sadar 16 seers and Giridi 15 seers per rupee.

General Summary.—Fine weather prevailed for the greater part of the week over the Province, and the rainfall was slight in almost all districts. Want of rain continues to be felt in most parts of the Burdwan and Presidency Divisions. Elsewhere the general prospects of the winter rice crop are favourable. *Aus* rice and jute are being harvested. In Bihar the *bhadoi* crops are reported good; *marua* and Indian-corn are being harvested. Cattle-disease is still reported in Purnea, but in no other district. The price of common rice continues steady.

By order of the Lieutenant-Governor of Bengal,

REVENUE DEPARTMENT,
The 3*rd September*, 1895.

C. E. BUCKLAND,
Secretary to the Government of Bengal.

Meteorological Report of the Province of Bengal

[illegible]95.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM FOR THE WEEK ENDING, 8 A.M., SATURDAY THE 31st OF AUGUST 1895.

THE monsoon current, as during the previous week, has been weak and irregular, but the distribution of the rainfall has again been different. For the week preceding the 24th of August, heavy rain fell in North Bengal and Bihar, while in the south-western districts there was much less than the average. During the week now under review the heavier falls have been in Orissa; and in the northern and eastern districts rainfall has been very scanty, especially in North Bengal, which has received about a quarter of the normal amount. Though considerably less than the usual amount of rain has fallen, yet showery weather has been common, and no distinct break in the rains has occurred. The number of rainy days, that is, days on which at least a tenth of an inch of rain has fallen, has been almost as large as usual.

At the beginning of the week a very shallow low pressure area was approaching the west coast of the Bay between Puri and Vizagapatam. The greatest defect recorded at any of the stations in that part of the coast was about a tenth of an inch, and as the centre moved away to the west before any further development occurred, the influence on the general weather conditions was of but slight importance. The wind circulation was cyclonic in the north of the Bay, and light easterly winds prevailed in Bengal, but the latter arrangement was not due to the depression, as it was maintained throughout the week after the low pressure area filled up. Pressure changes were very small and consisted of the usual oscillations which occur during settled weather, and the readings never differed by more than small amounts from the normal.

While the depression was passing the coast line in the early part of the week, lowest readings were in the Circars. The moderate rise that followed forced the area of lowest pressure northwards, and this slow northerly motion continued day by day throughout the week, till by the end of the week it was in Bihar. Afterwards the low pressure area became diffused in connection with the formation of another shallow depression over Burmah. The slight changes which were in progress during this northerly displacement appear to have led to the occurrence of thunderstorms and the more heavy falls of rain in the western districts, as the days on which rain was most general in Orissa and South-West Bengal were the 27th and 29th, in Chota Nagpur the 30th, and in Bihar the 30th and 31st. Over a great part of North and East Bengal during these days rainfall was very scattered, but in Backergunge, Noakhali and Chittagong some heavy showers and a good deal of general rain fell in the early part of the week.

The changes of pressure in progress on the last two days of the week gave rise to a shallow low pressure area in the east, the central area being in the south of Burmah. The distribution became very uniform both over the province and the north of the Bay. This uniformity was followed by light irregular winds and generally by fine weather, interrupted in places by thunderstorms and local heavy rainfall.

The character of the weather has been very similar to what obtained during the previous week—settled in general, but with local disturbances.

Pressure.—As stated above, pressure changes have been small and readings have been practically normal. The mean difference from the normal varies from excess of about ·02 inch to defect of ·04 inch in Orissa.

Temperature has generally been above the normal, a temporary fall occurring with local storms and heavy falls of rain. The means for the week are practically normal in South-West Bengal, Orissa, Chota Nagpur and Assam. In East Bengal and Bihar there has been excess of half a degree, and in North Bengal of more than 1°.

Rainfall.—Showery weather has prevailed over a great part of the province throughout the week. As the rainfall has been largely due to thunderstorms, the daily falls are more irregular than usual, but in many cases they are very light. In Orissa alone the average fall is above the normal, being 2·92 as compared with 1·97 inches. In Chota Nagpur there has been defect of about ·48 inch, in East Bengal ·61 inch, in Bihar of ·98 inch, and in North Bengal of 2·61 inches. As pointed out above, the number of days on which rain fell was very little under the average, except in North Bengal, where there was about one rainy day fewer.

The following table gives the summary of the temperature and rainfall data of each of the six meteorological divisions of the province for the week ending Saturday, the 31st of August 1895 :—

Meteorological Divisions.	Temperature.						Rainfall.									
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of month.		Since 16th May 1895.	
			Of highest of each day.	Of lowest of each day.	Of mean for each day.		Average.	Normal average.	Variation.	Average number in week.	Normal average number in week.	Variation.	Average.	Normal average.	Average.	Normal average.

	Inches.
The total fall of rain from 25th to 31st August 1895	1·90
The average fall of the corresponding period for 24 years, Surveyor-General's Office	2·14
The total fall from 1st January to 31st August 1895	33·00
The average fall of the corresponding period for 24 years, Surveyor-General's Office	48·20

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph and from observations made at 6h., 10h., 16h. and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; g, gloomy; d, drizzling rain; p, passing temporary showers; t, thunder; ⩍ dew.

METEOROLOGICAL OFFICE, GOVT. OF INDIA;
Calcutta, the 2nd September 1895.

J. H. GILLILAND,
For Meteorological Reporter to the Govt. of India.

(a) The decrease is due to good kharif crop prospects which are keeping down the prices of food grains and thereby reducing the traffic. Last year there was an abnormal demand for [illegible] grains which was carried locally and was also imported from the Punjab.
(b) Decrease is due to recovery of Rs. 6,000 Gandak bridge tolls having been included in the corresponding week of last year.

RESOLUTION ON THE ANNUAL GENERAL ADMINISTRATION REPORT OF THE PRESIDENCY DIVISION FOR THE YEAR 1894-95.

GENERAL DEPARTMENT—MISCELLANEOUS.

Darjeeling, the 10th September 1895.

RESOLUTION—No. 248T.G.

THE Lieutenant-Governor directs the publication, for general information, of the Commissioner's Report on the General Administration of the Presidency Division for the year 1894-95.

2. The Lieutenant-Governor considers Mr. Westmacott's remarks on the following subjects to be worthy of special attention by District Officials:—

PARA. 18.—The value of tours by Subdivisional Officers and the kind of subjects to which their inspections should be directed.

PARA. 78.—The public should be warned against the unsound character of the Provident Companies referred to.

PARA. 90.—The Reorganziation of the Chaukidars. The remarks of some district officers on this subject show more acuteness in raising difficulties than in clearing them out of the way. A perusal of the reports of the Commissioners of other Divisions will give them much useful information on this subject. There does not seem any reason why Chakran Chaukidars should necessarily be ousted on the introduction of the Chaukidari Act.

PARA. 97.—The Administration of Criminal Justice.

PARA. 139.—The Mismanagement of Pounds and Ferries by District Boards.

By order of the Lieutenant-Governor of Bengal,

C. E. BUCKLAND,

Secretary to the Govt. of Bengal.

INDEX.

ANNUAL GENERAL ADMINISTRATION REPORT OF THE PRESIDENCY DIVISION FOR 1894-95.

No. 72J.G., dated Calcutta, the 23rd July 1895.

From—E. V. WESTMACOTT, Esq., Commissioner of the Presidency Division,
To—The Secretary to the Government of Bengal, General Department.

I HAVE the honour to submit the General Administration Report for the Presidency Division for the year 1894-95, with the statistical returns enumerated in annexure B to Government letter No. 544, dated 28th February 1892.

I.—CHARGE.

2. I held the office of Commissioner of this Division from 1st to 24th April and from 12th November to the end of the year. Mr. H. C. Williams officiated for me in the interval, while I was on deputation on the Board of Revenue.

3. The statement below shows the names of the Magistrates and Collectors who were in charge of the several districts of the Division during the year:—

District.	Name.	Period for which each officer held charge.
24-Parganas	Mr. F. R. S. Collier ...	1st April to 28th April 1894.
	,, J. H. Temple ...	29th April to 29th May 1894.
	,, F. R. S. Collier ...	30th May 1894 to 31st March 1895.
Nadia ...	,, E. W. Collin ...	1st April to 29th April 1894.
	,, J. H. E. Garrett ...	30th April 1894 to 31st March 1895.
Murshidabad	,, J. Kennedy ...	1st April to 5th September 1894.
	,, J. H. Temple ...	6th September to 28th October 1894.
	,, J. Kennedy ...	29th October 1894 to 31st March 1895.
Jessore ...	,, W. Fiddian ...	1st April to 22nd June 1894.
	,, C. J. Stevenson-Moore	23rd June to 13th December 1894.
	,, F. S. Hamilton ...	14th December 1894 to 31st March 1895.
Khulna ...	,, H. F. T. Maguire ...	1st April to 28th May 1894.
	,, N. D. Beatson-Bell ...	29th May to 24th November 1894.
	,, W. B. Brown ...	25th November 1894 to 31st March 1895.

4. It will be seen that no officer remained in charge of any district throughout the year. Mr. Collier was away on short leave for one month, when Mr. Temple acted for him. The change in Nadia was caused by the transfer of Mr. Collin in April. In Murshidabad Mr. Temple officiated for Mr. Kennedy when he went on privilege leave. In Jessore Mr. Fiddian retired on 22nd June and Mr. Stevenson-Moore succeeded him. Mr. Hamilton took charge on the 14th October, and held office till the close of the year. Mr. Maguire was in charge of the district of Khulna till 28th May, when he was relieved by Mr. Bell, who, again, was succeeded on the 25th November by Mr. Brown. These frequent changes, though no doubt unavoidable, are much to be deplored—more particularly in the case of Khulna, which district requires a firm hand to make up for slackness and feeble administration in the past.

5. The statement below gives the names of the officers who were in charge of subdivisions in the several districts of this Division:—

District.	Subdivision.	Name of officer.	Period of incumbency.
24-Parganas	Barasat ...	Babu Chandi Das Ghosh ...	Throughout the year.
	Basirhat ...	Maulvi Mahammad Abdulla ...	Ditto.
	Diamond Harbour.	Babu Khagendra Nath Mitra ...	Ditto.
Nadia ...	Kushtia ...	Babu Purna Chandra Mitra ...	Ditto.
	Meherpur ...	Mr. W. N. Delevingne ...	Ditto.
	Ranaghat ...	Babu Nabin Chandra Sen ...	Ditto.

District.	Subdivision.	Name of officer.	Period of incumbency.
Murshidabad	Jangipur ...	Babu Nava Coomar Chakraborti ...	Throughout the year.
	Kandi ...	" Pran Kumar Ghosh ...	Ditto.
Jessore ...	Jhenidah	Mr. W. Maxwell ...	From 1st April to 20th June 1894.
		Babu Jagesvar Bisvas ...	From 21st June to 1st July 1894.
		Mr. W. Maxwell ...	From 2nd July to 17th October 1894.
		Babu Jagesvar Bisvas ...	From 18th October to 26th October 1894.
		Mr. W. Maxwell ...	From 27th October 1894 to 31st March 1895.
	Bangaon	" Atul Krishna Ray ...	From 1st April 1894 to 18th March 1895.
		Babu Akshay Koomar Chatterji ...	From 19th March to 31st March 1895.
	Narail ...	" Amrita Lal Mukerji ...	Throughout the year.
	Magura	" Radha Kanta Banerjee ...	From 1st April to 8th May 1894.
		" Kunja Behari Chatterjee ...	From 9th May to 16th June 1894.
		" Nagendra Nath Ghosh ...	From 17th June 1894 to 31st March 1895.
Khulna ...	Bagerhat ...	" Kumud Nath Mukherjee ...	Throughout the year.
	Satkhira ...	" Gati Krishna Neogi ...	Ditto.

6. It will be seen that, except in the Magura subdivision of Jessore, there was practically no substantive change in any of the subdivisions in the Division, which is very satisfactory.

II.—TOURS AND INSPECTION OF OFFICES.

(a) Commissioner's tour.

7. In April I spent seven days in the district of Nadia, during which I visited Ranaghat twice, to try and induce the Municipal Commissioners to reform their insanitary condition. At the end of the month Mr. H. C. Williams relieved me. In June he spent 6 days in visiting the district of Murshidabad. In July he made a tour of 7 days by water, visiting the Satkhira subdivision of Khulna, the Basirhat subdivision of the 24-Parganas, and the municipalities of Debhatta, Taki, Basirhat, and Satkhira. In August Mr. Williams visited the Barasat subdivision of the 24-Parganas and some of the municipalities near Calcutta. He appears to have been 4 days at a greater distance than 5 miles from head-quarters. In September he spent 5 days visiting Ranaghat and Krishnagar in Nadia. In October he visited the Magura and Narail subdivisions and the head-quarters station of Jessore, being on tour for 8 days. I resumed charge of the division on the 12th November, and was on tour from 17th November till 8th December, inspecting at the head-quarters station of Nadia, the Kushtia, Meherpur, and Jhenidah subdivisions, the municipalities of Krishnagar, Kushtia, Kumarkhali, Meherpur, and the town of Chuadanga, besides riding over a good deal of country in the east of Murshidabad, the north of Nadia, and the west of Jessore. In January I spent 21 days on tour, inspecting at the head-quarters of Jessore and Khulna and the subdivisions of Bangaon and Bagirhat. In February I spent 16 days on tour, inspecting in the district of Murshidabad, the head-quarters station, the subdivisions of Kandi and Jangipur, the municipalities of Berhampore, Murshidabad, Kandi, and Jangipur, and other places. In March I inspected the Diamond Harbour subdivision, the offices at the head quarters of the 24-Parganas at Alipore, the Cossipore Municipality, &c. The total number of days on which Mr. Williams and myself were at a greater distance than 5 miles from head-quarters appears to be 101, but a good deal of suburban inspection is done within that radius. The municipalities in this Division require much of the Commissioner's attention, and I endeavoured to see as much as I could of the district roads. It is needless to recite all the different matters inspected and examined.

8. The number of days during which each Magistrate-Collector was on tour in the interior of his district is given below:—

(b) Tours of Collectors.

District	Officer	Days
24-Parganas	Mr. F. R. S. Collier	40
	The Joint-Magistrate of the 24-Parganas	44
Nadia	Mr. E. W. Collin	6
	„ J. H. E. Garrett	122
Murshidabad	„ J. Kennedy	108
	„ J. H. Temple	13
Jessore	„ W. Fiddian	9
	„ J. Stevenson-Moore	76
	„ F. S. Hamilton	43
Khulna	„ H. F. T. Maguire	2
	„ N. D. Beatson-Bell	43
	„ W. B. Brown	45

9. It will be seen that, except in the case of the 24-Parganas, the wishes of Government in this respect have been more than fully complied with. All the District Officers except the Collector of the 24-Parganas were in the interior of their districts for more than the required number of days.

10. In the 24-Parganas the Collector and the Joint-Magistrate spent between them 84 days on tour, or 6 days short of the period prescribed by the orders of Government. Mr. Collier went out every month from July to January and for one day in March. He was prevented from doing much touring in December or January, or any in February, by illness, and also probably by his duties as member of Council. The Joint-Magistrate spent 44 days on tour from December to March. Mr. Collier visited all the subdivisional offices and treasuries, most of the thanas, municipal offices, and dispensaries. He looked into the state of roads and communications and the principal Government estates, inspected schools, enquired into the state of public health and public feeling, saw the state of crops, and held interviews with people of all classes.

11. Messrs. Collin and Garrett's tours extended over 128 days in Nadia. Mr. Collin was on tour for 6 days in April and Mr. Garrett's tour was distributed over the remaining months of the year. Mr. Garrett has been very active in travelling. He visited each subdivisional head-quarters at least three times, and made full inspections. He also visited and inspected—in the majority of cases twice—each municipality and municipal office, all the thanas except four, all sub-registry offices except one, all the important khas mahals, and made all the usual enquiries and inspections incidental to a camping tour. During his tour he visited the whole of the district, with the exception of the north-western portion of the Sadar subdivision, which he had intended to visit in January but did not, as he expected to be shortly relieved.

12. In Murshidabad Mr. Temple, while officiating for Mr. Kennedy in September and October, was in camp for 13 days. Mr. Temple inspected the Honorary Magistrate's court, municipal office and dispensary at Lalbagh, inquired into allegations of scarcity in Jangipur, and into the killing of a bull by Muhammadans in the subdivision of Kandi. Mr. Kennedy inspected all the khas mahals, many of the principal villages in the district, and the subdivisional offices and treasuries and sub-registry offices.

13. The number of days spent in camp by the District Officers of Jessore was 128. The tours were distributed throughout the year. Mr. Fiddian made the first half-yearly inspection of the Bangaon subdivisional office, sub-jail, and dispensary. Mr. Stevenson-Moore visited all the subdivisions, and inspected the offices, sub-treasuries, jails, dispensaries, thanas, sub-registry offices, and schools. He also enquired into the formation of village unions. Mr. Moore devoted much time to the pay, status, and physique of village chaukidars. He tried locally three bad livelihood cases. He also established local committees to manage the dispensaries of Jhenida, Magura, and Narail, with a view to obtaining some local support for those institutions, which are maintained by the District Board. Mr. Moore enquired into the cause of arrears of rents of pounds and ferries which have been very badly managed by the Local Boards, he inspected the Kotchandpur Municipality and arbitrated in a dispute between it and the local zamindar. He rowed down the river Kabadak to enquire into obstructions to

the channel caused by fishermen, and has since taken measures for their removal from navigable rivers throughout the district. The result of the removal of these *bandels* is reported to be already perceptible in the health of the people. While in the interior Mr. Moore brought about a compromise in the suits which certain persons had brought against the District Board regarding a tow-path. He also paid special attention to girls' schools. Mr. Moore made very useful tours. In January Mr. Hamilton visited Magura and Narail, and inspected the subdivisional offices, jails, dispensaries, sub-registry and Local Boards' offices, thanas, and khas mahals. He also visited Bangaon with me. In February he inspected the municipalities of Kotchandpur and Maheshpur, and visited the Tarpur Sugar Factory, inspected the Maheshpur thana, and enquired into the formation of a union at Benodepur. He visited some of the khas mahals in the Sadar and Jhenida subdivisions. Mr. Hamilton's tours were also useful.

14. The number of days spent in camp by the District Officers of Khulna was 90, distributed over all months of the year. Both the subdivisions were inspected once by Mr. Bell and once by Mr. Brown. Mr. Bell also inspected schools, sub-registry offices, excise shops, &c., and made some local investigations into criminal cases. He paid considerable attention to hospitals, and made arrangements for the extension of two of them. Mr. Brown inspected all the thanas and all the sub-registry offices except one, all the Local Boards and municipalities except one, attended to chaukidari matters, and paid much attention to khas mahals and wards' estates.

15. I am quite satisfied with the Collectors' tours in all the districts except that of the 24-Parganas. I should be glad if arrangements could be made in this district for more travelling by the Collector himself.

16. The following table shows the number of days spent by the different Subdivisional Officers on tour:—

District.	Subdivision.	Name of officer.	Time spent on tour.
24-Parganas	Barasat	Babu Chandi Das Ghosh	119
	Basirhat	Maulvi Mahammad Abdulla	108
	Diamond Harbour	Babu Khagendra Nath Mitra	91
Nadia	Kushtia	" Purna Chandra Mitra	129
	Meherpur	Mr. W. N. Delevingne	142
	Ranaghat	Babu Nabin Chandra Sen	123
Murshidabad	Jangipur	" Nava Coomar Chakraberti	127
	Kandi	" Pran Kumar Ghosh	101
Jessore	Jhenidah	Mr. W. Maxwell	108
	Bangaon	" Atul Krishna Ray	107
		Babu Akshay Coomar Chatterji	1
	Narail	" Amrita Lal Mukherji	125
	Magura	" Radha Kanta Banerjee	2
		" Kunja Behari Chatterjee	62
		" Nagendra Nath Ghosh	27
Khulna	Satkhira	Babu Gati Krishna Neogi	114
	Bagerhat	" Kumud Nath Mukherjee	104

17. The tours of all the Subdivisional Officers were up to the standard. All of them appear to have visited all parts of their respective subdivisions and to have generally made good use of their time in camp. In Nadia, however, Babu Nabin Chandra Sen, the Subdivisional Officer of Ranaghat, is reported to have taken up no criminal work during his absence from head-quarters, the result being that occasionally for as many as five days together no petitions were heard and no B and C forms were disposed of. This officer appears to have shirked as much work as he possibly could. Babu Purna Chandra Mitra and Mr. W. N. Delevingne did good work while on tour. In Jessore all the officers devoted much attention to the working of the Chaukidari Act.

18. In Jessore Mr. Moore directed Subdivisional Officers, in addition to ordinary inspections, to enquire specially into the following matters when on tour:—(1) Obstructions in rivers, (2) pay and status of chaukidars, (3) tanks excavated and reserved for drinking by the District Board, (4) the requirements of villages respecting drinking water, (5) ferries which it might be desirable for the District Board to acquire, (6) khas mahal improvements and

unsettled lands, (7) income-tax assessments. Regarding subdivisional tours Mr. Moore truly observes: "Much has been said against the necessity for tours "by Subdivisional Officers. I think in their way they are of just as much "importance as Collectors'. An intimate knowledge of the working of the "police helps on a Subdivisional Officer's administration enormously, and if his "tours are well arranged, his appearance in a village where a disturbance is "imminent, with his court accessories ready to hand, has an effect it is difficult "to estimate. * The Subdivisional Officer of Narail, Babu Amrita Lal Mukerjee, "has been specially successful in this respect; consequently the decrease in "rioting in Narail subdivision is most marked."

19. In the 24-Parganas the Subdivisional Officers of Barasat and Diamond Harbour kept horses; the Subdivisional Officer of Basirhat kept a boat. In Nadia and Murshidabad both the Subdivisional Officers kept ponies. In Jessore the Subdivisional Officers of Jhenidah and Bangaon kept horses, and those of Magura and Narail kept boats. The Subdivisional Officers of Bagerhat and Satkhira in Khulna kept boats.

Inspection of district offices and treasuries by Commissioner.

20. I inspected all the district offices and recorded my remarks. No serious irregularity came to light.

(2) Inspection of district offices and treasuries by Collectors.

21. All the district offices and treasuries were twice inspected by the Collectors—generally in September and March. All defects noticed by the Collectors or by me were entered in registers of defects opened during the year, under my orders, and the Deputy Collectors in charge of the different departments noted in their own handwriting the manner in which each defect was remedied. No very serious fault was brought to light.

Inspection of subdivisional offices and treasuries by Commissioners.

22. The Barasat, Basirhat, Satkhira, Ranaghat, Magura, and Narail subdivisional offices and sub-treasuries were inspected by Mr. H. C. Williams. I inspected the remaining subdivisional offices, with the exception of those at Jhenidah, to which my visit was a very brief one. I had inspected them in the previous year, and was satisfied with Mr. Maxwell's work.

Inspection of subdivisional offices and treasuries by Collectors.

23. In the 24-Parganas the Barasat subdivisional office and sub-treasury were twice inspected by Mr. Collier, and the Diamond Harbour and the Basirhat subdivisional offices and sub-treasuries once by him and once by the Joint-Magistrate. The Collectors of the other districts inspected all subdivisional offices and sub-treasuries twice, with the exception of Kandi, which was inspected only once, Mr. Temple, who was to have inspected there a second time, having been unable to do so owing to illness.

24. The offices and sub-treasuries of all the subdivisions, with the exception of Ranaghat and Kushtia, were twice inspected during the year by the Deputy Collectors in charge of them. No inspection was made by Babu Nabin Chandra Sen, the Deputy Collector of Ranaghat, of his own office in the second half of the year under report, on the excuse that the Commissioner had inspected his office in September, which is absurd. The Commissioner's inspection is on lines very different from the detailed inspection the Deputy Collector is expected to make; but, as I have said already, Babu Nabin Chandra Sen shirked everything he could. The inspection of the Kushtia subdivisional office and sub-treasury was not made by the Deputy Collector, Babu Purna Chandra Mitra, until the beginning of April last. His attention has been drawn to the necessity of inspecting his office within or before the close of each half-year.

III.—WEATHER AND CROPS.

25. The average rainfall in the Division was 58·43 inches during the year under report, or 18·72 inches less than in 1893-94 and 1·77 inches more than in 1892-93. The largest rainfall during the year was at Rampal in Khulna, being 73·92 inches, and the smallest at Barasat in the 24-Parganas, being 39·65. The average outturn of the *aman* or winter crop of rice in the Division was 15·1 annas during the year, against 12·7 in 1893-94 and 10·9

in 1892-93, while that of the *aus* or early rice crop was 14 annas against 9·6 in 1893-94 and 15·1 in 1892-93.

26. In the 24-Parganas the average rainfall in the year under report was less than that of the two preceding years in all the subdivisions, but it was unevenly distributed, and some place received a larger downfall than that at the recording stations. The consequence was an average outturn of crops throughout the district, except in parts of the Diamond Harbour subdivision, where a heavy downfall in July swamped the seedlings and did considerable damage before cuts could be allowed in the embankments to drain off excess water, and the lands that had been planted had nearly all to be planted a second time, and fresh seedlings grown or fetched from other places. In some parts of the subdivision land remained fallow for want of seedlings, and from the lowest tracts the water was not drained off. *Boro* rice was afterwards raised in some of them. There was heavy rain in the Basirhat subdivision in June, which injured the *borodhan* and *aman* seedlings in the Bhil Bullee estate. In spite of local damage caused by the floods, the outturn of the *aman* paddy in the Diamond Harbour and other subdivisions was greater than in former years, the result being a general fall in the price of rice. The oilseed crop was only 9 annas, but sugarcane was a 14-anna crop.

27. In Nadia the average rainfall in the year under report was 60·46 inches against 71·7 in 1893-94 and 50·1 in 1892-93. The quantity that fell during the year, though not insufficient for agricultural purposes, was not evenly distributed throughout the different seasons. The timely rainfall during the first half of the year was beneficial to the *bhadoi* and winter rice and indigo. It facilitated the ploughing and early sowing of lands, with the result that the crops yielded very fair outturns and the people were enabled to harvest them in time almost everywhere before any material damage was effected by the floods in the rainy season. On the other hand, abnormal rainfall at the beginning of November damaged the *rabi* crops more or less, and the season being late, the cultivators could not resow them. The outturn of these crops, however, except that of wheat, was greater than in the preceding year, and would have been highly satisfactory had there not been a total absence of rain during the months of January and February.

28. In Murshidabad the rainfall of the year under report was much less than in 1893-94, but greater than in 1892-93. In the Sadar subdivision the rain which fell in April and May was favourable to all the crops generally, but the unusually heavy rainfall in October and November caused considerable damage to paddy in low lands, indigo, mulberry, and sugarcane. In the Kandi subdivision, though the total rainfall of the year was a little more than that of the two preceding years, the outturn of *aman* or winter rice fell from 18 to 16 annas, of *aus* from 14 to 12 annas, and of jute from 12 to 11 annas, on account of irregularity in the rainfall. In Jangipur early and prolonged floods damaged the *bhadoi* rice and retarded the sowing of gram and wheat, and did considerable damage to *kalai*. The outturn of *rabi* crops, though grown late in the season, was better than was expected. Silkworms and mulberry did fairly well.

29. In Jessore the average rainfall of the year was 58·66 inches against 65·04 in 1893-94 and 61·44 in 1892-93. The rainfall was seasonable, save for excessive rains in November, which damaged the *rabi* crops already sown and somewhat retarded sowing. The average outturn of *aus* and *aman* rice was 17 and 16 annas respectively, against 10 and 9·2 annas in 1893-94. Wheat and pulses yielded 6 and 9½ annas only, owing to heavy rainfall in November. The outturn of tobacco, sugarcane, indigo, and jute crops was 12, 15, 10, and 14 annas during the year, against 12, 12, 4, and 7 respectively. Heavy floods in the Bangaon subdivision brought down the average for the district considerably.

30. In Khulna the rainfall in the year under report was less than that in 1893-94, but a little above that in 1892-93. The rain was evenly distributed throughout the season. The outturn of the rice crops was excellent, being 17 annas, the outturn of jute was 13 annas against 11 in 1893-94, while that of sugarcane and tobacco fell off. Mr. Brown, Officiating Collector, makes the following remarks on the subject:—

"In the Sunderbuns, where paddy is grown almost entirely for export, the "cultivators are said to have been severely hit by low prices. In ordinary years

"traders come round and buy grain from the cultivators—sometimes even before "it is reaped. But this year the demand is languid, and the raiyats had considerable difficulty in disposing of the produce. The reaping of the harvest in "the Sunderbuns is generally done by immigrant labourers, and their remuneration in bad years like the last is as low as $\frac{1}{16}$th or $\frac{1}{18}$th of the crop. But this "year, owing to plentiful harvests in other districts, the supply of labour was "short, and the remuneration rose to $\frac{1}{8}$th or $\frac{1}{6}$th of the crop. The Subdivisional "Officer of Bagerhat states that in consequence of these circumstances he has "seen some fields in the Sunderbuns in which the crops were left standing, as it "did not pay the cultivators to reap them. Perhaps these are fields where the "crop has been damaged by wild pigs and deer."

IV.—PUBLIC HEALTH.

31. The following table compares the recorded mortality in the districts of this Division during the past three years. Registration is, however, not yet sufficiently perfect to deduce arguments from the recorded figures:—

District.	Number of deaths from fever.			Number of deaths from cholera.			Number of deaths from other causes.			Total number of deaths from all causes.			Average of the past two years 1892 and 1893.
	1894.	1893.	1892.	1894.	1893.	1892.	1894.	1893.	1892.	1894.	1893.	1892.	
1	2	3	4	5	6	7	8	9	10	11	12	13	14
24-Parganas	32,650	31,884	33,164	4,919	1,561	8,742	7,481	7,656	6,152	45,050	41,101	48,058	44,580
Nadia	53,621	47,674	42,491	5,038	4,331	10,592	6,403	8,936	6,603	65,062	60,941	58,686	59,814
Murshidabad	36,766	38,592	31,825	3,868	4,390	4,617	4,500	5,545	4,237	45,134	48,527	40,678	44,602
Jessore	58,247	63,725	64,556	4,558	3,624	11,286	5,075	6,380	3,866	67,880	73,729	79,707	76,718
Khulna	23,111	24,148	28,548	2,457	1,270	3,961	6,670	6,705	4,777	32,238	32,123	37,286	34,704
Total ...	204,395	206,023	200,584	20,840	15,176	39,198	30,129	35,222	24,635	255,364	256,421	264,415	260,418
Ratio of death per mille of the population.	26	26·2	25·5	2·6	1·9	4·9	3·8	4·3	3·1	32·5	32·6	33·5	33·2

32. Taking each district separately, the public health of the 24-Parganas during the year was worse than that of the previous year. Deaths from cholera were more than three times the number shown in the previous year, but the cases were scattered. Deaths from fever were greater by 2·4 per cent. and from bowel-complaints by 22·4 per cent. Deaths from small-pox and "other diseases" alone showed a decrease of 22·4 and 7·9 per cent. respectively. The Barasat subdivision was the most unhealthy part of the district, and the death-rate there doubled during the year. As this is the highest portion of the district, it ought to have been the healthiest, but it appears that fever was specially prevalent. This may be due to a deficient supply of good drinking water, but the fact is that Barasat is notoriously unhealthy. The suburbs of Calcutta continued unhealthy, and there was a large increase of fever, especially noticeable at Cossipore-Chitpore and Chetla. A ride through the localities will show the reason. The insanitary conditions, which may be comparatively innocuous in sparsely inhabited villages, set in the middle of large open plains, are fatal when population is so dense as in the suburbs. The foul tanks and drains and other abominations illustrate the character of the municipal administration. Mortality in the suburbs would be much greater than it is if many of the inhabitants did not come from distant districts, to which they return to die when they fall ill. The largest mortality occurred in the months of November and December. The total number of persons vaccinated during the year was 47,471 against 41,102 of the preceding year. Of the former, 46,988 cases were successful and 483 unsuccessful.

33. In Nadia also the public health during the year was worse than that of the previous year. The urban areas suffered almost as much as the rural areas, the ratio of deaths per mille of the population being 39·57 against 37·07. Of the urban areas, Birnagar, which is an undrained jungle, suffered the most, having a death-rate of 54·08 per mille of the population. Meherpur, on a deserted channel of the river Bhairab, came next with 48·11 per mille. There was an increase in the death-rate as compared with 1893 in every town except Kushtia and Kumarkhali, the former showing a very large decrease. Of the rural areas, Santipur and Krishnagar furnished the highest death-rates being 51·34 and 50·52 per mille of the population, and thana Damurhuda the lowest, being 29·69 per mille. The greatest number of deaths occurred in the month of January (7,799) and the lowest number in June (2,412). November and December were also very unhealthy, and there was an increase in the mortality in April, due to the prevalence of both fever and cholera. Malarious fevers prevailed very severely throughout the whole district, the number of deaths from this cause being 53,621 against 47,674 in 1893, and the death-rate 32·61 per mille of the population against 29. The highest mortality from fever was in January, April, and October to December, causing 30,768 deaths, and the lowest in June, causing 1,956 deaths only. Cholera is shown as causing 5,038 deaths against 4,331 in 1893. The urban areas suffered less than the rural. The Sadar subdivision had the highest death-rate and Meherpur the lowest. The greatest number of deaths from cholera occurred in March and April, and the least in August and September. The total number of deaths from small-pox was 10 against 26 in 1893. Dysentery and diarrhœa account for 186 deaths against 267 in 1893. The total number of deaths from injuries was 1,059 against 870 in 1893. They were chiefly caused by snake-bite and suicide, which were more common among females than males, and in rural areas than in urban. Deaths from other causes amounted to 5,148 against 7,773 in 1893. There were 2 deaths among 154 patients admitted into the Krishnagar Jail Hospital. I attribute the ill-health of the district in great measure to obstructed drainage. It is worst along the deserted channels of great rivers, where it improves when heavy rain produces a flow of water. I believe that much may be done by sanitary drainage.

34. In Murshidabad the total number of deaths returned was 45,134 against 48,527 of the preceding year. This decrease in the death-rate coincides with general public opinion as to the comparative healthiness of the district, but the registration of vital statistics cannot be relied on. As usual, by far the largest number of deaths is registered under the head "fevers," and though no doubt deaths from chest-affections and other diseases accompanied by fever are recorded under this head, still malarial fevers and other complications are the main cause of death. The total number of deaths from fever registered during the year was 36,766, or 1,826 less than in the previous year. The last quarter of the year gives the highest death-rate from this cause. The greater number of the thanas most affected by fever are situated in the eastern portion of the district, which is urgently in need of drainage. The mortality from cholera during the year was 3,868, or very slightly more than the average of the previous five years, but less than in any single year of the five except 1890, which would appear to have been remarkably free from this disease. Of the rural circles, Barwan shows the largest death-rate from cholera, being 7·37 per mille of the population, and Nawada the lowest, being 4·12 per mille. Amongst the municipalities, Lalbag shows the highest death-rate and Jangipur the lowest. The health of all the towns except Kandi was better than in the previous year. The increase in the death-rate in Kandi is due to the greater prevalence of cholera, and not to a general increase of all sickness, malarial fevers being less than in the prevous year. Four deaths are returned from small-pox against 2 in 1893, and 4,500 from other causes against 5,545 in the previous year. The total number of persons vaccinated during the year was 39,674 against 35,632 in the previous year. Of the former, 39,323 cases were successful and 351 unsuccessful.

35. The total number of deaths recorded in Jessore during the year was considerably less than that of the two preceding years. It was also below the average of the five preceding years, the death-rate being 35·9 per mille against 9·303 in the previous year and 36·1, the average of the five preceding

years. The rainfall was not so heavy as in the preceding year, and this coupled with the measures taken by Mr. Stevenson-Moore for the removal of obstructions to drainage made by fishermen, may perhaps account for the decrease in the mortality. The prevailing disease was as usual fever, which alone was responsible for 58,247 deaths, against 63,725 in the previous year. Cholera accounted for 4,558 deaths against 3,624 in 1893, dysentery and diarrhœa for 92, and small-pox for 23 deaths. Deaths from injury numbered 855, and those from other causes 4,105. Fever was prevalent throughout the year and throughout the district, being most severe in January, April, November, and December, when 8,290, 5,454, 6,520, and 7,190 deaths respectively were reported. The death-rate was highest in the Bangaon subdivision, being 39·2, and lowest in Narail, where it was 24·2. The police-stations which suffered most from fever were Bangaon and Gaighata, with death-rates of 42·3 and 41·1 per mille of population. It is hoped that the removal of obstructions referred to will show better effect on the public health in the current year. Mortality from cholera was heavier during the year under report than in 1893, but it did not approach the very heavy mortality of 1892. There were 23 deaths from small-pox as compared with 2 in the preceding year. Most of the cases occurred in the subdivisions of Magura and Narail, and are said to have been imported from Calcutta. Fifty-nine thousand eight hundred and ninety-four vaccinations were performed during the year, of which 59,214 were successful and 680 unsuccessful.

36. In Khulna the public health appears to have been about the same as in 1893, and better than in 1892. The number of deaths from fever is registered as 23,111 against 24,148 in 1893 and 28,548 in 1892. Cholera is shown as causing 2,457 deaths during the year, against 1,270 in 1893 and 3,961 in 1892. Deaths from other causes were 6,670 against 6,705 in 1893 and 4,770 in 1892. The ratio of deaths from all causes per mille of the population was 27·37 during the year, against 27·27 in 1893 and 31·66 in 1892. The total number of persons vaccinated during the year was 33,382, of which 33,124 cases were successful and 258 unsuccessful.

V.—MATERIAL CONDITION OF THE PEOPLE.

37. In consequence of the better harvest in the 24-Parganas during the year, there was some improvement in the condition of the people generally. The agriculturists fared well. Those, however, who were in debt on account of the failure of crops in former years have only been able to clear themselves partially, and the profits derived from the sale of surplus produce were absorbed in the liquidation of their debts. The wages of labourers have been maintained. The non-cultivating classes continued to suffer from the increased price of food-grains, corresponding with the fall in value of the rupee, and from their disinclination to seek for any but clerical employment. The southern part of the district, which consists of low lands, suffered considerably during the year from the effects of floods caused by excessive rain in July, and, owing to the partial failure of the *aman* crop in these tracts, time was allowed to the cultivators for the repayment of the loans advanced to them under the Agriculturists' Loans Act. The price of common rice fell in consequence of the good outturn of the *aman* paddy throughout the district. The condition of the raiyats in the Government estates in the Basirhat subdivision was, however, bad, owing to a partial failure of the *aman* crop and to the loss of the *boro* rice harvest in those estates, and consequently large remissions of rent were granted to them, which, so long as I am dealing with actual cultivators and not middlemen, I prefer to carrying forward balances to be paid out of future harvests.

38. In Nadia there was a considerable improvement in the material condition of the people during the year. The outturn of the two rice harvests was good and the *rabi* crops were fair. The prices of food-grains were much lower than in the preceding years. The lower agricultural classes, living, as they are said to do, in a chronic state of indebtedness, were as well off as they could reasonably be expected to be. The price of labour ruled higher than usual—indeed at one time during the year labourers were getting 6 and 8 annas

a day for work on the roads, which shows that labourers are in no want of remunerative employment. It is said that owing to decay of local industries the artizan classes are being driven to agriculture, and that more and more land is yearly being brought under the plough, to the detriment of the cattle, which are thereby deprived of pasturage. This theory, however, seems to be fanciful, as a reference to the figures supplied to the Director of Agriculture will show that the area actually under plough falls far short of the culturable area, and I do not believe that the pasturage lands are being seriously encroached upon. The material condition of the people is, however, injuriously affected by the increase of malarial fever, which is due both to deterioration in the quality of their drinking water and to defective drainage. Rivers and tanks are gradually silting up, and though efforts have been made to induce the people to take loans for the improvement of their water-supply, they will not take advantage of the offer. There can be no doubt that for some three months in every year a large proportion of the inhabitants are put to the greatest difficulty to obtain drinking water, and though the District Board are devoting as much as they can spare to the construction of wells in places where they are most needed, it is obviously beyond their resources to cope—to even a moderate extent—with this real and pressing want. If the villagers could be induced to contribute some labour, the District Board could greatly extend their operations by grants-in-aid, but the villagers do nothing, and the excavation of a tank brings enormous profits to contractors and labourers.

39. In Murshidabad a number of the cultivators were affected by the loss of a large part of the *bhadoi* rice and mulberry crop, in consequence of early and long-standing floods. The good outturn of *aman* rice, however, afforded them relief to a considerable extent. The high prices at which the principal food-grains sold during the year were much felt by the non-cultivating classes, but benefitted the cultivating class. Having sufficient work, as also the advantage of the charitable doles largely given by many zamindars of the district, the landless labourers had very little to complain of; indeed, labour is more or less difficult to obtain.

40. In Jessore the good crops of the year and the consequent fall in the prices of rice have to a certain extent improved the condition of the working classes and raiyats. The landlords have got their rents and the mahajans recovered their bad debts. There was a decrease in the number of bonds and mortgage deeds, and an increase in title and rent suits. In short, the year was one of plenty and comfort. The Collector reports that the weavers of the district have never in the memory of man been so prosperous as they are at present, and attributes the change to the imposition of import and excise duties on the finer counts of cotton, though I think that it is really much too soon for this cause to have produced any effect. Although the district remained exceedingly unhealthy as regards fever and other diseases, the fact of the rainfall being seasonable has somewhat decreased the mortality from fever. The better classes of natives have suffered as much as usual from fever, liver, and spleen.

41. In Khulna, where the bulk of the people are agriculturists, their material well-being depends largely on the outturn of the rice crop, and as there was a bumper crop in the year under report, contentment and prosperity prevailed everywhere. But there was a general complaint among the cultivating class that the price of paddy was so low that it did not enable them even to pay their rents in full to their landlords.

42. On the whole it may be said that the material condition of the people of the Division during the year under report was better than in the preceding two years.

VI.—EMIGRATION AND IMMIGRATION.

43. 24-*Parganas.*—During the year under report 4,575 emigrants were registered in this district as compared with 5,216 in the previous year. Of these, 1,881 were for the colonies and 2,694 were for Assam, Cachar, and Sylhet, as compared with 1,987 and 3,229 respectively in the previous year,

showing a decrease in the number of emigrants both for the colonies and for the north-eastern labour districts. Of the total number of emigrants only 8 belonged to this district, and the rest to western districts. There was no registration for St. Lucia or Guiana during the year.

44. *Nadia.*—There was the usual exodus of labourers during the harvest season from this district to the Sunderbuns and neighbouring districts. Coolies from up-country were employed on railways within the district, which would not be the case if local labourers were starving for want of work. It is also reported that a large number of labourers went to work on the Assam-Bengal Railway without the intervention of recruiters.

45. *Murshidabad.*—There was no emigration from, or immigration into, this district during the year.

46. *Jessore.*—It is reported that the only emigration in this district is in the form of short visits to the Sunderbuns by labourers and cultivators for the paddy harvest, by *Namasudras* from Magura for the collection of wood, and by fishermen from Narail for catching fish. There is no immigration.

47. *Khulna.*—There is no emigration from this to other districts. There was the usual influx of labourers from the neighbouring districts in the transplanting and harvesting seasons, but they return to their homes as soon as their work is finished. They are allowed a percentage of the produce, which generally varies from $\frac{1}{15}$th to $\frac{1}{16}$th, as remuneration; but it is reported that, there being good crops during the year under report, the supply of labour fell short of the demand, and the rate of remuneration in consequence rose to $\frac{1}{5}$th or $\frac{1}{6}$th of the produce.

VII.—PRICES OF FOOD AND LABOUR.

48. The price of common rice, which is the staple food in this Division, fell by about one-fourth as compared with the two preceding years in all the districts of the Division except Murshidabad, where it rose slightly. The price of salt in all the districts has remained almost stationary during the last three years. The prices of wheat and gram rose in all the districts except Jessore, where the price of wheat fell a little, but these articles are not commonly consumed. In the 24-Parganas the price of common rice fell from 11 to 14 seers per rupee to 15 to 26 seers. Owing to damage caused in the Basirhat and Diamond Harbour subdivisions by the heavy rains of June and July, there was a rise in prices at these places, but with the progress of the harvest the prices fell again gradually, until at the end of the year common rice sold at 15 to 20 seers a rupee. In Nadia the price of common rice fell towards the end of 1894 and did not rise again. A similar fall took place under other items except gram in Meherpur, Chuadanga, and Ranaghat. In Murshidabad the prices of wheat, rice, and gram rose during the year as compared with 1893-94, but not so high as in 1892-93. In Jessore and Khulna the harvests were excellent, and the prices of common rice were lower than in the other districts of the Division. The prices of labour in the districts of this Division remained almost the same as in the two preceding years. In the 24-Parganas a decrease in the wages of the blacksmith from 12 to 10 annas is reported, but I do not suppose there is any real fall. In Nadia the wages of unskilled labour rose slightly, and at one period of the year common coolies were obtaining as much as 6 annas per diem for working on roads. On the whole the fall in the price of rice had no material effect on the wages of labour, which are generally fixed by local custom.

VIII.—MANUFACTURES AND MINES.

49. The principal manufactures of this Division are cotton twist and yarn, gunny-bags and cloth, paper, ice, shellac and lac-dye, indigo, silk, sugar and molasses. The manufacture of cotton twist and yarn, gunny-bags and cloth, paper, silk, ice, shellac and lac-dye is confined to the district of the 24-Parganas, in which 57 factories were at work at the close of the year under report against

58 in the previous year. Of these, nine are owned by Government, and the rest belong to companies or private individuals. The total number of operatives employed in the several mills and factories was 60,474. Of these, 46,524 were men, 8,977 women, 4,565 boys, and 408 girls. The number of operatives shows a decrease of 12,359 as compared with the number employed in the preceding year. The decrease is among the male employés at the Government factories and jute presses, &c. There has been no decrease in jute or cotton mills. The statement given below shows the value of the outturn as returned by the owners of the several mills and factories during the last three years:—

Articles.	Outturn.			Remarks.
	1894-95.	1893-94.	1892-93.	
1	2	3	4	5
	Rs.	Rs.	Rs.	
Gunny-bags and cloth ...	2,09,96,916	1,61,98,071	1,00,37,674	
Cotton twist and yarn ...	74,18,581	81,51,872	68,24,017	
Rice	No information given.	No information given.	58,000	
Paper	20,35,479	12,05,873	10,49,167	
Lac	18,00,000	9,50,000	10,00,000	
Leather	66,000	72,000	......	

50. According to these figures the year was favourable for all except cotton twist and yarn and leather. With regard to cotton twist and yarn, the Secretary to the Dunbar Cotton Mills makes the following observations:—

"Cotton has ruled moderate in price. There have been no great fluc-"tuations, but prices slowly fell till the end of 1894, being forced down on "account of an immense crop in America and by the fall in sterling prices to the "lowest point ever reached. Early in March a reaction set in, and prices have "now recovered from 10 to 12 per cent. from the lowest point reached. "*Yarn.*—The financial year opened with renewed demand from China and "Japan, and there was every prospect of a brisk trade to make up for the "diminution of stocks in the last, which followed the closing of the Indian "mints. During the next three or four months there was a fair trade, but the "outbreak of the plague in Hong-Kong, followed by the war between China and "Japan, effectually checked business, which still suffers from the latter cause. "There has been a good local off-take during the twelve months, which has "kept prices steady and enabled the mills to keep clear of stocks. The local "mills worked with a bare margin during the first part of the year, but latterly "the fact that yarn prices remained fairly steady while cotton prices were "falling enabled moderate profit to be made."

51. With regard to the manufacture of jute, the Manager of the Barnagore Jute Factory makes the following observations:—

"In the beginning of the period under review mills were all losing "money on account of the high price of unmanufactured jute. Towards

"the middle of May prices of jute began to give way and gradually dropped "till the end of December, when a reaction set in, and prices have since "continued to advance. For about three-fourths of the year most mills have "made fair profits."

52. As regards hours of work, noticed in paragraph 51 of last year's report, it has been reported that the Hastings Mill has continued to work 22 hours daily, and two or three others have worked till 8 or 9 P.M. with the idea of making a uniform 14-hour day, lighting with oil lamps and electric light. This system of working after dark is generally condemned by those in the trade, and is not considered beneficial either to workers, whether European or Native, or to employers. A very large majority, not only of the European managers and assistants, but also of the mill agents, consider that a uniform day of from 6 A.M. till 6 P.M. would be beneficial to all concerned.

53. There are two paper mills in this Division—one at Titaghur and the other at Kankinara, the latter having been started during the year under report. The manufactures consisted of white printing, *badami*, and coloured papers, blotting, cartridge, foolscap, and water-marked stamp paper. The raw materials used were grass, rags, jute, hemp, waste paper, &c.

54. In the district of Nadia there was considerable improvement in the working of the 16 oil mills started at Sarupganj. Additions have had to be made owing to the former capacity of the mills having proved inadequate to cope with the demand.

Indigo.

55. Indigo is largely manufactured in the districts of Nadia, Murshidabad, and Jessore. The table below shows the state of this industry during the year under report as compared with the two preceding years:—

District.	Number of factories.			Produce in maunds.			Value in rupees.			Remarks.
	1894-95.	1893-94.	1892-93.	1894-95.	1893-94.	1892-93.	1894-95.	1893-94.	1892-93.	
1	2	3	4	5	6	7	8	9	10	11
Nadia	61	63	65	4,595	1,249	2,130	7,98,683	2,51,055	5,44,790	
Murshidabad	23	23	23	2,454	1,641	1,357	5,73,725	4,21,577	4,11,795	
Jessore	14	17	20	1,160	478	1,198	2,35,644	1,20,096	3,33,942	
Total ...	98	103	108	8,209	3,368	4,685	16,07,051	7,92,728	12,90,527	

56. It will be seen that the number of factories is gradually decreasing in the districts of Nadia and Jessore, while in Murshidabad it remained stationary. The decline in this industry may be ascribed to (1) a gradual rise in the level of the country, making it less liable to fertilizing inundations. The plant grows less luxuriantly and the crop is more liable to injury from drought; (2) a great increase in the value of agricultural produce, which leads to a greater demand for land; (3) an enormous rise in the price of labour. The improvement in the outturn during the year in the district of Nadia has been attributed to normal rainfall at the proper seasons and lateness in the appearance of floods. In Murshidabad the outturn increased, but was not up to the average. Early and long-continued floods did great damage to the crop. There was a heavy fall in prices as compared with previous years, the outturn being larger. It is universally admitted that the manufacture of indigo can never pay by itself. All the planters have more or less large zamindaris, and without these they would cease to carry on business. The Meherpur subdivision, in the district of Nadia, is still the principal seat of the indigo industry. As reported in previous years, there were six large concerns in this subdivision.

57. The manufacture of silk is principally carried on in the districts of the 24-Parganas and Murshidabad. The following table compares the state of this industry during the last three years:—

Silk.

DISTRICT.	Number of factories.			Produce in lbs.			Value in rupees.			REMARKS.
	1894-95.	1893-94.	1892-93.	1894-95.	1893-94.	1892-93.	1894-95.	1893-94.	1892-93.	
1	2	3	4	5	6	7	8	9	10	11
24-Parganas ...	Information not furnished.						53,832	53,719	52,968	
Murshidabad ...	62	63	66	300,830	576,380	338,621	24,09,265	33,34,573	27,24,190	

This industry, like indigo, can hardly be called manufacture, being only preparation of raw produce for the market as a material and not as a finished product. In both the districts there was decrease in the trade, attributed to the unfavourable nature of the season and poor outturn of cocoons. The November crop of cocoons in the district of Murshidabad was specially small, but prices ruling high, many filatures did not buy till late in the season, and consequently the outturn of silk was greatly reduced, especially in the European filatures. It has been reported that the price of silk in the European market was also low. With the decline of the native silk industry in the district of Murshidabad, the manufacture of silk cloth at Mirzapur in the Jangipur subdivision is also losing ground year by year. During the year under report 6,311 pieces of silk cloth were manufactured, against 7,004 pieces of the previous year; the value thereof, however, rose from Rs. 51,450 to Rs. 55,058.

58. Sugar is manufactured from the sap of date trees in all the districts of this Division except Murshidabad. The managers of the sugar mill at Cossipore have not supplied any statistics of their operations. The concern is a private one, and the proprietors do not care to publish their transactions. The following table compares the state of this industry in the districts of this Division during the last three years:—

Sugar.

DISTRICT.	Number of factories.			Outturn.			Value.			REMARKS.
	1894-95.	1893-94.	1892-93.	1894-95.	1893-94.	1892-93.	1894-95.	1893-94.	1892-93.	
1	2	3	4	5	6	7	8	9	10	11
24-Parganas ...	171	220	175	Mds. 74,674	Mds. 92,546	Mds. 75,800	Rs. 5,24,236	Rs. 6,62,907	Rs. 5,68,500	
Nadia	No statistics are available.									
Jessore	144	174	174	2,58,684	2,88,036	3,19,170	21,79,875	20,79,535	19,05,429	
Khulna	Information not furnished			18,353	18,160	17,431	1,49,801	1,38,497	1,56,879	

In the district of the 24-Parganas the manufacture of sugar under the native process is confined to the subdivisions of Barasat and Basirhat. The principal centres of the date sugar manufacture are Santipur, Chakdaha, Krishnaganj, Daulatganj, Alamdanga, and Munshiganj, but no statistics are available regarding the outturn. The decrease in the number of factories and in outturn has been attributed to loss sustained in the preceding year by the manufacturers and to the heavy rainfall of November, which stopped tree-tapping for some time. The price of sugar was higher than in the previous year, probably on account of the fall in value of the rupee.

IX.—TRADE AND COMMERCE.

59. As the statistics referred to in paragraph 2 of Government of Bengal (Statistical Department) circular No. 2, dated 16th April 1895, have not been received from the Manager of the Eastern Bengal State Railway, although he

has been written to by the Collectors of districts, the report on this section is necessarily meagre, and generally based on figures the correctness of which is very doubtful. In my No. 56J.G., dated 29th May 1895, I reported to Government that the Collector of the 24-Parganas had not been able to obtain the necessary statistics, and suggested that it would be better if Government could obtain the required information more directly than through the Collectors of districts.

60. 24-*Parganas*.—The table below shows the export and import traffic registered along the 11 main trade routes of this district during the past two years:—

Articles.	From Mufassal towards Calcutta.		From Calcutta towards Mufassal.

Total ...	...	82,827	75,990	...

64. *Nadia.*—Trade in this district is carried on principally by means of rivers and railway. The principal articles of export are wheat, gram, pulses, jute, linseed, sugar, both refined and unrefined, cotton, and indigo; while the principal articles of import are cotton, European piece-goods, twist, both European and Indian, rice, paddy, salt, and kerosine oil.

65. The following statement shows the "up" and "down" import and export boat traffic of this district along the Nadia rivers during the year under report of the 22 articles mentioned in Government circular No. 2, dated the 16th April 1895:—

Articles.	Imports, 1894-95.		Exports, 1894-95.

68. These figures were supplied by the railway authorities in tons, but they have been reduced to maunds, taking 27 maunds as equivalent to one ton. These statements are newly prescribed, and while the river-borne trade figures are for the financial year, the figures for the rail-borne trade are for the calendar year. It is not therefore easy to compare the figures under the different heads with those of the previous year. No reliable figures under the head of European piece-goods are available, and the Collector cannot therefore definitely say whether the levy of the new duty on European articles during the year has affected the import under this head or not. None of the other heads call for any remarks. There was no trade under heads "silk" or "Indian tea" in this district during the year. Indigo does not find a place in the list appended to Government circular No. 2 of the 16th April 1895, but is an important article of export from Nadia, the exports in 1894-95 being 4,595 maunds, valued at Rs. 7,98,682.

69. *Murshidabad.*—The following table shows the different articles of export trade in this district, and the extent to which they were exported during the year under report as compared with the year preceding:—

	1893-94.	1894-95.
	Mds.	Mds.
Rice in husk	81,095	82,112
Do. not in husk	5,45,877	2,28,027
Wheat	36,781	27,974
Gram and pulses	55,177	35,789
Jute	2,50,282	2,50,691
Linseed	88,762	18,015
Mustard	4,369	7,002
Indigo	1,641	2,454
Silk	7,029	3,668

70. The figures show that there was a considerable falling off in the export of all the articles, except rice in husk, jute, mustard, and indigo. This is attributed to the short outturn of the winter crops in general, except mustard, owing to the late heavy rains of October.

71. Jeagunge, Baluchar, Bhagwangola, Mirzapur, Lalgola-Raghunathganj, Dhulian, Bhakhara, Satui, Jebanti, Kandi, Saktipore Dupakheria, Talibpore, and Panchthope are the chief internal trade centres of this district. The articles imported during the year were piece-goods, sugar, salt, *ghee*, twist, yarn, cocoanut oil, kerosine oil, spices, tobacco, gunny-bags, timber, firewood, and coal. These articles were almost all imported from Calcutta, except coal, which was imported from Raniganj, Sitarampore, and Barrakar.

The table below shows the principal articles of export and import by river as recorded in the Jangipur toll office during the year under report:—

Articles.	Exports, 1894-95.		Imports, 1894-95.	
	Up country.	Down country.	Up country.	Down country.
1	2	3	4	5
	Mds.	Mds.	Mds.	Mds.

The river-borne traffic of this district is confined as a rule to some months during the rains, but its briskness gradually ceases with the subsidence of the waters of the Bhagirathi. During the year under report the river remained navigable throughout the year, and a steamer of Messrs. Hoare, Miller and Company carried on business with Calcutta continuously. A statement showing the "up" and "down" import and export traffic of the several stations in this district carried by rail during the year under review is given below:—

Station.	Imports.		Exports.		Remarks.
	From up country.	From down country.	To up country.	To down country.	
1	2	3	4	5	6
	Mds.	Mds.	Mds.	Mds.	
Takipur ...	16	55	578	339	
Bhakhara ...	588	6,875	5,790	1,863	
Noada ...	5,715	10,647	13,826	35,337

Jangipur ...	310	1,824	33	7,815	
Dhulian ...	...	5,672	257	16,009	

72. It is reported that the above figures have been received from the Audit Office of the East Indian Railway at Jamalpur.

73. *Jessore.*—There was no change in the important means of communications during the year under review, except that the steamer which used to ply between Jhinkergatcha and Kotchandpur ceased to do so. The important trade centres of this district are Jessore, Basumdia, Rajarhat, Jhinkergatcha, Kaliganj, Khajuria, Chowgacha, Tarpur, and Keshabpur in the Sadar subdivision, Bangaon, Ganrapota, Gopalnagore, Maheshpur, Khalishpur, and Bagdah in the Bangaon subdivision, Jhenidah, Kotchandpur, Gilapol, Sailkopa, Nazirat, Harinakundo, and Dhantola in the Jhenidah subdivivision, Magura, Benodpur, Satrajitpur, Nohata, Rajapur, Nakail, and Radhanagor in the Magura subdivision, and Narail, Chanchuri, Lohagara, Kalia, and Sidhiposa in the Narail subdivision. Piece-goods, salt, kerosine oil, cotton, raw cotton twist, sugar refined, gunny-bags, manufactured tobacco, table rice, grain and pulse, are imported from Calcutta by railway, and from the railway stations they are carried by boats or carts to the marts for which they are intended. Tobacco unmanufactured is imported from Northern Bengal. Rice and paddy are imported from Backergunge and the Sunderbuns by boats. The principal articles of export from this district are rice, paddy, pulses, jute, linseed, sugar, indigo, and molasses. Fish, hides, cattle bones, and tobacco are also exported.

The following statement shows the rail-borne traffic of this district during the year 1894:—

Articles.	Imports.	Exports.
1	2	3
	Mds.	Mds.

76. Indigo does not find a place in the list prescribed by Government, but is an important article of export from this district, the exports in 1894-95 being 1,159 maunds, valued at Rs. 2,35,644. There is no office in the district for the registration of river or cart traffic. It is reported that the trade of this district is on the increase. Previous to the opening of the Bengal Central Railway the trade in foreign articles was monopolized by a few wealthy men, but since the opening of the railway it has been shared by several small capitalists, whose number is gradually increasing. It is observed that foreign articles are now sold at cheaper rates than before, while the prices of local products have risen, as they reach a ready market in Calcutta by the Bengal

Central Railway. The following is a balance sheet of the Jessore Loan Company on the 31st March 1895:—

Detailed heads of income.	Amount.			Detailed heads of expenditure.	Amount.		
1	2			3	4		
	Rs.	A.	P.		Rs.	A.	P.
1. Deposit ...	1,52,095	0	0	1. Establishment ...	3,112	6	6

Total for 1893-94 ...	4,90,494	6	6	Total for 1893-94 ...	4,90,494	6	6

77. *Khulna.*—The following table gives particulars of the import trade of the district during the past two years:—

Articles.	1893-94.	1894-95.
Piece-goods	7,43,980 Rs.	7,79,600 Rs.
Gunny-bags	46,795 Mds.	14,671 Mds.
Salt	1,11,851 „	1,04,087 „
Cotton twist and yarn	3,491 „	4,303 „

The other important imports were kerosine oil, iron, ironware, grain, wheat, fancy goods, and potatoes, but no statistics are available as to their quantity or value. The following table shows the particulars of the export trade of the district during the past two years:—

Articles.	1893-94.	1894-95.
Rice in husk	7,40,562 Mds.	3,56,702 Mds.
Do. not in husk	5,45,479 „	3,08,812 „
Gram and pulses	3,600 „	5,200 „
Jute	63,388 „	1,12,263 „
Gunny-bags	...	630 „
Hides	36,326 Rs.	16,708 Rs.
Sugar	18,160 Mds.	18,353 Mds.
Molasses	68,543 „	60,980 „
Soondri wood	Not known.	Not known.

Besides the above, betelnuts, cocoanuts, fish, tobacco, mats, reeds, honey and wax were largely exported during the year. These statistics were supplied by the Subdivisional Officers and the Collector's nazir. They are mere guess figures, as there is no agency to collect the statistics, and I think they might well be omitted from the report. No statistics of the rail-borne traffic have yet

been received from the railway authorities. The Examiner of Accounts, Bengal Central Railway, has, however, furnished the following revenue statistics:—

Articles.	1893.				1894.

The following statement shows the transactions of the Khulna Loan Company, Limited, during the calendar year 1894:—

	Rs.	A.	P.
Amount of deposit	54,268	9	0
Ditto deposits withdrawn...	29,824	6	0
Ditto loans given	1,14,264	0	0
Ditto principal realized	50,539	0	0
Ditto interest realized	21,152	9	9

The capital of the Company is Rs. 1,500, and the rate of interest varies from annas 12 to Re. 1-9 per cent. per mensem, according to the amount of loan advanced and the nature of the security pledged. The Company was able to declare a dividend of 15 per cent. to its shareholders during the year, as in the year preceding. The statement below shows the transactions during the year 1894 of the Khulna Trading Company, which was established in 1891:—

RECEIPTS.				EXPENDITURE.			
1				2			
	Rs.	A.	P.		Rs.	A.	P.
Shares realized	5	0	0	Money advanced	1,033	7	3

Total for 1893 ...	2,293	2	0	Total for 1893 ...	2,293	2	0

Provident Companies.

78. During the year under report there were 105 small Provident Companies in the district of Khulna. Of these, 84 were in the Bagerhat subdivision and 21 in the

Sadar, but none in Satkhira. The idea of these companies seems to have originated in Backergunge, and to have spread through the eastern subdivisions of the district during 1893 and 1894. The details of the companies are given below:—

Death	companies	...	...	85
Marriage	ditto	...	...	15
Birth	ditto	...	...	3
Fever	ditto	...	...	1
Pilgrimage	ditto	...	...	1
				105

Some of these companies are registered, but the majority are not. As the shares are not transferable, registration appears unnecessary. The principles of all these companies are nearly the same. There is no capital in the ordinary sense of the word, and there are no funds invested. A maximum number of shares is fixed. The price of each share is generally a rupee—often less. There is an entrance fee of a few annas. In the smaller companies the share-capital seems to be mostly swallowed up in preliminary expenses, such as cost of registration, establishment, postage, printing, &c. In case of death companies each share-purchaser can hold only one share. He has the right to name another person, who on the death of the shareholder applies to the directors, who proceed to levy a sum from each of the other shareholders, which is called the death-fee and is generally of the same value as the share. The amount of fees thus collected is paid to the nominee, who then retires from connection with the company. The nominee has thus an interest in the speedy death of the shareholder by whom he is nominated. The marriage and birth companies are conducted on the same principles. When the nominee who must be a female is married, or when she has a child, the shareholder is entitled to collect a fee from each of the other shareholders. When a company is newly started, the first few calls for fees are paid with fair punctuality, and the first few nominees or shareholders, as the case may be, receive the intended benefits. After a time, as calls multiply, the shareholders get tired of paying, and cease to do so, preferring to forfeit their shares. The claims of the nominees or shareholders multiply, but there are no funds to meet them and the company collapses. Most of the companies are reported to be failures. Some still exist, but the directors are finding difficulty in collecting the fees. Only one is said to have Rs. 8,750 invested at interest in the Bagerhat Loan Company. The price of a share of this company is Rs. 5. The object of the fever company was to provide fever-stricken people with funds for treatment out of the subscriptions, which were at the rate of half an anna a month. It has ceased to exist. The Pilgrims' Provident Fund is divided into 2,000 shares. Each shareholder has to pay 8 annas on admission. Each group of eight persons has to pay a sum not exceeding Rs. 2 a month. If all the shares were taken up, eight persons would get Rs. 400 a month while on pilgrimage. But if more than eight persons go on pilgrimage in one month, four-fifths of the amount realized will be given proportionately to them. If any one of them dies in a holy place, his nominee or heir will get the amount three months after his death. But no person will get anything if he goes on pilgrimage within four months of his entering as a shareholder.

Sugar.

79. Sugarcane is largely cultivated in the Kushtia subdivision and in part of Meherpur in Nadia. In the Kushtia subdivision Messrs. Renwick and Company let out on hire 6,789 cane-crushing mills during the year against 1,369 mills in the year preceding. This marked increase is attributed to the excellent outturn of the sugarcane crop during the year. As each mill is let out at Re. 1 per day, the profits of the concern must be enormous. In Murshidabad molasses are prepared in the Kandi subdivision. The outturn of the year has been estimated to be 3,000 maunds, valued at Rs. 15,000, against 2,400 maunds, valued at Rs. 11,400, of the previous year. The increase in the outturn is due to the better harvest

of sugarcane in the year under report. It has been reported that the Bombay sugarcane, which a few years ago used to be grown in abundance, has given way to other varieties which are preferred. In Khulna there was an outturn of 60,980 maunds against 68,543 maunds in the previous year, whilst the value was much the same.

Brass work.

80. The brass foundry at Moheshganj manufactures iron screws and other requisites for indigo factories. The successful working of this foundry depends on the number of orders received from local planters. The year having been favourable, a large number of orders were received, and the slackness of business noticed in the preceding year ceased. Brass utensils are manufactured at Navadwip, Jibannagar, Dharmadaha, and Matiari in Nadia, and in some parts of Jessore. Bell-metal and brass utensils of superior kinds are manufactured in considerable quantities in Berhampore, Khagra, Kandi, and Baranagar in the district of Murshidabad. These articles are generally sold in local markets and also sent to Rajshahi, Calcutta, and other places. Santipur *dhotis* and *saris* are much in demand for their fine texture, but the industry is undoubtedly dying out owing to the importation of European goods. Mr. Garrett, Officiating Collector of Nadia, observes that it is a pity that the weavers cannot be prevailed upon to work on a co-operative system, which is their only hope. The cotton wrappers of Kushtia and Kumarkhali are very largely used by the poorer classes on account of their cheapness. Large quantities of this material are exported annually to Dacca, Mymensingh, and Tippera and sold in those districts. The manufacture of coarse cotton cloths is also carried on in the districts of Murshidabad, Jessore, and Khulna. The clay figures of Ghurni, a part of the Krishnagar town, are very much appreciated both here and abroad. Mr. Garrett observes that these figures possess a good deal of artistic merit, and that the knowledge of anatomy shown by the ignorant workers is marvellous. A species of fancy earthenware is manufactured at a place called Taleswar in the subdivision of Bagerhat and at Khanja in the Satkhira subdivision of the Khulna district. Pottery of common kinds is also manufactured in the districts of Murshidabad and Jessore. The ivory industry, which was at one time in a flourishing condition in the district of Murshidabad, is now almost extinct, the manufacture being carried on only to a small extent in Khagra, Manullabazar, and Daulatabad police stations. Shell bracelets, padlocks, and blankets are manufactured in Murshidabad, and sticks, sandals, boxes and teapoys of buffalo horn, and reed mats in Khulna.

Cotton weaving.

Pottery and clay figures.

Ivory.

81. There are no mines in any of the districts of this Division.

X.—ADMINISTRATIVE CHANGES.

82. The chief administrative changes during the year were as follows:—

(1) Levy of a customs duty on all articles imported by sea under the amended Tariff Act.
(2) Levy of duty on all cotton yarns at every mill.
(3) Reduction of interest on the Government debt from 4 to 3½ per cent.
(4) Marking of guns before issue of licenses under the Indian Arms Act, and the introduction of the system of getting Arms Act licenses renewed through local police and post offices.
(5) The introduction of the system of thumb-prints for securing the identification of parties in the registration of deeds and in other matters—a mode of identification which, I may observe, was discussed by Mr. Monro, C.B., the late Mr. Worsley, and myself when enquiring about chaukidars ten years ago.
(6) Various changes in the sites of police-stations.
(7) Opening a new sub-registry office at Alfadanga in Jessore.
(8) Introduction of a system of payment of salaries of chaukidars on fixed days at police-stations, and of paying rewards to chaukidars.

XI.—STATISTICAL ENQUIRIES.

83. No statistical enquiries of any importance were undertaken in any of the districts of the Division during the year under report, besides the usual registration of vital statistics, the price-lists under the Bengal Tenancy Act, and the agricultural statistics required by the Director of Land Records and Agriculture.

84. In rural areas births and deaths continued to be reported at police stations by the village chaukidars. The Vaccination Department almost entirely failed to check vital statistics, as they were expected to do. I have observed during the year that the registration of deaths is steadily improving, though it would be absurd to accept the figures as sufficiently accurate for drawing deductions from them.

XII.—CIVIL JUSTICE.

85. The following statement shows the number of suits instituted, disposed of, and pending in each district of this Division during the past calendar year as compared with 1893:—

District.	Instituted.		Disposed of.		Pending.	
	1893.	1894.	1893.	1894.	1893.	1894.
1	2	3	4	5	6	7
24-Parganas	35,860	35,291	36,876	36,618	5,293	5,339
Nadia	20,296	20,049	20,668	19,947	1,177	1,279
Murshidabad	15,425	16,637	15,277	16,617	1,856	1,876
Jessore	26,849	26,423	28,076	27,750	2,677	2,406
Khulna	14,603	14,868	14,632	14,285	1,316	1,339
Total ...	113,033	112,768	115,529	115,217	12,319	12,209

In the 24-Parganas there was a decrease of 1·5 per cent. in the number of suits instituted and also a slight decrease of ·6 per cent. in the number disposed of. In Nadia there was a decrease of 1·2 per cent. in the number instituted and of 3·4 per cent. in the number disposed of. In Murshidabad there was an increase of 7·8 per cent. in the number instituted and of 8·7 per cent. in the number disposed of. The number instituted and disposed of in Jessore and Khulna show a decrease—the former of 1·5 and 1·1 per cent., and the latter of 1·6 and 2·3 per cent., respectively. The statement below shows the number and nature of each class of suits instituted during the past year as compared with the preceding year:—

District.	For money or moveables.		Suits under the rent-law.		Title or other suits.		Total.	Total.
	1893.	1894.	1893.	1894.	1893.	1894.	1893.	1894.
1	2	3	4	5	6	7	8	9
24-Parganas ...	17,892	17,451	15,128	14,467	2,840	3,373	35,860	35,291
Nadia ...	13,277	11,947	6,126	6,605	1,265	1,375	20,668	19,947
Murshidabad ...	8,196	8,514	5,706	6,422	1,375	1,681	15,277	16,617
Jessore ...	10,398	9,168	14,430	14,997	2,021	2,258	26,849	26,423
Khulna ...	5,637	5,228	7,955	7,996	1,040	1,061	14,632	14,285
Total ...	55,400	52,308	49,345	50,487	8,541	9,768	113,286	112,563

There was a decrease in the suits for money or moveable property in all the districts except Murshidabad, which shows an increase of 318. The increase in title and other suits was shared by all the districts. There was also an increase in the suits under the rent law in all the districts except the 24-Parganas, which may be due to the cultivators being in a more solvent

condition than in the preceding year. The statement below shows the proportion of contested cases to the total during the past two years:—

DISTRICT.	Withdrawn and decided *ex parte.*		Contested.		Percentage of contested cases.	
	1893.	1894.	1893.	1894.	1893.	1894.
1	2	3	4	5	6	7
24-Parganas ...	29,755	29,295	7,121	7,323	19·3	19·9
Nadia ...	16,502	16,082	4,166	3,865	20·1	19·3
Murshidabad ...	12,207	13,202	3,070	3,415	20·0	20·5
Jessore ...	22,441	22,432	5,635	5,318	20·0	19·1
Khulna ...	11,588	11,341	3,044	2,944	20·8	20·6
Total ...	92,493	92,352	23,036	22,865	19·9	19·8

86. In the 24-Parganas 36 per cent. of the cases were withdrawn, 43·9 per cent. decided *ex parte*, and 19·9 per cent. contested. The average duration of contested rent suits and of those decided *ex parte* was 166 and 94 days respectively against 142 and 85 days in the year preceding, which I consider most unsatisfactory. People often speak to me of the delays of the civil courts, and the unreasonable number of times parties and witnesses are called on to attend, and I gather that this is generally attributed to the failure of the courts to keep the verbosity of pleaders within bounds. In Jessore the average duration of contested suits for money or moveables, rent suits, and title and other suits during the year was 65, 106, and 169 days respectively, against 74, 78, and 175 days in the previous year. This is slightly better than last year as regards suits for money or moveables and title and other suits. It is, however, bad enough, and calls for reform. In order to form an opinion whether the administration of civil justice has been satisfactory or not, it would be necessary to show what proportion of decrees were satisfied in full, but on this point I have no statistics. Generally I hear complaints of the difficulty of obtaining satisfaction of decrees when obtained, as well as of the long delay in obtaining them, and if, as I believe, the complaint is as well founded in one case as it certainly is in the other, it cannot be said that the administration of civil justice has been successful. It is my duty to see that Magistrates dispose of their work with due punctuality and diligence, and in this I confess that there is still much room for improvement, but I understand that the procedure of the Civil Courts gives far more cause for complaint.

XIII.—CRIME.

87. During the year under report there were 15,936 cognizable offences reported in this Division against 15,216 in the preceding year, showing an increase of 720 cases. I attribute the increase in crime to the smallness of the proportion of cases in which the courts inflict punishment. The increase occurred in all the districts except Nadia. In the 24-Parganas the increase occurred in police and local Act cases; in Murshidabad in sanitary offences; in Jessore in burglary and theft cases, in Khulna in offences against the public tranquillity, affecting life, and criminal trespass. In Nadia, on the other hand, there was a decrease in the number of cases reported. The decrease occurred under all the classes except class I, under which there was an increase. The number of cases declared false in the Division was 744 as compared with 718 in the year preceding. Of these, 141 were in the 24-Parganas, 149 in Nadia, 118 in Murshidabad, 203 in Jessore, and 133 in Khulna, as compared with 130, 122, 134, 215, and 117 respectively, showing an increase in the 24-Parganas, Nadia and Khulna, and a decrease in the other two districts. Prosecutions were instituted in only 55 cases, or 7·3 per cent., against 65, or 9·0 per cent., in the previous year. Of these, 20 were instituted in the 24-Parganas, 16 in Nadia, 4 in Murshidabad, 8 in Jessore, and 7 in Khulna, as compared with 18, 20, 10, 9, and 8 respectively. The number of

cases in which convictions were obtained was 4 in the 24-Parganas, 3 in Nadia, 1 in Murshidabad, 5 in Jessore, and 1 in Khulna, against 7, 4, 3, 4, and 1 respectively in 1893. Compensation under section 560, Criminal Procedure Code, was given in 24 cases in the 24-Parganas, in 14 cases in Nadia, in 13 cases in Murshidabad, in 17 cases in Jessore, and in 22 cases in Khulna. The Magistrate of Nadia observes that in his district, Mr. Delevingne, the Assistant Magistrate of Meherpur, made a judicious use of this section, but that it was treated practically as a dead letter by all the other Magistrates, notwithstanding his repeated instructions. The same remark applies generally to the whole Division. Native Magistrates are very weak, or negligent, in dealing with false complaints. The total number of cases in which the police abstained from making enquiry was 1,549, or 9·7 per cent, against 1,737, or 11·4 per cent., in 1893, showing a decrease of 188 cases. Of the total number of cases, 503 were in the 24-Parganas, 241 in Nadia, 353 in Murshidabad, 348 in Jessore, and 104 in Khulna, against 462, 384, 473, 270, and 148 respectively in the year preceding, showing an increase in the 24-Parganas and Jessore and a decrease in all the other districts. The cases were mostly attempts at burglaries, or burglaries in which no property was stolen, or theft in which the property stolen was below Rs. 5 and could not be identified and the offenders not known It is stated that the power of refusing enquiry is exercised with discretion, but I believe that enquiry is refused much more often than it ought to be. In Nadia 42 cases were investigated under orders of the Magistrate after the police had refused enquiry. During the year 14,618 persons were arrested in this Division, against 13,897 in 1893. Of these, 14,225 were sent up for trial against 13,428, and 9,185 convicted against 8,732 in the previous year, the percentage of convictions being 64·5 against 65·0 in the year preceding. Taking the districts separately the percentage was 70·5 in the 24-Parganas, 63·6 in Nadia, 74·8 in Murshidabad, 50·5 in Jessore, and 54·2 in Khulna. The difficulty of obtaining convictions disheartens the police. Native Magistrates dislike having their orders reversed, and, though satisfied with the proof of an offence, will not convict when they know that there is a lenient appellate court over them. The total number of true cases of murder recorded in this Division was 52, the same number as in 1893. Of these, 13 were in the 24-Parganas, 3 in Nadia, 7 in Murshidabad, 12 in Jessore, and 17 in Khulna, as compared with 16, 2, 7, 16, and 11 respectively. The number in which convictions were obtained was unfortunately only 4 against 11. Of these, 1 was in Nadia, 1 in Jessore, and 2 in Khulna, as compared with *nil*, 3, and 3 respectively in the year preceding. In the 24-Parganas and Murshidabad in no cases were convictions obtained during the year, though in 1893, 4 cases in the former district and 1 case in the latter resulted in conviction. The result was bad in all the districts. The number of true cases of dacoity recorded was 33 against 25. Of these, 16 were in the 24-Parganas, 1 in Nadia, 2 in Murshidabad, 11 in Jessore, and 3 in Khulna, against 11, 2, 3, 8, and 1 respectively in the year preceding, showing an increase in the 24-Parganas, Jessore, and Khulna, and a decrease in the other two districts. Out of 33 cases, convictions were obtained in 3 only, against 10 in 1893. Of these, 2 were in the 24-Parganas and 1 in Jessore, as compared with 2 and 5 respectively. In none of the other districts was any conviction obtained. In the previous year there were convictions in 3 cases in Murshidabad. The result is very unsatisfactory. The number of cases of rioting in this Division was 424 as compared with 381 in 1893, showing an increase of 43 cases. Of the 424 cases, 66 were in the 24-Parganas, 73 in Nadia, 30 in Murshidabad, 145 in Jessore, and 110 in Khulna, against 77, 53, 37, 126, and 88 respectively in the previous year. The increase occurred in Nadia, Jessore, and Khulna. I attribute the increase in a great measure, especially in Jessore and Khulna, to the difficulty of getting convictions in the Sessions Courts in original or appellate cases, and the consequent immunity of offenders. These cases arose mostly out of land disputes, and the majority of them were of a petty nature, but in 15 cases loss of life occurred. Of these, 2 were in the 24-Parganas, 1 in Nadia, 1 in Murshidabad, 5 in Jessore, and 6 in Khulna. There were no religious disturbances in any of the districts of this Division during the year under review. Three hundred and eighty-two cases were instituted during the year under sections 106 and 107 of the Criminal Procedure Code, as compared with 376 in 1893,

showing a slight increase of 6 cases. The number of persons bound down was 1,180, against 1,390 in the preceding year, showing a decrease of 210 persons, which occurred in all the districts, but chiefly in Jessore and Khulna. The extra police force employed to prevent a breach of the peace at chars Harnagar and Chapri, in the district of Nadia, has been retained. The number of cases of bad livelihood instituted during the year was 333 as compared with 419 in 1893, showing a decrease of 86 cases, which occurred in all the districts except Nadia, where there was an increase. The number of cases in which security was demanded was 215 as compared with 280, the percentage being 64·5 against 66·8. The number of non-cognizable offences reported in this Division during the year was 15,562 as compared with 16,397 in the preceding year, showing a decrease of 835 cases, which occurred in all the districts. The decrease in the 24-Parganas has not been explained. The decrease in Nadia is very slight, being 6 cases only, and calls for no remarks. In Murshidabad the decrease occurred chiefly under head "offences against public justice," and under special laws, cattle trespass, and breach of contract. In Jessore the decrease was in all classes of cases, except classes III and V. It is most marked in classes IV and VI. In the former class it has occurred mainly under serial No. 15 (criminal force), and in the latter under serial Nos. 24, 26, 27, 28, 29, and 31. The decrease in cases under special laws is chiefly in cases instituted under the Municipal and Cattle Trespass Acts. In Khulna the decrease is attributed to the cheapness of food during the year. The number of cases in which the police were employed to make enquiries was 789, or 5·0 per cent., as compared with 4·8 per cent. in 1893. Of the 789 cases, 393 were in the 24-Parganas, 74 in Nadia, 83 in Jessore, and 239 in Khulna. As in 1893, the police were not employed to make enquiries in a single case in Murshidabad. The Magistrate of Nadia observes that the figures regarding his district mostly represent cases taken up by the police direct under cognizable sections and then returned as non-cognizable. In Jessore, out of 83 cases, it is stated that 63 were cases of security for keeping the peace and 16 were cases relating to public nuisances. Of the cases in Khulna, it is stated that 64 proved upon police enquiry to be non-cognizable, and 118 were cases under section 107 of the Criminal Procedure Code. The Magistrate of the 24-Parganas has furnished no explanation on this head. The number of persons against whom processes were issued was 17,008 as compared with 18,534. The number of persons who actually appeared before Magistrates was 12,385 against 12,827. The smallness of the number is said to be probably due to the compromise out of court of petty cases of assault, &c., after the issue of summons. The number of persons convicted was 6,197, or 50·0 per cent., as compared with 6,586, or 51·4 per cent., in 1893. In the Kandi subdivision of Murshidabad there was a large increase in the number of processes issued during the year, due to the fact that proper supervision over issue of processes was not exercised by the Deputy Magistrate, Babu Pran Kumar Ghosh. The service of processes is not satisfactory, and is receiving attention. Personal service is not effected nearly so often as it should be.

XIV.—POLICE.

88. The following statement shows the strength of the police force employed in the several districts of this Division:—

District	District Superintendent.	Assistant* Superintendent.	Inspectors.	Sub-Inspectors.	European constables.	Head-constables.	Constables	Town chaukidars.
1	2	3	4	5	6	7	8	9
24-Parganas ...	1	1	5	53	2	125	975	131
Nadia ...	1	1	4	33	...	51	493	110
Moorshidabad ...	1	..	4	32	...	65	521	97
Jessore ...	1	...	5	33	...	42	394	29
Khulna ...	1	...	3	21	...	47	259	55
Total ...	5	2	21	172	2	330	2,642	422
Total for 1893 ...	5	2	21	155	2	344	2,633	326

89. In the 24-Parganas there was an increase of 17 Sub-Inspectors and a decrease of 8 head-constables and 4 constables under the reorganization sanctioned by Government. The number of town chaukidars was increased by 80, owing to the introduction of the town chaukidari system in the municipalities of Rajpur, Baruipur, Gobardanga, and Barasat. In Nadia 12 town constables were replaced by 16 chaukidars. In Murshidabad there was a reduction of 11 head-constables and an increase of 24 constables during the year. The force in Jessore was the same as in the previous year. In Khulna there was an increase of 5 head-constables and 1 constable during the year. The numbers punished were as follows:—

Dismissed—

	1893.	1894.
Inspectors	...	...
Sub-Inspectors	3	...
Head-constables	6	4
Constables	82	127
Total ...	91	131

There was an increase in the total number of dismissals as compared with the previous year, but dismissals in the higher ranks show falling off:—

Punished departmentally—

	1893.	1894.
Inspectors	...	...
Sub-Inspectors	84	70
Head-constables	125	140
Constables	469	421
Total ...	678	631

There was an increase in the number of head-constables punished departmentally. The other heads show a decrease.

Punished judicially—

	1893.	1894.
Inspectors	...	...
Sub-Inspectors	...	...
Head-constables	2	2
Constables	53	58
Total ...	55	60

The number of constables punished judicially shows a light increase. The number rewarded during the year shows a falling off, as the following figures show:—

	1893.	1894.
By promotion	4	1
By money rewards	379	298
Total ...	383	299

In Nadia Sub-Inspector Benode Behary Gupta received a special reward of Rs. 70 from the District Superintendent of Rajshahi and Rs. 45 from the District Superintendent of his own district for giving a clue which led to the arrest in Rangoon of a notorious criminal in the Postal Department. The same officer also got a reward of Rs. 20 for tracing an absconded offender to French Chandernagore, and arresting him there with stolen property. In Jessore Inspector Dig Bijoy Pal was granted by the Inspector-General of Police a silver watch and chain for successfully working out a dacoity case, and Inspector Mohim Chunder Das was granted a money reward of Rs. 100 for detecting a case of forgery of currency notes. I am sorry to see a decrease in the number of rewards, which I think greatly increase the efficiency of the police.

The table below shows the number that left the force—

	1893.	1894.
On pension	39	43
„ gratuity	6	9
By resignation, without pension or gratuity ...	156	157
„ dismissal	91	131
„ discharge	23	25
„ desertion	14	13
„ death	97	95
Total ...	426	473

There was a considerable increase in the number dismissed during the year as compared with 1893.

During the year there were 15,936 cases of cognizable crime in this Division, as compared with 15,216 in the year preceding. Of these, 12,421 were enquired into by the police against 11,854. The number of cases in which convictions were obtained was 7,476, or 60·1 per cent., as compared with 59·0 per cent. in the preceding year. Deducting cases under class VI, the percentage of convictions was 33·4 as compared with 36·4 in 1893. I have remarked upon this in a previous paragraph. The following table shows the action of the police in the matter of recovery of stolen property:—

	Amount of property stolen.	Amount recovered.	Percentage of recovery.
	Rs.	Rs.	
24-Parganas	57,089	14,081	24·6
Nadia	34,322	7,117	20·7
Murshidabad	35,689	5,076	14·0
Jessore	37,306	5,449	14·6
Khulna	22,259	3,216	14·4
Total ...	1,86,665	34,939	18·7
Total for 1893 ...	1,88,711	51,569	27·3

There was a slight decrease in the amount of the property stolen, being Rs. 1,86,665 against Rs. 1,88,711, but the amount recovered fell from Rs. 51,569 in 1893 to Rs. 34,939 in the year under report, the percentage of recovery being 18·7 as compared with 27·3 in the year preceding. The result is not satisfactory, except in Nadia. Mr. Garrett, Officiating Magistrate of Nadia, observes as follows:—

"The general conduct of the police was not on the whole satisfactory. "Mr. Bernard's remarks on this point in last year's report fully apply to this "year's work. The general tone is slack in the extreme, and there are but few "station officers who have not evinced laziness to a greater or less extent. It was "found necessary to issue a stringent district order owing to the spread of the "pernicious habit of not drawing up first information reports on the receipt of "information of a cognizable case, a short entry in the station diary being con- "sidered sufficient. Generally speaking, chaukidars have been allowed to get out "of hand, owing to a great extent, I believe, to officers in charge of stations "neglecting their duty of personally taking muster parades. In fact, as remarked "by Mr. Bernard, the police seem to have considered that in avoiding offences "punishable under the Penal Code they have done all that is necessary. Of "course there have been noteworthy exceptions, but the general average is far "from satisfactory." When Mr. Bernard took charge of the district the Police Department was in most unsatisfactory state, and it will take a long time to make it efficient. There appears to have been previously a complete absence of control and supervision.

As regards the investigation of crime, I find that the police are disheartened by the action of the judicial courts, in which it is extremely difficult to obtain convictions, the courts appearing to expect a standard of evidence which is impossible of attainment among an essentially inaccurate people. The witnesses are inaccurate in their statements, and the police are inaccurate in their notes of enquiry, and judicial officers do not appear to endeavour to

winnow out the truth as they used to. A few discrepancies are quite enough to damn a case, and consequently the police are very reluctant to send cases for trial. One of the weakest points of the police appears to me to be the pursuit of absconding criminals. In the majority of cases very little search appears to be made, and although I have not figures to show it, I am under the impression that a very small percentage of those who keep out of the way during the progress of the first police enquiry, are eventually arrested.

Rural Police.

90. The following statement shows the number of rural police in the several districts of this Division, the number punished, and the number rewarded:—

DISTRICT.	Number of rural police.	Number punished.	Number rewarded.	Amount of reward.
1	2	3	4	5
				Rs. A.
24-Parganas	3,355	1,387	29	80 0
Nadia	3,486	677	25	141 0
Murshidabad ...	3,922	1,081	35	121 8
Jessore	3,885	552	34	230 2
Khulna	2,097	785	20	178 0
Total ...	16,745	4,482	143	750 10
Total for 1893 ...	16,614	4,904	149	...

During the year there was a decrease in the number of chaukidars punished, being 4,482 against 4,904, while there was an increase in the total number of chaukidars, being 16,745 against 16,614 in the preceding year. The decrease occurred in all the districts except the 24-Parganas and Murshidabad, where there was an increase. In the 24-Parganas, out of 1,387 chaukidars punished, 1,249 were punished for non-attendance at parades and the rest for other offences. In Murshidabad the increase was very large, being 1,081 against 529, and the Magistrate observes that these punishments were for absences from parades and for not reporting crimes. On the other hand, there was a large decrease in Nadia, being 677 against 1,090. The Magistrate states that this would indicate that the discipline among the chaukidars has improved, but he is afraid such is not the case. He thinks that until the taking of chaukidari attendance by any police officers below the rank of head-constable is absolutely prohibited, as I also think it ought to be, we shall really never know what the rate of attendance is. The number of chaukidars rewarded also shows a slight decrease, being 143 as compared with 149. I think it very desirable to pay increased attention to this matter. In Murshidabad there are still 1,407 chaukidars under Regulation XX of 1817 in the Kandi subdivision. Their numbers are being reduced as vacancies occur from death, &c., but it is reported that this will take time, as the Magistrate thinks that to introduce the Chaukidari Act straightway all over the subdivision would result in converting all the ousted chaukidars into thieves. In Jessore, there were also 3 chaukidars under Regulation XX of 1817. The possession of land being more valued than a fixed salary, I am inclined to think that we have a much better hold over chaukidars with *chakaran* lands than over those under the pay system. The payment of wages to chaukidars are supposed to be made regularly every quarter at the police-stations in the presence of a gazetted officer or Police Inspector. On this subject Mr. Brown, the late Magistrate of Khulna, had made the following remarks:—"The *punchayats* are very hard hit by the new system "of payment. Almost all must pay up the chaukidars' wages before they "have collected the tax, and many of them will be out of pocket by the end of "the year. The office will become more unpopular. Then the difficulty will "arise that under the law persons who have once been fined under section 8

"cease to be members of the *punchayat*. This will be resorted to as a measure of "release. In order to make the office of *punchayat* a little more popular, "I think that each collecting *punchayat* should be given a *sanad*, which should "be in itself a gun license for the period during which the *punchayat* is in "office. More *punchayats* should also be taken from the class of *Bhadraloka*, who "manage to shirk all the duties while enjoying most of the advantages of our "system of government." Mr. Fischer, the present District Officer of Khulna, does not agree with the above remarks. He observes that not every *punchayat* would care to pay a fine of Rs. 50. Touching the system of quarterly payments, Mr. Garrett, the Magistrate of Nadia, observes that the day after the quarter closes a chaukidar's pay becomes due to him, and he is in arrears three months' pay until the close of the next quarter, when it becomes six months in arrears. It is a long time to have to wait, and the *punchayat* should have the quarter's pay ready to hand to them the day it is due. He states that there is no doubt that many *punchayats* pay chaukidars monthly—much to their satisfaction, but that this renders the showing of three months' pay in cash to the Inspector at the police station on pay day a farce. He further observes that chaukidars have been detected handing over the same rupees, representing their pay, to another chaukidar to show to the Inspector, the excuse being that they had already received their pay in the form of loans at various times from the *punchayat*, but that they must show the full pay for three months in cash in order to get their acquittance rolls signed. I fancy that the exhibition by the *punchayats* of a full quarter's salary of every chaukidar is very often such a farce as Mr. Garrett describes: the same rupees do duty for several chaukidars, and after all the *punchayat* take them back. In Nadia no progress has been made in appointing men of better class as chaukidars, and under existing circumstances the Magistrate does not believe any progress is possible. He observes that the post is considered degrading, and that this will remain the general opinion until the village chaukidar is a Government servant. He states that service as a town chaukidar under Act V of 1861 on Rs. 5 per mensem and no pension is not considered degrading; that the post of peon or *pyada* even in the smallest of Government offices is eagerly sought after by men of good caste, the reason being that by accepting any of these posts the man becomes a servant of the Sirkar only. Mr. Garrett considers that when the village policeman is appointed and paid by a Government departmental head, then, and not until then, will the post cease to be a despised one, and he observes that if this were done the efficiency of the watchmen would be doubled, and there will be little need for the local and often useless thana constables. I do not agree with these remarks, considering it essential that the chaukidar should be a village servant, but the subject is too important for discussion here. In Jessore some chaukidars' pay has been raised to Rs. 5, and that of all others (except low-caste men) to Rs. 4. The Magistrate observes that no low-caste men are now appointed chaukidars, and that *Muchis* and other low-caste men are now being weeded out, but that there is some difficulty in getting a better class of men to come forward. It is reported that in Jessore, in making appointments, more attention is paid to the physical fitness of the chaukidars, and that no man is appointed who is less than 4 feet 5 inches in height and 31 inches round the chest. In this district good-conduct stripes are now given, and the bearers of these stripes get an advance of pay. The District Superintendent of Police, Nadia, discovered six ex-convicts among the chaukidars of Alamdanga police-station in the subdivision of Meherpur, and they were dismissed. These men were *Chota Bhagia* Muchis, a class of men noted for their propensity to crime. There are printed lists of these men, and it is only by gross negligence that such men could have been appointed. It is only a specimen of what the administration was in Nadia for some time. In Nadia 15 chaukidars were rewarded for either arresting thieves or absconders, or for giving information leading to the detection of theft or burglary cases. No instances of their having been employed by the police on menial and degrading duties have been reported in any of the districts of this Division, but Mr. Garrett, the Magistrate of Nadia, believes that *punchayats*, almost to a man, use them on their own private business. I have reason to believe that there are many criminals among the chaukidars, and that they participate in many of the crimes against which it is their duty to guard. I believe that they are far better paid than they used to

be, though by no means so regularly as the thana payments are supposed to secure, but I am by no means sanguine of getting men of better position than we have at present. I have more hope of securing improvement by a liberal system of rewards than by anything else we are doing.

XV.—CRIMINAL JUSTICE.

91. Criminal justice is administered by the Courts of Session, Stipendiary Magistrates, Benches of Honorary Magistrates, and Honorary Magistrates sitting singly. The total number of cases tried at the sessions during 1894 was 177 against 289 in the preceding year. I attribute the decrease to the difficulty of obtaining convictions, which renders the Magistrates reluctant to commit, although convinced of the truth of a case and of the sufficiency of proof. Of these, 121, or 68·3 per cent., were convicted, as compared with 68·5 per cent. in 1893. As regards the districts severally, the percentage of convictions was 81·2 in the 24-Parganas, 62·9 in Nadia, 50·0 in Murshidabad, 60·7 in Jessore, and 52·9 in Khulna, against 68·5, 69·2, 62·5, 71·6, and 69·0 respectively. Except in the 24-Parganas, the result was nowhere satisfactory, and this accounts, in my opinion, for an increase of crime. There were 54 Stipendiary Magistrates in this Division at the close of the year. Of these, 17 were in the 24-Parganas, 10 in Nadia, 8 in Murshidabad, 11 in Jessore, and 8 in Khulna. Of these Stipendiary Magistrates, 39 exercised first class, 10 second class, and 5 third class powers. The number of Benches in this Division was 45 against 47 in the year preceding. They were composed of 490 Honorary Magistrates, who were distributed as follows:—

District.		Number of Benches.	Number of Honorary Magistrates.
24-Parganas	...	18	174
Nadia	...	11	116
Murshidabad	...	4	67
Jessore	...	8	98
Khulna	...	4	35
Total	...	45	490
Total for 1893	...	47	501

The number of Benches in Nadia is 11 against 12 in the previous year, the Municipal Bench at Santipur having been amalgamated with the Independent Bench there. In Murshidabad there has been a decrease of one Bench owing to the Municipal and Sadar Benches at Berhampore having been fused into one. Of the Benches, 17 exercised second class and 28 third class powers, but of these latter, the regular Benches at Jessore and Narail also exercised second class powers when attended by Honorary Magistrates having such powers. The number of Honorary Magistrates who were authorized to sit singly was 35. Of these, 3 exercised first class powers, 28 second class powers, and 4 third class powers. In the 24-Parganas, Murshidabad, and Jessore the attendance of the Honorary Magistrates, with a few exceptions, was better than in the other districts. In Jessore this is said to be due in a great measure to the starting of regular rosters. There were no such rosters before, and those Magistrates who were known not to shirk their work were called upon time after time to serve, while those who were irregular in attendance were not called upon to attend. In this Division one Honorary Magistrate—Maulvi Mahomed Ismail—who has since been removed, failed to attend for two consecutive years. In contrast to the indifferent work of the Benches, most of those Honorary Magistrates who are empowered to sit singly have rendered real assistance to the Stipendiary Magistrates in the disposal of case-work. Favourable mention has again been made this year of Babus Mani Lal Banerjee and Preo Nath Mullick at Alipore, of Pundit Rakhal Chunder Tewary at Diamond Harbour, Babu Romoni Mohun Mullick at Meherpur, Moula Khodadad Khan at Krishnagor, Babu Hurry Kristo Mozoomdar at Berhampore, and of Maulvi Golam Kassim at Basirhat. In Nadia and Khulna the attendance of very few of the Honorary Magistrates was satisfactory.

The number of Honorary Magistrates removed and warned for irregular attendance in each district during the year is shown below:—

	Removed.	Warned.
24-Parganas	...	18
Nadia	...	5
Murshidabad	1	...
Jessore	1	20
Khulna	...	...
Total ...	2	43

Besides these several on being pressed on the subject of their failure to attend have resigned their appointments.

The following table shows the number of cases decided by Stipendiary Magistrates as well as by Benches and Honorary Magistrates sitting singly:—

District.	Decided by Stipendiary Magistrates.		Decided by Honorary Magistrates.	
	1893.	1894.	1893.	1894.
24-Parganas ...	10,229	11,856	3,946	3,627
Nadia ...	1,675	1,410	1,689	1,450
Murshidabad ...	1,571	1,257	1,178	2,266
Jessore ...	2,625	2,387	589	613
Khulna ...	1,723	1,668	378	297
Total ...	17,823	18,578	7,780	8,253

In Murshidabad there was a large increase in the number of cases decided by Honorary Magistrates, being nearly double as many as were decided in 1893.

92. The following statement shows the results of trials as regards persons:—

District.	Persons put on Trial.		Convicted.		Percentage of Convictions.		Remarks.
	1893.	1894.	1893.	1894.	1893.	1894.	
1	2	3	4	5	6	7	8
24-Parganas	17,736	18,206	13,221	14,219	74·5	78·2	
Nadia	6,067	5,541	3,874	3,264	63·8	58·9	
Murshidabad ...	3,651	4,230	2,301	3,032	63·	71·6	
Jessore	5,909	5,128	3,2[illegible]3	2,892	58·2	56·3	
Khulna	3,792	2,822	1,967	1,624	51·9	57·5	
Total ...	37,155	35,927	24,656	25,061	66·3	69·7	

The results show an improvement in the 24-Parganas, Murshidabad and Khulna, and a falling off in the other two districts. The following statement shows the number of witnesses examined during the year as compared with the year preceding:—

District.	Number of Witnesses examined.		Number detained for more than two days.	
	1893.	1894.	1893.	1894.
1	2	3	4	5
24-Parganas ...	21,579	25,736	1,330	1,337
Nadia ...	12,365	13,039	484	605
Murshidabad ...	8,590	8,688	432	606
Jessore ...	17,281	16,565	334	595
Khulna ...	10,772	8,226	283	461
Total ...	70,587	72,254	2,863	3,604

The increase in the detention of witnesses is most unsatisfactory.

Of the 605 witnesses detained over two days in the district of Nadia, 487 or 80·4 per cent. were detained by Honorary Magistrates, who are in the habit of adjourning cases without sufficient cause. Mr. Garrett has repeatedly drawn their attention to the desirability of the prompt discharge of witnesses, and he expects better results during the current year. In this district the percentage of witnesses detained over two days by Stipendiary Magistrates was 1·4 against 3·3 in 1893, which is an improvement due to constant supervision. The percentage, it is observed, would have been better still had it not been for bad work on the part of Babu Nabin Chandra Sen, late Deputy Magistrate in charge of Ranaghat. The following statement shows the number of remands granted in A form cases during the year under report:—

District.	Number disposed of on first day.	Number postponed.							Number pending at the close of the year.
		Once.	Twice.	Three times.	Four times.	Five times.	Six times.	Over six times.	
1	2	3	4	5	6	7	8	9	10
24-Parganas	1,035	424	211	141	92	53	34	26	85
Nadia	309	183	117	87	47	24	27	17	12
Murshidabad	195	172	135	75	36	24	10	24	14
Jessore	180	219	151	76	51	25	18	12	20
Khulna	129	129	104	70	46	20	13	6	23
Total ...	1,848	1,127	718	449	272	146	102	85	154
Total for 1893 ...	7,187	1,569	918	455	213	139	64	59	93

The percentage of cases remanded six times and over to the total number of cases disposed of was 3·9 as compared with 1·1 in the preceding year. The Magistrate of Nadia observes that remands were in some cases necessary to enable the police to prove previous convictions, and other cases had to be remanded from day to day owing sometimes to calling witnesses from other districts, but more often to lengthy examination and cross-examination of witnesses. I have seen that pleaders and mukhtears are generally allowed far too much license in this respect. The work of Honorary Magistrates sitting alone is often good and sufficiently punctual and methodical to afford real relief to the Stipendiary Magistrates, but I cannot say as much of the benches. A large proportion of the Magistrates appear to have no desire to perform the duties of their office, and very few recognise the necessity of punctuality. Remands are much too frequent, and it is often difficult to assemble the same bench which remanded a case after partly hearing it. Hence petty cases are allowed to drag on for months till people despair of getting justice and withdraw. Much has been done recently to improve the work of Honorary Magistrates, by revision of the rosters and by giving work of a more interesting character to such benches as show themselves competent and willing to deal with it.

93. The following table shows the number of reconvictions in the several districts of this Division during the year as compared with the year preceding:—

District.		1893.	1894.
24-Parganas	...	75	75
Nadia	...	68	67
Murshidabad	...	51	63
Jessore	...	44	21
Khulna	...	24	17
Total		262	243

The number of reconvictions shows a falling off, which occurred chiefly in the district of Jessore.

94. The following statement shows the amount of criminal fines imposed and realized in the several districts during the past two years:—

Criminal fines.

District.	Imposed.		Realized.	
	1893.	1894.	1893.	1894.
1	2	3	4	5
	Rs.	Rs.	Rs.	Rs.
24-Parganas ...	55,830	62,492	48,944	57,136
Nadia ...	18,866	16,830	13,848	15,173
Murshidabad ...	11,348	10,361	10,169	9,173
Jessore ...	17,664	14,875	16,223	13,522
Khulna ...	16,233	13,595	10,687	12,653
Total ...	1,19,941	1,18,153	99,871	1,07,657

There was a decrease in the amount of fines imposed in all the districts except the 24-Parganas, where there was an increase. The increase in the percentage of realizations on impositions is satisfactory, but it is impossible for a Magistrate always to know whether a criminal can pay a fine or not. In the 24-Parganas the number of cases in which compensation under section 560, Criminal Procedure Code, was awarded during the year under report was 24, and the amount paid as compensation was Rs. 306. In Nadia compensation amounting to Rs. 252 was paid in 14 cases against Rs. 50 in 4 cases in 1893. In Murshidabad Rs. 210 was awarded in 13 cases. In Jessore the amount paid was Rs. 1,042 in 17 cases, compared with Rs. 1,899 in 20 cases in the preceding year. In Khulna Rs. 185 was paid as compensation in 22 cases. From my examination of cases I consider that compensation should be awarded much more often than it is. The table below shows the number of cases in which whipping was awarded during the year as compared with the year preceding:—

District.		1893.	1894.
24-Parganas	...	73	63
Nadia	...	20	29
Murshidabad	...	12	33
Jessore	...	25	33
Khulna	...	7	11
Total	...	137	169

There was an increase in the number of cases of whipping in all the districts except the 24-Parganas. The Magistrate of Nadia observes that it is to be regretted that more free use was not made of this form of punishment. I agree with Mr. Garrett. Very few native Deputy Magistrates have sufficient recourse to what is in many cases the most appropriate form of punishment. In the 24-Parganas in three cases whipping was awarded in addition to other punishments.

95. The number of European British subjects brought to trial during the year was 7 against 11 in 1893. Of these, 6 were in the 24-Parganas and 1 in Murshidabad. The number convicted was 4.

96. There were no cases under Act X of 1891 in this Division during the year.

97. I cannot feel that the administration of criminal justice during the year has been satisfactory. The proportion of criminals who have enjoyed complete immunity from punishment is far larger than it ought to be, and I attribute the failure of justice to the attitude of the superior courts, who appear to require an impossible standard of evidence and to take advantage of little discrepancies which are the result of the natural inaccuracy of the people of the country to acquit persons guilty of the most heinous crimes. I have

examined judgments in cases which have broken down, and find considerable ignorance of the habits and modes of thought of the people. For instance, the messenger sent to the police station to report a crime is given a bald message that so and so has been murdered, and because he does not name the murderer, although the villagers know him, the courts hold that there is a material discrepancy between the first information and the evidence afterwards collected. I find too great readiness to catch at little discrepancies of this kind—which it is easy enough to find—and little or no endeavour to winnow out the truth among the discrepancies and exaggerations which belong to all Bengali evidence. That this is wrong is to my mind clear from the fact that people can riot or commit murder or dacoity with perfect impunity. The police will not send up cases, and the subordinate Magistrates will not convict or commit for trial when they feel sure that, however manifest the truth of a case may be, it is certain to end in acquittal in the superior courts.

XVI.—REGISTRATION OF DEEDS.

98. The following table shows the number of deeds registered and the total amount of receipts and expenditure in the several districts of this Division during 1893-94 and 1894-95:—

District.	Number of Documents registered in—		1893-94.		1894-95.	
	1893-94.	1894-95.	Receipts.	Expenditure.	Receipts.	Expenditure.
1	2	3	4	5	6	7
			Rs.	Rs.	Rs.	Rs.
24-Parganas ...	70,116	69,645	76,667	39,464	72,267	39,754
Nadia ...	24,062	23,437	27,707	18,598	25,454	18,518
Murshidabad ...	13,399	13,628	19,420	10,447	20,124	10,138
Jessore ...	90,423	85,048	72,666	45,028	61,807	45,194
Khulna ...	44,949	45,053	40,860	26,505	37,482	25,430
Total ...	242,949	236,811	2,37,320	1,40,042	2,17,134	1,39,034

Compared with the past year there has been a decrease in the total number of deeds registered and in the receipts. This is shared by all the districts except Murshidabad. Khulna shows a small increase in the number of deeds, but a falling off in receipts. The decrease in the 24-Parganas, Nadia, and Jessore is attributed to the rich harvest during the past year coming after three bad years, owing to which petty middlemen granted fewer leases for the sake of the premia than in previous years. In Nadia during the year under review many middlemen sold their interests to liquidate their debts, instead of leasing them out to the cultivating class. On this point I have to observe that, while the substantial zamindar, who lives on his property and does his duty, and the raiyat, who cultivates, are useful members of the community, the large class of petty middlemen live on the produce of the land without conferring any corresponding benefit on the country, and their disappearance would not, in my opinion, be a subject for regret. The increase in Murshidabad is attributed partly to appreciation of the value of registration and partly to the continuation of settlements by some big zamindars. In Khulna the increase is attributed to the general material progress of the district. In the 24-Parganas, Nadia, and Jessore the decrease in receipts is attributed partly to the decrease in the number of deeds registered and partly to the reduction of *advalorem* fees from 12 annas to 8 annas for deeds the consideration of which did not exceed Rs. 50. The decrease in Khulna is due chiefly to the latter cause. The increase in Murshidabad is attributed to an increase in the number of deeds registered. The total expenditure was Rs. 1,39,034 against Rs. 1,40,042 in the previous

year, thus showing a decrease of Rs. 1,008. There was a slight increase in the 24-Parganas and Jessore, which calls for no remark. The decrease in Nadia was also nominal. The decrease in Murshidabad is said to be chiefly due to the decrease in the commissions of the Sadar Sub-Registrar, consequent on the decrease in the number of deeds registered in the Sadar office. The decrease in Khulna is said to be partly due to the abolition of the folio system and partly to the curtailment of boat hire allowed to Sub-Registrars for sending their records to the Sadar office. Mr. Fischer, Officiating Collector of Khulna, notices defects in the transliteration of names, which I hope recent orders of the department may rectify to some extent, though the ignorance of Persian and Arabic on the part of Bengali officers must prevent anything like accuracy in writing Muhammadan names.

XVII.—CONDITION OF THE DIVISION AS REGARDS LAND AND THE LAND REVENUE ADMINISTRATION.

99. The number of estates of each class borne on the revenue-roll of the several districts during the year 1893-94 and 1894-95 are shown below:—

Year.	Class I—Permanently-settled estates.	Class II—Temporarily-settled estates.	Class III—Estates held direct by Government.	Total.
1	2	3	4	5
1893-94 ...	9,281	722	252	10,255
1894-95 ...	9,274	730	260	10,264
Difference ...	—7	+8	+8	+9

There was no change in the total number of estates in Murshidabad, Jessore, or Khulna. In the 24-Parganas and Nadia there was an increase of five estates and four estates, respectively, owing in the former district to partitions and settlement of Sundarbun grants, and in the latter district to the addition of four estates to class II, either by the settlement of alluvial accretions or by addition to the roll of estates which had been struck off as untraceable and brought to light by subsequent enquiries. Besides these changes, there were inter-transfers from one class to another in every district owing to sale of private estates for arrears of revenue and their purchase by Government, settlements of khas estates and other causes. The following table shows the demands, collections, remissions and balances of land revenue during the past two years 1893-94 and 1894-95:—

Year.	Arrear demand.	Current demand.	Total.	Arrear collection.	Current collection.	Total.	Remissions.	Balances.	Percentage of collections on demand.
1	2	3	4	5	6	7	8	9	10
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	
1893-94 ...	1,46,919	51,01,468	52,48,387	96,623	49,58,534	50,55,157	25,747	1,67,483	96·3
1894-95 ...	1,74,360	51,07,363	52,81,723	1,29,504	49,89,076	51,18,580	27,563	1,35,580	96·9

The percentage of collections on demand shows an improvement over the preceding year. The good harvests of the year acted beneficially on land revenue collections, but not to the extent desired, as the raiyats had suffered loss of crops during the two or three preceding years. The uncollected balance at the close of 1893-94 amounted to Rs. 1,67,483, but the arrear demand brought forward in the year under review is Rs. 1,74,360, showing an increase of Rs. 6,877. This is owing to an increase in the demand of certain estates

settled with retrospective effect. The percentage of collections in each class is exhibited in the following statement :—

Class of Estate.	1893-94.						1894-95.						
	Arrear demand.	Arrear collections.	Percentage of collections.	Current demand.	Current collections.	Percentage of collections.	Arrear demand.	Arrear collections.	Percentage of collections.	Current demand.	Current collections.	Percentage of collections.	Remarks.
1	2	3	4	5	6	7	8	9	10	11	12	13	14
	Rs.	Rs.		Rs.	Rs.		Rs.	Rs.		Rs.	Rs.		
I.—Permanently-settled estates.	33,508	33,468	99·9	44,41,844	43,86,824	98·7	54,083	54,964	99·9	44,40,713	44,08,040	99·2	
II.—Temporarily-settled estates.	26,774	25,028	93·5	3,13,177	2,89,925	92·5	27,450	24,508	89·3	3,19,443	2,92,321	91·5	
III.—Estates held direct by Government.	86,637	38,127	44	3,46,447	2,81,785	81·3	91,927	50,032	54·4	3,47,207	2,88,106	82·9	
Total ...	1,40,919	96,623	65·7	51,01,468	49,58,534	97·2	1,74,360	1,29,504	74·8	51,07,363	49,89,76	97·6	

The percentage of collections of the arrear demand in permanently-settled estates is satisfactory, being 99·9, as in the preceding year; but the results in the temporarily-settled estates were below the mark, while those in the Government estates were very poor, as in other years, though in comparison with the preceding year there was an improvement. The prescribed standard was not obtained in any district; in Calcutta, Nadia, Jessore and Khulna the collections were over 96 per cent., but in the 24-Parganas and Murshidabad they amounted to only 60·02 and 74·92 per cent. In the 24-Parganas the recovery of a large sum is doubtful, the tenants in some Government estates still suffering from the effects of bad harvests in the preceding three years. No coercive measures were taken against them, and the Collector reports that the rents due from them are being collected gradually. Where the tenants are actual cultivators I am in favour of liberal remissions when the harvests of the whole year fail, and large amounts have already been written off. I do not, however, recognise the same reason for leniency as regards subletting middlemen, who would never show corresponding leniency to their sub-tenants, and where the arrears are due from them, proceedings should have been taken. Where they are due from actual cultivators much should probably be remitted. In Murshidabad the low percentage is due to the loss by floods of the *bhadoi* crops in estates where it is the principal staple. There was an increase in the current collections in classes I and III compared with those in the preceding year, and a slight decrease in class II. The percentages of total collections, *i.e.* both arrear and current, are shown below:—

24-Parganas	93·1
Calcutta	99·9
Nadia	98·9
Murshidabad	98·4
Jessore	99·8
Khulna	97·3
Total for the Division	96·9

The results in all the districts except the 24-Parganas may be considered satisfactory. The statement below shows the collections in estates under direct management in each district of the division :—

District.	Number of estate.	Current demand.	Arrear demand.	Total demand.	Current collection.	Arrear collection.	Total collection.	Percentage of current collection on current demand.	Percentage of arrear collection on arrear demand.	Percentage of total collection on total demand.	Percentage of current collection on current demand in 1893-94.
1	2	3	4	5	6	7	8	9	10	11	12
		Rs.	Rs.	Rs.	Rs.	Rs.	Rs.				
24-Parganas	45	2,61,264	72,928	3,34,192	2,16,118	36,054	2,52,172	82·7	49·4	75·4	81·1
Calcutta	1	18,747	55	18,802	18,734	53	18,787	99·9	96·4	99·9	99·7
Nadia	39	18,818	2,988	21,806	14,885	2,822	17,707	79·09	94·4	81·2	82·4
Murshidabad	63	27,315	12,404	39,719	18,390	8,385	26,775	67·3	67·6	67·9	68·8
Jessore	79	4,344	369	4,713	4,160	247	4,407	95·8	66·9	93·5	92·8
Khulna	33	16,719	3,183	19,902	15,819	2,471	18,290	94·6	77·6	91·9	81·4

Total for 1893-94 ...	252	3,40,447	86,037	4,33,084	2,81,785	38,127	3,19,912	81·3	44	73·8	83

The number of estates under direct management in this division was 260 against 252 in the preceding year. The number, however, does not indicate the state of affairs, as a so-called estate often consists of dozens of petty holdings in different mauzas and even in different districts, and is not really an estate. They are now being separated with a view to selling the portion in each mauza separately. The number of estates increased in the 24-Parganas, Nadia, Jessore, and Khulna. In the 24-Parganas two estates under direct management were erroneously shown in the previous returns to be under farming leases. They having been transferred from class II to class III, the number has been raised from 43 to 45. The increase in the other districts is due to the transfer of estates from class I to this class owing to their purchase by Government for arrears of revenue. Compared with the preceding year, the rental increased in the 24-Parganas, Nadia and Khulna, and decreased in the other districts. The increase in the 24-Parganas is due to the transfer of two estates to the class of khas mahals, settlement of some vacant holdings, and re-settlement of others at enhanced rents; that in Nadia to *utbandi* measurements, and in Khulna to the settlement of estate Labsa. The decrease in Calcutta is due to redemption of the revenue of a number of holdings and to acquisition of lands for public purposes by the Calcutta Corporation. The decrease in Murshidabad and Jessore is due to abatement of rent in certain khas mahals. The percentage of current collections on current demand improved in four out of the six districts. Nadia and Murshidabad only show a falling off. The current collections attained the fixed standard in Calcutta, Jessore and Khulna; the 24-Parganas and Nadia collected 82·7 and 79·09 per cent., respectively, while Murshidabad shows the worst results, the percentage amounting to 67·3 only, being worse than in 1893-94. The percentage of arrear collections was much less than the prescribed standard in most districts. The low percentage in the 24-Parganas is due to bad collections in Diamond Harbour, Port Canning, and Basirhat. Nearly Rs. 12,000 are due from certain holders of town lots in Port Canning, who hold at a loss owing to the failure of the place as a port. Government has lately sanctioned the reduction of the rate of rent of these lots, and the lot-holders have been called upon either to surrender the lots or to pay the rent. But as they have done neither, suits for ejectment will shortly be brought against them. It is reported that the cultivating raiyats sustained heavy losses on account of the failure of their crops in the past three years, and were consequently much impoverished, and that though in the year under report the harvest was good, it has not been sufficient to enable them to pay the whole of the Government demand at once. They are reported to be still very badly off, and rigorous measures for the collection of rent could not be adopted without causing extreme hardship to them. As I have already said, I fear that further remissions will be necessary. A large sum is also due from the tenants of Government estate Bojerghatta in the subdivision of Basirhat, who withheld payment pending the disposal of an appeal preferred by them in the High Court against the decision of the Special Judge, rejecting their prayer to reduce their assessment. The Collector of Murshidabad reports that many estates in the Sadar subdivision are extremely poor and subject to annual floods, and that the short collections are due to loss by floods of the bhadoi crops in estates where it is the principal staple, to the partial failure of the mulberry crop in December owing to late inundation and heavy rainfall in October, and to the lateness of the cold-weather crops. The Collector of Nadia reports that the fact that no steps could be taken within the year under report for the collection of the increased demand obtained by the utbandi measurement accounts for the collection falling short of the fixed standard. The fall in the percentage of arrear collections on arrear demand in Jessore and Khulna is ascribed to the non-realization of rent of newly-purchased estates pending re-settlement. Considering the impoverished condition of the khas mahal tenants, I think the financial results of the management of estates held direct fairly satisfactory. The remissions granted during the year are classified below:—

	1893-94.	1894-95.
	Rs.	Rs.
Nominal remissions	4,686	5,265
Remissions of grace	20,760	22,133
Ditto of right	301	165
Total ...	25,747	27,563

The bulk of the nominal remissions represent rent of some unoccupied godowns in the Orphangunge market and paper balances. Rupees 18,889 were remitted out of grace on account of rent due from the tenants of some Government estates in the Diamond Harbour, Sadar and Basirhat sub-divisions, whose circumstances were reduced by the failure of their crops. The remissions of right were granted on account of diluvion, &c. In the Meherpur sub-divison in Nadia, there were seven halsanas or field watchmen attached to the large khas mahals for guarding the thatching grass, holding chakran lands by way of remuneration. Their work was found unsatisfactory, and they had grossly neglected their duty. In the latter part of the year under report these halsanas were replaced, with the sanction of the Board of Revenue, by eight paid chaukidars on a monthly salary of Rs. 6 each. With the exception of this, there has been no change worth noticing either in the agency or mode of management of khas mahals, but I have suggested to the Board that in some cases the experiment might be tried of paying for collecting by commission instead of fixed salaries. The statement below shows the expenditure incurred for the management of, and for miscellaneous and other improvements in, khas mahals during the year under report:—

Division.	District.	Amount expended from—				Remarks.
		7½ per cent.				
		Management proper.	Miscellaneous improvements including agricultural improvements.	Two per cent. for sanitary improvements.	Grant for agricultural, public works and improvements.	
1	2	3	4	5	6	7
		Rs.	Rs.	Rs.	Rs.	
Presidency	24-Parganas ...	12,370	2,613	4,885	1,762	
	Nadia ...	613	188	550	...	
	Murshidabad ...	2,501	749	440	100	
	Jessore ...	...	30	223	...	
	Khulna ...	664	356	1,000	100	
	Total ...	16,148	3,936	7,098	1,962	

24-Parganas.—Rupees 28,623 were spent on the Orphangunge market, in the extension of the revetment wall along the banks of Tolly's Nala, in the repairs of godowns, sheds, drains, &c.; Rs. 636 were spent in constructing a pucca ghát to a tank in Port Canning; Rs. 1,315 in re-excavating three tanks in Diamond Harbour, and Rs. 562 in the repairs of tahsil cutcheries there and in Basirhat; Rs. 4,885 were spent for filling up two tanks in Government estate Punchannogram, which were declared by the Calcutta Corporation to be injurious to public health. A further sum of Rs. 5,595 was allotted for filling up a similar tank in Government estate Addy Gunga Jheel in Kidderpore. The work was not taken up during the year, but has since been taken in hand and will be completed shortly. Out of the grant of Rs. 3,300 for works of agricultural improvements, Rs. 1,762 were expended on repairs to the river-side embankments in Port Canning.

Nadia.—Rupees 738 were expended in the following way:—

	Rs.
Construction and repairs of cutcheries and culverts ...	290
Construction of a masonry well at Bildholla	448
Murshidabad—	
Construction of bridges and roads	326
Repairs to tanks and wells	367
Ditto to cutchery houses, &c.	596
Jessore—	
Repairs of a cutchery house	30
Re-excavation of the old collectorate tank	205
Clearance of the circuit-house and the post-office tanks ...	18
Khulna—	
Construction of a cutchery house	270
Jungle cutting at Labsa	29
Foot bridge over a khal, &c.	57
Excavation of a tank at Goberdanga	600
Excavation of a tank at Narnia	250
Clearing a khal at chur Baniary	150

In Khulna Rs. 100 were spent in cultivating Nainee Tal potatoes supplied by the Agricultural Department. The raiyats in the khas mahals were somewhat suspicious of the innovation, but the crop was good. It has been kept as seed for next year. No other new staple was cultivated in any Government estate in any district. In the 24-Parganas 69 schools were maintained in the Government estates at a cost of Rs. 2,451, for the education of boys, and six girls' schools at a cost of Rs. 234. In Nadia there were three primary schools and a night school, the one at chur Kururia having ceased to exist since last rains. The total cost for the maintenance of these schools was Rs. 343, which were alloted by the Director of Public Instruction. In Murshidabad there were one upper primary school with 43 pupils, 8 lower primary schools with 165 pupils, and one girls' school with 17 girls. The total expenditure on these schools amounted to Rs. 683, of which Rs. 489 were paid out of the Khas Mahal Fund and Rs. 194 were contributed from local sources. In Jessore there were two middle vernacular, one upper primary and nine lower primary schools. The total amount of aid given to these institutions from the khas mahal grant was Rs. 66. In Khulna the total number of stipendiary schools was 21 against 16 of the preceding year. The number of students in these schools was 669 against 447 of the previous year. Rupees 2,315 were spent on primary education in this district. Besides the above schools, there were eight others paid by results of examination, and one unaided school imparting education to 288 boys. The condition of the raiyats in Government khas mahals cannot be considered very good. In parts of Murshidabad they were in difficult circumstances owing to excessive flood and consequent loss of the Bhadoi and mulberry crops. The Officiating Collector of the 24-Parganas, Mr. Collin, says "that during the year under report the harvests were generally good, but a single year of plenty preceded by three bad years had afforded them a temporary relief only, and has not materially improved their condition." As already stated, I have granted generous remissions to actual cultivators in such cases. If they cannot really pay their rents out of the harvests of the year, I do not think their debts should be carried forward against future harvests. Except in Jessore, where there were two cases of desertion, no desertion of raiyats from Government estates is reported from any district of this division. The accounts of the several Government estates were duly inspected by Collectors, Covenanted Deputy Collectors, khas mahal Deputy Collectors and Subdivisional Officers. No material irregularities or discrepancies were brought to notice by any of the inspecting officers. Certain suggestions which I have made to the Board will, I hope, if approved, greatly facilitate inspection.

Sales of defaulting estates.

100. Eight hundred and eighty-two estates, including shares, became liable to sale for non-payment of revenue demand, of which 100, or 11·3 per cent., were actually sold. The percentage of sales was less than in the preceding year, and the liberal

exemptions granted by Collectors who gave defaulters every facility to pay up their arrears before the sale days, indicate that the sale law was worked leniently.

Settlements.

101. The following table shows the settlements effected in each district:—

Division.	District.	Original settlements.		Resettlements.				Summary settlements.				Settlement for disposal.	
		Number.	Net profit.	Number.	Net revenue.	Increase.	Decrease.	Number.	Net revenue.	Increase.	Decrease.	Number.	Estimated revenue.
1	2	3	4	5	6	7	8	9	10	11	12	13	14
			Rs.		Rs.				Rs.				Rs.
Presidency ...	24-Parganas	...	...	3	1,076	22	93	5	614	178	...	1	550
	Nadia	3	1,015	11	1,019	405	114	1	26	...	...	38	11,631
	Murshidabad	..	...	7	3,550	...	104	3	758	...	...	8	8,375
	Jessore	2	21	4	203	...	31	...	...	...	...	5	51
	Khulna	1	200	...	...	...	...	...	...	...	...	1	153
	Sunderbans	40	4,035	23	5,377	1,133	...	1	50	...	...	241	23,721
	Total	46	5,271	48	11,315	1,560	403	10	1,448	178	...	294	16,884
	Total for 1893-94 ...	7	4,681	86	6,013	1,751	1,314	17	3,279	2	...	197	39,977

It will be observed that in the 24-Parganas, Murshidabad and Jessore, the net results show a slight decrease in the revenue. The rates adopted in the present settlements were generally those fixed in previous settlements.

102. Indications of strained relations between landlords and tenants have manifested themselves here and there, and bloodshed and murder have resulted. This has been reported in more detail under head XXXVI, "Conduct of Zamindars." Mr. Garrett, the Officiating Collector of Nadia, makes the following observations on this head:—"I fear that landlords still oppress their tenants to a far greater extent than would be apparent to a casual observer. The raiyats, owing to their improvidence and carelessness, are in a chronic state of indebtedness either to the landlord or the mahajan, and to openly oppose the former is, as a rule, quite beyond their means. The Tenancy Act, if properly understood and taken full advantage of, would of course enable the raiyats to withstand successfully a great deal of what they at present submit to without a word; but owing to their apathy and utter lack of independence they are to a great extent ignorant of their power and incapable of using it." I have no doubt that some zamindars are guilty of illegality in the matter of distraint, but the raiyats rarely complain.

103. The following table shows the amount of landlords' fees received and paid away during the year under the Bengal Tenancy Act:—

District.	Balance of 1893-94.	Amount received in 1894-95.	Total.	Amount paid out to landlords.	Amount deposited in the Treasury.	Amount remitted to other districts.	Total.	Otherwise disposed of.	Balance.	Remarks.
1	2	3	4	5	6	7	8	9	10	11
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	
24-Parganas	524	3,800	4,414	1,528	2,321	37	3,886	...	528	* Railway fair peons.
Nadia	31	1,295	1,3°6	418	896	...	1,314	...	12	
Murshidabad	11	635	646	73	331	60	464	...	182	
Jessore	55	2,004	2,059	410	1,480	...	1,890	96*	73	
Khulna	199	1,892	2,091	356	1,602	...	1,958	...	133	
Total ...	820	9,710	10,530	2,785	6,630	97	9,512	96	978	

It will be seen that nearly two-thirds of the amount had to be deposited in the treasury, the landlords having refused to accept the amounts tendered, under the impression that acceptance would imply consent on their part and establish a right of transfer in their raiyats which they may not possess. The Collector of the 24-Parganas says that another reason for the deposit is that petty zamindars have no authorized agents to receive payments on their behalf, and that their personal appearance entails an expense far in excess of the amount they are to receive. The Collector of Jessore writes

that landlords are generally unwilling to accept fees from the Collector, as they get more when the transferees go personally to their sharista to have mutations effected. Probably all these causes are in operation. The Collector of Khulna reports that the mode of treatment of landlords' fees received by money-orders, prescribed by the Accountant-General, Bengal, had led to inconvenience and increase of work in the account department of the Collectorate. I have recommended to the Board of Revenue a modification of some of the Government rules under the Tenancy Act which govern the payment of such fees. If my suggestion be accepted, I hope that there will be no practical inconvenience in dealing with such fees. An important fact as regards land has come to my notice, but I do not know at present its extent, or how far it may be due to enhanced value given to raiyats' holdings by the Bengal Tenancy Act. I am endeavouring to obtain more information about it. I find that many so-called raiyats belong to the non-cultivating classes who have obtained possession of raiyati holdings and enjoy all the privileges conferred on raiyats by the Tenancy Act, while the actual cultivators of the soil who pay rent to them are entirely at their mercy and obtain no protection from the law whatsoever. The Babus, who are called raiyats, successfully oppose all attempts to enhance their rents on the ground that they are raiyati rents, while the unfortunate cultivators pay them at rates which are sometimes ten or twelve times higher. The raiyat has been artificially protected to such an extent that his holding is too valuable for the actual cultivator to retain, and it has become an object of the cupidity of the Babu. Such purchases are also often made by neighbouring zamindars with the intention of harassing a neighbour.

Road and Public Works Cesses.

104. The following table shows the demands, collections, balances and remissions of cesses in the several districts of the Division for the past two years:—

District and Years.		Demands.			Collections.				Balance.			Deduct remission.	Net arrears.	Percentage of net balance on gross demand.
		Current.	Arrear.	Total.	Current, including previously paid in advance.	Arrear.	Advance for future years.	Total.	Current.	Arrear.	Total.			
1		2	3	4	5	6	7	8	9	10	11	12	13	14
		Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
24-Parganas ...	1893-94	2,37,880	37,588	2,75,468	2,06,240	34,389	4,612	2,45,271	31,640	3,199	34,839	785	34,054	12·3
	1894-95	2,37,725	33,959	2,71,684	2,00,662	31,095	5,165	2,36,922	37,063	2,864	39,927	70	39,857	14·6
Nadia ...	1893-94	1,57,145	8,204	1,65,349	1,41,970	7,529	4,390	1,53,889	15,175	674	15,849	220	15,629	9·4
	1894-95	1,54,833	15,629	1,70,462	1,45,035	15,180	5,184	1,65,399	9,798	449	10,247	43	10,204	5·9
Murshidabad	1893-94	1,46,101	31,110	1,77,211	1,26,305	16,795	5,921	1,43,591	20,726	14 315	35,041	1,018	34,023	19·1
	1894-95	1,46,101	33,269	1,79 370	1,27,994	19,336	3 302	1,50,632	18,107	13,933	32,040	5,328	26,712	14·9
Jessore ...	1893-94	1,85,941	48,378	2,34,319	1,45,530	43,063	6,242	1,94,835	40,411	5,315	45,726	456	45,270	19·3
	1894-95	1,85,842	45,321	2,31,163	1,58,051	42,256	6,946	2,07,253	27,791	3,065	30,856	533	30,323	13·1
Khulna ...	1893-94	1,42,320	19,458	1,61,778	1,29,156	16,638	2,600	1,48,394	13,164	2,815	15,879	1	15,978	9·8
	1894-95	1,57,604	15,967	1,73,571	1,44,112	14,408	3,171	1,61,691	13,492	1,559	15,051	273	14,778	8·5
Total ...	1893-94	8,69,387	1,44,733	10,14,120	7,48,291	1,18,414	23,795	8,85,969	1,21,116	26,318	1,47,434	2,480	1,44,953	14·2
	1894-95	8,82,105	1,44,145	10,26,250	7,75,854	1,22,275	23,768	9,21,897	1,06,251	21,870	1,28,121	6,247	1,21,874	11·8

105. The above figures show that there has been a considerable increase in the annual cess demand as compared with the preceding year, but the increase has been in Khulna only, and is due to valuations and revaluations. The decrease in Nadia is due to cesses assessed on subordinate julkars paying rent to superior landlords having been remitted during the year under report, under the Board's Circular No. 13 of March 1894. The proportion of collections to demand has improved in all the districts except the 24-Parganas as regards current demand, but as to arrears, it has fallen off in all the districts except Nadia and Murshidabad. The total collections, however, improved as compared with the preceding year, being 87·9 and 84·8 per cent. against 86 and 81·8 respectively. A large portion of the arrears is due in the districts of the 24-Parganas, Jessore and Murshidabad. In the 24-Parganas, valuation and revaluation of certain estates and tenures was undertaken during the year, one

Government estate, Gar Hajipur, being included, but the work has not as yet been completed. The valuation of hâts and fairs was also revised during the year, but the result cannot be ascertained until the time allowed for objections expires. In Nadia the valuations of one temporarily-settled estate, four petty private estates, and 53 rent-free tenures were completed during the year, resulting in an increase of Rs. 173 in the annual cess demand. In Murshidabad, no valuation or revaluation was undertaken during the year. The general revaluation of the district of Jessore sanctioned in 1893-94 is in progress. In Khulna the valuation of five estates and tenures was completed during the year. The revaluation of 66 estates has also been taken in hand since September last, and the work is in progress. I have endeavoured to ascertain why the progress of realising arrears under the certificate procedure is so slow and unsatisfactory as it is, and among other things I have noticed that the road cess departments make requisitions for certificates without due care, and that certificates not unfrequently fail from being faulty. The Deputy Collectors leave the preparation of certificates far too much to subordinate clerks, without giving personal attention to them. Out of a current demand of Rs. 8,82,105, only Rs. 7,75,854 were collected, and out of Rs. 1,44,145 arrears only Rs. 1,22,275, while Rs. 6,247 were remitted. I cannot consider this satisfactory.

XVIII.—ATTACHED ESTATES, INCLUDING COURT OF WARDS.

106. The number of estates under the management of the Court of Wards was the same as in the previous year. They are thus distributed—

District.	Wards' Estate.	Trust Estate.
24-Parganas	Bhawanipur ... ... Baranagore ... ... Jainagar	Nil.
Murshidabad	Kasimbazar	Nil.
Khulna	Satkhira	Syedpur.

Besides the above, a small portion of Miss Courjon's estate in the 24-Parganas, consisting only of a house in Calcutta, and the Chanchra road estate in Jessore, held by Government for the maintenance of a bridge over the river Bhairab, continue to be managed by the Collectors of those districts. Of the three estates in the district of the 24-Parganas, Bhawanipur is comparatively large, comprising 20 entire revenue-paying estates, 17 portions of estates, 4 patnis and 38 tenures, and having a rental of Rs. 1,64,605. The total demand of this estate was Rs. 3,73,061, including arrears amounting to Rs. 2,08,456. Rupees 1,83,899, or 111·7 per cent. of the current demand, were realized during the year, and Rs. 32,956 were written off, leaving a balance of Rs. 1,56,206 still uncollected at its close. Out of the balance outstanding, a sum of Rs. 2,057 has since the close of the year been written off as irrecoverable, and correspondence is going on for the remission of Rs. 8,864. Rupees 20,656 were spent during the year on reclamation of land, construction and repairs of embankments and khals, excavation and re-excavation of tanks, construction and repairs of village roads, and repairs of a bridge. Rupees 380 were spent on schools and Rs. 943 on dispensaries. Out of the lands reclaimed during the last two years, the settlement of 1,557 bighas has produced an income of Rs. 1,957. After defraying all ordinary and recurring charges, Rs. 20,000 on account of the marriage of the ward and Rs. 6,600 on the Adya Shradh ceremony of his grandmother, Rs. 7,947 were invested in Government securities and Rs. 3,232 in the purchase of land. The death of the grandmother has relieved the estate of an annuity of Rs. 4,200. The general conduct of the ward was good, and the progress made in his studies is said to have been fair, notwithstanding repeated interruptions caused by the illness of his mother, his own marriage, and the Shradh ceremony of his grandmother, involving several journeys between Bhawanipur and Bankipore, where the family are at present residing. The condition of the tenantry is said to be fair. For a long time there appears to have been no revision of rent-rolls, and numerous corrections have been made during the year. I cannot say how far this work is still from completion. The other two estates in the district deserve no special notice, except

that the conduct of the younger Baranagar ward has not given satisfaction. He persistently disobeyed orders to attend school at Hooghly, where he has been placed for his education, and presented several petitions to the authorities, making groundless allegations against the manager. It was considered useless to make any further attempt to educate him, and he has been ordered to learn zamindari business in the office of the manager of the Bhawanipur estate. Kassimbazar, the estate of the minor A. N. Roy, in the district of Murshidabad, is the most important charge in the Division. The total demand of this estate was Rs. 8,12,849, including arrears amounting to Rs. 4,40,298. Rupees 2,86,954, or 77·02 per cent. of the current demand, were realized during the year, and Rs. 6,791 were remitted, leaving a balance, after certain petty adjustments, of Rs. 5,19,032 uncollected at its close. The unsatisfactory collections have been principally in the Tippera estates, and are due partly to the effect still felt of the flood which occurred in 1893, but principally to the attitude assumed by a large number of the tenants towards the new rent-roll recently framed under Chapter X of the Bengal Tenancy Act. In these Tippera properties, the uncollected balances were, on the 1st April 1893, Rs. 2,01,036; on 1st April 1894, Rs. 3,58,955; and on 1st April 1895, Rs. 4,59,483,—an increasing accumulation of arrears which is most unsatisfactory, and as the estates are not in my Division, neither I nor the Collector of Murshidabad, nor the manager who lives in the latter district, exercise any proper supervision or control over the actual work. During the year Rs. 3,106 were spent on gratuitous relief and Rs. 4,445 on takavi loans in the Tippera properties. The revision of the new rent-roll, which appears to have been full of errors, commenced in February 1894, and is still going on under the supervision of the former Settlement Officer, Babu Kali Sankar Sen. The revision of 35,324 holdings out of 61,308 has been completed, but has not yet been commenced in villages where the raiyats are giving most trouble. During the year there was an epidemic of cholera in the Tippera estates. The estate made arrangements for supplying medical aid through the local authorities. A sum of Rs. 17,408 was spent during the year on works of improvement in different parts of the estate, and especially on the supply of drinking water, viz., Rs. 14,515 for the excavation of 19 tanks, of which 9 were completed during the year, Rs. 969 for the construction of three wells, Rs. 316 for the construction of two roads, of which one was finished and the other in progress, Rs. 1,069 for the construction of 18 culverts, and Rs. 539 for the improvement of gardens and construction of bunds, &c.; Rs. 51,757 were spent on survey operations, Rs. 5,389 on schools, and Rs. 7,597 on hospitals and dispensaries. A bull was brought from Burma by the Director of Land Records, and placed in Sarail for the improvement of the breed of cattle. The minor, who is now eighteen years of age and is under the tuition of a European and a native tutor, has besides received some practical training in zamindari management in the office of the manager, for which he shows particular aptitude and intelligence. He has also, under my orders, been taken to some tahsil cutcherries to examine the accounts and learn the system. It is much to be regretted that this boy's education was not energetically taken in hand several years sooner than it was. He is very backward for his age, and it is difficult now to fit him for his future position. Mr. Turton, his European tutor, appears to be doing the best he can with him, but it is late in the day. Of the two estates in the district of Khulna, Syedpur is a trust estate managed by the Collector of the district. The total demand of the estate, including cesses, interest and arrears, was Rs. 3,15,820, of which nearly Rs. 2,28,000 were due from putnies, about Rs. 82,000 from khas mahals, and the balance, about Rs. 6,000, on account of cesses on rent-free holdings. Rupees 2,07,664 were collected during the year and Rs. 1,691 were remitted, leaving a balance, excluding adjustment of Rs. 49, of Rs. 1,06,416, of which about Rs. 64,400 have been realized since the close of the year. The percentage of total collections on total demand was 65·7 and on current demand 107·4. The estate provides Rs. 60,000 annually for the Moshin Endowment Fund, and paid Rs. 75,000 on that account during the year, including Rs. 15,000 arrears of the previous year. The establishment was reorganized in June 1894, and the collections have since improved as was expected. Tenures falling into arrears have been bought up free of encumbrances, and engagements made with the actual cultivators, and if this policy is followed, I hope that satisfactory

relations will be established between the Collector and the tenants. There is, however, difficulty in identifying defaulting tenures and holdings, showing how faulty the management of the estate has been. There have been no survey or settlement operations on a large scale during the year. The last extensive settlement was made in 1828, and the rents have not been enhanced since, and there is some reason to suspect that the extent of lands held rent-free has fraudulently increased. The constant petty money which is essential to good management appears to have been entirely neglected. The parts of the estate which are not let in patni now require proper survey and settlement. Enquiries have been made during the year into the existing arrangements, and the matter is under consideration. There has been some improvement in collections in the Satkhira ward's estate, but much still remains to be done. The total nominal demand of this estate was Rs. 4,57,449, including arrears which amounted to Rs. 3,10,245. Rupees 1,71,837, or 116·7 per cent. of the current demand, were realized during the year, and Rs. 16,502 were remitted, leaving a balance of Rs. 2,69,110 outstanding at the close of the year. The percentage of total collections on total demand was 37·5 against 31·1 of the preceding year. The administration of this estate suffers from many disadvantages, viz. (1) it is a small fractional share only; (2) it is too widely scattered to be properly supervised; (3) there is a heavy debt on which the interest amounts to more than half the net income of the estate; (4) the accounts are in a state of very great confusion. Since the appointment of a new manager, about the beginning of the year, there has been decided improvement, the former man being utterly incompetent. Some progress has been made in adjusting the accounts of former years and in introducing a sound system for the future. The debt has been diminished by Rs. 27,835 during the year, and with a view to further reduction, an offer of Rs. 50,000, or nearly 20 years' purchase, has been accepted from a co-sharer for some property lying in the districts of the 24-Parganas, Nadia, and Jessore. Further negotiations are going on for the sale of other property. Friendly relations have been maintained with those co-sharers who are members of the family and who have now lent the title deeds to the Collector to be copied. The want of these was embarrassing the management very much. The wards live in Calcutta with their mother. They are approaching the age at which their education and training should be taken in hand. The estate can never be a satisfactory one, consisting of nothing but small shares, while other shares in much of it have already passed out of the family, and I have never been able to understand why it was thought advisable that the Court of Wards should undertake the management of it. It absorbs much of the time of the officers of the State, and I do not see what public object is attained in maintaining an estate consisting only of fractional shares.

XIX.—EXCISE.

107. The following statement shows the total excise revenue realised in each district of the Division during the past two years:—

District.	Number of licenses.		Increase.	Decrease.	Revenue.		Increase.	Decrease.
	1893-94.	1894-95.			1893-94.	1894-95.		
1	2	3	4	5	6	7	8	9
					Rs.	Rs.	Rs.	Rs.
24-Parganas	1,133	1,193	61	...	4,29,263	4,56,610	27,847	...
Calcutta	999	984	...	15	25,72,405	27,19,539	1,47,134	...
Nadia	262	258	...	4	1,20,239	1,21,293	1,054	...
Murshidabad	424	414	...	10	1,55,400	1,57,980	2,580	...
Jessore	308	251	...	57	88,170	83,918	...	4,252
Khulna	143	143	...	...	75,377	75,940	563	...
Total ...	3,268	3,243	61	86	34,40,854	36,15,280	1,78,678	4,252
Net decrease ...		25			Net increase ...	1,74,426		

108. It will be seen that there was a decrease in the number of licenses in all districts except one, and as regards revenue there was an increase in all districts except one. The net result in the Division is a decrease of 25 licenses with an increase in the revenue amounting to Rs. 1,74,426. The statement

below shows the revenue derived from each exciseable article during 1893-94 and 1894-95—

EXCISEABLE ARTICLES.	NUMBER OF LICENSES.		Increase.	Decrease.	REVENUE.		Increase.	Decrease
	1893-94.	1894-95.			1893-94.	1894-95.		
1	2	3	4	5	6	7	8	9
					Rs.	Rs.	Rs.	Rs.
1. Country spirits	383	374	...	9	14,49,454	15,35,268	85,814	...
2. Rum	10	11	1	...	4,34,472	4,31,036	...	3,436
3. Imported liquor	393	420	36	...	1,59,486	1,67,839	8,333	...
4. Tari	803	816	13	...	1,77,703	1,76,886	...	877
5. Puchwai	351	377	26	...	24,558	25,814	1,256	...

13. Opium	708	630	...	78	6,63,282	7,32,761	69,479	...
14. Miscellaneous	...	...	...	...	1,335	1,671	336	...
Total ...	3,268	3,243	77	102	34,40,854	36,15,280	1,80,399	5,973
Net decrease ...		25		Net increase ...		1,74,426		

Country Spirits.—There was an increase in the revenue in Calcutta and the 24-Parganas and a decrease in Nadia, Murshidabad, Jessore, and Khulna, the net result being an increase of Rs. 85,814 in the Division, to which Calcutta contributed Rs. 73,844. The trade in country spirits in Calcutta appears to continue to be fairly profitable. There was a decrease in the local consumption of rum in the town, which accounts to some extent for the increase in the consumption of country liquor. The increase in the 24-Parganas is reported to be due to increased consumption of country spirits owing to good harvests. Diminished sale of the liquor in Nadia, Murshidabad, and Jessore accounts for the loss of revenue. It is reported that enhanced retail prices of the liquor affected the consumption. Mr. Kennedy, the Collector of Murshidabad, says that the poor men of the lower classes are unable to pay the high price, and are compelled to take to tari and pachwai, and that others smuggle the liquor from the neighbouring districts where it is sold cheaper. The Collector of Jessore explains that the reduced circumstances of the people, owing to successive bad harvests and to the high price of food-grains prevailing for a part of the year under review, also led to diminished consumption. I consider that the taxation of country spirits is absurdly high in this division, except Calcutta and the Suburbs, and that it drives people to illicit practices and also to the use of other stimulants. I think it fully accounts for the falling off in revenue under this head. *Rum.*—The decrease of Rs. 3,436 in Calcutta, the only place into which rum was imported, is said to be due to the fact that the average strength of the liquor imported was lower than in the previous year. *Imported liquors.*—The increase is attributed to the settlement of those licenses separately having previously been combined with those for the sale of country spirits. *Ganja.*—The sale of the drug varied in different districts. Calcutta, the 24-Parganas, Murshidabad, and Khulna show an increase in the revenue, while Nadia and Jessore show a decrease. *Opium.*—Next to country spirits, this article yielded the largest revenue, the increase amounting to Rs. 69,479. The results varied in different districts. The consumption in Calcutta increased from 424 maunds 21 seers in 1893-94 to 515 maunds 5 seers in 1894-95, with corresponding increase in the revenue, which amounted to Rs. 78,663. The Superintendent of Excise Revenue attributes the increase to some extent to the suppression of smuggling of contraband opium into Calcutta. He is, however, inclined to suspect that a large quantity of duty-paid opium, supposed to have been consumed in Calcutta, found its way to Burma, Arracan and other places where the price of the drug is very high, and where opium is largely exported from Bengal by illicit means. I think he is probably right. The increase in the 24-Parganas is attributable to the good harvests of the year. There is no special reason for the decrease in Jessore. Mr. Kennedy suspects that a good deal of smuggling in small quantities goes on in Murshidabad. *Tari and Siadhi.*—The revenue from these articles shows a falling off, but the actual decrease is smaller than the figures indicate. A part of the current year's fees in Calcutta was paid in advance in March of the previous year, which accounts for the apparent falling off.

The table below shows the number of persons arrested and convicted for offences against the excise laws during 1893-94 and 1894-95:—

District.	Arrested.		Convicted.	
	1893-94.	1894-95.	1893-94.	1894-95.
1	2	3	4	5
Calcutta	230	325	194	285
24-Parganas	265	256	228	217
Nadia	109	52	94	38
Murshidabad	187	140	176	126
Jessore	64	44	54	38
Khulna	52	37	47	33
Total ...	907	854	793	737

Compared with the preceding year, the number of persons arrested and convicted during the year under review shows a decrease in all the districts except Calcutta, which appears to indicate a relaxation of detective action, which I cannot regard as satisfactory. The result of the year's administration of excise in the Division is an increase of Rs. 1,74,426 over the revenue of the preceding year. The bulk of this was contributed by country spirits and opium in Calcutta. The expansion of revenue in this district in recent years is noteworthy, it having risen within the last five years from twenty to twenty-seven lakhs. I do not attribute this to increased consumption, but to some success in the suppression of illicit practices, and to better organized taxation.

109. *Salt.*—There has been no change in the protected area in the only two saliferous districts of the 24-Parganas and Khulna in this Division, nor was there any incident of importance requiring special notice. The table below compares the consumption of salt in the two districts during the past two years:—

District.	1893-94.	1894-95.	Increase.	Decrease.	Remarks.
1	2	3	4	5	6
	Mds.	Mds.	Mds.		
24-Parganas ...	1,67,789	1,80,193	12,404	...	
Khulna ...	1,18,671	1,21,534	2,863	...	
Total ...	2,86,460	3,01,727	15,267	...	

The increase in the consumption of salt is ascribed by the Collectors of both the districts to the prosperous condition of the people, consequent on the excellent harvest of the year under report. In the 24-Parganas the influx of labourers to undertake repairs to embankments and for cultivation in the Sunderbuns also contributed to the result to some extent. The number of cases instituted for offences against the salt laws is shown below:—

	1893-94.	1894-95.	Decrease.
24-Parganas ...	412	196	216
Khulna ...	42	23	19

It will be observed that there was a decrease in the number of cases instituted in both the districts. It is reported that the prosecutions of the previous year in the 24-Parganas checked illicit manufacture. The falling off is also said to be partly due to the omission to prosecute petty cases; dealers are seldom prosecuted for technical offences, except when warnings do not produce

any effect. In Khulna the police did not detect so many cases as in the preceding year. The table below shows the quantity of salt confiscated and the fines and forfeitures realised and rewards paid in each district:—

DISTRICT.	QUANTITY OF SALT CONFISCATED.		FINES AND FORFEITURE REALISED.		REWARDS PAID.		REMARKS.
	1893-94.	1894-95.	1893-94.	1894-95.	1893-94.	1894-95.	
1	2	3	4	5	6	7	8
	MDS. S.	MDS. S.	Rs.	Rs.	Rs.	Rs.	
24-Parganas ...	39 27	30 15	1,740	973	877	1,397	
Khulna ...	18 15	5 20	207	636	156	110	
Total ...	58 2	35 35	1,947	1,609	1,033	1,507	

There was a sensible decrease in the quantity of salt confiscated in both the districts, due to a fall in the number of cases instituted. Rupees 973 represent the fines and forfeitures realised in the 24-Parganas, the amount disbursed to informers and apprehenders as reward being Rs. 1,397. The excess was paid on account of rewards due in cases disposed of in the preceding year. The entire fines and forfeitures realised in each case in this district were distributed as rewards to the police and informers. The Collector of Khulna reports that rewards were paid in all cases tried under sections 16 to 19 of the Salt Act, and that in cases in which there is no provision in the rules as to payment of rewards nothing was distributed out of the fines realised. As I believe that the report submitted by Mr. Ashton after a detailed inquiry is under consideration, I will say little now on the subject of salt, except that I believe that there is much illicit manufacture, on a large scale, along the edge of the Sunderbuns forest, distribution of illicit salt being rendered easy by the labyrinths of water channels along the whole tract. The police do not appear capable of dealing with it, and I do not see that the rawanna system has any practical preventive virtue.

XX.—STAMPS.

110. The following table shows the result of the administration of the stamp revenue in this Division during the year as compared with that of the preceding year:—

YEAR.	RECEIPTS.				CHARGES.			REMARKS.
	Sale of court-fee stamps and stamps for copies.	Sale of non-judicial stamps.	Miscellaneous receipts.	Total.	Refunds.	Other charges.	Total.	
1	2	3	4	5	6	7	8	9
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	
1893-94	28,23,597	15,77,464	8,383	44,09,444	74,087	45,527	1,22,614	
1894-95	30,80,308	16,20,651	52,211	47,68,170	92,459	45,726	1,41,185	
Increase ...	2,65,711	49,187	43,828	3,58,726	18,372	199	18,471	
Decrease ...	...	...	...	...	...	...	...	

There was an increase in the sale of both judicial and non-judicial stamps. The sales in each district are shown below:—

	1893-94.	1894-95.
	Rs.	Rs.
Calcutta ...	23,85,704	26,55,911
24-Parganas ...	6,71,647	7,07,288
Nadia ...	3,34,232	3,29,463
Murshidabad ...	2,66,264	2,72,430
Jessore ...	4,26,724	4,39,820
Khulna ...	3,16,490	3,11,038
Total ...	44,01,061	47,15,959

Compared with the preceding year, the sale of judicial stamps increased in Calcutta, the 24-Parganas, Murshidabad and Jessore, and decreased in Nadia and Khulna. Calcutta, as usual, has contributed most to the increase, which is due to the payment of probate duty, amounting to nearly two lakhs of rupees, in respect of certain large estates. The increase in the other districts is due to the institution of a larger number of civil suits. In Jessore it was also due to the extensive sale of four-anna adhesive court-fee stamps for re-valuation work in the Road Cess Department. The decrease in Nadia is slight. The Collector of Khulna reports that the circumstances of the people improved only during the latter part of the year under report, owing to a good harvest, but that they suffered from high prices of food-grains during the greater portion of the year. This, in his opinion, must have affected the institution of civil suits which led to a decline in the sale of stamps. Calcutta, the 24-Parganas, and Murshidabad, show an increase in the sales of non-judicial stamps, the other three districts showing a decrease. The improvement in Calcutta is due to the fact of certain mortgage deeds relating to properties situated in the mufassal having been executed in the vernacular. In the 24-Parganas the increase is attributed to the purchase by the proprietor of a newspaper of a large number of non-judicial stamps for binding himself to his subscribers to refund certain advances. In Murshidabad the execution of a larger number of deeds, specially interchange of pottahs and kabuliyats between some zamindars and their raiyats, led to the increase. The falling off in Nadia, Jessore, and Khulna is attributed by the Collectors to the fact that the cultivating classes were not obliged to borrow money, having reaped very good harvests during the year under report. There was a rise in the sale of receipt stamps in every district except the 24-Parganas. Everywhere the rule requiring receipts for sums exceeding Rs. 20 to be stamped with one anna receipt stamps is observed with far greater strictness than before. Cases of evasion are closely watched by the officers of the Income Tax Department and punished with heavy fines. The falling off in the 24-Parganas was due to ordinary fluctuation. The following statement shows the result of the action taken by Civil and Revenue Officers, and the prosecutions instituted for infringement of the Stamp Laws:—

Year.	Action taken by Civil Courts on unstamped or insufficiently stamped documents.		Action taken by Collectors on unstamped or insufficiently stamped documents.		Prosecutions instituted for infringement of the Stamp Laws.					Remarks.
	Number of cases.	Duty and penalty levied.	Number of cases.	Duty and penalty levied.	Number of cases.	Persons brought to trial.	Convicted.	Fines imposed.	Rewards paid.	
1	2	3	4	5	6	7	8	9	10	11
		Rs.		Rs.				Rs.	Rs.	
1893-94	178	1,532	474	6,334	73	72	60	755	265	
1894-95	186	2,010	467	8,610	387	287	238	1,685	981	
Increase ...	8	478	...	2,276	314	215	178	930	716	
Decrease ...	...	...	7	...	...	...	...	...	...	

There was an increase in the number of cases dealt with by Civil Courts, and a decrease in the number of cases in which action was taken by Collectors. In Calcutta there was a decrease of 41 cases, and the Collector explains that the number of unstamped and insufficiently stamped documents produced before him during the year was smaller than in the preceding year. Compared with the preceding year, the number of prosecutions increased everywhere except in Calcutta, where there were only 18 cases against 40 during the year. This is attributed by the Collector to less evasion of the law. In the other districts a large number of unstamped receipts, khata books, and hatchittas were impounded and the parties concerned were prosecuted. Many of these cases were pending when the year closed. The orders of Government as to liberal rewards in stamp cases have been borne in mind and are carried out by Collectors.

XXI.—INCOME TAX.

111. The table below shows the gross demand, remission, net demand, collection, and balance of income tax in the several districts of this Division, including Calcutta, during the year 1894-95:—

District.	Gross demand.	Remission.	Net demand.	Collection.	Balance.	Collection in the year 1893-94.	Difference between columns 5 and 7.				Remarks.
							Increase.	Decrease.	Percentage of increase.	Percentage of decrease.	
1	2	3	4	5	6	7	8	9	10	11	1
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	
24-Parganas ...	78,653	2,203	76,450	70,866	5,554	68,750	2,116	...	3·05	...	
Calcutta	20,15,120	53,848	19,61,272	18,99,075	62,197	17,70,462	1,28,613	...	7·3	...	
Nadia	51,426	363	51,063	50,767	296	48,778	1,989	...	4·08	...	
Murshidabad ...	63,867	3,111	60,746	60,177	569	56,483	3,694	...	6·5	...	
Jessore	43,062	1,350	41,712	41,045	667	41,102	...	57	..	1	
Khulna	34,536	596	33,940	33,587	353	31,070	2,517	...	8·1	...	
Total ...	22,86,654	61,471	22,25,183	21,55,517	69,666	20,16,645	1,38,872	...	6·8	...	

The gross demand amounted to Rs. 22,86,654 against Rs. 22,36,600 in the preceding year, showing an increase of Rs. 50,054, or 2·2 per cent. The increase occurred in all the districts except the 24-Parganas and Jessore, which showed a decrease of Rs. 3,033 and Rs. 1,080, respectively, as compared with the preceding year. In the remaining districts there was an increase of Rs. 54,167, as shown below:—

		Rs
Calcutta	... ...	46,307
Nadia	... ...	1,420
Murshidabad	... ...	6,137
Khulna	... ...	303
Total	...	54,167

The percentage of remission on the gross demand was 2·7 against 4 in the preceding year. The figures for each district as compared with the previous year are shown below:—

		1894-95.	1893-94.
24-Parganas	... ...	2·8	6 9
Calcutta	... ...	2·7	3·9
Nadia	... ...	·7	2·1
Murshidabad	... ...	4·9	1·8
Jessore	... ...	3·1	5·1
Khulna	... ...	1·7	5·3

The percentage was below five in every district. As compared with the previous year, the result shows some improvement in all the districts except Murshidabad. The increase in the percentage of exemption in Murshidabad was due to heavy remissions allowed on objection to three bankers, and to fluctuation in trade, especially in silk. The total number of objections filed during the year was 2,957 against 4,332 in the preceding year. The following table shows the percentage of objections to assessments in the several districts of this Division, compared with the previous year:—

		1894-95.	1893-94.
24-Parganas	... ...	7·6	17·4
Calcutta	... ...	8·	11·3
Nadia	... ...	8·9	10·3
Murshidabad	... ...	7·6	9·1
Jessore	... ...	14·5	14·7
Khulna	... ...	11·4	15·9

The percentage of objections to assessments was below 15 in every district. The percentage was highest in Jessore and lowest in the 24-Parganas and Murshidabad. The 24-Parganas shows considerable improvement in this respect, the percentage being 7·6 against 17·4 in the preceding year. The net demand on account of the tax stood at Rs. 22,25,183 against Rs. 21,47,183, showing an increase of Rs. 78,000, or 3·6 per cent. The increase occurred in all the

districts except Jessore, which showed a decrease of Rs. 152 as compared with the preceding year, but it occurred principally in Calcutta, where it amounted to Rs. 69,938. The increase was mainly due to the careful revisions of assessment in towns, municipalities and principal centres of trade. In Jessore the decrease in the final demand is said to be mainly under parts I and II. There was, however, in this district an increase in the final demand under part IV as compared with the preceding year. The Collector writes that a larger increase under this part could have been obtained, had it not been for depression in the sugar trade during the year under report. The percentage of collections on the final demand on account of tax only was 96·9 against 93·9 in the preceding year. The percentage in each district was as follows:—

	1894-95.	1893-94.
24-Parganas	92·7	90·5
Calcutta	96·8	93·6
Nadia	99·4	99·6
Murshidabad	99·06	99·6
Jessore	98·4	98·1
Khulna	99·0	95·8

The percentage was more than 95 in every district except the 24-Parganas, which also failed to come up to the prescribed standard of 95 per cent. in the two preceding years. The Collector of the 24-Parganas has furnished no explanation of the low percentage of collections in his district, but it is partly owing to heavy arrears under Part I, chiefly due from European employés of the local mills. The average incidence of the tax, excluding Calcutta, was Re. 1 to every 29 persons against 30 persons in the preceding year. In Calcutta the incidence was Re. 1 to every four persons, as in the previous year. During the year no special complaints were received regarding the working of the Act in this Division. As last year, I do not find that full and intelligent reports are given as to incomes upon reference from other districts, and Deputy Collectors are satisfied with very bald and insufficient information. It often happens that a firm makes its purchases in one district and sells in another, and yet Deputy Collectors are satisfied with a bald statement that the income of the branch firm is so and so, although the income cannot possibly be ascertained without a comparison of the transactions of both firms.

XXII.—MONETARY ARRANGEMENTS.

112. The following table shows the receipts and disbursements of the sub-divisional treasuries during the past two years:—

District.	Receipts.		Disbursements.	
	1893-94.	1894-95.	1893-94.	1894-95.
1	2	3	4	5
	Rs.	Rs.	Rs.	Rs.
24-Parganas	7,48,739	7,85,516	7,41,301	8,04,726
Nadia	8,60,220	10,02,066	8,70,933	10,06,480
Murshidabad	7,60,754	4,53,716	8,26,673	4,65,669
Jessore	6,23,897	7,03,962	6,29,635	6,95,383
Khulna	8,80,722	9,42,659	8,28,224	8,98,866
Total ...	38,74,332	38,87,859	38,99,766	38,71,074

The above shows that there was increase both in receipts and disbursements in all the districts except Murshidabad. The increase in the receipts in the 24-Parganas occurred at Baraset, where it was due to the transfer of the business of the two abolished sub treasuries at Barrackpore and Dum-Dum, and in Diamond Harbour, where it was due to better realizations of khas mahal rents. The apparent increase in disbursements was only owing to the remittance of money to the district treasury. In Nadia the increase in receipts is due to increased remittances from other districts, and that in disbursements is said

to be owing to increased payments to the Postal Department. In Jessore the increase took place in receipts from Civil Courts and post-offices, and is said to be due to the prosperous condition of the people during the year. The increase in disbursements is also attributed to the same cause. In Khulna the increase in the receipts is said to be due to increase in postal remittances, sale-proceeds of stamps, and receipts on account of the Wards' estate in the Satkhira suddivision. The apparent increase in disbursements is due to remittances to the Sadar treasury. As stated above, there was, on the other hand, a large falling off both in the receipts and disbursements in Murshidabad. The decrease is said to be due to smaller payments at Jungipur of supply bills and telegraphic orders of payments issued by the Accountant-General, in consequence of the principal trading firm there having ceased to draw money by these means during the year. The table below shows the working of the post-office savings banks in the districts of this Division as compared with the year preceding:—

Savings Banks.

District.	Amount deposited.		Amount withdrawn.	
	1893-94.	1894-95.	1893-94.	1894-95.
1	2	3	4	5
	Rs.	Rs.	Rs.	Rs.
24-Parganas	6,13,323	6,18,776	6,57,955	5,79,850
Nadia	3,45,300	4,92,301	2,60,514	3,74,455
Murshidabad	1,86,310	1,49,781	1,40,653	1,53,776
Jessore	2,01,670	2,20,138	1,67,595	1,92,726
Khulna	1,22,450	97,608	98,016	1,04,861
Total ...	14,69,053	15,78,604	13,24,733	14,05,668

It appears that in Nadia and Jessore there was an increase both in the amount deposited and the amount withdrawn. This is attributed to the fact that the people are becoming more and more familiar with the advantage and security afforded by the system. The 24-Parganas show an increase in the amount deposited and a decrease in the amount withdrawn. The increase is said to be due to the growing popularity of the system, and the decrease is attributed to the improved prosperity of the people during the year. In Murshidabad and Khulna the amount deposited shows a decrease, while there was an increase in the amount withdrawn. These fluctuations are said to be due to the reduction in the rate of interest introduced during the year, but it does not appear why these districts should have been specially affected by it. The following statement shows the amount of money-orders issued and paid in the districts of this Division during the past two years:—

Postal money-orders.

District.	Orders issued.		Orders paid.	
	1893-94.	1894-95.	1893-94.	1894-95.
1	2	3	4	5
	Rs.	Rs.	Rs.	Rs.
24-Parganas ...	31,92,744	32,55,272	25,92,296	26,64,537
Nadia ...	8,63,131	8 59,595	15,00,960	15,16,581
Murshidabad ...	8,50,505	8,53,603	Not furnished by the Postal Department.	
Jessore	7,78,924	7,87,189	9,38,463	10,33,742
Khulna	8,62,196	9,59,585	5,02,506	5,77,654
Total ...	65,47,500	67,15,244	55,34,225	57,92,514

The above shows that there was an increase both in the amount of money-orders issued and paid in the districts of the 24-Parganas, Jessore, and Khulna. The increase is attributed to better appreciation of the system by the public. The increase in the value of orders paid in Jessore is said to be also due to the increase in exports owing to good crops. In Nadia there was a decrease in the amount of orders issued, while the amount of orders paid shows an increase. The fluctuations are, however, slight, and do not call for any special remarks. In Murshidabad the amount for which orders were issued shows a slight increase, which the Collector of the district has not explained.

Currency notes.

The receipts and issues of currency notes in the districts of this Division during the past two years are shown in the table below:—

District.	1893-94.		1894-95.	
	Received.	Issued.	Received.	Issued.
1	2	3	4	5
	Rs.	Rs.	Rs.	Rs.
24-Parganas ...	29,20,260	28,11,400	26,27,785	26,64,275
Nadia ...	8,40,180	8,90,755	7,57,885	7,34,445
Murshidabad ...	12,30,395	12,88,990	12,24,480	10,89,000
Jessore ...	6,17,450	7,32,070	4,82,250	4,48,305
Khulna ...	3,57,990	4,03,025	3,89,345	3,42,175
Total ...	59,66,275	61,26,240	54,81,745	52,78,200

There was a decrease both in the receipts and issues of currency notes during the year in all the districts except Khulna. The Collector of the 24-Parganas has not been able to assign any satisfactory reason for the decrease in his district. Out of the currency notes issued from the treasury in this district, Rs. 5,00,000 worth of notes were remitted to the Reserve Treasury, Rs. 6,41,950 to the Bank of Bengal, and Rs. 15,22,325 paid to the public. The decrease in Nadia is not explained. Of the total value of currency notes issued from this district, Rs. 2,23,015 was remitted to the Reserve Treasury, and the balance, Rs. 5,11,430, was paid to the public. The decrease in receipts in Murshidabad is said to be too small to require any explanation. The decrease in the issues is attributed to the fact that under special instructions from the Accountant-General, Bengal, no remittance of surplus notes was made at the latter part of March 1895. The prohibition of the Accountant-General of the encashment of notes for facilitating the payment of supply bills and telegraphic orders of payment, was also in force in this district throughout the year. The decrease in the district of Jessore is said to be chiefly due to the popularity of the postal money-order system. In Khulna there was an increase in the receipts of currency notes during the year, chiefly from private parties in lieu of coin. The issues, on the other hand, show a decrease which is attributed to the popularity of the postal money-order system.

Copper coins.

Copper coins were freely supplied to the public throughout the year in all the districts of this Division.

XXIII.—RAILWAYS AND OTHER PUBLIC WORKS.

113. *Railways.*—In the 24-Parganas there are 124¾ miles of the Eastern Bengal State Railway, including branches to Budge-Budge, Canning and Diamond Harbour. A proposal to construct a steam tramway from Barasat to Basirhat is under consideration of the District Board. In Nadia a scheme for the construction of a steam tramway from Ranaghat to Krishnagar *viâ* Santipur was sanctioned by Government in March 1894. The terms of the

agreement between the District Board and the Company who have undertaken the work have been practically settled, and it is hoped that the work will have made some progress before the close of the current year. It is not proposed to bridge the river Churni at first, but if the line pays the contractors say they will probably do so. Even without the bridge, the line will be convenient for Krishnagar, the head-quarters station of the district, and for Santipur, which is a place of pilgrimage, and the District Board will be saved a considerable proportion of its very heavy annual outlay on the Krishnagar-Bagula and Krishnagar-Santipur-Ranaghat roads. In Murshidabad the only railway runs from Azimganj to Nalhati. There are four stations of the line in this district, viz., Azimganj, Barola, Sagardighi and Bokhara. The line is now on the broad gauge, and is worked by the East Indian Railway Company. Land has been acquired for an extension of river-side sidings of the Azimganj station, and for staff quarters at Raipur. There are two other stations on the loop line of the East Indian Railway, both just outside the border, but which serve this district, viz., one at Muraroi, about 16 miles west of Jangipur, and another at Synthia, about 24 miles from Kandi. No new railways were constructed in Jessore or Khulna during the year. The portions of the Bengal Central Railway which pass through these districts were maintained.

114. *Embankments, Drainage, Sluices, &c.*—In the 24-Parganas a sum of Rs. 25,291 was spent in maintaining 216¾ miles of schedule D and 2 miles 1,320 feet of takavi embankments, against Rs. 35,615 in the previous year. These are reported to be efficiently maintained. Rs. 4,959 was spent for construction of retired lines of embankments. There are 65 irrigation and drainage sluices, against 68 of last year. Of these 47 are maintained by Government, 4 by the Calcutta Corporation, and 14 by the zamindars and raiyats concerned. All the sluices are reported to be in good working order. The Churial khal drainage works, as reported last year, effected the drainage of 134 villages, covering an area of nearly 31 square miles. It has been proposed during the year to construct sluices at Satpukur, Kulpi, Bindol, Tellary, Tongrabichi and Allumpur, for improving drainage. During the year 19 cuts were allowed in different places in the embankments, of which 18 were for drainage and one for irrigation purposes. Besides, four surreptitious cuts were made in the embankments, but the offenders were not detected. I have suggested to the Magistrate the appointment of special constables to guard against a repetition of this. Rupees 938 were spent in clearing and removing the silt and other obstructions from the Soonti nadi from Jagatighata to Digra in the Barasat subdivision. In Murshidabad every effort was made by the Public Works Department to keep the Bhagirathi embankment in proper order when threatened at Lalitakuri during the high floods this year. Protective spurs were also erected to preserve the channel of the Bhagirathi. Rupees 49 were spent in improving the Kaliganj cut, which flushes and drains the Kasimbazar bhil, and Rs. 578 in maintaining two drainage channels or cuts 8½ miles in length. In Jessore a channel was cut in the bed of the Alumkhali khal at a cost of Rs. 105. The Muchikhali khal has been deepened at its mouth at a cost of Rs. 200. A protective bund has been constructed at Magura along the right bank of the Navaganga at a cost of Rs. 103. No irrigation or drainage works were constructed in Nadia or Khulna during the year.

115. *Buildings.*—In the 24-Parganas no building of any importance was constructed by Government or the District Board during the year. In Nadia Rs. 2,521 were spent by the District Board on the construction and improvement of inspection bungalows and Rs. 1,121 in repairing dâk and inspection bungalows and Local Boards' office buildings. In Murshidabad, Rs. 600 were spent in erecting a staging bungalow. In Jessore, Rs. 697 were spent on the reconstruction of an inspection bungalow at Kaliganj, Rs. 3,327 on the construction of a roof for the Jessore dâk-bungalow, Rs. 353 on the construction of a verandah with corrugated iron roof to the Judge's court-room, and Rs. 318 in erecting a building for in-door female patients at the Magura charitable dispensary. The Imperial and Provincial buildings were repaired at a cost of Rs. [illegible], and the District Board inspection bungalow, Local Board's office, &c., at Rs. 2,083. In Khulna a residence for the Commissioner of the Sundarbans was completed during the year by the Public Works Department, but is not required. The District Board spent Rs. 298 for the

construction of a rest-house at Kooliaghat, and Rs. 210 for a latrine at Bagerhat.

116. *Sanitation and Water-Supply.*—In the 24-Parganas sanitary arrangements during the *mélas* at Saugor and Harwa were carried out under the supervision of the District Engineer. The cost of the former was defrayed by the local zamindars, and that of the latter partly by the District Board and partly by the proprietors of the land. Rupees 1,673 were spent in the re-excavation of two tanks. In Nadia Rs. 3,831 were spent by the Board on the construction of 11 masonry wells. In Murshidabad Rs. 2,620 were spent in constructing eight masonry wells and five wells with baked earthen rings and Rs. 90 in repairing eight wells. The District Board of Jessore completed the excavation of four tanks at a cost of Rs. 3,359. In Khulna Rs. 2,004 were spent by the District Board in the excavation of a tank at Senhati, and Rs. 397 in the re-excavation of a tank at Kesra. The District Boards and Municipalities are now paying some attention to the improvement of the supply of drinking water. The villagers, however, have shown no readiness to co-operate in the work. If they would supply a certain amount of labour, the Boards might greatly extend their operations by a system of grants-in-aid, but at present enormous rates are paid for de-watering and excavation, and the profits go to contractors and paid labourers, which is disheartening. It might have been hoped that native members of district and Local Boards could have effected some improvement in this, but they appear to do nothing.

XXIV.—COMMUNICATIONS (LAND).

117. In the 24-Parganas 85⅓ miles of Provincial roads were maintained at a cost of Rs. 67,764. The average expenditure per mile was Rs. 798, against Rs. 774 in the previous year. With the exception of some portion of the Calcutta-Jessore road, the roads are reported to be in very fair order. The maintenance of 141½ miles of district metalled and bridged roads cost the Board Rs. 68,540 or Rs. 484 per mile, against Rs. 472 in the previous year. The average expenditure per mile is considered very low, but the roads have been kept in fair order throughout the year. A sum of Rs. 14,670 was spent in maintaining 254¾ miles of unmetalled and bridged roads and 59 miles of unmetalled roads with temporary bridges, showing an average expenditure of Rs. 47 per mile, against Rs. 50 in the previous year. These roads being under the direct management of the Local Boards are not maintained in a satisfactory condition, although the expenditure per mile is high. There are 992½ miles of village roads under the Local Boards, and a sum of Rs. 14,150 was spent for their repairs, against Rs. 15,959 in the previous year, at an average cost of Rs. 14 per mile. Rupees 18,049 were spent by the District Board in the construction of roads, bridges and culverts, and in metalling the road from Barasat to Barrackpore, which cost Rs. 9,830. An expenditure of Rs. 671 was incurred in repairing the platforms of ferry ghâts. In Nadia there were 119·71 miles of metalled roads and 493 miles of unmetalled roads. The total expenditure on the district roads amounted to Rs. 52,677, against Rs. 42,170 in the previous year. There were 526 miles of village roads under the Local Boards. The expenditure on these roads amounted to Rs. 4,292 against Rs. 2,259 in the previous year. Mr. Garrett writes:—"The flood was severe and exceptional, and it did damage to many of the roads of the Sadar and Kushtia subdivisions. The absence of rain in the latter half of the year increased the wear and tear of metalled roads very considerably, and interfered also with the repairs of the unmetalled roads to a great extent." Rupees 6,594 were spent by the District Board in the construction of new roads, culverts and bridges, and Rs. 358 on the repairs and improvements of approaches to Government and District Board ferries. In Murshidabad there were 544½ miles of district roads. The expenditure incurred on the maintenance of 24 miles of bridged and metalled roads was Rs. 9,391; that on 213 miles of unmetalled but bridged roads was Rs. 10,426; on 101½ miles of unmetalled roads with temporary bridges Rs. 4,405; and on 206 miles of low level roads Rs. 9,156. Out of 1,152 miles of village roads, 535 miles were repaired at a cost of Rs. 8,639. A sum of Rs. 25,082 was spent in raising and improving roads, constructing two causeways and six culverts, widening the roadway over

two girder bridges on the cart road alongside the Nalhati State Railway, and manufacturing bricks for bridging the Patkabari road. Rupees 710 were also spent in building a pair of *mar* boats for a ferry, and Rs. 1,121 on village roads. In Jessore there were altogether 41 miles of Provincial roads, 488 miles of district roads, and 438 miles of village roads. Of these, the Jessore-Calcutta Provincial road was maintained at a cost of Rs. 17,558. Rupees 27,178 were spent in the maintenance and repairs of 104 miles of district, metalled and bridged roads, Rs. 7,705 on 267 miles of unmetalled but bridged roads, Rs. 1,350 on 74 miles of unmetalled roads with temporary bridges, and Rs. 4,464 on 180 miles of village roads. Rupees 11,076 were spent in the construction of district roads, bridges and culverts, Rs. 1,360 in the construction of 4¼ miles of village roads, &c., and Rs. 282 in that of tow-paths. In Khulna there were 410 miles of district and 562 miles of village roads, maintained at a cost of Rs. 23,667 and Rs. 9,597 respectively. Rupees 2,597 were spent in constructing new roads, Rs. 2,074 in metalling, and Rs. 15,815 in bridging, principally with light iron structures.

Mr. A. Hayes, the Inspector of Works, who has made extensive and valuable inspections during the year, remarks that the Provincial and district roads both in the 24-Parganas and Jessore are generally in good order, and that the allotments made for their maintenance appear to have been judiciously expended, and that the roads in Murshidabad are also in fair order. With regard to the roads in Nadia, he observes that they are generally neglected for want of funds, and that until the District Board can make some financial arrangements to maintain them in decent order, it is a wrong policy to extend their mileage by construction of new roads. From what Mr. Hayes saw of the district roads in Khulna, they seemed to him to have received the District Engineer's full attention. Road work is now conducted much more expensively than when it was under the direct management of the Magistrates, and I think less efficiently. Far more is spent on establishments, and far higher rates are paid for labour and material, but the roads are not in such good condition as they used to be. Those in Jessore and the 24-Parganas are the best, the District Engineers in those two districts being men of great personal energy. The work in Nadia is very poor, and the Board might have a better engineer than they have. The funds at the disposal of the Boards for the maintenance of metalled roads, especially feeders to railways, are inadequate at the present greatly enhanced rates of expenditure, and are more and more contracted as demands are made on the Boards for water-supply, drainage and medical relief. Most of the Boards, in addition to what they rightly spend on primary education, spend money on higher education, which they cannot afford, and which is for the benefit of a class which can very well afford to pay for it. I hope such expenditure will be materially decreased in future. I cannot advocate the raising of loans for maintenance of roads, but I think there are permanent improvements, among which may perhaps be reckoned the substitution of stone for brick metal, where the wear and tear is very great, for which the Boards would be justified in borrowing money. The cry everywhere is for more money, but I cannot but observe that if the Magistrates of a quarter of a century ago had had such funds at their disposal as the District Boards have at present, there would be much more to show for them than there is now.

Arboriculture.

118. In the 24-Parganas 965 trees were planted during the year, and existing trees were preserved. There were about 16,400 trees along the Provincial and district roads. In Nadia, Rs. 878 were spent on arboriculture, against Rs. 860 of the previous year. Altogether 884 young indigenous fruit-bearing trees were planted out on the roads. Of these trees, 112 died, and out of 2,247 seedlings in the nurseries, 89 died from heat and 340 were destroyed by the last flood. Most of the young trees which were planted out in foregoing years are doing well. In Murshidabad Rs. 203 were spent in planting and rearing mango trees. One thousand five hundred guango trees were planted out on the roads in Jessore, at a total cost of Rs. 1,332, including maintenance of existing trees. In Khulna nothing was spent during the year on trees.

Communication (water).

119. In the 24-Parganas the circular canals (ten miles in length) and Tolly's Nulla including Kawrapuker Khal (37 miles) were maintained at a cost of Rs. 42,872

against Rs. 42,838 in 1893-94, while the gross revenue from tolls on these two canals was Rs. 4,28,772 against Rs. 4,07,471. The Sunderbun channels yielded a gross income of Rs. 6,925 from tolls against Rs. 5,495 in the previous year. There are also two khals (17 miles) in this district. That between Magra hât railway station and Joynagar is navigable all the year round, and is in fair condition. No expenditure was incurred on it during the year. The Sorisa khal is navigable only in the rains, and Rs. 238 only were spent on it. In Murshidabad Messrs. Hoare, Miller and Company ran a steamer twice daily for nearly the whole of the year between Berhampore and Azimganj. The East Indian Railway steamer which plied between Azimganj and Berhampore, and also between Azimganj and Dhulian, ceased coming to Berhampore during the dry season. Messrs. Hoare, Miller and Company also ran a steamer between Calcutta and Jeaganj during the whole of the year. In Jessore a steamer belonging to the Bengal Flotilla Company runs between Nawapara and Benodepur, reaching as far as Magura during the rains. Another belonging to Rai Dhunput Singh, plies between Jhinkergachi and Kapilmani. The steamer which used to run between Chandpur and Jhinkergachi has ceased to work for hire, and only carries goods from Tarpur factory to Jhinkergachi and back. In Khulna there is a steamer service for a distance of 35 miles between Khulna and Bangaon, and between Jhinkergachi and Kapilmani along the Kabadak, passing through a portion of this district.

XXV.—WORKING OF THE LODGING-HOUSE ACT.

120. As reported in the previous year, the Lodging-House Act is in force only in the town of Navadwipa in the district of Nadia, and its provisions were not extended to any other town during the year under review. At the introduction of the Act, on the 1st November 1891, the working of it was placed in the hands of the Municipal Commissioners of the town. But the present Municipal Board, which came into existence in the beginning of 1894, proved obstructive, and it was found necessary to transfer the working of the Act from their hands to those of a Committee, presided over by the District Magistrate, with effect from 1st April 1894. It has since worked more smoothly, though some of the Municipal Commissioners still throw difficulties in the way of the Committee. The annexed statement shows the working of the Act during the year.

Statement showing the working of the Lodging-House Act during 1894-95 in the town of Nadia.

Name of place where Act is in force.	Licensed Lodging-houses.		Prosecutions.						Income.									Expenditure.													Remarks.
							Amount of fines—												Head office expenditure.		Local expenditure.										
	Number.	Number of lodgers for whom accommodation is provided.	Number of cases disposed of.	Number of persons accused.	Number of persons convicted.	Number of persons acquitted.	Imposed.	Realised.	Opening balance.	Fees for licensing and regulating lodging-houses.	Fees for issue of Health Officer's certificate.	Other fees (if any).	Fines.	Contribution from other funds.	Miscellaneous.	Total (excluding opening balance).	Total (including opening balance).	Health Officer's pay and allowance.	Establishment.	Contingencies.	Establishment, &c.	Dispensaries, &c.	Conservancy.	Construction. It will be seen that the number of licenses and that of lodgers under the Act are steadily increasing year after year. The rate of fee levied on every lodger for whom accommodation is provided was at first fixed at 8 annas, which, as I remarked in my General Administration Report for 1892-93, was too high to suit the circumstances of the place. During the following year the fee was reduced to 4 annas, and was levied during the year under review at this reduced rate. The total amount collected from this source was Rs. 739 against Rs. 706 in 1893-94, Rs. 660-8 in 1892-93, and Rs. 238 in 1891-92. The income during the year from fees for the issue of the Health Officer's

certificate was Rs. 132 against Rs. 50 in 1893-94. The income continues to increase satisfactorily. The total expenditure during the year was Rs. 332 against Rs. 1,231 in 1893-94, Rs. 723 in 1892-93, and Rs. 140 in 1891-92. There was a cash balance of Rs. 632 on 31st March 1895, against a deficit of Rs. 406 on 31st March 1894, which was met from the municipal fund. Mr. Garrett, Officiating Collector of Nadia, observes that the expenditure of Rs. 1,231 in 1893-94 includes items which should have been more properly credited to municipal accounts than to lodging-house funds. For want of funds no properly qualified Health Officer has yet been appointed, a Civil Hospital Assistant, on a pay of Rs. 15, at present doing the work. The opposition with which the introduction of the Act was met by the principal *mohunts* was partially removed by the successful prosecution of one of them under the Act, the conviction being fortunately upheld by the High Court. During the year under review this man took out a license, and it is expected that others will follow his example. These mohunts are really the lodging-house keepers, and if they had succeeded in evading the tax, the law would have been a dead letter. There were 12 prosecutions under the Act, involving 13 persons, during the year under report, against one in 1893-94 and none in 1892-93. Of these, four were convicted and nine acquitted. The amount of fine realised during the year was Rs. 125-8. The Lodging-house Committee would have been more successful in their work had they been supported by the Municipal Commissioners, some of whom at least are said to be decidedly opposed to it. Under the orders of the Accountant-General, Bengal, a new fund has been created, and accounts opened with the local treasury direct.

XXVI.—EDUCATION—GENERAL.

121. The following table summarises the statistics of educational institutions of all classes for the past two years :—

Class of Institutions.	1893-94.		1894-95.	
	Schools.	Pupils.	Schools.	Pupils.
Public Instruction—				
Secondary ... High English ...	77	12,654	77	12,792
Secondary ... Midle „ ..	161	11,708	165	12,388
Secondary ... „ vernacular ...	223	12,870	222	13,402
Primary ... Upper	514	19,855	515	20,930
Primary ... Lower	4,089	117,467	4,406	127,070
Special, including madrasas	75	609	69	620

Private Institutions—				
1. Advanced teaching—				
(a) Arabic or Persian	2	25	1	25
(b) Sanskrit	69	700	75	797
2. Elementary teaching—				
Vernacular only or mainly	17	166	4	33
3. Teaching the Koran only	2	21	2	24
Total Private Institutions ...	90	912	82	879
Grand Total ...	5,625	186,164	5,979	199,192

The total number of institutions, public and private, has increased by 354, and the pupils by 13,028. All classes of schools have increased in number except high English, middle vernacular, and special schools, but in all classes the number of pupils has increased. The number of female schools increased by 47 and their pupils by 842. *Tols* for teaching Sanskrit increased by six and their pupils by 97. The Division comprises an area of 12,052 square miles, with a population of 7,853,566 according to the census of 1891, of whom 3,956,405 are males and 3,897,161 females. The number of schools returned being 5,979, there was on the average one school for every 2·01 square miles. Estimated at

the usual rate of 15 per cent, of the population, the number of male children of school-going age would be 593,460 and of female children 584,574. The number of pupils actually at school was 184,129 boys and 15,063 girls, or 30·9 and 2·4 per cent., respectively, of all boys and girls of a school-going age. The following table compares the expenditure on education during the past two years:—

HEADS OF CHARGES.	1893-94.					1894-95.				
	Government.	District fund.	Municipal fund.	Private sources.	Total.	Government.	District fund.	Municipal fund.	Private sources.	Total.
1	2	3	4	5	6		8	9	10	11
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.

Female ditto	11,632	4,331	1,895	38,346	56,204	12,310	5,4[illegible]7	2,278	37,695	57,750
Special ditto	23,456	...	360	17,184	41,002	24,115	396	327	17,060	41,898
Scholarships	9,481	2,538	...	284	12,303	9,092	2,594	...	202	11,888
Buildings	3,641	797	210	784	5,432	2,121	1,178	145	4,045	7,489
Furniture and apparatus ...	272	685	120	63	1,140	327	4[illegible]5	158	266	1,176
Miscellaneous	10,848	6,370	710	9,989	27,917	8,972	8,113	732	10,802	28,619
Superintendence	34,052	30,434	...	...	64,486	36,353	30,425	...	...	66,778
Total ...	1,77,431	1,50,742	15,068	6,40,440	9,83,081	1,80,065	1,61,516	18,665	6,03,106	10,23,352

The figures show increased expenditure under all heads. Expenditure from Provincial revenues increased by Rs. 2,634, from District Funds by Rs. 10,774, from Municipal Funds by Rs. 3,597, and from private sources by Rs. 22,666, the total increase aggregating Rs. 39,671. The Government expenditure has slightly increased under the heads of secondary, female and special education and superintendence, but has decreased under those of primary education, scholarships and buildings. The decrease of Government expenditure on primary education is due to an increased share of financial responsibilities having been thrown upon District and Municipal Boards in respect of such education. The increase in the expenditure of public money on higher education, accompanied by a falling off in fees, is unsatisfactory, but I am glad to observe increased expenditure on primary education accompanied by an increase in the amount of fees. The following table compares the different classes of schools under the control of each District Board for the past two years:—

DISTRICT.	SCHOOLS.													
	1893-94.							1894-95.						
	Aided.	Middle vernacular.		Aided primary.				Aided.	Middle vernacular.		Aided primary.			
	Middle English.	Managed by District Board.	Aided by District Board.	Upper.	Lower.*	Aided girls'.	Total.	Middle English.	Managed by District Board.	Aided by District Board.	Upper.	Lower.	Aided girls'.	Total.
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
24-Parganas	16	3	32	65	889	14	1,019	18	3	30	73	971	15	1,110
Nadia	30	3	12	59	376	52	532	30	3	12	64	513	74	696
Murshidabad ...	15	...	13	47	471	9	555	14	...	14	45	500	11	584
Jessore	21	3	23	105	541	84	782	20	2	29	104	593	116	864
Khulna	18	2	31	82	767	28	928	20	2	28	76	902	34	1,062
Total ...	100	11	116	358	3,044	187	3,816	102	10	113	362	3,479	250	4,316

The schools under the control of District Boards have increased in all districts, viz., in the 24-Parganas by 91, in Nadia by 164, in Murshidabad by 29, in Jessore by 82, and in Khulna by 134. It is satisfactory to see that the increase has for the most part taken place in primary schools for boys and in girls' schools. The number of lower primary schools increased by 435, viz. by 82 in the 24-Parganas, by 137 in Nadia, by 29 in Murshidabad, by 52 in

Jessore, and by 135 in Khulna. The number of female schools has risen in all districts, the total increase in the Division being 63. The relations between the District Boards and the Education Department continued satisfactory during the year. The 24-Parganas and Khulna District Boards have not vested their Local Boards with any educational functions. The Nadia, Jessore, and Murshidabad Local Boards have powers which do not go beyond issuing cheques on bills for primary schools presented by Sub-Inspectors, but are dilatory even in this, the result being that charges due to one year fall into the next year's account. The Local Boards appear to be as useless in this as in everything else. Since the close of the year 25 Government Sub-Inspectors for the non-board areas in this Division have been placed under the supervision of District Boards.

University education.

There are three colleges sending up pupils for examination in arts in this Division—the Krishnagar College in Nadia, the Berhampore College in Murshidabad, and the Narail Victoria College in Jessore. The Krishnagar College is still maintained from provincial revenues, although Government has certified its intention of withdrawing from its management altogether. Funds are being raised privately for its maintenance. A sum of Rs. 20,283 was spent in maintaining the College during the year. The Berhampore College is under private management and is maintained by Maharani Sarnamoyee. A sum of Rs. 15,005 was spent during the year in its maintenance against Rs. 14,945 in 1893-94. An expenditure of Rs. 4,469 was incurred in maintaining the Narail Victoria College, of which Rs. 1,200 were paid from provincial funds, and the rest was met from private subscriptions and endowments.

Secondary education.

The following table shows the comparative statistics of higher English, middle English and middle vernacular schools for the past two years:—

	1893-94.		1894-95.	
	Schools.	Pupils.	Schools.	Pupils.
High English—				
Managed by Government	7	1,680	7	1,719
Do. by District or Municipal Board ..	1	335	1	300
Aided by Government, District, or Municipal Board	52	7,685	55	8,441
Unaided	17	2,954	14	2,512
Total ..	77	12,654	77	12,972
Middle English—				
Managed by Government	...	...	...	...
Do. by District or Municipal Board ...	...	...	...	...
Aided by Government, District, or Municipal Board	124	9,258	126	9,589
Unaided	37	2,450	39	2,799
Total ...	161	11,708	165	12,388
Middle Vernacular—				
Managed by Government ...	1	97	1	95
Do. by District or Municipal Board ...	12	651	11	710
Aided by Government, District, or Municipal Board	189	10,772	189	11,188
Unaided	21	1,350	21	1,409
Total ...	223	12,870	222	13,402

Primary education.

The following statement shows the statistics of primary schools for Native boys for the last two years:—

	Upper primary.				Lower primary.			
	1893-94.		1894-95.		1893-94.		1894-95.	
	Schools.	Pupils.	Schools.	Pupils.	Schools.	Pupils.	Schools.	Pupils.
Managed by Government, District, or Municipal Boards ...	...	...	...	...	...	...	...	...
Aided by Government, District or Municipal Boards ...	493	19,081	497	20,280	3,407	100,635	3,877	114,640
Unaided	21	774	18	650	682	16,832	529	12,430
Total ...	514	19,855	515	20,930	4,089	117,467	4,406	127,070

The increase in the number of boys has been shared by all the districts. The decrease in the number of unaided schools with their pupils is due to some of them having received aid from District or Municipal Boards during the year.

In the 24-Parganas the stipendiary system has been abolished by the District Board, and all schools, whether upper or lower primary, have been brought under the system of payment-by-results. The upper primary schools in Nadia, Jessore and Khulna are still mostly stipendiary, while the lower primary schools are paid by results. In Murshidabad the combined system of payment obtains in both classes of schools, small stipends being supplemented by rewards on the results of annual examinations. The following table shows the attendance and expenditure in upper and lower primary schools for the past two years. The average daily attendance has increased, the expenditure from District and Municipal Funds has increased, and it is satisfactory to see that the income from fees has increased at the same time:—

	Upper Primary.		Lower Primary.	
	1893-94.	1894-95.	1893-94.	1894-95.
(1) Number of schools	514	515	4,089	4,406
(2) Number of pupils on 31st March ...	19,865	20,930	117,467	127,070
(3) Average number of the rolls monthly ...	19,346	19,704	108,588	115,698
(4) Average daily attendance	14,395	14,987	85,387	92,027
	Rs.	Rs.	Rs.	Rs.
(5) Expenditure by Government ...	8,307	7,427	5,356	5,607
(6) Expenditure by District Boards ...	15,587	15,808	45,619	52,601
(7) Ditto by municipalities ...	2,349	2,917	6,023	8,471
(8) Ditto from fees, &c. ...	28,742	29,878	1,59,774	1,64,731
(9) Ditto from other sources ...	9,367	9,663	20,655	26,792

Special instruction.

The following table gives the different classes of special schools in the last two years. Although the number of special schools is smaller, the number of pupils in them has increased. There are two technical schools under the management of District Boards, one in the 24-Parganas and the other in Murshidabad:—

	1893-94.		1894-95.	
	Schools.	Pupils.	Schools.	Pupils.
Training schools	5	167	5	187
Guru-training classes	66	305	60	306
Industrial schools	2	78	2	64
Other schools	1	4	1	8
Total	74	554	68	565

Female education.

The following comparative table shows the total number of girls' schools and pupils, as well as the expenditure incurred for the past two years. The increase in the number of girls is satisfactory:—

	1893-94.			1894-95.		
	Schools.	Pupils.	Expenditure. Rs.	Schools.	Pupils.	Expenditure. Rs.
Girls' schools—						
Managed by District or Municipal Boards.	...	...	...	1	28	160
Aided by Government or District or Municipal Boards.	321	8,570	50,199	393	9,904	53,326
Unaided	75	1,519	6,005	49	999	4,264
Girls in boys' schools ...	...	4,061	...	...	4,416	...
TOTAL ...	396	14,150	56,204	443	15,347	57,750

Muhammadan education.

The following table gives the number of Muhammadan pupils and their percentage to the total number of pupils in the different classes of schools for the past two years. It is satisfactory to note that there has been an increase of 4,337 Muhammadan pupils during the year under review. The increase took place in secondary, lower primary, female and Koran schools, the greatest increase being in Jessore:—

Class.	1893-94.			1894-95.		
	Total number of pupils.	Number of Muhammadan pupils.	Percentage of Muhammadan pupils to total number of pupils.	Total number of pupils.	Number of Muhammadan pupils.	Percentage of Muhammadan pupils to total number of pupils.

Khulna	5	13	15	7	12	29
Total ...	39	68	242	61	57	406

At the last University Entrance Examination, nine Muhammadans were successful, viz. one from the 24-Parganas, two from Nadia, two from Murshidabad, one from Jessore, and three from Khulna.

There are no aboriginal races in this Division.

Indigenous education.

The statistics of indigenous schools of all classes are compared in the following table, district by district:—

District.	Year.	Arabic or Persian.		Sanskrit.		Elementary.		Koran.	
		Schools.	Pupils.	Schools.	Pupils.	Schools.	Pupils.	Schools.	Pupils.
1	2	3	4	5	6	7	8	9	10

Khulna	1893-94	...	...	3	80	...	...	...	...
	1894-95	...	...	2	51	...	...	...	...
Total ...	1893-94	2	25	69	700	17	166	2	21
	1894-95	1	25	75	797	4	33	2	24

At the Bidagdhajanani Sabha examination held in 1894, 75 candidates appeared from the local *tols*, of whom 21 passed.

XXVII.—DISPENSARIES.

122. The number of dispensaries in the Division was 52, against 49 in the previous year. The increase is due to the opening of dispensaries at Kulpi in the 24-Parganas and at Bangaon and Nowhatta in Jessore. In the 24-Parganas there were 22 dispensaries against 21 in 1893, of which seven received both in-door and out-door patients, and others out-door patients only. The important hospital and dispensary at Kamarhati, supported by the estate of the late Babu Sagor Dutt, has been doing good work during the year, and the female ward continues to be well managed and successful. Next

in importance are the Cossipur and Rassa dispensaries, which are well provided with funds. The South Suburban Hospital and the Barasat and Diamond Harbour dispensaries are also reported to be doing well. A proposal has been set on foot to open a separate female ward at the North Suburban Hospital. The best among the out-door dispensaries are those at Chetla, Naihati and Halisahar. These are all located in good buildings, and are well provided with the necessary equipments. The total number of in-door and out-door patients treated at all the dispensaries in the district during the year was 2,098 and 111,404 respectively, against 2,013 and 98,695 in 1893, the daily average number of patients being 89·41 and 878·54, against 88·85 and 857·93 in the previous year. The dispensaries received Rs. 13,354 from municipalities, Rs. 3,127 from the District Board, Rs. 4,047 from Government, and Rs. 22,574 from private subscriptions, endowments, &c. The total expenditure was Rs. 41,355. The following table shows the working of the lunatic asylums at Dullanda and Bhawanipur, the Campbell Hospital at Sealdah, and the Police Case Hospital at Alipore:—

Names of Institutions.	Average number of patients daily treated in—		Cost incurred by Government in—	
	1893.	1894.	1893.	1894.
1	2	3	4	5
			Rs.	Rs.
Bhawanipore Lunatic Asylum ...	37	40	20,474	21,567
Dullanda ditto ...	247	223·05	26,770	31,112
Campbell Hospital ...	685	662·59	53,402	77,306
Alipore Police Hospital ...	36·07	32·04	1,700	1,739

The Calcutta Municipality continues to subscribe Rs. 30,000 a year towards the expenses of the Campbell Hospital. In Nadia there were nine dispensaries under Government supervision during the year, of which those at Krishnagar, Ranaghat, Meherpur and Kushtea treated both in-door and out-door patients, the others affording out-door relief only. Accommodation for in-door patients will shortly be provided at Chagdah. The total number of in-door patients treated at all the dispensaries during the year was 699, and that of out-door patients 45,071, against 508 and 38,998 in 1893. The total income of the dispensaries was Rs. 8,230 from Municipalities, Rs. 640 from the District Board, Rs. 573 from Government, and Rs. 1,039 from private subscriptions. Rupees 10,462 were expended during the year. There are five dispensaries in the district under private management. Dispensaries at Krishnagar and Sikarpur are supported by missionaries, one at Natudah by Babu Nafar Chandra Pal Chowdhury, one at Meherpur by the Mullick family, and the dispensary at Ranaghat by Mr. J. Monro, C.B. The last mentioned dispensary has already done, and is doing, an incalculable amount of good. Patients flock to it from all round, and the daily average attendance is now about 600, or ten times that of an ordinary mufassal dispensary under native management. I find it difficult to account for this. There must be something radically wrong in the administration of the latter which I cannot at present explain. It may possibly be due to the private practice of the native doctors. In Murshidabad, there were eight dispensaries, six of which received both in-door and out-door patients and two out-door patients only. The most important of them is the Kandi Grish Chandra Hospital. In the Female Hospital established by Srimati Arna Kali Debi at Berhampore, the number of patients treated in 1893 was one (in-door) and 2,698 (out-door), and 15 (in-door) and 2,291 (out-door) in the year under report. The result is not very encouraging. The total number of in-door and out-door patients treated at all the dispensaries was 1,297 and 52,440 respectively, against 1,212 and 51,143 in the preceding year. The total

income of the dispensaries was Rs. 21,092, viz. Rs. 8,704 from Municipalities, Rs. 992 from the District Board, Rs. 112 from Government, and Rs. 11,284 from private subscriptions and endowments. The whole of the amount was expended during the year. In Jessore there were eight dispensaries against six in the previous year. Those at Jessore, Magura, and Narail received both in-door and out-door patients, and the rest out-door patients only. The total number of in-door and out-door patients treated at all the dispensaries during the year was 310 and 29,659 respectively, against 242 and 28,315 in 1893. The total income of the dispensaries in the district was Rs. 8,644, of which Rs. 7,767 were expended during the year. The dispensaries at Jessore and Kotechandpur received grants from the local municipalities amounting to Rs. 1,567 and Rs. 933 respectively. The District Board grant to all the dispensaries was Rs. 3,017, the Governmant grant Rs. 487, and receipts from private subscriptions, &c., were Rs 2,640. Mr. MacLeod, Chairman of the Kotechandpur Municipality, has added two rooms to the dispensary building at his own expense for the accommodation of in-door patients. In the Jessore dispensary a separate female ward is at last under construction. Besides the above, there is a dispensary for out-door patients only at Bunagati, maintained at the expense of the Dighapatia Raj. In Khulna there are five dispensaries under Government supervision, of which those at Khulna and Satkhira receive both in-door and out-door patients, and the rest out-door patients only. The total number of in-door and out-door patients treated at all the dispensaries in the district was 164 and 23,249 respectively, against 117 and 16,732 in 1893. The total income of the dispensaries was Rs. 4,562 only during the year, viz., Rs. 2,299 from Municipal grant, Rs. 955 from District Board grant, Rs. 718 from Government, and Rs. 590 from private subscriptions. The total expenditure incurred in maintaining the dispensaries during the year was Rs. 5,321. There are also three dispensaries under private management, one at Sripur maintained by the local Hitasadhini Sabha, one at Nakipur by Babu Hari Charan Chowdhuri, a local zamindar, and one at Morrelganj by Maharaja Durga Charan Law. The contributions to dispensaries made by District Boards are shown in the following statement:—

DISTRICTS.		Grant made in 1893.	Grant made in 1894.
24-Parganas	... ...	463	519
Nadia	... ...	765	640
Murshidabad	... ...	1,061	992
Jessore	... ...	1,967	3,017
Khulna	... ...	1,431	955

It is satisfactory to see that the 24-Parganas and Jessore are increasing their expenditure on medical relief, and a matter of regret that it is falling off in the other three districts. Such expenditure is of far more benefit to the people generally than money spent on higher education. When, however, I compare the scanty attendance at these dispensaries with the manner in which I see patients crowding to that of Mr. Monro at Ranaghat, the conclusion forces itself upon me that there must be something radically defective in the administration of the former.

XXVIII.—LIBRARIES.

123. As stated in the reports of previous years, the number of public libraries in this Division is very limited. The office libraries at the head-quarters of districts and subdivisions are reported to be in good order. In Nadia the catalogues of all the office libraries were revised during the year under report, and useless and obsolete books were disposed of. In Ranaghat the "Rivers Thompson Library" has now only a nominal existence, and the other library is mostly used, as before, by the students of the local school. In Murshidabad, the Berhampore Public Library has long been only a book club. There has not been any improvement in the status of the Jessore Public Library during the year under report. There was an income of Rs. 231-12-6, which was raised chiefly from subscriptions. The cash balance on 31st March 1895 was Rs. 42-15 against Rs. 50-10-6 on 31st March 1895. No books were purchased during the year, and only a few newspapers. By far the larger part

of the income is spent in paying a clerk and another servant, for whose benefit the institution may be said to be maintained. There are public libraries at Satkhira, Sripur, Tengra, Bhowanipur, Senhati and Mulghar.

XXIX.—MUSEUMS.

124. There are no museums in this Division.

XXX.—LOCAL SELF-GOVERNMENT INSTITUTIONS.

District and Local Boards.

125. The Bengal Local Self-Government Act, III (B.C.) of 1885, has been in operation in this Division for nine years.

126. In the 24-Parganas, the District Board held 13 meetings during the year, including two special meetings, against the same number in the previous year. The average percentage of attendance at each meeting was 51·3 against 46·8 in the previous year. Besides the general meetings of the Board, the Finance and Education Sub-Committees each met 11 times during the year. The number of Local Boards in the district was four, as in the previous year, all presided over by non-official Chairmen. The following table shows the number of meetings held by the Local Boards, and the average attendance of members at each meeting during the year:—

Name of Local Board.	Number of meetings held.	Average attendance at each meeting.
Alipore	10	7·8
Diamond Harbour	16	6·8
Barasat	8	6
Basirhat	12	4·5

Taking all the Boards together, there was an increase in the number of meetings held, but the average attendance at each meeting was worse than in the previous year. The Local Boards continued to be in charge of the village and district unmetalled roads and cattle-pounds. In Nadia the District Board held 12 meetings during the year, against 14 in the previous year, the average attendance at each meeting being 13·5 against 12·07 in the previous year. There are four Local Boards in the district, three of them presided over by non-official Chairmen. The following table shows the number of meetings held by the Local Boards during the year, and the average attendance of the members at each meeting:—

Name of Local Board.	Number of meetings held.	Average attendance at each meeting.
Sadar	11	8·5
Kushtea	11	8·5
Meherpur	17	8·5
Ranaghat	9	4

The number of meetings held by each Local Board has increased, but the attendance has fallen off even as compared with 1893-94, when it was bad. The District Board of Murshidabad held 14 meetings against 12 in the previous year. It is most unsatisfactory to observe that four meetings were adjourned for want of a quorum, against 2 in 1893-94, and the difficulty of getting work done by the Board has been the subject of complaint. The average attendance of members at each meeting was only 7·63 against 8·41 of the preceding year. The Deputy Magistrates in charge of subdivisions did not come in for meetings as they ought, and the Chairman himself unfortunately did not come in when he was out in camp. The following table shows the number of meetings held by the three Local Boards in the district during the year, and the average attendance of the members at each meeting, which has not improved:—

Name of Local Board.	Number of meetings held.	Average attendance at each meeting.
Sadar	10	5·71
Kandi	11	5·09
Jangipur	14	5·38

In Jessore the District Board held 17 meetings against 21 in the previous year, the average attendance at each being 10·7 against 12·2 in the previous

year. The subjoined table shows the number of meetings held by the five Local Boards in the district during the year, and the average attendance of the members at each meeting:—

Name of Local Board.	Number of meetings held.	Average attendance at each meeting.
Jessore	30	5
Narail	13	4·8
Jhenida	11	4·4
Magura	12	4·9
Bongaon	11	5·5

The average attendance of members is not satisfactory, though it has slightly improved in Narail and Magura. In Khulna the District Board held 11 meetings during the year against 14 in 1893-94, the average attendance at each meeting being 12·2 against 11·4 in the previous year. The following statement shows the number of meetings held by the three Local Boards in the district, and the average attendance of members at each meeting:—

Name of Local Board.	Number of meetings held.	Average attendance at each meeting.
Khulna	10	5·5
Bagirhat	7	6·4
Satkhira	8	8·2

The subjoined statement shows the expenditure incurred by each District Board on sanitation and water-supply, medical relief, and primary education, for the past three years:—

District.	Year.	Sanitation and water-supply.	Medical relief.	Primary Education.
24-Parganas ...	1892-93	2,141	1,214	31,507
	1893-94	2,168	1,094	29,226
	1894-95	4,591	1,277	29,120
Nadia ...	1892-93	3,006	100	17,507
	1893-94	1,044	1,108	16,337
	1894-95	3,846	1,355	21,906
Murshidabad ...	1892-93	...	...	16,067
	1893-94	1,856	1,893	16,035
	1894-95	3,540	1,165	17,020
Jessore ...	1892-93	5,248	2,238	22,253
	1893-94	1,002	2,676	21,067
	1894-95	2,703	3,703	22,766
Khulna ...	1892-93	254	515	16,964
	1893-94	1,352	1,364	17,127
	1894-95	2,569	1,026	16,713
Total ...	1892-93	10,649	4,067	104,298
	1893-94	7,422	8,135	99,792
	1894-95	17,249	8,526	107,525

It is satisfactory to note that the expenditure under head "Sanitation and Water-supply" has increased in each district. The 24-Parganas, Nadia, and Jessore District Boards have also increased their expenditure on medical relief, while it has fallen off in Murshidabad and Khulna. The expenditure on primary education has increased in Nadia, Murshidabad, and Jessore, the increase being marked in Nadia, while it has fallen off slightly in the 24-Parganas and Khulna.

127. The following is a summary of the views of the District Officers on the working of the District and Local Boards. *24-Parganas.*—The District Board worked smoothly and harmoniously. Most of the members continued to take considerable interest in the questions which came before them for consideration. The members of the Local Boards are also generally reported to have taken interest in their work. *Nadia.*—The Local Boards take little or no interest in their work. The excuse offered is that they have not enough to do, but, as Mr. Garrett, the Officiating Magistrate, observes, they cannot be entrusted with more until they show themselves fit for it by the efficient performance of their present duties. *Murshidabad.*—The District Board are reported to be useful as a consultative body, and many of them are said to pay attention to the out-door work of the Board. I am unable to endorse these remarks. It appears very difficult to get enough of members to form a quorum at a meeting or to get any work done. It is reported that very few of the members of the Local Boards take any interest in their work. So far as I have been able to form an opinion, it is only European planters who do anything, and Mr. Elliot Hills complains that he has to ride a long distance for meetings, only to find that there is no quorum. *Jessore.*—The work of the District

Board went on smoothly. No special interest was taken in the work by non-official members, but they were, on the whole, loyal in their advice and willingness to adopt measures proposed by the executive, so that the Chairman was able to keep the work going. The Local Boards are said to have performed their duties fairly, but I find their administration of pounds a failure, and do not see what good work they have done. *Khulna.*—The District Board has worked harmoniously. The management of pounds by the Local Boards has been a failure, but I am glad to find it reported that there has been improvement in this respect during the year. The incompetent management of the Satkhira Local Board gave opportunity for considerable embezzlement on the part of the clerk, but the Subdivisional Officer has since been appointed Chairman, and matters have improved. Mr. Brown writes:—"The Boards can "hardly be called representative institutions, as most of the leading members "are Hindus and reside in or near the small sadar and sub-divisional towns, "while the great mass of people are cultivators, and mostly Muhammadans: "nor can the system, as it works at present, be called Local Self-Government." It may be said generally that the District Boards are of some use as consultative bodies, but the work is really done by the Magistrate of the district as Chairman, and the quality of the executive work depends upon the character of the District Engineer and his loyalty to the Magistrate. The office work is supposed to be supervised by the Vice-Chairmen, some of whom look after it and some do not. The executive work is done very much more expensively than it used to be when the ferry fund was administered by the Magistrate, and not more efficiently. The contractors and subordinate officials must be making large fortunes. I cannot but think that native members of the Board, who know what work ought to cost, could effect large reductions of expenditure if they tried. Although I observe that the Magistrate of the 24-Parganas speaks fairly well of the Local Boards in his district, I have received a most unfavourable impression of the work of these bodies in the Division generally. Their management of pounds and of petty roads has been feeble and incompetent in the extreme, and I consider myself justified in pronouncing that these bodies are of no use whatsoever. It is true that they have not been asked to do much, but what little has been entrusted to them has been so very badly done that it would be absurd to extend their functions. Union Committees are in course of formation, but were not in existence during the year.

Municipalities.

128. The total number of municipalities in the Division at the close of the year was 37, as in the previous year. The Municipality of Titaghar has been separated from that of South Barrackpore since the close of the year. No general election was held in any of the municipalities. Bye-elections were held in some of them, which, except at Gobardanga and Barasat, were successful. The following statement shows a large increase in both income and expenditure during the year under report, compared with that of the previous year:—

DISTRICT.	Income.		Expenditure.		REMARKS.
	1893-94.	1894-95.	1893-94.	1894-95.	
1	2	3	4	5	6
	Rs.	Rs.	Rs.	Rs.	
24-Parganas	4,76,278	5,11,559	3,48,270	4,35,284	
Nadia	94,190	97,861	85,678	93,570	
Murshidabad	96,617	1,05,434	85,185	90,965	
Jessore	29,034	31,980	26,174	29,023	
Khulna	46,403	59,003	22,478	36,664	
Total ...	7,42,522	8,05,837	5,67,785	6,85,506	
Increase	...	63,315	...	1,17,721	
Decrease	...	...	...	...	

The following table shows the number of meetings held during the last two years in each municipality, and the average percentage of attendance of Municipal Commissioners at each meeting:—

Name of Municipality.	Number of meetings held in—		Average percentage of attendance at each meeting.		Remarks.
	1893-94.	1894-95.	1893-94.	1894-95.

Debhatta	18	23	56·	55·8	
Chanduria	8	4	52·08	63·	

129. The average attendance at each meeting has improved, only 10 municipalities showing an average attendance of less than 50 per cent., against 13 in the preceding year. Mr. Kennedy, the Magistrate of Murshidabad, remarks that a great deal of interest is shown in municipal business transacted within the four walls of the office, but that far too little is taken in out-door work, which is too completely abandoned to the municipal servants. The following is a summary of some of the principal improvements effected or proposed in municipalities during the year under report:—In the Cossipore-Chitpore Municipality filtered water was introduced at a cost of about Rs. 90,000 and an out-door dispensary was opened. In the Maniktala Municipality pipes and hydrants were laid for extending the supply of filtered water. In the district of Nadia the drainage of the Krishnagar Municipality, by excavating the channel of the Anjona, has not yet been undertaken, but as the Municipal Commissioners have at last agreed to increase the rate of house-tax, there is now some prospect of funds being provided. A separate ward for females is

being added to the Krishnagar dispensary, Babu Nafar Chundra Pal Chowdhury having contributed Rs. 2,500 for the purpose. In most of the municipalities the Municipal Commissioners decline to take steps for the suppression of well-privies, even in the most crowded parts of the town, and I cannot say that sanitation is making much progress. In the district of Murshidabad, Maharani Surnomoyi of Kasimbazar has, with her usual public-spirited liberality, offered to pay for the construction of water-works in the Berhampore Municipality. It is unsatisfactory to notice that in the Lalbagh Municipality the system of trenching night-soil, which was carried out during 1893-94, was stopped altogether last year. In Jessore nothing particular has been done, but the affairs of the Municipalities of Jessore and Kotechandpur continue to be fairly administered, while that of Moheshpur is in very bad order owing to local squabbles. In Khulna the Municipal Commissioners of Debhatta have taken the first step towards improvement, by facing the unpopularity of raising the assessment. It has been reported that they go in fear of their lives in consequence, and they want to rebuild their offices lest the present thatched buildings should be burnt down by their enemies. They have made an exceptional display of courage, for very few Municipal Commissioners dare to increase taxation. The Municipal Commissioners of Chanduria find their income reduced to about Rs. 800, the courts having very properly put a stop to their taxing carts which only come occasionally within their borders. More than half of this was spent on their establishment of servants and the rest on their dispensary. Most of the inhabitants are eager to have the Municipality abolished, and I have recently recommended its abolition. Mr. Garrett, the Magistrate of Nadia, makes the following remarks with regard to Municipal administration:—"Party spirit rules high in most municipalities. The great object of the "Commissioners is not to better the condition of their towns by working "harmoniously, but to defeat the members of the opposite party in the discussions "at the municipal meetings. Each party when in power tries to harass those who "belong to the opposite party. Respectable men of a quiet disposition generally "keep themselves aloof from the politics and party warfare of municipalities "which are administered by men who are more desirous of improving their own "position than of improving the state of their town by doing their duty fear-"lessly and conscientiously." As I was in charge of the Division for less than half of the year, I had not the same opportunities of closely examining the working of the different municipalities as I had in 1893-94, when I visited 22 of them. During the year under review, I visited only half that number. In the examination, however, of the budget estimates of all of them, I have seen something of their working. I find little improvement in the quality of municipal administration in the Division, of which I pointed out the principal defects in my report for the year ending March 1893, and such improvement in working as there has been, has generally been due to pressure and supervision by controlling authorities, which for the present it would be impossible to relax.

XXXI.—EMPLOYMENT OF MUHAMMADANS.

130. The percentage of appointments held by Muhammadans in the several districts of this Division appears to be generally fair in consideration of the proportion of Muhammadans to Hindus among the educated classes. It is satisfactory to find that during the year under review there was a slight increase in the number of Muhammadan employés under heads "ministerial officers" and "menials" in every district except Khulna, where the numbers fell from 19 and 147 to 15 and 122 respectively. Mr. Collier, Officiating Collector of the 24-Parganas, observes that although Muhammadans as a class are backward in point of educational qualifications, it is probable that more might be done to give them appointments in Government service. Mr. Garrett, Officiating Collector of Nadia, says that the claims of educated Muhammadans when they stand candidates are duly considered along with those of Hindu candidates wherever vacancies occur. Mr. Kennedy, Collector of Murshidabad, observes that in his district the proportion of Muhammadans to Hindus in Government employ is lower than that of Muhammadans to Hindus among the educated classes. But as none except those who have passed the entrance examination are provided with any appointment in the superior grade, and as such men are very few among the

Muhammadans, any chance of the proportion becoming higher within any specified time is very small. Mr. Roe, Officiating Collector of Jessore, observes that the Muhammadans of his district are mostly agriculturists and are very backward in education. I think that all European officers are fully desirous of giving Muhammadans a fair share of employment, but they cannot be expected to take an inefficient Muhammadan instead of an efficient Hindu, and the number of efficient Muhammadans is very small. Muhammadans are also prone to lose heart and resign their service under any discouragement, and I think it is probable that in most offices the overwhelming majority of Hindu Babus make a solitary Muhammadan clerk feel uncomfortable in a manner of which the head of the office cannot take cognizance.

XXXII.—POST OFFICES AND TELEGRAPHS.

131. The following table shows the number of post offices in this Division and the number and mileage of the mail lines during the year under review:—

District.	Number of post-offices.			Mail lines.					
				Imperial.		Zamindary.		Total.	
	Imperial.	Zamindary.	Total.	Number.	Average mileage.	Number.	Average mileage.	Number.	Average mileage.
1	2	3	4	5	6	7	8	9	10
24-Parganas ...	71	8	79	...	...	...	...	47	336
Nadia ...	82	6	88	42	302½	12	140	54	442½
Murshidabad ...	35	5	40	8	123	18	207	26	330
Jessore ...	57	6	63	26	241	17	228	43	469
Khulna ...	40	5	45	13	126	17	273	30	399

132. The number of post offices, both imperial and zamindary, in the 24-Parganas and Jessore, remained the same as in the previous year. In Nadia the number of Imperial post-offices decreased by three, while in Murshidabad and Khulna it increased by one and six respectively. The number of zamindary post offices in these districts remained stationary. The number of mail lines increased in Jessore only by one, decreased in the 24-Parganas and Nadia by two in each, and remained the same in Murshidabad and Khulna as in the previous year. The decrease in the 24-Parganas is due to the abolition of the mail lines from Debipur to Fulta and from Budge-Budge to Raipur. The decrease in Nadia has not been explained. But in this district the decrease in the aggregate mileage of imperial lines, which fell during the year under report from 428½ to 302½, appears to be disproportionately large. Mr. Garrett observes that the figures have been supplied by the Postmaster-General, Bengal, and that he is not in a position to check their correctness. The number of letters, &c., received for despatch and issued for delivery in the districts during the year was as follows:—

District.		Number of letters, &c., in 1894-95.	Number of letters, &c., in 1893-94.
24-Parganas	...	10,059,106	9,658,136
Nadia	...	5,082,884	......
Murshidabad	...	Not given.	......
Jessore	...	3,497,676	3,130,523
Khulna	...	Not given.	......

133. The following table shows the working of the general telegraph offices during the past two years:—

DISTRICT.	Number of combined Post and Telegraph Offices.	Messages sent.		Messages received.	
		1894-95.	1893-94.	1894-95.	1893-94.
1	2	3	4	5	6
24-Parganas	17 offices against 16 in 1893-94	16,848	16,899	11,077	9,180
Nadia	5 do. against 2 ditto	2,438	1,971	3,054	2,186
Murshidabad	4 do. do. 4 ditto	2,977	2,780	2,781	2,527
Jessore	2 do. do. 1 ditto	1,485	1,237	1,090	812
Khulna	2 do. do. 2 ditto	1,254	989	1,500	1,339

There has been an increase both in the number of messages sent and received during the year in all the districts of this Division. The increase is said to be due to the growing appreciation by the public of the advantages offered by the system. The number of combined post and telegraph offices increased from 25 in 1893-94 to 30 during the year, viz., one in the 24-Parganas, three in Nadia, and one at Narail in Jessore. There is no telegraph office attached to the Meherpur post-office in the district of Nadia, but as it is the head-quarters of a subdivision, it would be convenient if one were opened. Besides, there are telegraph offices at all railway stations, which take away a certain amount of business from the post-office telegraphs.

XXXIII.—(a) ZAMINDARY DAK.

134. The following statement shows the receipts and disbursements on account of the zamindari dák service in this Division during the past two years:—

DISTRICT.	Rate per cent. at which levied.		Amount levied.		Expenditure.	
	1893-94.	1894-95.	1893-94.	1894-95.	1893-94.	1894-95.
1	2	3	4	5	6	7
	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.
24-Parganas	0 7 0	0 7 0	10,074 10 2	8,393 5 0	7,656 0 6	7,219 15 10
Nadia	0 12 0	0 12 0	9,228 14 2	6,591 7 7	5,997 5 10	6,147 8 0
Murshidabad	0 9 0	0 9 0	6,863 1 5	6,766 7 6	6,275 0 9	6,008 4 10
Jessore	0 14 0	0 14 0	7,213 0 6	7,074 0 0	8,152 10 9	8,519 5 5
Khulna	1 0 0	1 0 0	6,875 0 0	6,547 0 0	7,568 5 1	7,806 0 0
Total ...	......	.....	40,254 10 8	35,371 4 1	35,649 0 11	35,701 2 1

135. In the 24-Parganas the number of post offices was the same as in the year preceding. There were, however, some changes in the lines and in the establishment, the total length of lines being reduced from 198 miles to 171 miles on account of closing some police outposts. The Mothurapur post-office was placed in charge of a clerk of the Local Sub-Registrar's office, and by this change a saving was effected. In Murshidabad the line from Lalgola to Dewanserai was abolished. In Jessore a new line, Chowgatcha to Mohespur, 12 miles in length, was opened during the year. In none of the other two districts was there any change in the dák lines during the year. The total collections during the year show a decrease in all the districts. In explanation of the decrease in Nadia, the Collector of that district observes that on account of change of kist days under the orders of the Board of Revenue, three instalments fell within the year 1892-93; that the last kist was fixed on the 28th March, and advantage of the 30 days' grace allowed under the law being

taken by the zamindars, heavy arrears were outstanding at the commencement of 1893-94. A large portion of these arrears being collected in that year, and the date of the last kist having been altered again to 12th January, there was a considerable increase in the collections in 1893-94. There was also a large amount of fines and advance payments collected during that year. None of the other District Officers have furnished any explanation regarding the decrease in their districts. The total expenditure shows an increase in the districts of Nadia, Jessore and Khulna, and a decrease in the other two districts. The increase in Nadia is attributed to increased expenditure under the head of petty construction and repairs of dák sheds. The increase in Jessore is said to be due partly to increased expenditure on account of repairs, partly to the appointment of two additional runners, and partly to increase in the District Officer's touring expenses owing to high floods. The increase in Khulna has not been explained. The decrease in Murshidabad is ascribed to savings effected by the abolition of some police outposts. Regarding the decrease in the 24-Parganas no explanation has been furnished by the Collector. There was no complaint reported during the year, and the management of the lines is reported to have been satisfactory. I think there is something anomalous in the present administration of this fund. The police communications, for the maintenance of which it was originally established, have to a great extent been taken over as imperial postal lines, and those which are left are managed by the imperial postal authorities. It does not appear necessary that the Magistrate and Commissioner should decide as to the number of runners, inspectors, dák huts, &c., on each line; and if the contribution of the Zamindari Dák Fund were strictly limited to what has been found necessary in the past, and if the efficient maintenance of all police lines were stipulated, I think all details of management might be made over to the Postal Department, with the exception of the communications between the Magistrate's moving camp and his head-quarters, which the Magistrate must keep in his own hands.

Fairs.

136. The most important fairs held in the 24-Parganas are (1) Ganga Sagor méla, (2) Pir Gora Chand's méla, (3) Gazi Saheb's méla. The Ganga Sagor is a Hindu bathing festival in the Sagor Island at the mouth of the Ganges, held this year in January. The total number of pilgrims who attended the place was estimated at 35,000. The police, conservancy, and sanitary arrangements were made by the District Board at a cost of Rs. 2,754, which had been deposited by the proprietor. No epidemic disease broke out amongst the pilgrims, and there were only a few cases of cholera. Three pilgrims are said to have been killed by tigers. The other two fairs are held in honour of Muhammadan pirs or saints. Pir Gora Chand's fair in the Basirhat subdivision was attended by about 10,000 pilgrims. The expenditure on account of police, conservancy, and sanitary arrangements amounted to Rs. 134. The Ghazi Saheb's fair in the Sadar subdivision was attended by about 30,000 pilgrims. There was no outbreak of epidemic disease in this méla. In Nadia the principal fairs held during the year were the Rash Jatra at Santipur, the Dole Jatra at Ghosepara, and the Choitanna méla at Kuba. Each of these was attended by from 30,000 to 50,000 people. The mélas at Navadwipa were not very largely attended during the year. Sanitary and conservancy arrangements were made either by the local municipalities or by the owners of the lands on which the fairs were held. In Navadwipa the cost of sanitary arrangements was defrayed from the fees levied under the Lodging-house Act. There was no serious outbreak of any epidemic at any of the fairs, nor any disturbances. The provincial fairs in Murshidabad are (1) Tulsi Bihar méla, (2) Kapileshur méla, (3) Chattra méla, (4) Palkabara méla, (5) Gowas méla. Of these, the Tulsi Bihar méla is of some importance, and lasts nearly a month. The other fairs are of short duration and are gradually losing their importance and utility. No epidemic disease is reported to have broken out in any of these. The only fairs in Jessore deserving any notice are the Jubilee méla at Magura, the Rás méla at Salrujitpur and Gilapole, and the Gobrapur méla. The original object of the first-named méla was to encourage agriculture by giving rewards for agricultural products exhibited. The object was not realized at the last méla. The exhibits were poor, and the méla was more of a *tamasa* than an agricultural exhibition. The other mélas are

religious gatherings. There was no outbreak of any disease at any of the mélas. In Khulna no fair of any importance was held during the year. An agricultural exhibition was held in the latter part of February, and lasted for 15 days. Agricultural products, articles of manufacture and cattle were exhibited. Certain machines were also sent by the Agricultural Department under the supervision of an assistant of that department. The expenditure of the exhibition was partly borne by the District Board and partly by Government. The success was doubtful.

POUNDS.

137. The following table gives the statistics of the pounds under the District Boards in this Division during the year under report, as compared with the preceding year:—

1	2	3	4	5	6	7	8	9	10	11	12
DISTRICT.	Year.	Number of pounds.	Arrear demand.	Current demand. *	Total demand.	Collections, including arrears.	Balance.	Remission.	Net balance.	Expenditure.	REMARKS.
			Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	
24-Parganas ...	1893-94	101	421	5,920	6,341	5,628	713	90	623	80	* Last year Rs. 7,163 were shown. The increase of Rs. 1,886 is due to the arrear demands of some pounds omitted last year being added during the year under report.
	1894-95	102	623	5,130	5,753	4,409	1,344	...	1,344	...	
Nadia	1893-94	173	4,019	26,182	30,201	26,129	4,072	81	3,991	504	
	1894-95	176	3,991	28,917	32,908	27,930	4,978	...	4,978	909	
Murshidabad ...	1893-94	75	841	16,966	17,807	14,439	3,368	...	3,368	391	
	1894-95	76	3,368	15,897	19,265	15,467	3,798	...	3,798	642	
Jessore	1893-94	140	7,828	21,397	29,225	21,629	7,596	433	7,163	555	
	1894-95	145	9,049*	19,178	28,227	20,016	7,811	2,682	4,629	537	
Khulna	1893-94	64	1,803	5,014	6,817	4,192	2,625	...	2,625	100	
	1894-95	62	2,625	3,688	6,313	4,285	2,028	...	2,028	99	
Total ...	1893-94	553	14,911	75,480	90,391	72,017	18,374	604	17,770	1,630	
	1894-95	561	19,656	72,810	92,466	73,007	19,459	2,682	16,777	2,187	

Taking the Division as a whole, the number of pounds increased by 8, but the current demand fell off by Rs. 2,670. The collections, including arrears, however, improved, being 100·2 per cent. on the current demand against 95·4 per cent. in the previous year. The expenditure in connection with the pounds increased by Rs. 557. In the 24-Parganas, although the number of pounds increased by one, the current demand and the collections fell by Rs. 790 and Rs. 1,219, respectively. This falling off is ascribed partly to bad seasons and floods, and partly to the introduction of the new forms and registers. The Basirhat Local Board explains that the decrease is due to some extent to the reduction in the rates for feeding and watering cattle. This explanation cannot be accepted as satisfactory. The increase in the outstanding balance at the close of the year is chiefly due to the Diamond Harbour and the Alipore Local Boards having failed to realize the entire amount of rents recoverable during the year. Rupees 862 were realized during the year as sale-proceeds of unclaimed stray cattle, &c., making up the total pound collections to Rs. 5,271 against Rs. 6,576 in the previous year. In Nadia the number of pounds increased by three. They were farmed out for Rs. 28,917, of which Rs. 27,103 were realized, leaving a balance of Rs. 1,814. Rs. 827 were also realized during the year on account of arrears of previous years, aggregating Rs. 3,991. The total balance outstanding at the close of the year under report was therefore Rs. 4,978, which is in course of realisation under the certificate procedure and by *kistibundis*. Mr. Garrett writes on the subject as follows:—"The

"administration of pounds by the Local Boards has, as usual, been slack in "the extreme. The persistent way in which the clear rules laid down by "the District Board have been disregarded is most disheartening. As noticed "in previous years, the complaints of malpractices against farmers who engage "emissaries to seize and impound cattle illegally for their interest are not rare. "That most pernicious habit of paying persons who impound cattle half of the "fines which will subsequently be realized from the owners is universally "observed in this district. I am afraid though that nothing can be done to put "a stop to it. Several pound-keepers have been prosecuted for malpractices "throughout the year, but it is as a rule extremely difficult to get evidence "against them. There can be no doubt that pounds are not as regularly "inspected as they should be. This is one way in which the members of Local "Boards could do a great deal of good, but there is not a single member who "takes sufficient interest in his work to do so." In Murshidabad there was an increase of one pound during the year under report. The collections also increased by Rs. 1,028, although the demand of the year fell off by Rs. 1,069. A large part of the outstanding balance, viz., Rs. 3,798, is said to have become irrecoverable. The increase of expenditure, Rs. 251, is attributed to the fact that one new pound had to be constructed and some old ones reconstructed during the year. In Jessore five new pounds were established during the year to suit the convenience of the people. The current demand fell by Rs. 2,219. The decrease is ascribed to greater discretion exercised by the Local Boards in the selection of pound farmers, and also to loss of cattle by disease. The decrease in the demand accounts for the decrease in the collections. The outstanding balances amounted to Rs. 7,311, of which Rs. 2,682 have been already remitted as irrecoverable, and a great part of the remainder also is said to be irrecoverable. This is due to feeble administration, and shows how indifferently the pounds are managed. The receipts from the sale proceeds of unclaimed stray cattle, &c., amounted to Rs. 1,046 during the year against Rs. 760 in 1893-94. In Khulna the number of pounds decreased by two and the current demand by Rs. 1,326. The falling off in the demand is said to be due to the want of competition at the sales. The auction system is always a failure without a system of upset prices carefully calculated and strictly adhered to. The collections during the year, however, improved. The new pound forms are not in use in this district, although they were prescribed as long ago as June 1893. It is said that steps are now being taken to introduce them. Mr. W. B. Brown, the Officiating Magistrate, recorded the following remarks on the subject:—"I consider the management of pounds by farmers in this district to "be infamously bad. The pounds are most wretched structures, the cattle are "never fed, and the accounts are badly and, I fear, dishonestly kept. The "farming system is said to bring in more income than the *khas* system, but if "this is so I think it can only be because the farmers misappropriate the feeding "charges. The farming system compares very badly with the *khas* system of "which I have hitherto had experience. I would recommend that the *khas* "system be introduced at thanas where the pounds can be looked after by the "writer constables." Mr. Brown has lost sight of the fact that the number of pounds has greatly multiplied since there was one at each police-station only, and also of the fact that the police are not under the orders of the District Boards, to whom the management of the pounds has been transferred from the Magistrates. Elsewhere than at police-stations *khas* management is always a failure. The farming system, of which I admit the faults, at least produces revenue, which the other does not. In the 24-Parganas there were 52 municipal pounds during the year under report, against the same number in 1893-94. The income from these pounds amounted to Rs. 5,545 against Rs. 5,346 in the previous year, and the expenditure to Rs. 700 against Rs. 905. In Nadia the number of pounds within municipal limits was 24 against 25 in 1893-94. The total receipts were Rs. 3,830 against Rs. 3,733 in the year before, and the expenditure Rs. 57 against Rs. 81; all of these pounds were farmed out. In Jessore there were 7 municipal pounds during the year, against 6 in 1893-94, with an income of Rs. 1,227 against Rs. 1,260. The expenditure on the pounds amounted to Rs. 230 during the year, against Rs. 399 in 1893-94. No information has been given by the Magistrates of Murshidabad or Khulna regarding municipal pounds in their districts.

FERRIES.

138. The following statement shows the income from ferries under Government and the District and Municipal Boards for the past two years:—

District.	Year.	Income from Government ferries.	Income from District Board ferries.	Income from Municipal ferries.	Remarks.
1	2	3	4	5	6
		Rs.	Rs.	Rs.	
24-Parganas ...	1893-94	4,435	16,397	Nil	
	1894-95	4,597	16,228	Nil	
Nadia ...	1893-94	24,650	3,069	Nil	
	1894-95	24,195	3,071	Nil	
Murshidabad ...	1893-94	4,960	9,364	9,003	
	1894-95	4,722	9,047	9,141	
Jessore ...	1893-94	Nil	7,675	63	Moheshpur Municipality.
	1894-95	Nil	7,407	51	
Khulna ...	1893-94	930	5,316	12	Debhata Municipality.
	1894-95	930	4,828	13	

139. This account of pounds and ferries is a lamentable illustration of the administration of District and Local Boards. The income is falling off, and although the actual rents decrease, the uncollected balances grow larger and larger until great portions of them are written off as irrecoverable. I have no hesitation in preferring the farming system to one of direct management, considering the quality of the servants who would be employed for the latter and the very small amount of supervision which the Boards would bestow upon them. The Excise Department has shown how successfully a system similar to that of pound rents can be worked; but though I have again and again pointed this out to the local authorities, they do not appear to take advantage of the example. They take advances by way of security, but this is useless when they habitually allow the arrears to exceed the security. I believe the allegations against the farmers to be generally true, as regards starving the cattle, giving them no shelter, keeping them standing in deep mud, bribing people to capture cattle, and so on, and without efficient supervision and inspection such evils will continue. It is proposed to employ inspectors, but I have no belief in efficient work being done by such inspectors without active supervision, and that the Boards do not appear to be inclined to exercise.

XXXIV.—SOCIAL AND POLITICAL INSTITUTIONS.

140. There are no important institutions of a social or political character in this Division. There are some branches of the Indian Association of Calcutta in Diamond Harbour, in the 24-Parganas, in Krishnagar, in Nadia, and in Berhampore in Murshidabad. They consist chiefly of pleaders. The branch of the Indian Association at Krishnagar meets only for the purpose of sending delegates to the Congress. No delegates were, however, sent last year. The Murshidabad branch of the Indian Association is said to discuss both social and political matters whenever there is occasion. During the year under report, it discussed the Police Bill. In several municipalities in the 24-Parganas there are certain rate-payers' associations which arrogate to themselves the functions ot an opposition to the Municipal Commissioners. In the Sadar subdivision of the district the attention of those who take an interest in public affairs is directed to the institutions and associations in Calcutta. In Nadia the rate-payers, associations, which formerly existed in certain municipalities, have ceased to exist. It is said to be due to the fact that the persons who organised them have succeeded in securing for themselves or for their parties seats on the Municipal Board. The *Bandhu Sabha* of Santipur and *Mitra Sabha* of Ranaghat

continued to do some good work in the way of affording help to widows and orphans. *Hari Sabhas*, Hindu religious institutions, have been started in several places where religious books are read and hymns are sung. The pandits of Nadia have organized an association for the advancement of Sanskrit learning and for the discussion of philosophical, religious and social questions, under the name of the College of pandits of Nadia. The question of calf vaccination was laid before the pandits at their last annual conference during the Christmas holidays, and the pandits gave it as their opinion that there was no religious objection to using calves for vaccination. In Murshidabad there are two other institutions, viz., the "Murshidabad Muhammadans Association" and the "Anjumani." The former deals with matters connected with the intellectual and moral improvement of Muhammadans, and the latter is reported to be a purely religious institution maintained for the help of the poor. In Khulna the only social institutions deserving of notice are the Jessore and Khulna *Sunmilani*, which looks after zanana education and the physical and moral training of boys, and the *Sripur Hitasadhini Sabha*, which maintains a charitable dispensary in Sripur.

THE PUBLIC PRESS.

141. In the 24-Parganas the total number of presses was 30 against 27 in the previous year. Six presses were closed and nine opened during the year. Of the presses, 1 is owned by Government, 1 by a European, 1 by a native Christian, 10 by Muhammadans and 17 by Hindus. The Horticultural Press, the Bharati Press and the Suptahik Sambad Press continued to issue periodicals called *Sanskrit Chandrika*, the *Bharati*, and the *Anader Patrika* respectively. Another periodical, called *Bhishuk Darpan*, has been newly started during the year, and is issued by the Bhishuk Darpan Juntra. The Herald Press issued a paper called the *Indian Christian Herald*. Two newspapers, the *Railway Guardian* and the *Power*, have sprung up during the year. The former is issued by the Railway Press, and the latter by the Power Steam Printing Works, which also issues two other papers, the *Banganibasi* and the *National Guardian*. The circulation of these papers and periodicals is confined to a limited number of people. A monthly Bengali magazine named *Prabha*, printed in Calcutta, is published at Nila, a village in the subdivision of Diamond Harbour. It deals with literary, and not with political or administrative subjects. In Nadia the number of presses was reduced from three or two. No daily, weekly or other periodical paper is issued from any of these presses. In Murshidabad there were 11 presses as against 10 in the previous year. Three weekly newspapers—the *Pratikar*, the *Pratinidhi* and the *Hitaishi*—were published in this district during the year. They are moderate in tone and limited in circulation. A monthly paper called the *Nandi*, a comic paper, was started during the year, but after two or three issues it ceased to exist. In Jessore there were four presses, a new press having been started during the year. Three of them execute miscellaneous work, while the fourth, "The Chikitsa Prabash Press," continued to issue a weekly journal called the *Samaj-o-Sahitya* and vernacular books on hygiene. As in the previous year, there was only one press in Khulna. It executes job work. No newspaper is issued from it. The vernacular journal called the *Ghostok*, started in the preceding year by a local Native Christian, continued to be printed and published in Calcutta. It will thus be seen that the newspapers and periodicals published in the districts of this Division are generally of little importance and small circulation. As regards the public press generally, the few who read newspapers in the several districts of this Division read the papers published in Calcutta. Of papers published in English, the *Statesman*, the *Indian Mirror*, the *Amrita Bazar Patrika*, the *Hindu Patriot*, and the *Bengalee*, have the largest circulation among the native community. The leading vernacular papers are the *Bangavasi*, the *Banganivasi*, the *Hitavadi*, the *Sanjibani*, the *Samaya* and the *Sudhakar*. Of these the *Bangavasi* and the *Banganivasi* are the organs of the orthodox Hindus. The *Hitavadi* is more liberal as regards social matters, and is a supporter of the Congress. The *Samaya* advocates the cause of the raiyat and social reform. The *Sanjivani* is the organ of the Brahma Somaj. The *Sudhakar* is a Muhammadan paper devoted to the cause of the Musalmans. The *Bangavasi* has in some districts found its way among the shopkeepers and the others of the

lower class who know a little of reading and writing. My remarks on public feeling apply to the public press, with which the people at large may be said to have nothing to do, though I cannot but think that there is a danger of the seditious and malignant misrepresentations of the native press gradually filtering downwards and leading the discontented among the people to believe that the British Government is their enemy.

XXXV.—SUBORDINATE EXECUTIVE ESTABLISHMENT AND CHARACTER OF OFFICERS.

142. Seventeen Sub-Deputy Collectors and thirteen kanungos were employed in this Division during 1894-95, as shown below:—

	Sub-Deputies.	Kanungos.
24-Parganas	5	3
Nadia	4	1
[illegible]	3	4
Jessore	3	3
Khulna	2	2
	17	13

143. Of the five Sub-Deputy Collectors in the 24-Parganas, Babu Amrita Lal Gupta worked for a few months only, and Babu Adyata Charan De is specially employed as Superintendent of the Port Canning estate. Since the middle of February, Babu Jotendra Nath Gupta has been employed exclusively in settlement operations. One of the Sub-Deputy Collectors of Nadia, Babu Charu Chandra Kumar, was transferred from this Division early in the year. Another Sub-Deputy Collector, Babu Hem Chandra Mitter, went away on leave on 21st September 1894, and returned to duty on the 4th March 1895. So properly speaking only two Sub-Deputy Collectors worked in this district throughout the year, and one for half the year. Babu Hara Chandra Ghose, who was a Sub-Deputy Collector in Murshidabad, has been promoted to be a Deputy Collector. There was one Sub-Deputy Collector at Khulna for some months, and one in the Satkhira subdivision for the whole year. The Sub-Deputy Collectors and kanungos were employed as usual on measurement, settlement, collection of rent from khas mahals, and other miscellaneous and out-door duties, but they greatly prefer sedentary work in offices, and it requires constant goading and supervision to keep them on tour. The Sub-Deputy Collectors at some of the subdivisions were employed in criminal judicial work, which I think interferes unduly with their revenue work. The remarks of District Officers about the qualifications of the Sub-Deputy Collectors will be found with mine in the statement showing the character of gazetted officers, appended to this report. Of the kanungos, Babu Rash Behary Bose, attached to Basirhat, and Babu Nritya Gopal Sanyal, at Krishnagar, have not been favourably reported on. The latter officer is lazy and perfunctory in his work.

XXXVI.—CONDUCT OF ZAMINDARS.

144. In the 24-Parganas most of the zamindars are non-resident, and there is not much sympathy between them and their raiyats, in whose welfare they usually take no personal interest. The Mookerjees of Goberdanga, and Babu Prosad Das Dutt, who has a zamindari in the Diamond Harbour subdivision, take an interest in the welfare of their tenants, and the zamindars of Goberdanga maintain a school and a dispensary. In the 24-Parganas, Babu Rajkishore Mandal is generally reported to be a tyrannous landlord. Debendra Nath Bose, son of Dwarka Nath Bose, the zamindar of Metakhira abad, with a number of *lathials*, attacked the cutcherry of a tenure-holder in the abad, and because, in the affray which took place, some of the assailants were wounded, a case was brought against the defending party, which resulted in acquittal. The landlord appears to have been the guilty party. In Nadia the zamindars, with a few exceptions, have been quiet and law-abiding. There have been several criminal cases between the notorious Nafar Chandra Pal Chaudhuri and Ram Gopal Chetlangi, regarding the possession of certain chars, and an addi-

tional police force has been quartered on the chars to preserve the peace, but in this case the Chetlangis appear to be the aggressors. Certain *lathials* in the employment of the zamindars of Amla Sadarpur in Kushtia subdivision were convicted of rioting. The gumashta of a petty zamindar, Raj Mohini Debi, a widow of Kurulgachi, at the head of a number of *lathials*, attacked certain raiyats in pursuance of a claim to a fishery, and in the affray which ensued one of the raiyats was killed and two wounded. The rioters have been sentenced to various terms of imprisonment. Messrs. Watson and Company and the other European planters and zamindars are reported to have managed their affairs quietly during the year. In Murshidabad the conduct of the zamindars has been generally satisfactory. No case of employment of *lathials* by any zamindars was reported. The Nawab Bahadur of Murshidabad and Maharani Surnomoyi of Cossimbazar are exemplary landlords, and the Maharani has, during the year, undertaken the construction of water-works for the town of Berhampore—a gift which will cost more than two lakhs of rupees. Rao Jogendra Narain Rai of Lalgola has commenced building a *surai* for travellers at Jangipur, which will cost some eight thousand rupees. On the expiration of the ijara given by Rao Jogendra Narain Rai of a large portion of his property to Messrs. Jardine, Skinner and Company, there were indications of disturbance, the raiyats objecting to the zamindars renewing the ijara to the Company. But the matter has been amicably settled between the parties, the Rao Saheb having given Jardine, Skinner and Company a *putni* of his share of certain villages in which they were co-sharers, retaining the rest of the property in his direct management. In the north of Jangipur, one Bhagabati Charan Mitra tried to raise the rent of his raiyats, which led to the institution of some cases, but nothing serious happened. There has been also some friction in the Kandi subdivision between one Jiban Gobinda Ghosh and his raiyats. The landlord appeared to be in the wrong. A raiyat was murdered by the servants of Babus Raj Kumar Raya and Surendra Kumar Raya of Narail, as he refused to go to their cutcherry to execute a kabuliyat in their favour. Considerable ill-feeling existed between Babu Kali Das Rai, one of the co-sharers of Narail, and his tenants of Nischindipur, owing to an attempt made by his naib to enhance rents by 25 per cent. and to exact kabuliyats. Several cases were also brought by the raiyats against the naibs for forcibly sowing their lands with indigo. Babu Raj Kumar Raya and Kali Das Raya of Narail, and their sons, still usurp judicial functions, the sons having the original and the father appellate jurisdiction. The people are so much used to this state of things that they never complain against it. A number of *lathials* of Babus Bhavendra Nath Banerji and Jagadananda Banerji of Altapole attacked certain parties who had been buying up *jummai* right of their raiyats, and killed one of them. The case resulted in acquittal. Strained relations existed between Raja Promotho Bhusun Deb Raya of Nuldanga and his tenants of the Nowhatta concern in the Magura subdivision. There were two cases of wrongful confinement and one of theft brought against the Raja's men by the raiyats. In two of them the accused were convicted, and the third was compounded. I find that the so-called raiyats are often Babus, and sometimes even zamindars, who have purchased the rights of the raiyats for the purpose of making themselves unpleasant. In at least one case the Narail zamindars have made such a purchase in one of the Raja's zamindaries. Babu Hari Charan Bose of Sukpukhuria, in Bangaon subdivision, established a rival *hât* in spite of proceedings taken against him under sections 107 and 144, Criminal Procedure Code; the bonds executed by his men were forfeited. A riot was committed in village Tangrali by the servants of Raj Kumari Dasi of Ranaghat on one side, and those of Sishir Kumar Ghosh of Amritabazar on the other. There was friction between the agents of Babu Dino Nath Mullick of Calcutta and his tenants in thana Gaighatta. One of the zamindar's men was convicted of rioting. Mr. Maxwell, Joint-Magistrate, in charge of the Jhenida subdivision, reports that a few cases of unfair treatment of raiyats by the Jorada concern, managed by Mr. George Monnier, came to his notice during the year. Babu Protap Chandra Ghosh, zamindar of Kotechandpur, gave some trouble to the local municipality about road lands. The District Magistrate had to interfere in the dispute. In Khulna the greater zamindars are chiefly non-resident. Several instances of oppression and illegal acts on the part of the resident zamindars have been reported. Babus Ram Nath, Girindra Chandra,

and Bijoy Krishna Dutta Chaudhuri of Khararia employed *lathials* to oust a tenure-holder under the zamindars of Hogla, who also retained *lathials*. There were two cases, in one of which the men of the Khararia zamindars were convicted of rioting, and in the other the men of Raj Kiswar Chatterjee were convicted of the same offence. Debendra Nath Ghosh of Noapara employed *lathials* to coerce his tenants, and a serious riot occurred. The case ended in conviction, and the order was upheld by the High Court. A man was shot dead in an affray between Paresh Nath Dey of Amirpore, police-station Batiaghatta, a landlord, and his raiyats, as the former had taken forcible possession of certain plots of land said to have previously been held by the latter. The case resulted in acquittal. Modhu Kundu of Digraj demanded a kabuliyat from a raiyat, who refused it, having already given one to another co-sharer. Thereupon Modhu, with a number of men, attacked the raiyat, and a riot took place. The offender was convicted by the Magistrate, but acquitted by the Sessions Judge. A number of *lathials* of Guru Charan Bose, Behari Bose, and Hari Charan Bose of Khalisakhali assaulted a raiyat who had mortgaged his lands to another, and in the fight which ensued one of the mortgagee's men was killed. The case ensued in acquittal. Babu Jogendro Nath Mitra, a zamindar of Mollah, was shot dead by certain disaffected raiyats; the actual murderer has not been detected. Certain *lathials* employed by Broja Lal Nag of Bushbati attacked certain raiyats who had attorned to his rival claimant. In the affray which took place, one of the raiyats was killed and another wounded. The accused were convicted by the Sessions Judge, but the High Court set aside the conviction. The raiyats of Srimati Kamal Kumari Chaudhurani, in the Bagerhat subdivision, showed a disposition to resist the oppression of her naib. Rioting might have ensued but for the timely interference of the Deputy Magistrate, who succeeded in bringing about a reconciliation. There is a spirit of lawlessness and violence abroad in the districts of Jessore and Khulna, which appears to call for a stronger administration of criminal justice than there has been of late. From what I have observed in cases, the courts appear to require evidence of a standard which cannot be obtained where the police and the people are equally inaccurate in their statements. No attempt appears to be made to winnow out the truth among discrepancies and exaggerations, and, as I have said in a previous paragraph, murderers and other criminals escape punishment to an extent which thoroughly disheartens the police and encourages evil doers. Native Magistrates are of course influenced by what they know of the idiosyncrasies of the superior courts.

XXXVII.—GENERAL REMARKS.

145. The crops generally were good, and the condition of the cultivators and agricultural labourers consequently satisfactory. Health was also generally fair. The most important point which has attracted my attention during the year has been the violence and rioting which has occurred principally in the eastern part of the Division and in connection with agrarian disputes, and the difficulty of getting the offenders punished in the criminal courts.

REVISED RULES FOR THE GRANT OF MEDICAL CERTIFICATES TO CANDIDATES FOR EMPLOYMENT IN GOVERNMENT SERVICE, AND TO APPLICANTS FOR LEAVE ON MEDICAL CERTIFICATE OR FOR PERMISSION TO RETIRE.

MUNICIPAL DEPARTMENT,—MEDICAL.

Darjeeling, the 4th September 1895.

RESOLUTION—No. 298T.M.

READ—

A letter from the Government of Bengal, to the Inspector-General of Hospitals, Indian Medical Department, No. 669G., dated the 21st June 1872, laying down rules for conducting the medical examination of candidates for the public service under the Financial Notification of the Government of India No. 2620, dated the 10th August 1871.

Government of Bengal Notification, dated the 19th June 1874, under which the duty of conducting the medical examination of candidates for employment in the public service was, in Calcutta, required to be performed by all commissioned Medical Officers engaged in private practice.

A letter from the Government of Bengal, to the Surgeon-General for Bengal, No. 1335, dated the 20th March 1879, laying down rules for the grant of medical certificates to gazetted officers applying for leave or extension of leave in India.

A letter from the Government of Bengal, to the Inspector-General of Civil Hospitals No. 1729, dated the 11th August 1891, modifying the orders of 1879.

Government of Bengal Resolution No. 2114 Medical, dated the 4th May 1894, revising the rules for the grant of medical certificates to candidates for employment in Government service, and gazetted officers applying for leave or permission to retire from the service.

In Government Order No. 669G., dated 21st June 1872, cited in the preamble, it was laid down that, in the case of a person selected for appointment to an office conditionally on passing the prescribed medical examination, no fee was to be charged by the Medical Officer conducting the examination, but that in cases where the person to be examined had not been so selected, but was only a candidate for an office, a fee of Rs. 4 might be charged to the examinee. The duty of conducting such examinations was, in Calcutta, to be performed by the Commissioned Medical Officers in Calcutta who enjoy the privilege of private practice, and have consequently taken the place of the Presidency Surgeons under the Medical Warrant of 1867; and in the mufassal, by the Medical Officer in charge of a Civil Station. In the Notification of 19th June 1874, it was further laid down that a candidate for Government service should be furnished with a letter showing that he would be appointed to a post in the event of his being declared physically fit, and that only those so authorized should be examined without the payment of a fee. In order to distribute the duty of examination equally among the Commissioned Medical Officers at the Presidency, Heads of Departments were requested to send candidates to them in rotation.

2. The orders No. 1335, dated 20th March 1879, dealt with medical certificates granted to gazetted officers applying for leave, or extension of leave in India, and in order to secure uniformity of practice, and to prevent persons going from one doctor to another in quest of certificates, it was prescribed that all gazetted officers not stationed at the Presidency should in the first instance apply to the Civil Surgeon of the district to which they were attached, and to him only, and that officers stationed at the Presidency should apply to one of the following medical officers, according to the branch of the public service to which they belonged:—

Revenue officers	To the Superintendent, General Hospital.
Judicial officers	To the Principal, Medical College.
Other officers (including officers of the Public Works Department, Police, Registration, and other Departments).	To the Superintendent of the Eye Infirmary and Mayo Hospital.

A form of medical certificate was prescribed, and it was stated that no leave would be granted on any certificate couched in different terms.

These orders were subsequently modified in Government Order No. 1729, dated 11th August 1891, on a representation from the High Court, which brought to notice the inconvenience to which judicial officers had in some instances been put in obtaining medical certificates, owing to Presidency Surgeons considering themselves absolutely debarred from examining applicants for leave, unless specially and personally requested to do so; and it was decided that gazetted officers of the Judicial Department should apply to the Second Surgeon of the Medical College Hospital, Calcutta, for medical certificates, instead of to the Principal of the Medical College, who had been relieved of these duties, and that an officer applying to a Presidency Surgeon for a certificate should produce a letter from the head of his office addressed to the particular Presidency Surgeon. The form of letter was at the same time prescribed.

3. In March 1894 the attention of Government was drawn, in a communication from Surgeon-Major F. S. Peck, Civil Surgeon of Muzaffarpur, which was forwarded through the Inspector-General of Civil Hospitals, to certain objections to the existing rules for the grant of medical certificates. It was pointed out that in some instances candidates for Government service in the mufassal, who were unable to obtain a medical certificate of fitness from the Civil Surgeon of the district in which they resided, were in the habit of applying to the Civil Surgeon of some other district, or to a Presidency Surgeon in Calcutta, and that owing to the latter officer being ignorant of the previous history of the case, they not unfrequently succeeded in getting the required certificate. Similar difficulties, it was said, arose when officials desired to obtain medical certificates recommending the grant of leave or permission to retire from the service. The following rules were therefore laid down in supersession of previous orders:—

(1) A candidate for employment in the service of Government shall not be examined by any medical officer without a letter authorising the examination from the local head of the department in which the applicant wishes to serve. Such letter should be addressed in the mufassal to the Civil Surgeon of the district, and at the Presidency to one of the officers named in the margin.

> Professor of Materia Medica, Medical College.
> Professor of Surgery, Medical College.
> Ditto Anatomy, ditto.
> Ditto Midwifery, ditto.
> Ditto Ophthalmic Surgery, Medical College.
> Surgeon Superintendent, Presidency General Hospital.
> Superintendent, Campbell Medical School and Hospital.

(2) In the same way applicants for a medical certificate recommending leave or retirement shall ordinarily go to the Civil Surgeon of the district in which they are employed, or if they are employed in Calcutta to one of the officers referred to above.

(3) If the medical officer who signs the certificate under Articles 893 and 904 of the Civil Service Regulations is not the usual medical attendant of the applicant, he shall certify in addition that he has communicated with the usual medical attendant of the applicant before giving the certificate.

(4) In every case, if the opinion of the medical officer is unfavourable to the applicant, an appeal will lie to the Medical Board through the departmental head, actual or prospective, of the applicant, and the decision of the Board shall be final.

4. These rules have been found in practice to be defective, inasmuch as they abandon the principle of distributing departments equally among the so-called Presidency Surgeons, and give, both to candidates for Government service, as well as to officials employed in Calcutta, an absolute option in selecting their medical officer. This option has led to much trouble, and given rise to many complaints in the past, and the object of all previous orders has been to do away with it. The rules, moreover, do not meet the fairly frequent case of an officer who has taken leave in the mufassal and while on leave in Calcutta wants an extension of leave on account of illness and *vice versa*. And lastly, they include the Superintendent of the Campbell Medical School and Hospital in the list of Presidency Surgeons, although he is debarred from private practice. In order to remedy these defects, and to place the entire question of the grant of medical certificates on a clear and satisfactory footing, the Lieutenant-Governor is pleased, in supersession of all previous orders on the subject, to lay down the following rules for future guidance:—

I. The duty of granting medical certificates shall, in Calcutta, be performed by the following medical officers, who will examine only those officers who belong to the departments allotted to them :—

Designation of medical officer.	Departments allotted.
Professor of Anatomy, Medical College.	Civil Service. Bengal Medical Department.
Professor of Midwifery, Medical College.	Executive Branch of the Provincial Civil Service and Subordinate Civil Service— (a) Deputy Magistrates and Deputy Collectors. (b) Special Deputy Collectors. (c) Sub-Deputy Magistrates and Collectors.
Professor of Surgery, Medical College.	Calcutta Small Cause Court. Judicial Branch of the Provincial Civil Service, including Small Cause Court Judges, Subordinate Judges, and Munsifs. Registration Department.
Professor of Ophthalmic Surgery, Medical College.	Jail Department. Marine ,, Ecclesiastical ,, Public Works ,, Emigration ,, Meteorological ,, Botanical Gardens. Factories. Boiler Commission. Translators to Government. Telegraph Department.
Surgeon Superintendent, Presidency General Hospital.	Forest Department. Opium ,, Survey ,, Settlement ,, Wards' Estates. Police Department.
Professor of Materia Medica, Medical College.	Excise Department. Income-tax ,, Customs ,, Salt ,, Stamps and Stationery Department. Accounts ,, Education ,,

II. In the mufassal the duty of granting medical certificates shall be performed by the Civil Surgeon or Civil Medical Officer of the district, who will examine persons of all departments who belong to, or are employed in his district. He will on no account examine a person attached to another district except under the circumstances described in rule IV.

III. All officers of Government, whether gazetted or non-gazetted, who are desirous of obtaining medical certificates recommending leave, extension of leave, or retirement, must, if employed in Calcutta, apply to the medical officer to whom the department in which they are employed is allotted. If they are employed in the mufassal, they must apply to the Civil Surgeon or the Civil Medical Officer of the district in which they are employed, and to him only.

IV. Officers on leave either in Calcutta or the mufassal, who, while at a station other than that from which they went on leave, are desirous of obtaining an extension of leave on medical certificate must, if in Calcutta, present themselves for medical examination to the Medical Officer at the Presidency to whom the Department in which they are employed is allotted, and if, in the mufassal, to the Civil Surgeon or Civil Medical Officer of the district. In every such case it shall be the duty of the Medical Officer, before he grants a certificate, to ascertain particulars regarding the applicant's previous medical history, and the fact that this has been done shall be mentioned in the medical certificate.

V. Candidates for employment in Government service, either in a particular department or generally, must, in Calcutta, go for medical examination to the Medical Officer to whom the department in which they wish to serve has been allotted, or to the Professor of Ophthalmic Surgery if they seek employment generally, and to no other officer. In the mufassal, they must go to the Civil Surgeon or Civil Medical Officer of the district in which they wish to serve. In all cases, a fee of Rs. 4 will be charged to the examinee.

VI. Medical certificates granted to candidates for employment in Government service shall be in the form annexed. Those granted to officers in the service of Government, whether gazetted or non-gazetted, shall be in the form prescribed in Article 893 of the Civil Service Regulations.

VII. In every case, if the opinion of the medical officer is unfavourable to the applicant, an appeal will lie to the Medical Board, and the decision of the Board shall be final.

ORDER.—Ordered that a copy of this Resolution be forwarded to all Heads of Departments for information, and communication to officers subordinate to them.

Ordered also that a copy of this Resolution be forwarded to all Departments under this Government for information.

Ordered also that a copy of this Resolution be submitted to the Government of India in the Home Department for information.

Ordered also that this Resolution be published in the *Calcutta Gazette* for general information.

By order of the Lieutenant-Governor of Bengal,

WEATHER AND CROP REPORT.

For the week ending the 9th September, 1895.

Burdwan.—Rainfall at Sadar ·30. Weather hot and cloudy. *Aus* crop is being harvested and is estimated at about 8 annas. Prospects of *aman* rice bad through continued want of rain. Fodder and water sufficient. Condition of cattle good. Common rice sells at an average price of 16¾ seers a rupee.

Midnapore.—Rainfall at Sadar 2·00. Weather cloudy at times. Want of rain felt everywhere. Sugarcane doing well. Common rice selling from 14 to 23 seers per rupee at different subdivisions.

24-Parganas.—Rainfall at Sadar ·09. The break in the rains continues. *Aus*, jute and sugarcane crops are fair. Harvesting of *aus* and jute continues. Prospects of winter rice fair in the south, but poor in the north of the district. Transplantation going on in a few places. Health of cattle generally good. Fodder and water sufficient. Rice sells at—

	Srs.	c.	
Sadar	12 to 14	0	per rupee.
Barasat	15	0	
Basirhat	17	12½	
Diamond Harbour	16	0	

Murshidabad.—Rainfall ·24. Weather hot and cloudy. Harvesting of *bhadoi* still going on. 20 to 30 per cent. of *aman* rice land remains uncultivated. Cutting of jute commenced; outturn estimated very good. Fodder sufficient. Common rice sells at 15 seers per rupee.

Khulna.—Rainfall at Khulna ·46, Bagerhat 1·53, Satkhira 1·54. Weather hot and occasionally cloudy. Transplantation of *aman* rice continues. More rain urgently wanted. *Aus* and jute are being harvested. The grain in the ear of the *aus* is reported to be not full. Fodder and drinking water sufficient. Price of common rice varies from 15 to 19½ seers a rupee in the different subdivisions.

Dinajpur.—Average rainfall 1·45. Weather cloudy. Standing crops good. Price of common rice 14 to 15 seers a rupee. No outbreak of cattle-disease, nor any complaint for fodder or drinking water.

Rangpur.—Average rainfall 1·17. Weather hot and cloudy, but heavy rain after the end of the week. Prospects generally favourable. Transplantation of *aman* and steeping of jute in full swing. No cattle-disease. Fodder available.

Pabna.—Rainfall ·71. Weather hot and cloudy. Rivers falling. Prospects of *aman* paddy good. Common rice selling at Sadar 16 seers and Sirajganj 14 seers per rupee. Fodder sufficient.

Dacca.—Rainfall ·63. Weather hot and cloudy at intervals. Cutting of jute continues. Prospects of crops favourable. Common rice selling at 17 seers per rupee. No cattle-disease. Fodder available.

Chittagong.—Rainfall 9·67. Weather hot. Reaping of *aus* nearly over; about 10 annas outturn. Transplantation of *aman* continues; prospects generally fair. Water and fodder sufficient. Sporadic cattle-disease reported from Putia. Rice selling at 18 seers per rupee.

Patna.—Rainfall at Sadar ·32. Prospects of *bhadoi* crops favourable. *Marua* and Indian-corn being reaped. Rain wanted for the growth of paddy plants. Condition of cattle good. Fodder and water sufficient. Common rice selling from 16½ to 18½ seers per rupee.

Gaya.—Rainfall at Sadar ·35. Harvesting of *marua* and *makai* going on. Transplantation of paddy nearly finished Price of common rice at Sadar 15 seers a rupee.

Champaran.—Rainfall at Motihari 3·63. *Bhadoi* crops are being harvested and *aghani* transplanted. Prospects of both good. Cattle-disease reported.

Darbhanga.—Rainfall at Sadar 2·87, Madhubani 3·40, Samastipur 1·10. *Bhadoi* harvest commenced in places. Transplanting of paddy nearly completed. Rain wanted at Samastipur. Prices almost stationary. Fodder for cattle plentiful.

Bhagalpur.—Rainfall at Sadar ·18. Weather hot and cloudy. *Bhadoi* being cut; outturn good. Prospects of *aghani* continue good generally. In portions of the district further rain is soon wanted. Price of common rice 18 seers 15 chitaks per rupee. Fodder and water sufficient.

Purnea.—Rainfall at Sadar ·44. Harvesting of *bhadoi* paddy and jute still going on. Transplantation of *aghani* paddy nearly finished. Cattle-disease in Kasba thana. Fodder and water sufficient. Common rice selling at 21 seers per rupee.

Cuttack.—Rainfall ·94. Weather seasonable. Early *beali* rice being reaped. Late *beali* maturing. Weeding of *sarad* rice in progress. Condition of cattle good. Fodder sufficient. Common rice sells at—

	Srs.	c.	
Cuttack	21	0	per rupee.
Jajpur	22	5	
Kendrapara	26	4	
Banki	22	5	

Hazaribagh.—Rainfall at Sadar ·03, Giridi 1·27. Heavy rain urgently required for rice crops. *Bhadoi* being harvested with good results generally. Fodder abundant. Price of common rice at Sadar 16 seers and Giridi 15 seers per rupee.

General Summary.—Fine weather, with slight showers, continued throughout the week, except in the east of the province, where there was heavy rain. Transplantation of winter rice is nearly finished, but in many districts more rain is required for the growth of the plants. In the Burdwan and Presidency Divisions considerable portions of rice land remain uncultivated owing to continued want of rain. Early rice and jute are still being harvested, and the *bhadoi* crops in Bihar and Chota Nagpur. Sugarcane is doing well. No cattle-disease is reported except from Purnea and Champaran. The price of common rice continues almost stationary.

By order of the Lieutenant-Governor of Bengal,

REVENUE DEPARTMENT,
The 10*th September*, 1895.

C. E. BUCKLAND,
Secretary to the Government of Bengal.

STATISTICAL DEPARTMENT,
The 7th September, 1895.

C. E. BUCKLAND,
Secy. to the Govt. of Bengal.

Abstract of the results of Meteorological Observations taken at the Alipore Observatory in the month of August 1895.

	Inches.	Date.	Hour.
The mean pressure of the month	29·582		
The average pressure of August from 24 years' registers ...	29·598		
The highest pressure in the month	29·697	29th	10
The lowest pressure in the month	29·388	6th	16
The range of pressure	0·309		
	Hours.		
The total number of hours of bright sunshine during the month	114·4		
The maximum possible number of hours of sunshine ...	398·4		
	ϴ		
The mean temperature of the month	82·6		
The average temperature of August from 24 years' registers	83·1		
The highest temperature in the month	91·4	19th	
The lowest temperature in the month	74·0	19th	
The range of temperature during the month	17·4		
The mean daily range of temperature	9·2		
The greatest range of temperature in one day	17·4	19th	
	Per cent.		
The mean humidity of the month	88		
The average humidity of August from 24 years' registers ...	86		
	Inches.		
The mean vapour tension of the month	0·984		
The average vapour tension of August from 9 years' registers	1·002		
The mean cloud proportion of the month	7·52		
The average cloud proportion of August from 18 years' registers	8·01		
	Inches.		
The total rainfall of the month	11·84		
The total rainfall indicated by a Beckley's self-registering rain-gauge (mouth of the gauge about 52 feet above the ground)	10·77		
The average fall of August from 48 years' registers ...	13·94		
The greatest fall in 24 hours	1·92	17th	
	Days.		
The number of rainy days in the month	25		
The average number of rainy days in August from 24 years' registers	25		
The mean maximum equilibrium temperature of solar radiation during the month	ϴ 144·3		
The mean difference of sun and air temperatures	57·2		
The greatest sun temperature	157·2	10th	
The greatest excess of sun over air temperature	66·8	10th	
The mean temperature of the nocturnal radiation thermometer on woollen cloth	76·4		
The mean depression of the nocturnal radiation thermometer below the minimum air temperature at 4 feet above the ground	1·7		
The greatest depression of the nocturnal radiation thermometer below the minimum air temperature	3·5	25th	
	Miles.		
The mean movement of the wind per day	83·5		
The greatest movement of the wind in one day	249·0	7th	
The greatest movement of the wind in one hour	20·0	7th, 8 to 9 A.M.	

The number of hours with winds from each of the 8 points—

N. 3, N.E. 27, E. 97, S.E. 195, S. 191, S.W. 84, W. 42, N.W. 7, Calm 98.

The results of observations at the Alipore Observatory are not rigorously comparable with the registers of past years (at the Park Street Observatory). The barometer is about 3 feet higher at Alipore, and, other things being equal, reads therefore ·003 lower. The diurnal range of temperature is also greater at Alipore, and the mean temperature apparently about 0·6 higher; and, finally, the thermometer which furnished the record of temperature at the Surveyor-General's Office during 20 years and upwards is found to read 0·6 higher than the Kew standard thermometer, which is the standard of reference at the present Observatory.

J. H. GILLILAND,
For Meteorological Reporter to the Govt. of India.

METEOROLOGICAL OFFICE, INDIA;
Calcutta, the 9th September 1895.

Meteorological Report of the Province of Bengal

Meteorological Division.	Division.	District.	Representative station.	STATION OBSERVATIONS. — Air Pressure. — Mean barometric height, 8 A.M., reduced to 32°.	Mean reduced to sea-level and constant gravity, lat. 45°.	Variation from mean.	Wind. — Prevailing direction.	Mean wind velocity.	Temperature. — Highest.	Date.	Lowest.	Date.	Mean maximum temperature.	Mean minimum temperature.	Mean daily temperature.

* Mean of 6 days.

Explanation.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period for the ... The *humidity* of the atmosphere is expressed at percentage, saturated air being represented by 100. A clear sky is denoted by 0 and an overcast sky by 10. The mean at the numerical means or average of the rainfall in that district determined from the returns sent in by the subdivisional stations for the period in question

for the week ending Saturday, the 7th of September 1895.

Variation from normal mean.	Mean 8 A.M. temperature.	Average humidity at 8 A.M.	Average cloud amount at 8 A.M.	Rainfall of week at observing station.	DISTRICT OBSERVATIONS. Of week. Mean for district.	Of week. Normal mean.	Of week. Average number of rainy days.	Of week. Normal number of rainy days.	Rainfall. Since 1st of month. Mean for district.	Since 1st of month. Normal mean.	Since 1st of month. Variation.	Since 10th May 1895. Mean for district.	Since 10th May 1895. Normal mean.	Since 10th May 1895. Variation.	DISTRICT.

Explanation.—... indicates that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns are wanting, the corresponding spaces in the total rainfall columns are left blank. With reference to the column of rainy days, the definition of a rainy day is when at least ·10 inch of rain has fallen.

CALCUTTA, *the 10th September 1895.*

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL,* AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM FOR THE WEEK ENDING, 8 A.M., SATURDAY THE 7TH OF SEPTEMBER 1895.

THE chief features of the weather arrangements over Bengal for the week just past have been the absence of cloud and rain and the consequent high temperature. It will be remembered that at the end of the previous week a depression was developing with its central part over the south of Burmah, and that it was beginning to control the winds over a wide area. Light easterly winds were general in Bengal, except in the west of the province, and the interaction of the westerly winds in the western districts, with the more general easterly system, led to local disturbances and fairly general rain in Bihar and Chota Nagpur. As the depression moved westward across the Bay, the westerly winds in Bihar and Chota Nagpur changed to east and rainfall then almost entirely ceased. The depression, while in the east of the Bay, was diffused and shallow, but as it was moving in a westerly direction towards the coast of the Circars, there was a likelihood of its developing into a more serious disturbance during the days that must elapse before it reached the opposite coast. The changes, however, that occurred at the coast stations while the disturbance was in the centre of the Bay were opposed to the deepening of the depression, though in the light of after events, it appears that they led to the concentration of the disturbance into a small storm of considerable intensity. The changes referred to above began as a rapid rise of pressure in Bengal on the 2nd, and a brisk rise over the north of the Bay, after which the differences from normal readings varied from excess of ·07 inch in Bihar and North Bengal to defect of ·1 inch in the south-east of the Bay. The rise continued with moderate rapidity over the whole of the Bay area except the south-west, on the 3rd, judging by the changes at the coast stations, and the resulting distribution then appeared to be almost normal. The changes near the centre of the disturbance must have been very different, as it continued to move steadily in a westerly direction, and on the 5th was near the part of the coast between Cocanada and Vizagapatam. The centre crossed the coast near Cocanada on the afternoon of the 5th, and the storm was of considerable severity between Vizagapatan and Masulipatam. The lowest barometric reading reported was 29·28 inches from Cocanada, taken at 2 P.M. on the 5th, and the highest wind velocity was 40 miles an hour at the same place. After the centre crossed the coast, a rapid rise of pressure set in, and by 8 A.M. on the 6th the distribution in that part of the Bay was very nearly normal. The stormy weather rapidly moderated, but the after effects of the disturbance were felt for some days in strong south-westerly winds in the north-west of the Bay and moderately strong winds over Bengal.

The rapid rise of pressure on the 2nd in Bengal gave rather high readings over the province, and as changes were small during the remainder of the week, the excess never disappeared; but after the disturbance left the Bay on the 5th, the rapid rise of pressure over the area as far north as Orissa, with a slow fall in Assam and North Bengal, led to important changes. A faint low pressure area formed in the north-east and an indraught of air immediately took place in that direction. From being easterly over the whole province, the wind changed to west or south-west, and the moist current set up over the Bay by the storm moved up the eastern side of the province into Assam and North Bengal. Up to the end of the present week, however, the results of these changes were not marked. Showers became more frequent in East Bengal, and the heaviest fall of rain reported was 4 inches at Sibsagar. At the same time very dry weather prevailed in the western and central districts, and temperature was high over the whole province.

Pressure has been above the normal throughout the week, except on the 1st, when there was a small defect. The most important change in Bengal was the rapid rise on the 2nd, but near the centre of the storm area in the Bay changes were very rapid. The rise at Cocanada between 2 P.M. on the 5th and 8 A.M. on the 6th was about ·35 inch. The mean pressure for the week is above the normal at all stations by amounts varying from ·02 inch in Assam to ·05 inch in part of Bihar.

Temperature.—Owing to the comparatively cloudless skies and absence of rainfall, temperature has been generally high during both the day and the night. Mean excess is 1°·2 in Chota Nagpur, 1°·4 in Bihar, 1°·6 in Assam and Orissa, 2° in South-West Bengal, 2°·3 in East Bengal, and 2°·6 in North Bengal.

Rainfall.—Showers were fairly numerous in the western districts on the 1st and 2nd and latterly in East and North Bengal and Assam, but fine weather has been very general throughout the week. The falls are, in consequence, much below the normal in all districts, but especially in East and North Bengal. The average fall for Bihar, Orissa, and Chota Nagpur is 1·35 inches, rather more than half the normal, which is 2·5 inches. In North Bengal it is about a quarter of the normal, in East Bengal a fifth, and in South-West Bengal less than a third.

The following table gives the summary of the temperature and rainfall data of each of the six meteorological divisions of the province for the week ending Saturday, the 7th of September 1895 :—

Meteorological Divisions.	Temperature.						Rainfall.									
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of month.		Since 16th May 1895.

	Inches.
The total fall of rain from 1st to 7th September 1895	0·28
The average fall of the corresponding period for 24 years, Surveyor-General's Office	2·59
The total fall from 1st January to 7th September 1895	33·28
The average fall of the corresponding period for 24 years, Surveyor-General's Office	50·79

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; d, drizzling rain; p, passing temporary showers; ⌓ dew.

Printed at the Printing Office, and published by the Book Depôt, of the Bengal Secretariat, Writers' Buildings, in the City of Calcutta, 11th September 1895.

continued to do some good work in the way of affording help to widows and orphans. *Hari Sabhas*, Hindu religious institutions, have been started in several places where religious books are read and hymns are sung. The pandits of Nadia have organized an association for the advancement of Sanskrit learning and for the discussion of philosophical, religious, and social questions, under the name of the College of Pandits of Nadia. The question of calf vaccination was laid before the pandits at their last annual conference during the Christmas holidays, and the pandits gave it as their opinion that there was no religious objection to using calves for vaccination. In Murshidabad there are two other institutions, viz., the "Murshidabad Muhammadan Association" and the "Anjumani." The former deals with matters connected with the intellectual and moral improvement of Muhammadans, and the latter is reported to be a purely religious institution maintained for the help of the poor. In Khulna the only social institutions deserving of notice are the Jessore and Khulna *Sunmilani*, which looks after zanana education and the physical and moral training of boys, and the *Sripur Hitasadhini Sabha*, which maintains a charitable dispensary in Sripur.

THE PUBLIC PRESS.

141. In the 24-Pargannas the total number of presses was 30, against 27 in the previous year. Six presses were closed and nine opened during the year. Of the presses, 1 is owned by Government, 1 by a European, 1 by a Native Christian, 10 by Muhammadans, and 17 by Hindus. The Horticultural Press, the Bharati Press, and the Suptahik Sambad Press continued to issue periodicals, called *Sanskrit Chandrika*, the *Bharati*, and the *Anader Patrika* respectively. Another periodical, called *Bhishuk Darpan*, has been newly started during the year, and is issued by the Bhishuk Darpan Juntra. The Herald Press issued a paper called the *Indian Christian Herald*. Two newspapers—the *Railway Guardian* and the *Power*—have sprung up during the year. The former is issued by the Railway Press, and the latter by the Power Steam Printing Works, which also issues two other papers—the *Banganibasi* and the *National Guardian*. The circulation of these papers and periodicals is confined to a limited number of people. A monthly Bengali magazine, named *Prabha*, printed in Calcutta, is published at Nila, a village in the subdivision of Diamond Harbour. It deals with literary, and not with political or administrative subjects. In Nadia the number of presses was reduced from three to two. No daily, weekly or other periodical paper is issued from any of these presses. In Murshidabad there were 11 presses as against 10 in the previous year. Three weekly newspapers—the *Pratikar*, the *Pratinidhi*, and the *Hitaishi*—were published in this district during the year. They are moderate in tone and limited in circulation. A monthly paper, called the *Nandi*, a comic paper, was started during the year, but after two or three issues it ceased to exist. In Jessore there were four presses, a new press having been started during the year. Three of them execute miscellaneous work, while the fourth, "The Chikitsa Prabash Press," continued to issue a weekly journal, called the *Samaj-o-Sahitya*, and vernacular books on hygiene. As in the previous year, there was only one press in Khulna. It executes job work. No newspaper is issued from it. The vernacular journal called the *Ghostok*, started in the preceding year by a local Native Christian, continued to be printed and published in Calcutta. It will thus be seen that the newspapers and periodicals published in the districts of this Division are generally of little importance and small circulation. As regards the public press generally, the few who read newspapers in the several districts of this Division read the papers published in Calcutta. Of papers published in English, the *Statesman*, the *Indian Mirror*, the *Amrita Bazar Patrika*, the *Hindu Patriot*, and the *Bengalee* have the largest circulation among the native community. The leading vernacular papers are the *Bangavasi*, the *Banganivasi*, the *Hitavadi*, the *Sanjibani*, the *Samaya*, and the *Sudhakar*. Of these, the *Bangavasi* and the *Banganivasi* are the organs of the orthodox Hindus. The *Hitavadi* is more liberal as regards social matters, and is a supporter of the Congress The *Samaya* advocates the cause of the raiyat and social reform. The *Sanjivani* is the organ of the Brahmo Somaj. The *Sudhakar* is a Muhammadan paper devoted to the cause of the Musalmans. The *Bangavasi* has in some districts found its way among the shopkeepers and the others of the

lower class who know a little of reading and writing. My remarks on public feeling apply to the public press, with which the people at large may be said to have nothing to do. though I cannot but think that there is a danger of the seditious and malignant misrepresentations of the native press gradually filtering downwards and leading the discontented among the people to believe that the British Government is their enemy.

XXXV.—SUBORDINATE EXECUTIVE ESTABLISHMENT AND CHARACTER OF OFFICERS.

142. Seventeen Sub-Deputy Collectors and thirteen kanungos were employed in this Division during 1894-95, as shown below:—

	Sub-Deputies.	Kanungos.
24-Parganas	5	3
Nadia	4	1
Murshidabad	3	4
Jessore	3	3
Khulna	2	2
	17	13

143. Of the five Sub-Deputy Collectors in the 24-Parganas, Babu Amrita Lal Gupta worked for a few months only, and Babu Adyata Charan De is specially employed as Superintendent of the Port Canning estate. Since the middle of February, Babu Jotendra Nath Gupta has been employed exclusively on settlement operations. One of the Sub-Deputy Collectors of Nadia, Babu Charu Chandra Kumar, was transferred from this Division early in the year. Another Sub-Deputy Collector, Babu Hem Chandra Mitter, went away on leave on 21st September 1894, and returned to duty on the 4th March 1895. So, properly speaking, only two Sub-Deputy Collectors worked in this district throughout the year, and one for half the year. Babu Hara Chandra Ghose, who was a Sub-Deputy Collector in Murshidabad, has been promoted to be a Deputy Collector. There was one Sub-Deputy Collector at Khulna for some months, and one in the Satkhira subdivision for the whole year. The Sub-Deputy Collectors and kanungos were employed as usual on measurement, settlement, collection of rent from khas mahals, and other miscellaneous and outdoor duties, but they greatly prefer sedentary work in offices, and it requires constant goading and supervision to keep them on tour. The Sub-Deputy Collectors at some of the subdivisions were employed in criminal judicial work, which I think interferes unduly with their revenue work. The remarks of District Officers about the qualifications of the Sub-Deputy Collectors will be found with mine in the statement showing the character of gazetted officers appended to this report. Of the kanungos, Babu Rash Behary Bose, attached to Basirhat, and Babu Nritya Gopal Sanyal, at Krishnagar, have not been favourably reported on. The latter officer is lazy and perfunctory in his work.

XXXVI.—CONDUCT OF ZAMINDARS.

144. In the 24-Parganas most of the zamindars are non-resident, and there is not much sympathy between them and their raiyats, in whose welfare they usually take no personal interest. The Mookerjees of Goberdanga, and Babu Prosad Das Dutt, who has a zamindari in the Diamond Harbour subdivision, take an interest in the welfare of their tenants, and the zamindars of Goberdanga maintain a school and a dispensary. In the 24 Parganas, Babu Rajkishore Mandal is generally reported to be a tyrannous landlord. Debendra Nath Bose, son of Dwarka Nath Bose, the zamindar of Metakhira abad, with a number of *lathials*, attacked the cutcherry of a tenure-holder in the abad, and because, in the affray which took place, some of the assailants were wounded, a case was brought against the defending party, which resulted in acquittal. The landlord appears to have been the guilty party. In Nadia the zamindars, with a few exceptions, have been quiet and law-abiding. There have been several criminal cases between Nafar Chandra Pal Chaudhuri and Ram Gopal Chetlangi, regarding the possession of certain chars, and an addi-

REPORT ON THE STATE OF THE SALT MARKET FOR THE SECOND QUARTER OF 1895-96.

No. 1042B., dated Calcutta, the 14th November 1895.

From—E. H. WALSH, ESQ., Offg. Secretary to the Board of Revenue, L.P.,

To—The Secretary to the Government of Bengal, Financial Department.

SALT.

THE HON'BLE MR. D. R. LYALL, C.S.I.

I AM directed to submit the following report on the state of the salt market for the second quarter of 1895-96, comprising the months of July, August, and September 1895.

2. The quantity of salt of every description cleared during the quarter under report amounted to 26,12,380 maunds against 28,04,085 maunds in the previous quarter and 27,54,188 maunds in the corresponding quarter of the previous year; and the net amount of duty levied thereon was Rs. 61,10,917 against Rs. 66,34,015 in the previous quarter and Rs. 63,79,206 in the corresponding quarter of the previous year. In all cases fractions are omitted.

3. The quantity of locally-made salt removed from the golas in Orissa during the quarter under review and the quantity which remained in store at the close of the quarter are shown in table I:—

TABLE I.

1	2
	Puri.
	MDS.
Balance at the close of the previous quarter ...	2,73,170
Manufactured or added during the quarter ...	59,644
Total ...	3,32,814
Sales during the quarter	22,180
Wastage	2,778
Total ...	24,958
Balance at the close of the quarter	3,07,856

The total sale of locally-made salt during the quarter under review amounted to 22,180 maunds against 17,932 maunds in the previous quarter, and 12,023 maunds in the corresponding quarter of the previous year. Duty was paid during the quarter on the full amount sold.

4. The subjoined table shows in detail the importations into the port of Calcutta and the total clearances of sea-imported salt during the quarter under review compared with the figures of the corresponding quarters of the previous two years:—

TABLE II.

WHENCE IMPORTED.	1893-94. Second quarter.		1894-95. Second quarter.		1895-96. Second quarter.

5. Table III shows the quantity of the sea-imported salt remaining in the warehouses at the close of the quarter under review compared with the results of the previous four quarters:—

TABLE III.

WHERE STORED.	Second quarter of 1894-95.	Third quarter of 1894-95.	Fourth quarter of 1894-95.	First quarter of 1895-96.	Second quarter of 1895-96.
1	2	3	4	5	6
	Mds.	Mds.	Mds.	Mds.	Mds.
Sulkea Salt golas	26,25,575	29,61,285	28,77,803	25,35,892	27,50,366
Kidderpore Docks do.	3,66,559	5,62,578	5,22,579	4,59,317	3,51,571
Chittagong Government do.	1,18,723	1,45,109	1,50,165	83,141	1,54,211
Khulna (Bonded Warehouse of Messrs. Turner, Morrison & Co.)	......	......	1,150	584	1,564
Balasore (ditto)	......	......	1,300	2,231	1,837
Total ...	31,10,857	36,68,972	35,52,997	30,81,185	32,59,549

The stock in bond at the close of the quarter has risen by a little above 1¾ lakhs of maunds over that at the close of the previous quarter, and the shipments of salt, noted in paragraph 9, also show a marked advance.

6. The despatches of salt from Calcutta by water and the three railways passing the several pass stations into the interior of the country both east and west of the river Hooghly, as well as the despatches by steamers and flats during the quarter under review and the corresponding quarters of the previous two years, are shown in the table below:—

TABLE IV.

PERIOD.	BY WATER.					BY RAIL.			BY STEAMERS AND FLATS.

8. The quantity of saltpetre-salt removed from the refineries on payment of duty amounted to 5,033 maunds against 12,557 maunds in the previous quarter and 6,238 maunds in the corresponding quarter of the previous year.

9. The shipments of Liverpool salt for the port of Calcutta according to published market reports were as follows :—

	Tons.
July	33,380
August	28,450
September	10,990
Total ...	72,820

Four vessels are also reported to have arrived at the port of Calcutta during the quarter under review with salt from Hamburg, amounting approximately to 11,380 tons.

10. Table V shows the average wholesale price per 100 maunds of Liverpool and other descriptions of salt during each fortnight of the quarter :—

No transactions of sea-imported salt have been reported for the quarter from the ports of Cuttack and Puri.

WEATHER AND CROP REPORT.

For the week ending the 18th November, 1895.

Burdwan.—No rain. Weather very hot for the time of year. *Rabi* crops are being sown. Prospects of winter rice crop bad. Sugarcane doing well. Fodder and water sufficient. Condition of cattle good. Common rice sells at an avera ge price of 15½ seers a rupee.

Midnapore.—Rainfall nil all over the district. Prospects of paddy continue good in the Sadar, Contai, and Tamluk subdivisions. In Ghatal the outlook is gloomy. Indigo is being sown. Sugarcane doing well. Fodder and water sufficient. Rice is selling at—

	Srs.	
Sadar	16	per rupee.
Contai	22	
Tamluk	14 to 16	
Ghatal	14 or 15	

24-Parganas.—Rainfall nil. Weather seasonable. Prospects of *aman* crop unfavourable, except in low lands and in the south of the district. Sugarcane doing well. Sowing of *rabi* crops going on. Fodder and water sufficient. No cattle-disease. Rice sells at—

Sadar ... ... 12 to 14 seers per rupee.

	Srs. c.	
Barasat	13 12	per rupee.
Basirhat	15 3¾	
Diamond Harbour	16· 0	

Murshidabad.—No rain. Weather seasonable. Condition of *kalai* good. Sowing of indigo and *rabi* crops still continues. State of *aman* not good; estimated outturn eight annas. Rain much wanted. Cutting of sugarcane going on. Fodder and water sufficient. Common rice sells at 14 seers per rupee.

Khulna.—No rain. Weather warm. Sowing of *rabi* crops still going on at Sadar and Satkhira. Prospects of crops good. Fodder and water sufficient. No cattle-disease. Prices of common rice —

	Srs.	
Sadar	17 to 21	per rupee.
Bagerhat	18	
Satkhira	16	

Dinajpur.—No rain. Mornings and evenings cool. Hot during day. Prospects of standing crops continue good. Outturn of winter rice is estimated to be 18 annas. Common rice selling from 13 to 15 seers per rupee. No cattle-disease reported. Fodder and water sufficient.

Rangpur.—Rainfall nil. Weather seasonable. Washing of jute finished. Harvesting of *aman* commenced in places. Sowing of winter crops going on. Rain wanted for *aman* crop. Prospects generally good. Common rice selling from 12 to 14 seers per rupee. Fodder sufficient.

Pabna.—Rainfall nil. Weather hot at day, but cool at night. Prospects of *aman* good, but more rain is wanted. Common rice sells at Sadar 16 seers and Sirajganj 14 seers per rupee.

Dacca.—Rainfall ·18. Weather sultry. Prospects of standing crops fair. Fodder available. No cattle-disease. Common rice sells at 18 seers per rupee.

Chittagong.—Rainfall ·10. Weather hot. Harvesting of *aman* continues. Prospects of winter rice indifferent. *Rabi* sowings in progress. Water and fodder plentiful. Rice selling at 17 seers per rupee.

Patna.—No rain. Paddy on high lands suffering for want of rain. Harvesting of black paddy commenced in places. *Rabi* and poppy still being sown; the latter had to be resown in many cases owing to the season being abnormally hot. Common rice selling from 16 to 21 seers per rupee. Condition of cattle good. Fodder and water sufficient.

Gaya.—No rain. Prospect of winter rice crop continues as bad as before. *Rabi* tolerably fair. About ⅞ of poppy sown; germination fair. Price of common rice at Sadar 14½ seers against an average of 16½ seers per rupee.

Champaran.—No rain. *Rabi* being sown. *Aghani* being harvested with an estimated outturn of 12 annas. Paddy on high lands suffered for want of rain. Small-pox among cattle is reported from thana Bagaha. Fodder and water for cattle sufficient.

Darbhanga.—No rain. Rice crop approaching maturity. Rain badly wanted for *rabi* sowings. Prices almost stationary. Fodder sufficient.

Bhagalpur.—No rain. Weather continues warm during day. Winter rice has nearly ripened and reaping commenced in some places; the yield is not expected to exceed 10 annas. *Rabi* sowings continue. Sugarcane is being pressed. Common rice sells at 17 seers 10 chitaks per rupee. Fodder and water sufficient.

Purnea.—Rainfall ·08. Paddy on high land suffering badly for want of rain. *Rabi* sowings going on and prospects fair. Fodder and water sufficient. Cattle-disease reported from Sadar thana. Common rice selling at 16 to 21 seers per rupee.

Cuttack.—Rainfall nil. Weather seasonable. Harvesting of *laghu sarad* continues. *Guru sarad* maturing. Condition of cattle good. Fodder sufficient. Common rice sells at—

	Srs.	c.	
Cuttack	23	10	per rupee.
Jajpur	29	14	
Kendrapara	31	8	
Banki	31	8	

Hazaribagh.—Rainfall nil. Weather cloudy. Harvesting of paddy commenced in places; prospects are not as good as expected. *Rabi* prospects good. Poppy sowings in progress. Sugarcane doing well. Fodder and water sufficient. Common rice selling at 12 to 14 seers per rupee.

General Summary.—There was light rain in Dacca and Chittagong during the week, but practically none in the other reporting districts. Except in Northern and parts of Eastern Bengal and in Orissa, the state of the winter rice crop is not satisfactory owing to the early cessation of the rains. The sowing of indigo in Lower Bengal and of the *rabi* crops in Bengal and Bihar has commenced. In Patna district the first sowings of poppy have failed from the unusual heat, and in Darbhanga the *rabi* is suffering from a lack of moisture. Sugarcane is doing well, and the pressing has begun in some districts. Cattle-disease is reported from Champaran and Purnea; elsewhere the cattle are in good condition. The price of common rice is generally steady.

By order of the Lieutenant-Governor of Bengal,

REVENUE DEPARTMENT,
The 19th November, 1895.

C. E. BUCKLAND,
Secretary to the Government of Bengal.

Explanation.—... indicates that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns are wanting, the corresponding spaces in the total rainfall columns are left blank. With reference to the column of rainy days, the definition of a rain day is when at least ·10 inch of rain has fallen.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL,* FOR THE WEEK ENDING, 8 A.M., SATURDAY THE 16TH OF NOVEMBER 1895.

FINE settled weather has prevailed throughout the week, but with one very marked peculiarity in the unusually high temperature for the season of the year. The pressure arrangement, though not differing much from the normal over the province, has not shown very decidedly the features characteristic of the cold weather. This is due to the rather large pressure excess in the south of the Bay, in consequence of which the winds instead of being northerly have been either irregular or with a tendency to become southerly. In the early part of the week, when in addition to the excess in the south, there was defect in the western districts of Bengal, the wind circulation, though very light, resembled in its general features that which obtains during the south-west monsoon period; that is, directions were south or south-west in Lower Bengal, and easterly in the northern districts. The differences from the normal in pressure at that time varied from excess of ·05 inch in the south of the Bay to defect of ·07 inch in the west of Bihar. The variation in mean temperature ranged from defect of 3° in Arakan and part of East Bengal to excess of 5° in the west of Bihar.

Pressure rose slowly for some days; the defect in temperature at eastern stations almost entirely disappeared and the wind circulation in Bengal remained southerly, but over the Bay winds were northerly though light. In the middle of the week pressure fell slowly, then a brisk rise followed on the 14th, and readings were over 30 inches in the northern and western districts. Though, with the increasing pressure in the north-western districts, northerly winds became more general, temperature remained very high, and on the 14th excess in mean temperature was at many stations over 5°. The brisk rise of pressure continued on the 15th, and readings on that day varied from 30·09 inches in North Bengal to a little under 30 inches in the south-west of the Bay. As this arrangement showed a gentle gradient from north to south over the whole area, the northerly winds which hitherto had been fairly regular over the Bay set in at the inland stations also, but with very little strength. Temperature remained practically unchanged, excess averaging 5° except in East Bengal, where it was about 3°. On the 16th, the last day of the week, the pressure distribution had not changed, but temperature had increased over the western half of the province, where excess was about 6°.

Owing probably to the southerly winds in Lower Bengal, humidity was high in the eastern and northern districts. The sky was more cloudy in East and North Bengal than is usual in the middle of November, and a few light scattered showers fell chiefly in the Darjeeling hills and in parts of East Bengal. In the western districts the skies were cloudless with an entire absence of rainfall.

Pressure, as stated above, was very nearly normal over the province. At first there was a small defect, but the steady rise resulted in a moderate excess towards the end of the week. Mean pressure is in excess everywhere by small amounts varying up to ·04 inch in East Bengal.

Temperature having been high throughout the week both during the day and the night, there is a large excess in mean temperature in all districts. For the large divisions average excess varies from 2°·2 in East Bengal to 5°·1 in Bihar.

Table showing the excess or defect of the actual mean temperature from the normal for the week ending Saturday, the 16th November 1895.

	Normal mean maximum temperature for the week ending 16th November.	Actual mean maximum temperature for the week ending 16th November 1895.	Variation of actual mean from the normal.	Normal mean minimum temperature for the week ending 16th November.	Actual mean minimum temperature for the week ending 16th November 1895.	Variation of actual mean from the normal.	Normal mean daily temperature for the week ending 16th November.	Actual mean daily temperature for the week ending 16th November 1895.	Variation of actual mean from the normal.

Rainfall.—Showers fell in the Darjeeling hill districts during the greater part of the week and at a few scattered stations in East Bengal. In the other districts no rainfall occurred. The average fall in East Bengal is ·16 inch and in North Bengal ·14 inch.

The following table gives the summary of the temperature and rainfall data of each of the six meteorological divisions of the province for the week ending Saturday, the 16th of November 1895 :—

Meteorological Divisions.	Temperature.						Rainfall.									
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of month.		Since 16th October 1895.

The average fall of the corresponding period for 24 years, Surveyor-General's Office	0·29
The total fall from 1st January to 16th November 1895	39·38
The average fall of the corresponding period for 24 years, Surveyor-General's Office	65·14

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h., 10h., 16h. and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

△, dew; ≡, fog.

CONTENTS.

RESOLUTION ON THE ANNUAL GENERAL ADMINISTRATION REPORT OF THE RAJSHAHI DIVISION FOR THE YEAR 1894-95.

GENERAL DEPARTMENT—MISCELLANEOUS.

Darjeeling, the 11*th September* 1895.

RESOLUTION—No. 258T.G.

THE Lieutenant-Governor directs the publication of the Commissioner's Report on the General Administration of the Rajshahi Division for the year 1894-95, for general information.

2. The following passages in the Report contain the expression of Mr. Nolan's views on some important points, to which His Honour desires to call the attention of officers:—

Paragraph 5.—Mr. Nolan's condemnation of the theory that it is no part of the business of a Magistrate to discover the truth of a case which he is trying: it may be presumed that he means "otherwise than by recording the depositions of witnesses."

Paragraph 16.—The remarks of the Deputy Commissioner of Jalpaiguri on the material condition of the people.

Paragraph 21.—The advantage to the tea planting industry in the Western Duars of the absence of a Labour Law.

Paragraphs 39 *and* 40.—The working of the Regular Police and the Village Chaukidars.

Paragraph 65.—The good effect of the system of rent receipts prescribed by the Bengal Tenancy Act.

Paragraph 68.—The relations between landlords and tenants.

Paragraph 100.—The importance of adequate expenditure on the maintenance of ferries.

3. The Lieutenant-Governor regrets to observe that the head-quarters of the Rangpur district were not inspected during the year. In other respects the amount of touring was sufficient.

4. The Annual General Administration Report is not the place for a currency discussion, but His Honour thinks it right to observe that he does not share Mr. Nolan's views, expressed in paragraphs 19 and 25 of the Report, as to the rise which has taken place of late years in the prices of agricultural produce being due to the fall in the gold-price of silver.

By order of the Lieutenant-Governor of Bengal,

C. E. BUCKLAND,

INDEX.

No. 1021Rct., dated Darjeeling, the 26th June 1895.

From—P. NOLAN, Esq., Commissioner of the Rajshahi Division,

To—The Secretary to the Government of Bengal, General Department.

I HAVE the honour to submit the General Administration Report of the Rajshahi Division for the year 1894-95.

I.—CHARGE.

(a) Division.

2. I was in charge of the Division during the year, except that Mr. H. C. Williams officiated for me during my absence for three months on privilege leave.

(b) Districts.

3. The subjoined statement gives the names of the officers who were in charge of the districts of the Division during the year under report:—

Districts.	Officers.	For what period (both days inclusive).
1	2	3
Rajshahi ...	Mr. J. C. Price	From 1st April to 9th December 1894.
	" E. H. C. Walsh ...	" 10th December 1894 to 31st March 1895.
Dinajpur ...	" A. C. Tute	" 1st April to 18th June 1894.
	" B. K. Mullick ...	" 19th June 1894 to 11th January 1895.
	" C. A. Samuells ...	" 12th January to 2nd March 1895.
	" L. Palit	" 3rd to 31st March 1895.
Jalpaiguri ...	Lt.-Col. H. Boileau ...	" 1st to 11th April 1894.
	Mr. R. H. Renny ...	" 12th April to 4th September and from 3rd October 1894 to 31st March 1895.
	" D. Sunder	" 5th September to 2nd October 1894.
Darjeeling ...	" R. T. Greer ...	" 1st April 1894 to 31st March 1895.
Rangpur ...	" E. B. Harris ...	" 1st April to 23rd July and from 25th October 1894 to 31st March 1895.
	" F. N. Fischer ...	" 24th July to 24th October 1894.
Bogra ...	" A. E. Harward ...	" 1st to 9th April 1894.
	" H. G. W. Herron	" 10th April to 3rd August 1894.
	" C. A. Bell	" 4th August to 22nd December 1894.
	" U. C. Batavyal ...	" 23rd December 1894 to 31st March 1895.
Pabna ...	Kumar Gopendra Krishna Deb.	" 1st April to 25th June 1894.
	Mr. H. E. Ransom ...	" 26th June 1894 to 31st March 1895.

(c) Subdivisions.

4. The statement below gives the names of the officers who were in charge of subdivisions in the several districts during the year 1894-95:—

Districts.	Subdivisions.	Officers.	For what period (both days inclusive).
1	2	3	4
Rajshahi ...	Nator	Babu Jnandra Nath Lahiri ...	From 1st April to 11th November 1894.
		Mr. S. C. Mukerjee ...	" 12th November 1894 to 31st March 1895
	Naugaon ...	Babu Ganendra Nath Pal ...	" 1st April to 29th July 1894.
		" Gossain Dass Dutt ...	" 30th July 1894 to 31st March 1895.
Dinajpur ...	Thakurgaon ...	" Purna Chandra Gupta	" 1st April 1894 to 31st March 1895.
Jalpaiguri ...	Alipur ...	" Nibaran Chandra Ghattak.	Ditto ditto
Darjeeling ...	Kurseong ...	Mr. L. F. Morshead ...	" 1st April 1894 to 22nd March 1895.
		" P. T. Rebello ...	" 23rd to 31st March 1895.
	Siliguri ...	" P. T. Rebello ...	" 1st April 1894 to 31st March 1895.
Rangpur ...	Kurigram ...	Babu Jagat Chandra Bose ...	Ditto ditto.
	Nilphamari ...	" Akshoy Kumar Bose ...	Ditto ditto.
	Gaibandha ...	" Jogendra Nath Banerjee	" 1st April to 9th June 1894.
		" Ashutosh Bhattacharjee	" 10th June 1894 to 31st March 1895.
Pabna ...	Sirajganj ...	Mr. C. A. Bell ...	" 1st April to 30th July 1894.
		Babu Charu Chandra Chatterjee.	" 31st July to 15th August 1894.
		" Sarat Chandra Das ...	" 16th August to 11th November 1894.
		Mr. H. D. deM. Carey ...	" 12th November 1894 to 31st March 1895.

II.—TOURS AND INSPECTION OF OFFICES.

(a) Commissioner's tours.

5. The commencement of the official year found me at Bogra, finishing my inspection of that district. The work there proved so unsatisfactory, owing to the bad health of the Collector, that I had to induce him to make an immediate application for furlough. During the hot weather I also spent some time in making arrangements preliminary to the resettlement of the Terai. The Lieutenant-Governor arrived on the spot at the end of April, and reviewed the work done. During the rainy season I inspected Rajshahi, Pabna, and Kurseong. In Rampur Boalia I had to enquire into the circumstances under which certain policemen had fired on rioters during the Muharram procession. I concurred in the finding of the District Magistrate, that the constables had great provocation, but that they had acted against orders, for which they were punished. My report included suggestions on which Government framed rules as to the carriage of large sticks by members of the crowds which assemble on such occasions, and for the better control of the armed police. The Rajshahi offices I found in good order, under the experienced management of Mr. Price. From records examined at Pabna, I came to the conclusion that serious crime is investigated with less than the usual care in that district. I warned the police against being content with searching houses and obtaining confessions without ascertaining all the circumstances necessary to elucidate the whole facts of the case. I also took special notice of an instance in which a Deputy Magistrate discharged six prisoners accused on their own confession of murdering an old man in his bed without, as it seemed to me, taking suitable measures to ascertain what had occurred, with a view to their punishment, if they were guilty, and in the event of their innocence, to the exposure of the means by which false confessions were obtained. Pabna is a head-quarters of the theory that it is no part of the business of the Magistrate to discover the truth. In October I made a short tour to Gantak in Sikkim. On the way I inspected Kalimpong tahsil, where several important questions were pending, as to the re-assessment of ground rents in the bazar, the prohibition of subletting to Europeans, and the defence of the Government raiyats against usury. The crop in the hills had proved a bumper, and the people were generally prosperous. Trade had been affected by the prohibition on the part of the Tibetans of the export of tea and salt from their country: this at first created discontent among the Sikkim people, who have been accustomed to take their supplies from that source, but I think the result has on the whole been beneficial. Darjeeling tea sells at eight annas the seer in Gantak, and though at this price the quality is poor, it is better than that of the Chinese brick tea at one rupee the seer. English salt is also cheaper than that which comes from Tibet, and there is no real difference in quality. The command of the Tibetans over the market rested, therefore, merely on the habit of consumers, which had made them prefer a particular flavour. In so far as the prohibition has weakened that habit, it has been economical to the purchasers, has been favourable to English producers, and in regard to salt has benefited the revenue. The example of the upper classes in Sikkim may affect the Tibetans with whom they are closely connected. I found the members of the State Council drinking Darjeeling tea. I met General Lance on the march, and with him and Mr. White arranged the local suggestions for the demarcation of the Tibet frontier which is now being carried out. I arranged for the transfer of the Raja's second son from Tumlong to Darjeeling; his education was being conducted very suitably with reference to his present position as an avatar destined to the management of a monastery, but was not such as to qualify him for the *gaddi* to which he may succeed. I found that the settlement of the land had been concluded in 67 out of a total of 86 villages; of the remaining 19, ten are unsuited for such operations by reason of their remote and inaccessible position.

Mr. Williams, who acted as Commissioner during my absence from the 13th November to the same date in February, first inspected Dinajpur, with the subdivision of Thakurgaon. Of the former town he observed that "the management of the municipality reflects great credit on all concerned, and is a contrast to most about Calcutta." He then visited the Kalimpong mela, an interesting annual gathering of hill folk, which the missionaries there have organised for several years. Afterwards he inspected the district of Bogra, with

its important settlement at Jaipur, and the neighbouring subdivision of Naugaon. He returned to Jalpaiguri by Dinajpur, inspecting the south of that district. In January he inspected the Nator office and Alipur, and he was present at the payment of the subsidy to Bhutan at Buxa, and visited the Sonthal colony, which he found in a flourishing condition. In February he inspected the Nilphamari subdivision. After I resumed charge, I remained for some time at head-quarters, to hear appeals and deal with the current work; then I made a tour in the Duars, where I had the honour of receiving the Lieutenant-Governor. The total number of days spent on tour by me was 54, and by Mr. Williams 60, making in all 114 days. The district of Rangpur, except Nilphamari subdivision, and Sirajganj, escaped inspection, all other stations and subdivisions being duly visited. Mr. Williams had arranged with me to take them in his tour, but for some reason was unable to do so.

(b) Tours of District Officers.

6. The statement below shows the period spent on tour by each District Officer:—

Districts.	Officers.	Period spent on tour. Months.	Days.	Remarks. Months.	Days.
1	2	3	4	5	
Rajshahi ...	J. C. Price, Esq.	2	8	3	13
	E. H. G. Walsh, Esq. ...	1	5		
Dinajpur ...	A. C. Tute, Esq.	...	...	3	1
	B. K. Mullick, Esq. ..	1	11		
	C. A. Samuells, Esq. ...	1	14		
	L. N. Palit, Esq.	...	6		
Jalpaiguri ...	Lieutenant-Colonel H. Boileau	...	...	3	20
	R. H. Renny, Esq. ...	3	20		
	D. Sunder, Esq.	...	...		
Darjeeling ...	R. T. Greer, Esq.	4	...		
Rangpur ...	E. B. Harris, Esq. ...	4	1	4	3
	F. N. Fischer, Esq. ...	...	2		
Bogra ...	A. E. Harward, Esq. ...	...	...	3	17
	H. G. W. Herron, Esq. ...	...	...		
	C. A. Bell, Esq.	1	20		
	U. C. Batavyal, Esq. ...	1	27		
Pabna ...	Kumar Gopendra Krishna Deb ...	...	6	3	8
	H. E. Ransom, Esq. ...	3	2		

The tour of the District Officers exceeded the limit prescribed by Government. They inspected subdivisional offices, jails, dispensaries, police-stations, schools, municipalities, sub-registry offices, the working of the Chaukidari Act, visited the roads, ganja golas, pounds, ferries, Government estates, and enquired into the state of crops and the condition of people in the interior. Both Messrs. Price and Walsh of Rajshahi, while inspecting the Municipal office at Nator, devoted their special care to the sanitation of that town, which is still unsatisfactory. Mr. Renny visited every part of his district. Mr. Greer had to deal with the extensive settlement proceedings in the Terai. Mr. Ransom visited all the settlement and batwara works in progress, and also Government and resumed estates under khas management. Mr. Batavyal, of Bogra, inspected the settlement work of the Jaipur Government estates, made selections of village panchayats, and tested income-tax assessments, and took up several bad livelihood cases. I am fully satisfied with the work done by the District Officers on their tours, and am convinced that their inspections were so conducted as to be of the greatest public benefit.

(c) Tours of Joint and Assistant Magistrates.

7. The following table shows the periods spent on tour by Joint and Assistant Magistrates:—

DISTRICTS.	Officers.	PERIOD SPENT ON TOUR.		REMARKS.
		Months.	Days.	
1	2	3	4	5
Jalpaiguri ...	J. T. Rankin, Esq., Assistant Magistrate.	3	17	
Darjeeling ...	H. G. W. Herron, Esq , Joint-Magistrate.	...	...	Employed for 5 days only.

Mr. Rankin was placed in charge of the territorial subdivision in the Duars, where, besides trying cases, he inspected roads, markets and ferries. Mr. Herron was too short a time at Darjeeling to be out on tour.

(d) Tours of Subdivisional Officers.

8. The following statement shows the period spent on tour by the Subdivisional Officers:—

SUBDIVISIONS.	Officers.	PERIOD SPENT ON TOUR.		REMARKS.	
		Months.	Days.		
1	2	3	4	5	
				Months.	Days.
Nator ...	Babu Jnandra Nath Lahiri ...	1	27	3	21
	Mr. S. C. Mukerjee ...	1	24		
Naugaon ...	Babu Ganendra Nath Pal ...	...	23	3	5
	" Gossain Das Dutt ...	2	12		
Thakurgaon ..	" Purna Chandra Gupta ...	3	26		
Alipur ...	" Nibaran Chandra Ghatak	3	12		
Kurseong ...	L. F. Morshead, Esq. ...	3	18		
Siliguri ...	P. T. Rebello, Esq. ...	4	29		
Kurigram ...	Babu Jagat Chandra Bose ...	3	11		
Gaibandha ...	" Jogendra Nath Bidyabhushan.	...	9	3	2
	" Ashutosh Bhattacharjee ...	2	23		
Nilphamari ...	" Okhoy Coomar Bose ...	3	10		
Sirajganj ...	C. A. Bell, Esq. ...	...	22	3	1
	Babu Sarat Chandra Das ...	...	11		
	H. D. deM. Carey, Esq. ...	1	28		

The Subdivisional Officers also made tours in excess of the prescribed limit. They inspected police-stations, schools, dispensaries, outstills, pounds, ferries, Government estates, fairs, &c., and examined chaukidari accounts, lists of panchayats, and income-tax assessments, besides attending to their usual criminal works. Mr. Morshead, of Kurseong, supervised the khanapuri work and demarcation of boundary of jotes in the Terai. I have arranged with District Officers that the subdivisional tours may be so conducted as to produce some actual good, with as little interruption as possible to the judicial business. I do not, however, profess to be satisfied with the result. I am inclined to think that if in the case of Deputy Collectors in charge of subdiv sions the minimum length of the tour was made two months instead of three, the latter limit being retained as a maximum, a considerable saving

would be effected in travelling allowance, without any loss in efficiency. Such is the universal opinion among the residents of the subdivisions, who fail to see anything but an interruption to the regular course of justice in prolonged tours. The present system was introduced for European officers, generally young members of the Civil Service, who had to make themselves acquainted with the people, and took with pleasure to camp work. In applying it to Hindu officials of experience, some modification appears desirable.

(e) Inspection of district and subdivisional offices and treasuries.

9. The table below shows the number of inspections of district and subdivisional offices and treasuries made by the Commissioner and District Officers during the year:—

Districts.	District and sub-divisional offices and treasuries.	Inspection of district and sub-divisional offices made by—		Inspection of treasuries and sub-treasuries made by—	
		Commissioner.	Collector.	Commissioner.	Collector.
1	2	3	4	5	6
Rajshahi ...	Rajshahi ...	1	2	1	2
	Nator ...	1	2	1	2
	Naugaon ...	1	2	1	2
Dinajpur ...	Dinajpur ...	2	2	1	2
	Thakurgaon ...	1	2	1	1
Jalpaiguri ...	Jalpaiguri ...	1	1	(A)	2
	Alipur ...	1	2	1	2
Darjeeling ...	Darjeeling ...	1	2	1	2
	Kurseong ...	1	2	...	3
Rangpur ...	Rangpur ...	...	2	...	1
	Gaibandha ...	...	3	...	3
	Nilphamari ...	1	2	1	2
	Kurigram ...	...	2	...	2
Bogra ...	Bogra ...	1	2	1	1
Pabna ...	Pabna ...	1	2	1	2
	Sirajganj ...	...	2	...	2

(A) Inspected on 1st April 1895.

As required by the rules, all the District Officers inspected their own and subdivisional offices, treasuries and sub-treasuries twice during the year, with the exception of those of Dinajpur, Jalpaiguri, Rangpur, and Bogra. The Collector of Dinajpur has furnished no explanation as to the failure to inspect the Thakurgaon sub-treasury twice during the year. The Deputy Commissioner of Jalpaiguri states that Mr. Sunder was in charge of the district in September 1894: he did not make the half-yearly inspection of offices in that month. The district treasury of Rangpur was not inspected in the first half-year owing to the ill-health of Mr. Fischer. Mr. Batavyal states that on account of kist days and great pressure of work in the treasury, he had to postpone his inspection till the 1st of April 1895.

The result of the inspection was on the whole satisfactory. Mr. Harris of Rangpur, Mr. Walsh of Rajshahi, and Mr. Batavyal of Bogra, made specially good reports.

III.—WEATHER AND CROPS.

(a) Weather.

10. The following table shows the rainfall of the year in the different districts:—

Districts.	Rainfall in inches.	
	Average of last two years 1892-93 and 1893-94.	1894-95.
1	2	3
Rajshahi	59·96	55·14
Dinajpur	77·03	72·43
Jalpaiguri	159·00	147·03
Darjeeling	133·07	117·88
Rangpur	89·38	63 10
Bogra	70 83	69·85
Pabna	71·80	61·93

It will be observed that the fall was below normal, but not in any very marked degree. The deficiency was most marked in Rangpur. The distribution of rain during the monsoon season was as follows:—

Month.	Rainfall in the Rajshahi Division.	
	Normal.	Actual in 1894-95.
1	2	3
January	8·42	6·42
June	17·61	13·46
July	16·89	14·19
August	14·14	17·12
September	12 88	15·53
October	4·57	7·39
1st November to 15th ...	·16	1·51

The figures show that the monsoon commenced mildly, but ended otherwise. There was no rain in the cold weather, which diminished the outturn of rabi.

(b) Crops.

11. The following table shows the outturn of the staple crops, as estimated by the District Officers:—

Crop.	Outturn in annas.
Rice ... Autumn crop	11·3
Rice ... Winter "	13·3
Jute	13·4
Tobacco	12·3
Sugarcane	13·07
Pulses	11·9
Silk	9·0
Tea	13·7

The average outturn being 16 annas, it would appear from these figures that the harvest was deficient in regard to every crop. As intimated in previous reports, I quite discredit the returns and all those submitted to the Government

of Bengal on the subject. According to the fixed custom of the country, 16 annas means not an average crop, but a bumper, and this standard is so established that the officers who compile our figures use it without knowing that they do so. We will never attain approximate correctness in Bengal districts until we go back to the language of the people in this respect; it can be translated in my office or in that of the Director of Agriculture, to suit the official standard for India generally. In my opinion the harvest as a whole was very little, if at all, below the average.

In illustration of the method on which the returns are sometimes prepared, I may take those embodied in the Pabna report. The Collector writes:—"Both the paddy crops resulted in good harvests, the aman specially so, and rice was cheaper at the end of last year than it had been for a long time. Large stocks have been laid in, and with brisk trade, profits will be in proportion. The cultivating class generally were happy and contented, and labourers as a rule well off." Yet his figures show this specially good crop of *aman* as below the average, being 15 annas only; the bhadoi crop as bad, 11 annas; the boro rice as very bad, 7 annas; and of the remaining crops none exceed 14 annas. Here it is evident that, without knowing it, he had used the anna system in the popular, as distinguished from the official, sense, taking 16 annas to express the largest possible yield. This being understood, his report becomes intelligible.

IV.—PUBLIC HEALTH.

12. The following table shows the mortality of the year in the several districts of the Division as compared with the preceding year:—

Names of the prevailing diseases or other causes.	Rajshahi.				Dinajpur.				Jalpaiguri.				Darjeeling.

I attach but little value to the classification of deaths in this table. We know from jail and other statistics that bowel diseases are amongst the most

common causes of mortality, but very few entries appear under that head. "I think," writes the Civil Surgeon of Bogra, "a good many bowel-complaints are returned as cholera, while nearly every skin eruption is registered as small-pox." The general tendency is to describe all deaths as due to fever, unless the reason for assigning another character to the sickness is very strong indeed.

The registration is further defective as it omits a great number of deaths. The real death-rate is very much higher than that reported. I find, however, that the omissions are very uniform one year with another, and do not greatly affect such conclusions as can be drawn from the reported figures as to the comparative prevalence of fatal diseases at various periods. In the Darjeeling Terai an improvement was effected this year by the appointment of chaukidars for the first time, and in Jalpaiguri by such appointments being made for tea gardens. Elsewhere, I find no change in the efficiency of registration.

The number of reported deaths in the Division in 1894 was 34·21 per mille, against 32·88 in the preceding year. In 1893 there was an increase in reported mortality in Rajshahi, Bogra, and Pabna, the southern districts, in which there was excessive rainfall. The health was better in the districts of Dinajpur, Jalpaiguri, and Rangpur, and the health of the Darjeeling district underwent little change. In 1894 just the reverse was the case. The health was better in the three southern districts, where the rainfall was about normal, worse in Dinajpur, Jalpaiguri, and Rangpur, and the portion of Darjeeling situated in the plains. The whole of this country forms a Terai between the Himalayas and the comparatively elevated clay formation called the Barind; it is very unhealthy at all times, and was specially so this year. Malarious fever is the prevailing disease; every one suffers from it more or less, and it leaves the people in a feeble state, liable to die from any other sickness. Cholera frequently visits the tract; indeed, it may be considered as endemic. As to the reason why the Terai should be so unhealthy, the reports received contain some conjectures. The Magistrate of Dinajpur, Mr. Palit, writes that the range of temperature is very great, as high as 49°F. in the month, and as much in the 24 hours. This sudden and severe change has, he thinks, a very bad influence. I have no doubt that in the malarious region the chill which comes on with the evening is very fatal, particularly if it is not kept off by warm clothing—a matter as to which the natives, even when in good circumstances, are generally indifferent. Mr. Harris considers that the increased mortality from fever in Rangpur was probably caused by an unusual amount of rainfall in the months of October and November. The death-rate in the portion of the Terai situated in Darjeeling was 67·95 per mille, against 58·39 in 1893. Mr. Greer has recorded the following observations:—

"A great increase appears in the mortality in this tract, the rate having doubled during the past five years. Admitting that greater correctness in the collection of statistics may be accountable for a share in the increase, the figures are sufficiently high to call for serious notice. Local opinion fails to furnish any satisfactory explanation. In the course of my enquiries on the subject, I have been informed by some that the existence of jungle is the prevailing cause, while others assert that clearances have favoured the spread of fever by removing shelter and leaving the inhabitants exposed to the cold winds from ravines or hill streams. It is alleged that a large number of deaths is due to *kalazar*, and also that influenza has weakened the constitution of the inhabitants. The subject deserves attention. The establishment of one or two dispensaries can do little in the face of these mortuary returns. The cause should be ascertained by experts."

The question is a very old one, and relates to all countries of the Terai character, that is to say, situated at the foot of the Himalayas and interspersed with forest. I think that much of the evil must be attributed to the jungle in Jalpaiguri. The effect of clearances for tea gardens has been very salutary, and I never heard of these causing injury by removing shelter. I thought that everyone was agreed that the higher and less sheltered the situation the better, while land shut in by forest, where the malaria collects with little disturbance, is specially unhealthy. Excessive rainfall is generally accompanied by a corresponding increase in the death-rate. The large range of temperature must also contribute to the unfavourabl result, and there are probably other causes with which we are imperfectly acquainted.

(a) Accidental and sudden deaths.

13. The figures showing total number of accidental and sudden deaths in 1894 were as follows:—

DISTRICTS.	Men.	Women.	Children.	Total.	Total figures for 1893.	REMARKS.
1	2	3	4	5	6	7
Rajshahi	224	295	464	983	845

Pabna	10	8	1,345	1,044	43,768	44,055	43,408	43,614	360	441	
Total ...	76	74	8,696	10,296	216,111	253,200	214,644	250,517	1,204	2,441	242 unknown.

(c) Vaccine operations in municipalities.

15. The following table shows the statistics regarding vaccination in municipalities in 1894-95 and the previous year:—

DISTRICTS.	Name of Municipality.	NUMBER OF PERSONS VACCINATED.		SUCCESSFUL.		UNSUCCESSFUL.		REMARKS.
		1893-94.	1894-95.	1893-94.	1894-95.	1893-94.	1894-95.	
1	2	3	4	5	6	7	8	9
Rajshahi	Rampur Boalia	701	1,720	667	1,540	34	180	
	Nator	114	159	114	159	...	...	
Dinajpur	Dinajpur	351	573	314	509	9	64	
Jalpaiguri	Jalpaiguri	300	442	250	330	50	112	
Darjeeling	Darjeeling	1,602	2,172	1,599	2,007	3	165	
	Kurseong	262	1,210	213	1,048	14	162	
Rangpur	Rangpur	646	402	641	444	25	18	4 unknown.
Bogra	Bogra	321	280	319	263	2	18	10 ditto.
	Sherpur	126	221	124	197	2	14	
Pabna	Pabna	525	574	503	429	22	145	
	Sirajganj	761	1,020	738	923	23	97	
	Total ...	5,729	8,833	5,482	7,849	184	970	14 unknown.

The figures indicate a satisfactory increase in the number of operations. The Collector of Bogra observes that "owing to the prevalence of small-pox in the eastern parts of the district, a good deal of attention was paid to vaccinate all unprotected persons in the affected areas; and vaccination was carried on as a protective measure with some vigour. There was no serious opposition to

vaccination in any part of the district; that is to say, opposition of a character which did not yield to persuasion, though obstruction and passive resistance was reported from several villages. It is remarkable that the eastern tracts of the district are more liable to small-pox than western tracts."

V.—MATERIAL CONDITION OF THE PEOPLE.

16. In my report of last year I described the normal state of the people in the four regions into which this Division is naturally divided—the Himalayan, the Terai, the Barind, and the Gangetic. There was no marked change in 1894-95. The crops were not quite so good, and the price of rice was lower; it follows that the cultivators' profits were less, though still very fair. The labourers gained something by the comparative cheapness of their staple food. On the other hand, there was a great deal of sickness. The Deputy Commissioner of Darjeeling comments on the indebtedness of the raiyats of Kalimpong—a subject on which he has written much, but has not supplied any definite statistics which I can quote with advantage. Mr. Renny, the Deputy Commissioner of Jalpaiguri, writes:—

"During the last cold season I visited every part of the district, and made enquiries into the material condition of the people, and on all sides I found unmistakeable signs of prosperity and contentment. In some parts I observed houses with corrugated iron roofs, and neatly made mat walls; these in most instances were the residences of jotedars and other denominations of tenure-holders. Such houses are not to be seen in the Government estates only, but also in the native zamindaris. Again, nearly all the people are well clothed, and notwithstanding that this is a fever-stricken district, yet the bodies of a very large majority of the people are well nourished; this is evidence to show that they get plenty to eat. Lastly, it is next to impossible to get a man of the district to work: high wages are no inducement to them. The tea planter has to import his labour from Darjeeling or Chota Nagpur, and the District Engineer has to bring down coolies from Bihar, and to employ natives of Nepal. The Subdivisional Officer of Alipur Duars tells me that so prosperous are the people in some parts of his subdivision that they actually import labour from Kuch Bihar and the neighbouring British districts to till their fields and to reap their crops. The people generally do not indulge in luxuries, in eating and drinking. What they cultivate in the way of crops and rear in the way of meat is sufficient to supply their wants, and they are contented and happy. When visiting the Jalpaiguri town in early morning, it is not an uncommon sight to see people having *chota hazri*, consisting of tea and *roti*, and the same sight may be seen in other bazars in the district. These surely are all signs of prosperity, and point to the material condition of the people being satisfactory."

I have also observed the good physical condition of the people in Jalpaiguri, particularly of the children, who are very numerous. The climate does not seem to affect the appearance of the cultivators, as it does in Dinajpur. They are generally colonists reclaiming new land, showing the hopefulness and prosperity we associate with that position; but many of them have a hard struggle against the jungle and its denizens.

VI.—EMIGRATION AND IMMIGRATION.

17. The emigration from this Division is not great, and generally escapes the notice of District Officers. The Collector of Rangpur curtly states that "no emigration took place from this district," from which observation I infer that he has overlooked the figures given by me from the census returns in the annual report of last year. In Darjeeling there is a certain amount of recruiting for military purposes, which elicits attention, because the planters object to it, as interfering with

(a) Emigration.

their labour supply. The Deputy Commissioner has given the following figures:—

Regiment for which recruited.	Castes of Recruits.					Total.
	Mangars.	Gurungs.	Limbus.	Rais.	Others (Chatris, Sunuwars, Saneasis, Sarkis, Kamis, Damais).	
1	2	3	4	5	6	7
1st Burma Rifles	2	6	26	18	......	52
Lushai Police Battalion ...	2	1	...	...	7	10
Naga Hills ditto	2	9	...	...	19	30
North Lushai ditto	8	8	45	52	8	121
Mogon ditto	18	11	56	32	7	124
Myit Kyana ditto	6	9	31	57	24	127
Arakan ditto	6	6	1	8	5	26
Chindwai ditto	...	4	...	1	7	12
Lakimpur ditto	2	4	5	6	18	35
Total for 1894-95 ...	46	58	164	174	95	537
Total for 1893-94 ...	...	...	...	...	......	351

All these men were recruited from Nepal, excepting 31 from Sikkim.

18. In last year's report I gave the census figures as to immigration.

(b) Immigration.

The only new information on the subject is contained in the following passage from the report of the Deputy Commissioner of Jalpaiguri, who has evidently paid due attention to the movement:—

"As to immigration, this continues on a larger scale than ever, not only in regard to the importation of labour for the tea estates, but also in regard to the movements of the agricultural classes from the neighbouring districts, notably from Kuch Bihar, an independent native State, who come in search of land. In the census report of 1891 it is stated that out of a total district population of 681,352 persons, 148,527, or 21 per cent., are immigrants, of whom the tea gardens have absorbed about 90,000. When the above was written, there were 177 tea gardens with 35,607 acres of land under plant (mature and immature), but now there are 193 gardens with 43,133 acres under plant. Mr. O'Donnel writes:—'On an average each garden gives employment to a thousand people, including the wives and children of the labourers.' My enquiries also show this to be the case. This, then, will bring the tea garden population, all of which are immigrants, up to 193,000. In 1891 it was found that in the Damdim and Mainaguri tea tracts, the population had risen from 9,431 in 1881 to 173,556, or, in other words, had increased by 164,125; my figures show that within the last four years there has been a further increase of 28,875. This increase, however, is not confined to the Damdim and Mainaguri tracts, but to the whole of the northern part of the district lying between the Tista and Sankos rivers, for tea gardens have been and are being opened out all along the north of the district. As regards the increase in the non-tea tracts, I find that in the decade 1881—91, the increase was 42,830, of whom 505 came from Dinajpur, 10,101 from Rangpur, and 32,224 from Kuch Bihar. That the tide has not ceased to flow yet is to be gathered from the fact that during the year of report 669 applications were received for leases of arable lands for ordinary cultivation. The applications are for jotes.

There have no doubt, therefore, been numerous chukanidar immigrants of whom we cannot gauge the number until census time."

I may observe that relatively to the large number empoyed in tea, as estimated by Mr. Renny, the emigration from Darjeeling for military service is not large.

VII.—PRICE OF FOOD AND LABOUR.

(a) Prices of food.
(b) Prices of labour.

19. The price of food, which had been excessively high in the two previous years, continued to be so in 1894-95, except as regards the principal article of consumption—common rice. The cost of the latter fell greatly towards the end of the year; in Rajshahi, for instance, during the second fortnight in March, the rate was 17 seers the rupee, against 14 seers, the average of the two previous years. Before the fall in the value of silver, the usual price in that district was 23 seers the rupee. Wages remained almost unchanged, the only alteration in the returns being a reduction in the daily wages of gharamis in Dinajpur from five annas three pies to five annas, of common masons from five annas four pies to five annas; and in Rangpur a rise of wages for common carpenters from five annas four pies to eight annas, of superior carpenters from ten annas eight pies to twelve annas eight pies, of women from an anna and-a-half to three annas, and of boys from one anna to two annas. The enhancement in Rangpur is important; but I doubt whether it has been accurately observed. The Collector, who supplies the figures, writes in his report that "there is little variation in wages." Throughout the Division generally coolies get four annas a day, except in Rajshahi, where they receive three annas and three pies only.

VIII.—MANUFACTURES AND MINES.

(a) Manufactures.

20. As reported last year, the manufactured articles used in the Division are for the most part imported, the equivalent being given in rice, jute and other agricultural products. The so-called local manufactures, where they are of importance, consist merely in the preparation of certain crops for the market, and may be considered agricultural processes. Those which relate to tea, indigo and cinchona are in the hands of Europeans. I doubt if in any part of the world a population of eight millions could be found who manufacture so little as the inhabitants of the Rajshahi Division. They import nearly all their clothing, all their metal work, their salt, and most of their domestic utensils.

The production of indigo is almost limited to Rajshahi, the districts of Pabna, Dinajpur, and Rangpur giving only a few maunds. The outturn of the Division this year was 931 maunds, against 600 in 1893 and 410 in 1892. The season was favourable.

The yield of manufactured silk in Rajshahi, the only silk-producing district in this Division, was 129,290lbs., against 141,406lbs. in the previous year, showing a slight decrease of 12,116lbs. The factory managers report that the year 1894 was a bad one for silk cultivation.

The outturn of jute hand presses in Jalpaiguri and Sirajganj was respectively 43,932 bales and 148,007 bales, and that of the Sirajganj Jute Mill worked by steam, was 8,700 tons. Endi cloth (coarse silk) is manufactured in small quantities for home consumption in Dinajpur, Jalpaiguri, Rangpur, and Bogra. Molasses are manufactured in all the districts. They are largely exported from Rajshahi. Sugar is made in the Thakurgaon subdivision of the Dinajpur district, and at Pachagar in Jalpaiguri. Gunnies are prepared in almost all the districts and at the Sirajganj Jute Mills on an extensive scale, and exported to Calcutta. Cotton cloth is manufactured in Pabna by hand-looms, but the products of this industry are gradually being replaced by European piece-goods of fine textures which sell at lower rates. Brass and bell-metal utensils are manufactured at Budhpara and Kalam within the Nator subdivision, at Gomnati in the Nilphamari subdivision, at Pachagar in Jalpaiguri, and in the district of Pabna. They are exported to other districts after meeting the local demand. Sitalpati mats are made in Bogra and Pabna.

Sataranjis (carpets) are made in Rangpur and are in great demand throughout Bengal. Beer and porter are brewed in Darjeeling.

21. The number of tea gardens in the districts of Jalpaiguri and Darjeeling, the area under cultivation in acres, gross yield in pounds, and the average yield per acre from mature plants, are shown in the following table:—

DISTRICTS.	Number of gardens.			AREA UNDER CULTIVATION IN ACRES.						Gross yield in pounds.			Average yield per acre from mature plants.		
				Mature plants.			Immature plants.								
	1892.	1893.	1894.	1892.	1893.	1894.	1892.	1893.	1894.	1892.	1893.	1894.	1892.	1893.	1894.
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16
Jalpaiguri	183	184	193	27,980	33,322	35,386	10,603	9,633	7,717	18,278,628	18,524,210	19,155,205	653·2	555·9	541·3
Darjeeling	184	184	177	40,618	54,308	53,368	5,820	5,304	16,670	10,581,601	11,145,074	11,313,492	200·5	205·2	211·9
Total ..	367	368	370	68,598	87,630	88,754	16,423	14,937	24,417	28,860,229	29,669,284	30,468,697	420·7	338·5	343 3

The cultivation of tea possesses a special value, inasmuch as it does not develop, like that of jute, by displacing other crops, but by the reclamation of the jungle which renders the Terai region so malarious. The number of persons returned as employed increased during the year from 66,412 to 74,724, but the population really engaged on the work in some form as indicated by the census is much greater; the area on which the plant grows increased from 102,567 to 113,171 acres. There were 134 applications for new grants in Jalpaiguri, against 15 of the previous year; of these 39 were sanctioned. The outturn in 1894 was fair, and prices good. I give the following figures taken from the *Planters' Gazette* of the 15th June, as illustrating the large profits made by Duars gardens:—

Name of Company.	Dividend for 1894.
Carron	30 per cent.
Chalouni	30 "
Ellenbarie	30 "
Good Hope	25 "
Hope	50 "
Haldibari	7 "
Matelli	17½ "
Monabari	12½ "

Four other gardens are mentioned in the statement, but their dividend for the year had not been declared. It is sometimes said that tea cannot be cultivated at a profit with imported workmen unless penal contract laws are maintained. Without this check, it is alleged, the coolies will desert, leaving the employer to bear the loss of the money spent on bringing them from their homes. In the Duars all labour is imported, and there is no labour law. The figures quoted indicate the result. I do not deny that great inconvenience is felt by managers and their assistants for want of the coercive powers which are exercised elsewhere—inconvenience so considerable as to explain the representations made from time to time in favour of introducing the Assam system in whole or in part; but there are advantages on the other side which render free labour more profitable, though it gives greater trouble. The coolies prefer going to the free districts; their recruitment is therefore less costly, and they work with a better will. For the shareholder, or proprietor, I have no doubt that the Duars system is the best, as it is for the labourer.

22. The following statement shows the condition of cinchona cultivation in Darjeeling during the year of report and previous years:—

DISTRICT.		Number of plants.			Gross yield in pounds.			Profit.		
		1892-93.	1893-94.	1894-95.	1892-93.	1893-94.	1894-95.	1892-93.	1893-94.	1894-9
1		2	3	4	5	6	7	8	9	10
eling ...	Government Plantation ...	4,087,650	4,426,000	3,927,500	304,390	425,010	500,534	Rs. 3,171	Not available.	Not av. able.
	Private ditto ...	1,270,470	200,000	90,500	154,842	8,000	77,148	Not available.	Ditto.	Ditt
	Total ...	5,358,120	4,626,000	4,018,000	459,232	433,010	577,682	3,171	.....	......

Two of the private plantations have not furnished figures for column 4; hence the marked decrease in the number of plants.

(b) Mines.

23. No mine was worked during the year. Appendix V is therefore blank.

IX.—TRADE AND COMMERCE.

(a) Exports.
(b) Imports.

24. The trade of the Division is mainly with Calcutta, the port at which our agricultural products are exchanged for European goods. The chief article of export is jute, of which we send more than six-and-a-half million maunds, against less than two million maunds of all other commodities taken together. The fibre must bring over two crores of rupees a year into the Division, the land revenue being half a crore, and the rental, according to the road cess valuation, a crore and-a-half. Tea is in point of value the second export; tobacco and rice are also of great importance. The chief imports are piece-goods, salt and gunny bags. The ordinary raiyat is clothed in English cotton and eats English salt; in return he gives a part of his jute, and has nearly enough left from the price of that fibre to pay his rent. The following tables show the trade of the Division with Calcutta as registered in that city and published in the gazette. I may observe that these returns are never used by local officers in Bengal, as far as I am aware, though they readily supply more information than can be gleaned from any other source even at the cost of much labour.

25. The decline in the import of the principal commodity—European piece-goods—is very remarkable. These were valued at Rs. 2,20,71,666 in 1892, at Rs. 1,49,89,495 in 1893, and at Rs. 1,21,06,277 in 1894. The falling ing off is common to all the districts, except Darjeeling, where the circumstances are altogether exceptional, and I am therefore unable to attribute it to the supply having come otherwise than from Calcutta. No less significant is the reduction in the importation of kerosine oil, an article the use of which is supposed to be growing more common every day. I have always been disposed to regard the consumption of these commodities as an index to the prosperity of the people, but I find that in Rajshahi, where the decrease is most marked, the crops were better this year than they were last. Indian piece-goods were not imported last year, except a nominal quantity to Bogra: in 1894 they made an appearance in some force, but not so as to fill in any appreciable degree the great void left by the shrinking of the trade in English goods. I notice also a great increase in the importation of Indian cotton twist, which has almost supplanted the English article. More than one District Officer has adopted the view I hazarded last year, that imports have been checked by the continued fall in exchange—a result which should follow according to the accepted theory on this point. The import of salt has increased largely, but it fell last year by nearly the same amount. I believe the consumption is pretty steady, and that variations are due to the exigencies of trade. The rice exports diminished, but not to any great extent—a fact which agrees with the reports of crop outturns. In the

Rajshahi district only do these indicate an improvement on last year's results, and in it there has been an increase in rice exports. Wheat, gram, and other food-grains are so little exported that the decline in regard to them needs no explanation; the partial failure of the oilseed crops accounts for the falling off under that head. There was a slight increase in the jute exports, though the crop was distinctly inferior to that of last year; this I attribute to a larger area having been sown, and to the accumulation of stocks. The jute crop being gathered in the autumn, its amount affects the exports, not only of the calendar year in which it is cut, but of the next also. The export of tea was 3,35,082 maunds in 1893, and rose to 3,73,383 maunds in 1894, the increase being due to the gradual expansion of this prosperous industry. The cotton exports are really from the Garo Hills, though shipped at river stations in Rangpur: I observe a great decline in exportation. The silk produce of Rajshahi has varied very little from that of last year, which was much better than that of 1892. The trade in tobacco centres in Rangpur, from which the exports were a little less than in 1893; on the other hand, there is evidence that cultivation for export is spreading to Rajshahi, Dinajpur, Jalpaiguri, and Bogra. The total imports were 15,27,083 maunds, against 13,26,330 maunds last year; the exports were 82,17,975 maunds, against 81,89,197 maunds. It is well known that in these parts the down traffic is much heavier than the up, and that it is also more valuable; the balance is the commercial tribute of an outlying tract to the industrial centre.

(c) Sirajganj steamer service.

26. The total quantity and value of the articles carried upwards and downwards by this service during the past two years are shown in the following table:—

	Quantity.		Value.	
	1893.	1894.	1893.	1894.
	Mds.	Mds.	Rs.	Rs.
Export ...	24,86,703	28,63,910	1,72,35,047	1,30,66,631
Import ...	7,72,430	5,07,083	36,26,028	28,20,108

I am not in a position to explain the decrease, except in so far as it is attributable to the discontinuance of work during a portion of the year by the Sirajganj Jute Company.

The statement given below shows in detail the import and export trade of Sirajganj and other marts of the Pabna district carried by the Sirajganj steamer service:—

27. The registration of trade with Bhutan continued to be carried on at the three stations of Buxa, Hantupara, and Ambari. The following figures show the value of the import and export:—

(d) Trade with Bhutan.

	1893.	1894.
	Rs.	Rs.
Import	1,36,424	1,27,352
Export	1,32,470	94,384

There was decrease in the value of import and export to the extent of 6·8 and 28·7 per cent. respectively, compared with the preceding year. The Deputy Commissioner considers that the disputes in Bhutan, in its relation with Tibet, may have had something to do with the matter. The imports are generally of staples, not specified in the returns, except as "other articles of merchandise." Cotton in bales is the chief export.

The details of the traffic are given in the following statement:—

ARTICLES.	Total imported through the different registering stations from Bhutan.		Increase.	Decrease.	Total exported through the different registering stations to Bhutan.		Increase.	Decrease.	Value of total imports.	Value of total exports.
	1893.	1894.			1893.	1894.			1894.	1894.

28. No change was made during the year in the system of registering trade carried on with the ajdoining States of Tibet, Sikkim, and Nepal. The following table gives an abstract of the import and export trade of the three States in question:—

(c) Trade with Tibet, Sikkim, and Nepal.

NAME OF STATE.	IMPORTS.						Exports.						REMARKS.
	In number.		In rupees.		In maunds.		In number.		In rupees.		In maunds.		
	1893.	1894.	1893.	1894.	1893.	1894.	1893.	1894.	1893.	1894.	1893.	1894.

(a) Revised figures.

The trade with Tibet has special interest, as it has been recently the subject of a convention with China. It may be convenient to bring together the figures showing the value of exports and imports during each year of the last decade:—

YEAR.	Value of imports.	Value of exports.	REMARKS.
1	2	3	4
	Rs.	Rs.	
1885-86 ...	3,72,735	2,45,714	
1886-87 ...	2,18,143	3,40,462	
1887-88 ...	1,90,427	1,74,799	
1888-89 ...	3,168	4,181	
1889-90 ...	1,49,275	1,34,085	
1890-91 ...	1,80,893	1,99,788	
1891-92 ...	6,18,146	2,03,131	
1892-93 ...	3,51,519	2,29,117	
1893-94 ...	3,58,799	3,31,613	
1894-95 ...	7,01,348	4,47,802	

It will be observed that the traffic almost ceased in 1888-89, owing to political complications. It has since revived, and shows a tendency to increase beyond the dimensions it attained before the disturbance. The opening of the Yatung, in Tibet, as a mart has as yet had no influence, as traders have not settled there, but the establishment of a permanent route over the Jeylup pass has probably had a great effect.

X.—ADMINISTRATIVE CHANGES.

30. Five sub-registry offices were opened during the year—one at Birganj in Dinajpur, two in Rangpur, and two in Bogra. The police-station Hemtabad in Dinajpur was converted into an outpost, and Raiganj made the head-quarters of the thana. The outpost at Ghoraghat, which was abolished on the recommendation of the Police Committee, was during the latter part of the year ordered by Government to be re-opened. The outposts Madhupur in thana Shariakandi in Bogra, Ataikula, Handyal, Khetupara, and Pangasi in Pabna were abolished. The boundaries of the Sadar and Alipur subdivisions in Jalpaiguri were revised owing to the appointment of a Territorial Subdivisional Officer in the district. Nine villages of thana Mathura in Pabna were transferred to Faridpur and included in the area of the Goalando thana. The Munsifi at Shazadpur was transferred to Sirajganj.

XI.—STATISTICAL ENQUIRIES.

31. No special statistical enquiries of any importance were undertaken during the year.

32. The following statement shows the number of births and deaths registered in the several municipalities in the Division:—

Name of District.	Name of Municipality.	Number of births registered.		Number of deaths registered.	
		1893-94.	1894-95.	1893-94.	1894-95.
1	2	3	4	5	6
Rajshahi	Rampur Boalia ...	725	507	761	661
	Nator	239	233	449	302
Dinajpur	Dinajpur	214	201	382	597
Jalpaiguri	Jalpaiguri	261	208	246	327
Darjeeling	Darjeeling	289	370	214	274
	Kurseong	93	126	141	125
Rangpur	Rangpur	240	194	424	378
Bogra	Bogra	161	147	241	222
	Sherpur	82	74	178	118
Pabna	Pabna	376	264	387	252
	Sirajganj	637	582	652	424
	Total ...	3,317	2,906	4,075	3,680

There has been an increase in the number of both births and deaths registered in Darjeeling, an increase of births in Kurseong, and an increase of deaths in Dinajpur and Jalpaiguri. The other municipalities show a decrease in both births and deaths. Generally speaking, there has been a decrease in both births and deaths registered in the municipalities during the year under report. The decrease in the number of births registered is apparently due to careless registration. The decline in the death-rate may be real.

There were 16 prosecutions under Act IV (B.C.) of 1873 in Dinajpur for neglect to register births and deaths, and fines amounting to Rs. 96-8 were imposed. There were 24 prosecutions in Darjeeling and 9 in Pabna, the amount of fines realized was Rs. 11-4 and Rs. 12-8 respectively. Out of 24 prosecutions in the Darjeeling Municipality, 17 persons were convicted.

The number of births registered in rural areas in the several districts of the Rajshahi Division during the year 1894-95 and the previous year is shown in the table given below:—

Districts.	Births registered in rural areas.		Population of rural areas.	Births registered per mille.		Remarks.
	1893-94.	1894-95.		1893-94.	1894-95	
1	2	3	4	5	6	7
Rajshahi	52,225	43,667	1,282,744	40·7	34·0	
Dinajpur	66,510	51,387	1,543,631	43 07	33·3	
Jalpaiguri	25,905	20,736	671,670	38 5	30·8	
Darjeeling	3,489	5,855	205,647	16·9	28·4	
Rangpur	81,002	65,955	2,041,248	39·6	32·3	
Bogra	(a)28,789	25,020	806,973	35·6	31·	
Pabna	(a)53,207	41,302	(b)1,321,470	41·22	31·3	
Total ...	311,127	253,922	7,873,383	33·7	32·3	

(a) These figures are for calendar year.
(b) The population decreased owing to the transfer of some villages from the district of Pabna to that of Faridpur.

Nowhere has the number of births registered reached what is supposed to be the normal rate, 47·8 per mille.

It is reported by the Deputy Commissioner of Darjeeling, Mr. Greer, that a decided improvement has taken place in the registration of deaths since the introduction of the Chaukidari Act in the Terai, the number reported being 44·9 per mille, against 40·28 in 1893. The Act is not applicable in the hills where managers of tea gardens and khas mahal mandals perform the necessary duties. The

system works satisfactorily. The reports of deaths submitted by the officers of the Vaccination Department are sent for verification to the police, and any reported omission is tested by local enquiries.

33. The only model farm in the Division is at Mynaguri in the district of Jalpaiguri. It comprises an area of 13 bighas 12¼ cottahs. The lands are divided into plots for different kinds of crops. Among the new staples, the Naini Tal potatoes and some English vegetables were sown. The potatoes were of smaller size than those of the previous year. Indigenous crops were also cultivated, but their outturn was below the average, owing to rain at the sowing season. Sugarcane cultivation was also tried in 1 bigha 4 cottahs 12 chitaks of land, and the yield of molasses was 22 maunds 6 seers 4 chitaks. As this crop is rare in the Duars, it attracted the notice of many of the jotedars, some of whom have commenced its cultivation. Plantains of good quality and fruit trees have also been planted. The farm is closely supervised by the officers of the Agricultural Department. The income derived from the farm was Rs. 392-7-3 and the expenditure incurred was Rs. 500.

Model farms and gardens.

XII.—CIVIL JUSTICE.

34. There were 34½ Judicial officers in the Division (as calculated for official purposes' against 37¼ in the preceding year. These officers disposed of 58,464 suits, ordinary and Small Cause Court, and examined 79,688 witnesses, *i.e.*, disposed of 1,694·6 suits, and examined 2,309·8 witnesses per officer, against 1,570·3 suits and 2,106 witnesses per officer in the preceding year.

The number of suits and miscellaneous and execution cases disposed of and witnesses examined by each class of officer will be seen from the following statement:—

	Number of officers.	Number of suits disposed of (ordinary and Small Cause Court).	Number of miscellaneous (judicial) cases disposed of.	Number of execution cases disposed of.	Number of witnesses examined.	Ratio per cent. of witnesses detained over two days to total examined.	REMARKS.
1	2	3	4	5	6	7	8
Judges ...	4	26	799	26	522	14·4	
Subordinate and Small Cause Judges.	4¾	4,424	255	2,[illegible]	7,009	8·4	
Munsifs ...	25¾	54,014	3,104	29,290	72,157	9·1	

Of the 26 cases disposed of by the Judges, 16 were contested. Thus, each District Judge disposed of, on an average, 4 contested cases during the year. Taking 233 as the number of Civil Court working days in the year, the number of witnesses examined by each Judge on each working day of the year was ·55, against ·7 on each working day in the preceding year.

The 4¾ Subordinate and Small Cause Court Judges disposed of 4,424 suits, of which 735 were contested, and examined 7,009 witnesses. Thus each officer of this class disposed of 3·99 suits, of which ·7 was contested, and examined 6·3 witnesses on each working day of the year, against 3·7 suits, of which ·6 was contested, and 5·7 witnesses on each working day in the preceding year.

The ratio of witnesses detained over two days per cent. of witnesses examined was 8·4 against 7·2. There were 25¾ Munsifs in the Division during the year, against 27 in the preceding year, who disposed of 54,014 suits, of which 10,440 were contested, against 53,134 suits, of which 9,069 were contested, and 72,157 witnesses against 69,465. Thus each Munsif disposed of 9 suits, of which 1·7 were contested, and examined 12·03 witnesses on each working day of the year, against 8·5 suits, of which 1·4 were contested, and 11.1 witnesses on each working day in the preceding year.

The ratio of witnesses detained over two days per cent. of witnesses examined was 9·1 against 10·4, and the ratio per cent. of suits pending on December 31st, 1894, to total disposed of was 15·1, against 14·8 in the preceding year.

Thus, on the whole, a smaller number of Munsifs has done more work than a larger number of officers did in the preceding year.

35. The following statement compares the work of the year 1894 with that of 1893:—

Districts.	Year.	Number of officers in the district.	Number of suits disposed of.			Increase.	Decrease.	Suits in columns 4 and 5 how disposed of.		Classes of suits in columns 4 and 5.			Number of witnesses examined.	Ratio per cent. of witnesses detained over two days to total number examined.	Ratio per cent. of ordinary and Small Cause suits pending on 31st December to total disposed of.	Number of suits disposed of per Munsif.
			Ordinary.	Small Cause Court.	Total.			Contested.	Otherwise disposed of.	Money.	Rent.	Title.

(a) The power under the Small Cause Court Act which the present Joint-Magistrate of Kurseong exercised in his capacity as Munsif was withdrawn.

The ratio per cent. of witnesses detained over two days to the total number examined decreased in Rajshahi, Dinajpur, and Jajpaiguri—very considerably in the last-named district—and increased in the remaining districts of the Division. The lowest ratio was in Dinajpur (4·6) and highest in Bogra (15·7).

As in the preceding year, the number of suits disposed of by each Munsif was highest in Bogra (2,765), Pabna occupying the second place (2,608). Excluding Darjeeling. Jalpaiguri occupies the last place (1,249·5 suits).

The following statement shows the ratio per cent. of suits disposed of in each district to total disposed of in the Division and the proportion of suits disposed of to population during 1894:—

Districts.	Population.	Number of suits disposed of.	Ratio per cent. of cases disposed of to total number of cases disposed of in the Division.	Proportion of suits disposed of to population.	Remarks.
1	2	3	4	5	6
				Suit. Persons.	
Rajshahi ...	1,313,336	6,001	11·1	1 to 218	
Dinajpur ...	1,555,835	11,774	21·8	1 „ 132	
Jalpaiguri ...	681,352	2,499	4 6	1 „ 271	Exclusive of rent suits which are tried by Deputy Collectors under Act X of 1859.
Darjeeling ...	223,314	397	·8	1 „ 562	
Rangpur ...	2,065,464	17,381	32·1	1 „ 118	
Bogra ...	817,494	5,530	10·3	1 „ 148	
Pabna ...	1,361,223	10,432	19·3	1 „ 130	
Total ...	8,018,018	54,014	100·	1 „ 148	

From these figures it clearly appears that Rangpur is the district in the Division in which most litigation occurs, Pabna occupying the second place. Turning to columns 11, 12 and 13 of the table at the commencement of this paragraph, it is observed that rent and money suits in the Division were almost as numerous this year as last, and there is no substantial variation to be explained. Even when the districts are considered separately, the differences are small.

As indicating the extent to which the people are in debt to the money-lenders, the Munsif of Thakurgaon notes that "the number of money suits is nearly equal to that of rent suits, and that the value of the money suits—Rs. 58,398—is so much larger than that of the rent suits—Rs. 35,588." He remarks on the reluctance of the mahajans as a class to produce their account books in Court and the consequent temptation to debtors to deny their just debts.

In Darjeeling money suits are rare, and show no marked signs of increasing in number, though the Deputy Commissioner finds that debt is very prevalent. There were 381 such suits in 1894, against 364 in the previous year, being 1 suit in 586 of the population; in the neighbouring district of Jalpaiguri the proportion is 1 in 308 of the population. This is remarkable, as criminal cases are proportionately far more numerous in Darjeeling than in other districts. Title suits increased from 3,353 in 1893 to 4,232 in 1894. The title suits are increasing: the probable reason being, according to Mr. Steinberg, Judge of Rangpur, the classification of mortgage suits under this head. It will be several years yet before this change has produced its full effect.

Mr. Bradbury, Judge of Pabna, attributes the increase of title suits as well as the decrease of other suits observed in his district and Bogra to the goodness of the harvest. He writes:—"for the first time during my incumbency of this Judgeship the lateness of the inundation saved the *aus* or summer paddy in Pabna, and that has been followed by a plentiful ingathering of *aman* or winter paddy. Finally, the present cold-weather crops of both districts as a whole promise well. Thus the outlook for producer, consumer and rent receiver was throughout 1894 infinitely more satisfactory than it had been for some years, and the result, as might have been expected, was a substantial decline of institutions in 1894. A fat year succeeded a series of lean years, and the indebted multitude were able either to satisfy their debts or make such payments on account as stayed recourse by creditors to the Court.

"Accordingly the decrease is solely of suits for rent and petty debts. The same amelioration of income and prospects which alleviated the indebtedness of the humbler population facilitated the assertion by those better off of real or imaginary rights to land and what not. In years of scarcity the luxury of litigation is of necessity foregone. A revival, however ephemeral, of prosperity affords the means of appealing to the law; hence the extraordinary rise of the class of title and other suits from the 1,414 of 1893 to the 1,578 of 1894, every court save those of the Munsifs of Pabna contributing thereto. These figures alone attest the improved condition of the general population, for the plaintiffs of the bulk of suits of the kind under consideration belong to the middle or lower class."

The average ratio per cent. of number of appeals confirmed to total disposed of was 65·3 against 59·8. It was 69·3 in Dinajpur and 56·5 in Bogra.

The rent suits disposed of by the two Deputy Commissioners and the Deputy Collectors under them are shown in the following table:—

Districts.		Number of officers.	Number of rent cases disposed of.	How disposed of. Contested.	Withdrawn.	*Ex-parte* and default and otherwise.	Number pending at close of year.	Ratio per cent. of cases pending to cases disposed of.	Number of witnesses examined.	Ratio per cent. of witnesses detained more than two days to total examined.	Number of cases disposed of per officer.
1		2	3	4	5	6	7	8	9	10	11
Jalpaiguri ...	1894 ...	2½	2,443	429	35	1,079	455	18·6	3,747	·5	977·2
	1893 ...	3½	2,965	410	19	2,536	315	10·6	4,825	·6	847·1
Darjeeling ...	1894 ...	1	18	5	......	13	4	22·2	51	......	18·
	1893 ...	1½	22	4	1	17	5	22·7	69	30·2	14·6
District total ...	1894 ...	3½	2,461	434	35	1,092	459	17·8	3,798	·5	703·1
	1893 ...	5	2,987	414	20	2,553	320	10·7	4,894	1·1	597·4

It will be observed that in Jalpaiguri the rent cases are counted by thousands, and with the civil suits occupy a great proportion of the Deputy Collectors' time. In Darjeeling, work of this kind is trifling; there were only five contested suits during the year. The percentage of cases pending at the end of the year, 17·8, is larger than it was in 1893, but does not seem to me very excessive; in rent suits it is generally desirable to give the defendant time to collect his evidence. In no branch of litigation is the tendency greater to use the courts for improper purposes. The ratio per cent. of witnesses detained more than two days to total examined was ·5 in Jalpaiguri, and nil in Darjeeling. I found on inspection that the work was done with great regularity in this respect, as the figures indicate a result very different from what I observed three years ago.

Under the Duars Act of 1869, the Deputy Collectors try all suits connected with land in the part of Jalpaiguri east of the Tista.

The work disposed of is shown in the following statement:—

Districts.		Number of officers.	Number of suits disposed of.	How disposed of.		Classes of suits.			Number of miscellaneous (judicial) cases disposed of.	Number of execution cases disposed of.	Number of witnesses examined.	Ratio per cent. of witnesses detained over two days to total number examined.
				Contested.	Otherwise disposed of.	Money or movables.	Rent.	Title.				
1		2	3	4	5	6	7	8	9	10	11	12
Jalpaiguri Sadar subdivision.	1894 ...	1½	95	37	58	8	69	18	......	39	226	......
	1893 ...	1½	133	56	77	21	92	20	......	......	250	4·8
Alipur subdivision	1894 ...	1½	159	40	119	4	117	38	16	51	169	1·18
	1893 ...	2	95	29	66	......	77	18	......	......	104	3·8
Total for the district	1894 ...	3	254	77	177	12	186	56	16	90	395	·5
	1893 ...	3½	228	85	143	21	169	38	......	......	354	4·5

The ratio per cent. of witnesses detained over two days to the total examined was much better than in the previous year, and may be considered very satisfactory. The percentage of suits pending at the end of the year to suits disposed of was 13·4, against 20·1 in 1893—a variation in the direction opposite to that noticed in regard to rent suits, and almost equal in degree. The one may be set off against the other.

There were 61 rent appeals in Jalpaiguri, of which 37 were confirmed, 3 modified, 14 reversed, and 7 were otherwise disposed of. The ratio per cent. of number of appeals confirmed to total disposed of was 60·66, against 66·7 in 1893. There were 8 such appeals in Darjeeling, in all of which the decisions of the lower courts were reversed. There were altogether 40 appeals under the Bhutan Duars Act, of which 17 were confirmed, 1 modified, 13 reversed, and 9 otherwise disposed of. The ratio per cent. of number of appeals confirmed to total disposed of was 42·5, against 58·5 in 1893. The proportion of reversals is very large, and may fairly be quoted as evidence that the Deputy Collectors, who come to us without experience of civil work, and seldom remain long enough to learn very much, do not make good Judges. The appeals are nearly all from Deputy Collectors to Deputy Commissioners; I had as Commissioner to hear 6 appeals under the Bhutan Duars Act from the Deputy Commissioner's orders, in 5 of which the original decision was upheld, and as many under the Rent Law, in all of which the decisions were upheld.

XIII.—CRIME.

36. The following statement shows the crime, cognizable and non-cognizable, reported in each district during the year 1894, as compared with the year 1893:—

Districts.	Cognizable crime.		Increase.	Decrease.	Non-cognizable crime.		Increase.	Decrease.	Total crime.	
	1893.	1894.			1893.	1894.			1893.	1894.
1	2	3	4	5	6	7	8	9	10	11
Rajshahi	2,485	2,278	......	207	1,799	1,722	......	77	4,284	4,000
Dinajpur	2,412	2,544	132	......	1,745	1,674	......	71	4,157	4,218
Jalpaiguri	1,451	1,549	98	......	933	990	57	......	2,384	2,539
Darjeeling	1,570	1,356	......	214	964	992	28	......	2,534	2,348
Rangpur	2,668	3,052	384	......	3,085	2,709	......	376	5,753	5,761
Bogra	1,515	1,983	468	......	1,368	1,529	161	......	2,883	3,512
Pabna	1,995	1,796	......	199	1,988	2,226	238	......	3,983	4,022
Total ...	14,096	14,558	462	......	11,882	11,842	......	40	25,978	26,400

The figures show but little variation from those of last year; there was a slight increase in cognizable and still slighter decrease in non-cognizable crime. The general result is an increase of 422 cases over last year's total of 25,978, or less than 2 per cent.—an amount proportionate to the annual growth of the population.

37. The subjoined statement shows the number of offences reported under each class during the years 1893 and 1894 in the Division:—

Cases.	Cognizable.		Non-cognizable.	
	1893.	1894.	1893.	1894.
1	2	3	4	5
Abetment	2	...	...	...
I.—Offences against public tranquillity ...	337	375	835	818
II.—Serious offences against the person ...	568	608	1	6
III.— Ditto ditto property ...	3,496	3,877	315	291
IV.—Minor offences against the person ...	345	392	5,278	4,660
V.— Ditto ditto property ...	5,945	6,620	1,024	1,232
Total of cases I to V ...	10,693	11,872	7,453	7,007
VI.—Other offences	3,257	2,534	2,283	2,762
Special laws	146	152	2,146	2,073
Total ...	14,096	14,558	11,882	11,842

There has been an increase of more than 10 per cent. in offences against public tranquillity and offences against property. The former is due to land disputes in Rajshahi, and the latter may, perhaps, be attributed, at least in some degree, to better reporting. The decrease is in offences against special laws; prosecutions under the Arms and Excise Acts having been exceptionally numerous in 1893.

The total number of non-cognizable cases was 11,842, against 11,882 in 1893, showing a decrease of 40 cases only.

The fluctuations under classes IV and V, Minor offences against person and property, were great; the former shows a decrease of 618 cases, chiefly owing to the falling off of assault cases in Rangpur and Pabna, and the latter an increase of 208 cases, chiefly owing to the increase of cases of this class in Rajshahi and Rangpur.

38. The following statement shows the proportion of crime to population in the several districts :—

DISTRICTS.	Total cognizable cases.	Population to each cognizable case.	Total non-cognizable cases.	Population to each non-cognizable case.	Total of both cognizable and non-cognizable cases.	Population to each case.	REMARKS.
1	2	3	4	5	6	7	8
Rajshahi	2,278	576	1,722	762	4,000	328	
Dinajpur	2,544	611	1,674	924	4,218	368	
Jalpaiguri	1,549	430	990	658	2,539	268	
Darjeeling	1,356	164	992	225	2,348	95	
Rangpur	3,052	676	2,709	762	5,761	358	
Bogra	1,983	412	1,529	534	3,512	141	
Pabna	1,796	757	2,226	611	4,022	335	
Total ...	14,558	550	11,842	667	26,400	308	

The high ratio of crime to population in Darjeeling is due to the special character of the district, a hill tract, where Magistrates are numerous, and every petty infraction of the rights of property, or of rules made for the public convenience, watched with special care. Even under these conditions, however, I think that the prosecution of one person in ninety-five each year is excessive, when we allow for the number of persons who, by reason of age, sex or remoteness, are but little exposed to legal proceedings. In Bogra there is a great deal of crime and litigation, probably because of the inferior administration of that district, the standard of efficiency in which has for a considerable time been below that attained in the rest of the Division. I am surprised to find that the proportion of cognizable cases is lowest in Pabna, where the conditions, except as to administration, are very similar to those which prevail in Bogra.

XIV.—POLICE.

39. The following statement shows the working of the police in the districts of the Rajshahi Division during the year 1894:—

DISTRICTS.	Class of offence.	Cases enquired into by the Police during the year.		False cases.		True cases.		Percentage of false cases to those enquired into.		Cases disposed of by the Magistrates during the year.	
		1893.	1894.	1893.	1894.	1893.	1894.	1893.	1894.	1893.	1894
1	2	3	4	5	6	7	8	9	10	11	12

The number of cases investigated by the police was 9,939, against 10,061 in 1893. Of this number 7·5 per cent. were returned as false. I attach little value to the proportion of such returns, as it varies with the practice of each Magistrate. The degree of evidence necessary for conviction, and that required before the complainant can be punished for perjury, are established, but in regard to the large number of cases which are of such a doubtful character that action can be taken against neither party, there is no standard to regulate the decision whether they are to be entered as true or as false. One Magistrate requires, before excluding them from his returns, a degree of certainty as to their falsehood which to another appears quite superfluous.

Of the cases and persons under classes I to V disposed of by the Magistrates, 70·9 and 47·9 per cent. respectively were convicted, against 72·2 and 53 per cent. in the preceding year. The proportion of convictions was highest in Darjeeling, and, as usual, it was lowest in Bogra.

The subjoined table compares the number of serious charges instituted against police officers during 1893 and 1894 :—

Districts.	Torture Cases.		Extortion Cases.		Embezzlement Cases.		Total.		Remarks.
	1893.	1894.	1893.	1894.	1893.	1894.	1893.	1894.

Total ...	5	...	29	20	...	...	34	20	

It is satisfactory to observe that no cases of torture or embezzlement were instituted against police officers, and that there were no charges of any kind in Jalpaiguri, Darjeeling, Rangpur, or Pabna. In Dinajpur extortion cases were formerly very common, and very badly investigated. The present District Superintendent of Police, Mr. Tucker, has been active in his enquiries, with the usual result, that such charges have diminished in number. I could not get Mr. Fasson, District Superintendent of Police, Bogra, to make prompt personal enquiry as to such charges, and his neglect gave occasion for their continuance in Bogra. In regard to such offences everything depends on the activity of the District Superintendent, and I do not think that the change in the Police Code, diminishing his responsibility in the matter to some extent, has worked well. Where he is ready at once to examine into the truth of every complaint, his subordinates will not dare to extort money, nor will bad characters care to risk prompt exposure by bringing false accusations. I am aware, however, that improvement in this direction requires considerable time. The habit of making illicit profits is not easily broken when once formed, nor is that of attacking the police by wrongful accusations.

I think that the police were well managed during the year in Dinajpur by Mr. Tucker, in Jalpaiguri by Mr. Gouldsbury, and in Darjeeling by Mr. Birch. The other districts did fairly well, except Bogra. In it there has recently been a change both of the District Magistrate and of the District Superintendent, so that the officers now in charge are not responsible for the results.

The Village Chaukidari Act.

40. Chaukidars were appointed for the first time throughout the Terai, in supersession of a special system of patrol police, remunerated by grants of land which proved unsuccessful. Mr. Greer, the Deputy Commissioner of the district, reports that a great improvement has been effected by this measure. In Bogra the work of appointing new panchayats when the office of those formerly named had elapsed, had been neglected. It was, on orders passed by me when inspecting, taken actively in hand during the year, and has now been completed. The force is now paid with fair regularity, but I cannot say that the most is made of it for purposes of prevention and detection. There is a tendency to ignore the fact that a village police works best when in sympathy with the villagers, to punish too often and to reward too little. It is a general complaint after each dacoity that the chaukidar did not do his duty. On the other hand, I may mention a report received this month of excellent conduct on the part of a chaukidar in Jalpaiguri. He noticed the absence of a bad character one night, and arranged with the panchayat, aided by some neighbours, to examine the man as he returned in the morning. The suspected person had, in fact, been engaged in a dacoity ; he was seized as he re-entered his village with his share of the spoils, confessed, and named his accomplices, ten of whom were arrested with a considerable amount of the plunder. This is what might occur frequently if the panchayats could be made to value their position, and take an interest in their work. My experience is that the degree to which they do so depends very much on the consideration with which they are treated.

XV.—CRIMINAL JUSTICE.

41. There were 48 Stipendiary Magistrates in the districts of this Division during the year, against 48½ (as we count them) in the previous year. These officers disposed of 9,112 criminal cases of all kinds with 14,187 persons and examined 38,755 witnesses, against 10,819 cases with 15,181 persons and 42,665 witnesses in the previous year. The average number of cases disposed of per officer and the average number of witnesses examined per case disposed of were 179·4 and 4·5, against 223·07 and 3·9 respectively. From these figures it appears that each Stipendiary Magistrate heard somewhat less than three witnesses on the average working day, and disposed of one person accused. He heard little more than half of one case per day. In the face of such figures I have never been able to accept the statement that frequent adjournments, or inconveniently late hours, are necessary on account of the heavy burden of magisterial work.

There were 36 Benches and Honorary Magistrates sitting singly during the year, against 37 in the preceding year. These Benches and Honorary Magistrates sitting singly disposed of 2,987 criminal cases of all kinds with 3,631 persons and examined 8,077 witnesses, against 2,763 cases with 3,410 persons and 7,302 witnesses in the preceding year.

The following statement shows the criminal work disposed of by the Stipendiary and Honorary Magistrates exclusive of cases under class VI in the several districts of the Division during 1894:—

DISTRICTS.	Number of Magistrates.	Number of cases disposed of.	Number pending at close of year.	Number of persons disposed of.	Number convicted.	Number acquitted.	Number remaining under trial at close of year.	Number of witnesses examined.	Number of those in column 9 who were detained more than two days.	Ratio per cent. of witnesses detained over two days to total number examined.	Number of appeals decided by Magistrate or District Judge.	Number of decisions confirmed in appeal.	Ratio per cent. of decisions confirmed in appeal to total appealed.	Average number of cases disposed of per officer.	Average number of witnesses examined per case disposed of.	REMARKS.

Darjeeling	11	619	3	842	609	241	6	1,384	20	1·4	11	11	100	56·2	2·2	Two died
Rangpur	11½	761	29	824	298	526	38	2,551	266	10·4	34	25	73·5	67·1	3·3	
Bogra	2	291	2	368	93	275	4	906	153	16·8	37	25	67·5	145·5	3·1	
Pabna	3	301	10	325	142	183	14	634	89	13·0	2	...	..	100·3	2·1	
Total ...	35½	2,323	56	2,863	1,367	1,483	91	7,001	446	6·3	115	79	68·6	64·7	3·0	

It appears that each Stipendiary Magistrate disposed of half a case of classes I to V and disposed two and-a-half witnesses on each working day of the year in such cases. The average number of cases disposed of per officer was over 100 in all the districts except Jalpaiguri, where the officers, in addition to the criminal work, try cases under Act X of 1859 and Act XVI of 1869. The largest number is returned by Pabna, where the average exceeds 225. Of the 10,312 persons disposed of, 5,362, or 51·9 per cent., were convicted. The best results were obtained in Darjeeling, 63 per cent., and worst in Bogra, 48·3 per cent. The average number of witnesses examined per case disposed of was 4·8. The number was largest, as it always is, in Bogra, and smallest in Darjeeling, the figures being 6·6 and 3·4, respectively. The ratio per cent. of witnesses detained over two days to the total number examined was 5·4. The percentage was highest in Bogra (10·8) and lowest in Jalpaiguri (1·3). I found that Mr. Renny, the Deputy Commissioner, exercised a very salutary influence over subordinate courts in regard to their punctuality in examining witnesses. Out of 807 appeals decided by Magistrates and District Judges in the Division, decisions were confirmed in 558 or 69·1 per cent. of cases. The result was best in Darjeeling and worst in Pabna, the figures being 92·5 and 59·4 respectively. The number of cases under classes I to V disposed of by Honorary Magistrates and that of witnesses examined were 2,323 and 7,001, respectively. The average number of cases disposed of was highest in Bogra (145·5) and lowest in Rajshahi (23·6). Of the 2,863 persons disposed of, 1,367, or 47·7 per cent, were convicted. The best results were obtained in Darjeeling (71·1) and the worst in Bogra (25·3).

The average number of witnesses examined per case disposed of was 3·8. The highest average is returned by Jalpaiguri and the lowest by Pabna, the figures being 5 and 2·1, respectively. None of the witnesses examined by the Benches in Jalpaiguri were detained over two days. The ratio exceeded 10 in respect to three districts—Rangpur, Bogra, and Pabna—while it was below three in Rajshahi, Dinajpur, and Darjeeling. The ratio per cent. of decisions confirmed in appeal was 68·6. The result was best in Darjeeling. The ratio exceeded 60 per cent. in Jalpaiguri, Rangpur, and Bogra. The results in the remaining districts were not good.

Remands.

42. The remands in A form cases in the several districts are shown in the following statement:—

Districts.	Class of Magistrate.	Number of A cases sent up during the year, including those pending from preceding year.	Number disposed of on first day.	Number postponed. Once.	Twice.	Three times.	Four times.	Five times.	Six times.	Over six times.	Number pending at close of year.	Ratio per cent. of A cases remanded six times and more to A cases disposed of.

	GRAND TOTAL 1893 ...	3,732	1,418	888	642	290	184	91	50	75	94	3·4

NOTE.—The Rangpur figures of this table do not agree with the figures of the corresponding table of the Crime Report, because the District Officer excluded the A Form pending at the end of 1893 from the table of the Crime Report.

The ratio per cent. of A cases remanded six times and more to A cases disposed of was 4·7, against 3·4 in the preceding year. Darjeeling shows a great improvement during the year, the figures being ·8, against 3·5 of the preceding year. Bogra returned 10·2 against 12·5. The ratios in Dinajpur and Rangpur were 6·1 and 8·6, against 2·9 and 2·8, respectively. In the district of Rajshahi there has been a sustained improvement in the promptitude with which cases are tried, as also to some degree in Jalpaiguri and Darjeeling. I know of no reason why the same result could not have been obtained elsewhere. Dinajpur and Rangpur are the districts which have fallen off. The Honorary Magistrates in Dinajpur and Bogra seem to have been specially dilatory.

Cases in which European British subjects were accused.

43. There were two cases in Rajshahi during the year in which European British subjects were involved; one of assault, which was compromised, one of nuisance in which the accused was fined. There were three cases in Jalpaiguri. The first was under section 186, Indian Penal Code, obstructing a public servant in the discharge of his duties; the second was under section 323, Indian Penal Code, voluntarily causing hurt; and the third was under section 19, Act XI of 1878 (Arms Act), exporting a gun without a license. Conviction was obtained in the first and third cases, while the second was compromised. None of the accused claimed to be tried by jury. The following table shows the details of the trial of European British subjects during the year in Darjeeling:—

Description of offence.	Total number brought to trial.		Total disposed of.		Pending.		Persons how disposed of.				
	Cases.	Persons.	Cases.	Persons.	Cases.	Persons.	Convicted.	Acquitted or discharged.	Committed.	Died, escaped, or transferred.	Total.

Bad livelihood cases.

44. The subjoined table shows the bad livelihood cases during the year 1894:—

Districts.	Number of cases instituted.	Number of cases in which conviction followed	Number of cases in which acquittal followed.	Longest period from date on which process issued to conclusion of case.	Remarks.
1	2	3	4	5	6
				Days.	
Rajshahi	16	7	...	58	9 cases pending.
Dinajpur	38	18	...	60	20 " "
Jalpaiguri ...	15	8	6	58	1 case pending.
Darjeeling ...	9	9	...	60	
Rangpur	37	27	6	160	4 cases pending.
Bogra	43	31	9	142	1 absconded. 1 proceedings dropped. 1 struck off.
Pabna	93	59	16	300	18 cases pending.
Total for 1894 ...	251	159	37	...	
Total for 1893 ...	260	191	58	..	

The result of bad livelihood cases was satisfactory in Rajshahi, Dinajpur, and Darjeeling.

Result of Sessions trials.

45. The following statement shows the results of the Sessions trials in the several districts:—

DISTRICTS.	Number of cases committed, but pending at commencement of year.	Number committed during the year.	Total number for disposal.	Number disposed of.	Number in which conviction obtained	Number of cases in which sentence was modified or reversed by High Court.	Number of cases acquitted by Sessions Judge.	Number of cases otherwise disposed of.	Percentage of cases resulting in conviction to total cases disposed of.	REMARKS.
1	2	3	4	5	6	7	8	9	10	11
Rajshahi ...	13	22	35	33	26	1	6	1(a)	81·2	
Dinajpur ...	1	16	17	13	8	...	5	...	61·5	
Jalpaiguri ...	1(b)	8	9	9	5	...	4	...	55·5	
Darjeeling ...	1	8	9	7	5	...	2	...	71·4	
Rangpur ...	6(c)	33	39	38	26	2	12	...	68·4	
Bogra ...	...	18	18	18	10	...	7	1	55·5	
Pabna ...	4	16	20	19	13	...	6	...	68·4	
Total for 1894 ...	26	121	147	137	93	3	42	2	68·4	
Total for 1893 ...	19	165	184	155	1 5	7	40	...	74·1	

(a) Transferred to Pabna under orders of the High Court.
(b) Revised figure.
(c) Out of the 10 cases that were pending at the end of 1893, four cases were transferred to Dinajpur in 1893.

The proportion of convictions is lower than in 1893. It was best in Rajshahi, where the percentage of cases ending in conviction to total cases disposed of was 81·2, and it was worst in Jalpaiguri and Bogra, where the percentage fell off from 90 and 75 to 55·5 and 55·5 respectively.

Criminal fines.

46. The subjoined table shows the demand, collections, and remissions of criminal fines during the year 1894:—

DISTRICTS.	Demand of the year, including balance of the previous year.		Collection.		Remission, &c.		Balance outstanding at the end of the year.		Percentage of collections on net demand (columns 4 and 5 on columns 2—6 and 3—7, respectively).		REMARKS.
	1893.	1894.	1893.	1894.	1893.	1894.	1893.	1894.	1893.	1894.	
1	2	3	4	5	6	7	8	9	10	11	12
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.			
Rajshahi ...	15,935	16,704	8,459	9,694	1,121	580	6,355	6,430	57·1	60·1	
Dinajpur ...	17,437	17,226	13,181	11,612	1,337	1,589	2,919	(a)7,533	72·2	74·2	(a) Correct figures arrived at by verification from the fine register. It is reported that the mistake occurred before 1888.
Jalpaiguri ...	17,047	14,269	6,497	7,004	3,141	142	7,409	7,123	46·6	49·5	
Darjeeling ..	13,270	9,051	8,365	5,958	2,028	2,482	2,877	518	73·5	91·1	
Rangpur ...	16,860	18,524	11,591	13,104	1,227	1,097	4,042	(b)5,728	74·1	77·6	(b) The difference of Rs 5 is due to the fact that the process fees realised as cost was not added to the amount of fines imposed. It was added as distinct item to the amount of fine realised under Accountant-General, Bengal's circular No. 113T.—M. of 1893.
Bogra ...	14,957	18,152	8,904	11,577	695	1,221	5,358	5,354	62·4	68·3	
Pabna ...	16,440	18,393	10,625	11,354	385	2,515	5,310	4,524	66·1	71·5	
Total ...	1,11,946	1,12,319	67,622	70,333	9,934	10,226	34,390	35,273	66·2	68·6	

The percentage of collections on net demand shows improvement in all the districts, but the results cannot be considered satisfactory, especially in Jalpaiguri, where the collections are still below 50 per cent. The amount of remissions was highest in Darjeeling, being 27·4 per cent.

Attendance of Honorary Magistrates.

47. The following abstract statement shows the attendance of the Honorary Magistrates:—

DISTRICTS.	Subdivisions.	Number of times the Honorary Magistrates were asked to attend.	Number of times the Honorary Magistrates actually attended.	NUMBER OF TIMES THE HONORARY MAGISTRATES WERE ABSENT— With leave.	Without leave.	Total.

(a) One Honorary Magistrate attended 18 times more than he was asked to attend.
(b) Certain Honorary Magistrates attended several times more than they were asked to attend.

I have noticed with much pleasure the good work done by Mr. Sutherland, Barrister-at-law, and the Honorary Magistrates of Darjeeling. And in some remote places the appointment of benches offers the only means of doing justice on the spot. But I am not in favour of transferring trials from professional to Honorary Magistrates where the services of the former are available. I have found that judicial business is best transacted by those who are trained to it and being paid to do it have no excuse for neglect. The economy of employing private gentlemen without remuneration is a consideration of consequence, and it is well to encourage those willing to take a part in the administration, but the primary object is that justice should be done.

XVI.—REGISTRATION OF DEEDS.

48. The number of deeds registered during the year rose from 98,742 to 105,885, showing an increase of 7,143, as will be seen from the following statement. The increase is normal, being proportionate to the progress of the Division during a good year in wealth and population:—

DISTRICTS.	NUMBER OF DOCUMENTS REGISTERED DURING—	
	1893-94.	1894-95.
1	2	3
Rajshahi	6,454	5,788
Dinajpur	19,709	20,803
Jalpaiguri	5,019	5,113
Darjeeling	509	571
Rangpur	29,967	34,400
Bogra	18,226	20,946
Pabna	18,858	18,264
Total ...	98,742	105,885

A charge was brought against the clerks of the Naugaon Sub-Registry Office, in the district of Rajshahi, for demanding excessive fees; it is reported that they have been dismissed, and that the conduct of the Sub-Registrar is under enquiry.

XVII.—CONDITION OF THE DIVISION AS REGARDS THE LAND AND THE LAND REVENUE ADMINISTRATION.

49. The current demand of land revenue was Rs. 51,75,095, and there was at the beginning of the year an arrear of Rs. 88,068; the collections amounted to Rs. 51,97,905, and the arrears were reduced to Rs. 61,276. In the previous year also the collections had exceeded the current demand, reducing the arrears from Rs. 1,10,340 to the sum indicated above. The result may be regarded as satisfactory. The road cess collections were also in excess of the current demand, being Rs. 9,57,869, against a current demand of Rs. 9,45,390, leaving an outstanding balance of Rs. 74,406 at the close of the year.

There was an increase of Rs. 16,430 in the current demand of land revenue, obtained almost entirely from temporarily-settled estates and estates held under direct management. To this increase Jalpaiguri contributed Rs. 13,267 gained by settlement of lands under tea lease rules, by progressive rate of rents under those rules, by renewal of time-expired leases, by settlement of jalkar mahals, and by the general settlement of the Western Duars. The current demand of cesses was Rs. 9,45,390, against Rs. 9,24,376 in the previous year, showing an increase of Rs. 21,014. This increase is due chiefly to revaluations.

With a total demand of Rs. 49,421 (current Rs. 47,005 and arrear Rs. 2,416) on account of zamindari dák cess, the collections were Rs. 48,383. Here, again, the outstanding balance was reduced.

Collections.

50. The following table shows the percentage of current collections on current demands and the percentage of arrear collections on arrear demands under each class in each district:—

Districts.		Class I.—Permanently-settled estates.		Class II.—Temporarily-settled estates. (a) Settled for periods with proprietors.		(b) Private estates leased to farmers for periods.		(c) Government estates leased to farmers for periods.		Class III.—Estates directly managed. (a) Those managed for proprietors.		(b) Those owned by Government as proprietor.		Remarks.
		Current.	Arrear.	Current.	Arrear.	Current.	Arrear.	Current.	Arrear.	Current.	Arrear.	Current.	Arrear.

	1893-94	99·8	100	99·1	100	96·4	89·7	90·5	100	68·9	95	62·1	93·1	

The percentage of collections in permanently-settled estates was above the prescribed standard in all districts except Darjeeling and Bogra. In the former the apparent deficiency is due to a peculiar arrangement, which costs us several explanations every year. A sum of Rs. 474 has been allowed for life to the heirs of the late Chebu Lama, and by order of the Board it is shown in the accounts as a revenue demand remitted. In Bogra the balance was Rs. 5,291, of which Rs. 5,209 were realized after the close of the year. Revenue in that district is largely paid by transfer receipts, which are sometimes realized too late. In Pabna the collections on private estates temporarily settled with farmers did not reach the prescribed standard. In that district successive Collectors have been much too easy with these middlemen, who should be taught punctuality, or eliminated altogether from our revenue system. The short collections in Rangpur on Government estates temporarily settled with farmers were due to the non-realization of the small sum of Rs. 32. The low percentage in Pabna is open to the comment I have made as regards private estates. In estates directly managed for proprietors, and in those owned by Government as proprietors, the percentages of collections were not up to the mark in Rajshahi and Pabna. The short collections in the former district were partly due to the failure of the kalai and mulberry crops in some estates. The short collections in Pabna were principally due to the non-realization of rents from the raiyats of the estate Namzad Bahir Char. This land is under settlement, and the local authorities have not been able to come to an understanding with the raiyats as to the new rental. Until the point is decided, a difficulty is felt in making any realizations. The figures for Jalpaiguri have not been explained. The results were considerably better than in the previous year. The percentages of collections in Government estates managed direct were low in Darjeeling and Bogra. The falling off in Darjeeling is trifling, and needs no explanation. The deficiency in Bogra is due to the fact that Rs. 1,608 collected during the year by the manager of the Jaipur Government estates was not credited to the year's accounts 78 treasury. The collections on these estates were satisfactory in Dina— 5,40,702 Rangpur, where the demands were collected in full.

OPERATION OF THE SALE LAWS.

51. The following table shows the number of sales and exemptions from sales in the several districts during the year:—

DISTRICTS.	SALES.				Exemption from sales.	Sales annulled.	REMARKS.
	Whole estate.	Shares.	Rights and interests.	Total.			
1	2	3	4	5	6	7	8
Rajshahi ...	......	7	......	7	61	......	...
Dinajpur ...	1	2	......	3	19	......	...
Jalpaiguri ...	......	1	......	1	1	......	...
Darjeeling ...	......	......	......	......	11	......	...
Rangpur ...	3	2	......	5	18	......	...
Bogra ...	1	......	......	1	62	......	...
Pabna ...	4	1	......	5	180	......	...
Total for 1894-95 ...	9	13	......	22	352	......	...
Total for 1893-94 ...	21	11	......	32	378	2	...

The defaults resulting in sales were as usual due to disputes among sharers or the unprofitable nature of the estates. It appears that the Act was worked with moderation.

52. Altogether 15 regular settlements were effected during the year.

Settlements.

In Rajshahi the settlements of char Titamari and diara Shibnagar were concluded under the old Regulations. The former was hitherto unassessed, and the revision of the rent-roll of the latter was found necessary on account of the expiration of the farming lease. The operations resulted in an increase of Rs. 301 in the revenue, chiefly on account of improvement in the quality of the soil through fluvial action and extension of cultivation. In Jalpaiguri two tea estates, the term of the preliminary leases of which had expired, were resettled. The settlement of the Western Duars, which was commenced in 1889 and conducted by a special officer under the provisions of the Bhutan Duars Act, XVI of 1869, was concluded, and the final report submitted during the year. The settlements of the Alipur and Falakata tahsils have since been confirmed. The settlements of the other three tahsils were confirmed during the previous year. An increase of Rs. 1,40,902, or 60·2 per cent., was gained over the revenue of Rs. 2,33,999 paid under the previous settlement. The enhanced revenue has been collected with as much facility as the old, and no general objection has been made to the increase. The resettlement of the West Tista Khas Mahal in Darjeeling, which was concluded during the year, resulted in an increase of revenue amounting to Rs. 2,683. The other estate settled in this district is a plot of forest land. A cadastral survey in connection with the resettlement of Terai jotes, containing an area of 271 square miles, was undertaken during the year under the supervision of Mr. J. McHatton, Extra Assistant Superintendent of the Bengal Survey Party, Nos. 2 and 8, and 229 square miles were surveyed during the season commencing from the 8th December 1894 to the 5th March 1895. Munshi Panch Cowrie Biswas, who was appointed Assistant Settlement Officer to carry out demarcation and khanapuri work, completed khanapuri as regards 100 square miles. The marks deliminating the jotes have disappeared in places by the encroachments of the rivers Balason, Mechi, and Mahananda, and boundary disputes accordingly arose. The total expenditure of the operations amounted to Rs. 19,289-13. In Rangpur a fishery was settled for five years and resumed estate with the head raiyat for ten years. The survey of the Jaipur Government estate in Bogra w[illegible]cess, [illegible]menced by a professional party acting without a Settlement Officer, was reduc[illegible]y 1893, and finished in September 1894. Khanapuri was [illegible] in the [illegible] the year under report, and attestation of about 12 s[illegible] [illegible]5. The work is backward. A Settlement Officer cou[illegible] [illegible]ipur and [illegible] the 9th of February 1894, when

the khanapuri was almost completed, and he returned to general duty on the 16th August 1894. He took leave before the next field season and was transferred to other work. His successor, Babu Sarat Chander Das, arrived on the 29th of November 1894, and had to commence attestation without the advantage of communicating with the officers whose work he had to attest. He found many defects in the khanapuri, much of which had to be done once again. Up to the end of March 1895 the existing rents and the status of 1,465 tenants were recorded after final attestation, but some of the entries will probably require further revision. There were 78 boundary disputes, of which 23 were disposed of by the Settlement Officer during the year. The cost of survey to the end of the year was Rs. 12,625-4 and that of settlement Rs. 4,912-2-3. Seven regular settlements were effected in Pabna, of which five were settlements of resumed estates and two of Government estates. Of the five resumed estates, four were settled with proprietors and one farmed out. The two Government estates are fisheries.

Estates held under direct management.

53. The following table will show the state of collections from these estates during the year:—

Districts.	Number of estates.			Total demand, arrear and current.	Total collections, arrear and current.	Total remissions, arrear and current.	Total balances.	Percentage of collections on demand.			Remarks.
	Belonging to Government.	Belonging to private individuals.	Total.					Arrear.	Current.	Total.	
1	2	3	4	5	6	7	8	9	10	11	12
				Rs.	Rs.	Rs.	Rs.

Total for 1894-95 ...	98	35	133	6,08,541	5,61,584	3,496	43,461	91·8	91·2	92·3	
Total for 1893-94 ...	97	33	130	6,26,083	5,67,510	2,975	55,598	89·4	90·8	90·4	

The collections were satisfactory in Dinajpur and Rangpur.

Agency and the mode of management.

54. There has been no change in the agency and mode of management.

Cost of management.

55. The following table shows the cost of management in the several districts:—

Districts.	Revenue demand of estates for which the expenditure in column 3 was incurred.	Cost of management, including contingencies.	Percentage of column 3 on column 2.
1	2	3	4
	Rs.	Rs.	
Rajshahi ...	8,862	398	4·47
Dinajpur ...	......	......	......
Jalpaiguri ...	3,75,945	17,238	4·5
Darjeeling ...	1,10,745	9,385	8·4
Rangpur ...	......	......	......
Bogra ...	40,610	5,460	13·4
Pabna ...	15,116	1,462	9·67
Total for 1894-95 ...	5,51,278	33,943	6·1
Total for 1893-94 ...	5,40,702	33,489	6·1

The high cost in Bogra is due to the fact that a special officer is retained for the management of the Jaipur estate in that district.

Condition of raiyats, desertions, &c.

56. The condition of raiyats in Government estates is very like that of their neighbours on private lands, differing only in this, that as their rents are more permanently fixed, they are, on the whole, more prosperous. Like the surrounding raiyats, they are cheerful and fairly well off in the hills; they make money in the Terai country, though suffering in many parts from sickness; are free from poverty, but very ignorant in the Barind; are occasionally badly off in the Gangetic districts, and feel the pressure of population, while in other respects having a life very much to their taste. The only attribute they enjoy in common is security of tenure at a fair rent, and since the passing of the Bengal Tenancy Act, it is shared in some measure by the whole country. The prosperity of the Duars is due to the fact that it is a country newly conquered and reclaimed where population has not yet attained its limits.

Miscellaneous and sanitary improvements.

57. The following statement shows the expenditure from the grant for the management of, and miscellaneous and sanitary works of improvements in, Government estates during the year:—

Division.	Districts.	Amount expended from— 7½ per cent. Management proper.	Amount expended from— 7½ per cent. Miscellaneous improvements (including agricultural improvements and experiments).	Amount expended from— 2 per cent. for sanitary improvements.	Grant for agricultural public works.	Remarks.

	Bogra ...	5,460	266	808	......	
	Pabna ...	1,462	111	68	......	
	Total ...	33,943	16,495	7,050	1,334	

Details of the expenditure shown in columns 4, 5 and 6 of the foregoing statement are given in the following table:—

Districts.	Amount expended— In digging tanks and sinking wells.	In drainage and irrigation.	In planting trees.	On drains and embankments.	On roads.	On sundry works.	Total.
1	2	3	4	5	6	7	8
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Rajshahi ...	344	......	......	......	......	22	300
Dinajpur ...	......	......	......	......	......	......	......
Jalpaiguri ...	3,786	1,757	......	......	4,953	7,764	18,260
Darjeeling ...	......	......	......	......	5,000	......	5,000
Rangpur ...	......	......	......	......	......	......	......
Bogra ...	808	......	22	......	144	100	1,074
Pabna ...	68	......	......	......	......	111	179
Total ...	5,006	1,757	22	......	10,097	7,997	24,879

The greater part of the Rs. 5,006 devoted to water-works was expended on making 88 Raniganj pipe wells in the Duars—a very useful work where good drinking water is hard to get. Rupees 1,757 were spent in Jalpaiguri on dams on the Dhurdhura, Bhutki, and Barabisha rivers, repairing a channel at Chukchuka and some roadside drains. The Deputy Commissioner, Mr. Renny, reports that "by the construction of the bunds much improvement has been effected in bringing lands under cultivation which would have otherwise remained fallow. By clearing roadside drains the Alipur civil station has been better drained." Tree planting, I regret to see, was neglected except in Bogra; this is a matter I commend to the attention of all Collectors and tahsildars. The expenditure on road making was confined to Jalpaiguri and Darjeeling, new districts, where the work is much needed. The Darjeeling assignment of Rs. 5,000 was all paid as a contribution for the construction of an important bridge at Matigara on the Balasan river in the Terai. This may be suitable for once, but in general I prefer to see the grant used for various local works on the different estates rather than appropriated bodily for some one Government construction which is being mainly made out of other funds. In regard to expenditure under the head of miscellaneous improvements, I may observe that Rs. 2,250 were spent on the construction of record-rooms in the three tahsils. Besides what is shown in the preceding statement, a sum of Rs. 11,534 was spent during the year from the Darjeeling Improvement Fund on the construction of Hospital Assistant's quarters at Kalimpong, improvements of hats and bazars, the maintenance of roads, maintenance of the dispensary at Siliguri, and contribution to primary education.

Roads and communications.

58. The following table shows the amount expended in original works and repairs of the roads in different districts:—

Districts.	Construction of—		Maintenance and repairs of—		Total.	Remarks.
	Main roads and bridges.	Village roads.	Main roads.	Village roads.		
1	2	3	4	5	6	7
	Rs.	Rs.	Rs.	Rs.	Rs.	
Jalpaiguri ...	30,498	6,189	15,330	1,080	(a)53,097	
Darjeeling ...	800	...	5,965	...	(b)6,765	
Bogra ...	144	...	...	...	(c)144	
Total ...	31,442	6,189	21,295	1,080	60,006	

(a) and (c) Inclusive of the amount shown in the second table at the commencement of paragraph 57.
(b) Exclusive of the amount shown in the second table at the commencement of paragraph 57.

Cultivation of new staples.

59. Several experiments were tried during the year, that which produced the most favourable result being the sowing of the Naini Tal potato seed. This succeeded in Rajshahi and in the Alipur subdivision of Jalpaiguri, while it failed at Mainaguri.

Agricultural improvements, implements, machinery, &c.

60. No agricultural implements were tried during the year of report.

Working of the Public Demands Recovery Act.

61. The number of certificates issued during the year, exclusive of those received "from other districts," was somewhat less than that in the preceding year, being 6,220 against 6,835. The number of disposals by satisfaction of claim was greater than that of the preceding year by 881, and the number pending at the close of the year shows a decrease by 220. The realizations were much better, showing an increase of Rs. 60,840 over those of the preceding

year, and were generally made before sale of property, only Rs. 5,267 having been recovered by the latter method or arrest. The results are therefore, on the whole, very satisfactory.

Land acquisition.

62. There was no work of special importance in this department. The number of cases instituted and disposed of during the year was 17 and 11, against 6 and 9, respectively, in the previous year. The number pending at the close of the year was 28, against 22 in the previous year.

Partition.

63. Fifteen partition cases were instituted during the year, and 13 were disposed of, against 6 and 8, respectively, in the previous year: 52 cases are pending. I find great difficulty in securing continuous attention to this form of business. Partition cases are long, and the residence of officials in this Division is very short; as soon as a Collector or Deputy Collector has got the butwaras in hand, he seems to be invariably transferred. I have, however, noticed an improvement in recent years.

Registration of land mutations.

64. There were 1,793 instituted during the year, 1,800 were disposed of, and 480 remained pending. The instructions contained in the Board's circular order No. 3 of September 1891, dispensing with the necessity of recording evidence of possession in uncontested land registration cases, have been duly observed. The change has continued to work satisfactorily. It leads to the more speedy disposal of cases, and saves much expense to the applicants. It has not yet given rise to any fraudulent registration. The registers prescribed by the Act are generally in fair order.

Working of the Tenancy Act.

65. The importance of the use of the elaborate rent receipts prescribed by the Act is now universally known to the raiyats, and the forms have come into general use. This provision of the Bengal Tenancy Act has proved most successful: it has constructed a record of rights for the province on automatic principles.

66. The following statement shows details as to some operations under the Bengal Tenancy Act, VIII of 1885:—

Division.	Districts.	Transfer of tenures. (a) Voluntary, section 12(3).	(b) By decree sale, sections 13(2) and 14.	(c) By succession, section 15.	Commutation of rent payable in kind, section 40.	Appraising of produce where rent is paid in kind, sections 69 and 70.	Registration of improvement, section 80.	Certificates of Collectors as to acquisition of land for building or other purposes, section 84.	Notices of resumption of land by landlords, section 87(2).	Written permission to landlords to measure land, under section 90.	Applications by Collector for appointment of common manager, under section 93.	Applications made for survey and record of rights under chapter X.	Applications made for the survey and record of private proprietor's lands, under chapter XI.	Local enquiries held by the order of a Court, section 158.
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
Rajshahi.	Rajshahi	137	6	16	...	1	...	...	..	...	...	...	...	.

	Total for 1893-94 .	660	282	4	...	..	1	...	10	...	..	2	...	...

Three settlements under the Bengal Tenancy Act were completed during the year—of Lot Latijhari, a Ward's estate in Dinajpur; Char Pachakola, the property of Government; and Latuabari, a private estate in Pabna. There are 14 such settlements in progress. I have found the procedure of ordering a survey and record of rights to be made very effective for settling land disputes which, if left to be fought out, go on for generations. The objection to using the system more extensively is that most of the competent officers who can be spared for such work are engaged on the great settlements of Bihar and Orissa. When this agency is set free, I hope for great good to Bengal in the adoption of a more active policy where the relations between landlord and tenant are disturbed. The local officers cannot be got to do the work, and those at present sent on special duty are seldom fit to do it.

Landlords' fees.

67. Under sections 12 and 13 of the Bengal Tenancy Act, VIII of 1885, a sum of Rs. 1,044 was deposited as landlords' fees, against Rs. 1,262 in the previous year. The amounts accepted and refused by landlords were Rs. 301 and Rs. 669, against Rs. 244 and Rs. 966, respectively, in the preceding year. The figures indicate that the zamindars are somewhat less disinclined than they were to accept their fees, also that the raiyats' desire to pay has a little slackened. Rejection is still, however, the rule, acceptance the exception. The alleged object of the refusals is the fear of creating evidence that the holding is of the privileged character for which the fees are payable; it is not improbable that the hope of getting more than the legal fee by private arrangement is the real motive.

Relation between landlords and tenants.

68. The relation between landlords and tenants were on the whole peaceful and satisfactory during the year, though there were exceptions, some of which I note. In the Naugaon subdivision a complaint was made that the Chaudhuri zamindars of Kasimpur had the crops of their raiyats plundered for resisting a demand for enhanced rent. The charge was proved fully and certain persons convicted. In Rangpur the survey and settlement of Padamshar, where the relation between landlords and tenants had been very strained, has been effective in restoring peace. It is reported by the Subdivisional Officer of Gaibandha that "the zamindar of Bamandanga, Babu Sarat Chandra Roy Choudhuri, has become very unpopular on account of his vagaries and his shabby treatment of his tenants. His method of putting down his raiyats is said to be by letting loose his elephants, of which he possesses 12, without mahuts in charge of them, to wander through the crops and destroy them." The Collector says that steps have been taken to stop this procedure. It was a case of this kind, observed by me on tour, that led to the orders for settling rents in Padamshar. I should have thought it easy to deal with, so long as the zamindar confined himself to the use of an engine of oppression as conspicuous as an elephant. The Subdivisional Officer of Sirajganj writes:—"Most of the landlords keep large number of peons and sardars, very few are in undisputed possession of their estates, and collections are commonly made at least by show of force. Landlords are undoubtedly in a difficult position, and I think the raiyats can hold their own as a rule, but there are some serious disputes current between landlords and raiyats at present, and a few gross acts of oppression have undoubtedly occurred." I believe that the agrarian disputes in Sirajganj, which have been carried on for half a century and originally suggested the procedure for settlement now embodied in the Bengal Tenancy Act, could all be reconciled if certain portions of the subdivision were dealt with under the Act. But, as I have said, the opportunity for action in this direction will arise when the only agency fit to conduct it is set free.

Training of young officers in survey and settlement work.

69. In Darjeeling Mr. L. F. Morshead made certain preliminary enquiries in connection with the resettlement of the Terai jotes. In Pabna Mr. C. A. Bell, late Subdivisional Officer of Sirajganj, acted as Settlement and Revenue Officer of the private estate Uday Krishtopur Digur and Aminpur, and in addition as Settlement Officer in connection with settlements under Regulations of the petty estates. Mr. Carey, the present Subdivisional Officer, also acted as Settlement and Revenue Officer of estate Char Aminpur in addition to the settlement work of the petty estates under the Regulations.

Deputy and Sub-Deputy Collectors.

70. I desire to record no remarks under this head.

XVIII.—ATTACHED ESTATES, INCLUDING COURT OF WARDS.

71. There were eight estates under the management of the Court of Wards during the year. Babu Kunja Mohan Maitra, ward of the Talanda estate in Rajshahi, is being educated in the 4th class of the Rajshahi Collegiate School. The progress made by him in his studies is unsatisfactory. He has not obtained his annual class promotion this year. Both the wards of the Maldwar estate in Dinajpur have obtained their class remove in the school. Burdhankuti ward,

Babu Chandrakeshore Roy, has given up his studies and does not attend school. He is being taught now zamindari business at home by a tutor. The Rahamatpur ward was in good health and made progress in studies. He has been promoted from the 5th to the 4th class of the Hare School, Calcutta. The Tepa ward has also done well. He obtained his class remove from the 4th to the 3rd class of the Hare School, Calcutta. The progress made by the Hazrahati ward was unsatisfactory. Arrangements are being made to remove him from Rajshahi to Rangpur, and place him under the 2nd teacher of the local zilla school, who has been appointed guardian tutor of the ward. The survey and settlement of Lot Latijhari of the Maldwar ward's estate in Dinajpur, taken in hand in 1893, were completed during the year. The rental has increased from Rs. 3,750 to Rs. 4,520. The demand of the Wards' estates in the Division was Rs. 3,15,925 current and Rs. 2,10,609 arrear, making in all Rs. 5,26,534; the collections were Rs. 3,11,926, the remissions Rs. 11,501, leaving a balance of Rs. 2,03,107. The result is so far fair that the collections almost equalled the current demand, and that the arrears were reduced, though by very little only. Nothing is more difficult than to get a manager to apply for leave to write off a demand irrecoverable, even when, as is usually the case, it represents a sum that never was due—something entered in the account on the old zamindari princple of making the rent seem as large as may be. He finds that to obtain the remission costs trouble, and he does not see that it can benefit the ward; moreover, it is contrary to custom. It is for this reason mainly that the considerable arrears remain on the accounts year after year. The collections indicate different defects in the season as retarding realizations.

XIX.—EXCISE.

72. The following statement shows the excise revenue in the several districts of this Division during the year 1894-95:—

ISTRICTS.	Country spirit.		Tari.		Pachwai.		Rum, &c.		Charas, &c.		Ganja and bhang.		Opium.		Druggists' licenses.		Miscellaneous.		
	1893-94.	1894-95.	1893-94.	1894-95.	1893-94.	1894-95.	1893-94.	1894-95.	1893-94.	1894-95.	1893-94.	1894-95.	1893-94.	1894-95.	1893-94.	1894-95.	1893-94.	1894-95.	1893-9

na ...	33,229	37,087	168	227	214	212	1,630	1,713	1,080	1,682	51,215	51,974	18,246	17,470	9	35	59	95	1,0
Total ...	4,02,333	4,30,458	3,617	4,103	31,949	35,380	26,122	28,100	7,777	9,371	2,51,970	2,71,547	2,23,681	2,20,412	343	349	780	806	9,4

The statement shows a moderate increase in the receipts under every head except opium, the demand for which remains almost unchanged. The steady growth of the excise I attribute to the same cause as that of the stamp revenue—the normal development of a year during which the people were fairly prosperous, in a country progressing both in population and wealth. Exclusive of the cost price of opium, it amounted to Rs. 51,954, or 5·5 per cent. To ascertain the increase due to greater consumption in this Division, it is necessary to exclude also the figures as to ganja, a drug we produce rather than use; calculated thus, the excise revenue was Rs. 6,96,602 in 1893-94 and Rs. 7,28,979 in 1894-95, showing an improvement of Rs. 32,377, or 4·6 per cent.

The increase is mainly under the head of country spirit and ganja, which account for Rs. 28,125 and Rs. 19,577 respectively, and is on account of better settlement.

There were 123,421 gallons of country spirit consumed during the year, against 113,908 of the previous year, showing an increase of 9,513 gallons. The consumption of ganja and opium was 442 and 183 maunds, against 462 and 190 maunds, respectively, in the preceding year.

The rate per head of the population of the total excise revenue was as follows in the several districts:—

	As.	P.
Rajshahi	1	7
Dinajpur	1	7
Jalpaiguri	3	9
Darjeeling	13	0
Rangpur	1	5
Bogra	1	6
Pabna	1	3

The consumption of country spirits is highest in Darjeeling, and of opium in Rangpur, as was the case in the preceding year.

73. The area cultivated with ganja decreased from 3,295 bighas to 2,011, the number of raiyats growing the drug from 2,879 to 1,842, the produce from 9,755 maunds to 3,235. The figures indicate a bad season, caused by excessive rain at the commencement of the season, and the appearance of the red spider later on. The quantity of ganja exported from the producing and storing station at Naugaon was 5,456 maunds 28 seers 2 chitaks, against 7,434 maunds 1 seer 1 chitak in the preceding year. Its distribution was as follows:—

	Mds.	s.	c.
Bengal	4,627	6	14
Orissa	96	37	4
Assam	596	35	12
Kuch Bihar	62	12	8
North-Western Provinces ...	73	15	12
Total ...	5,456	28	2

The export to the North-Western Provinces has steadily increased. The duty on ganja sent there was Rs. 18,214. This sum was paid at the Naugaon sub-treasury under a rule which seems contrary to the economic principle that taxation should not be levied until the latest moment possible. In the case of Assam the more convenient system is adopted of realising the duty in the consuming districts. The rate of duty during the year remained unchanged; 58 persons were licensed to act as ganja brokers, against 70 in the previous year. There were 14 prosecutions for offences against the Ganja Act: 10 for illegal possession, 3 failing to account for stock, and 1 for illegal sale. Of these cases 13 ended in conviction.

XX.—STAMPS.

74. The subjoined table shows the stamp revenue during the year 1894-1895:—

Districts.	Court-fees.	Copies.	Non-judicial adhesive.	Receipt.	Non-judicial impressed.	General.	Court papers.	Total.	Remarks.
1	2	3	4	5	6	7	8	9	10
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	
Rajshahi	1,91,121	10,273	6	3,185	42,640	2,379	2,880	2,52,484	
Dinajpur	1,68,057	7,602	21	6,118	74,810	3,384	3,727	2,63,719	
Jalpaiguri	76,042	4,533	52	4,232	30,183	1,290	1,530	1,17,862	
Darjeeling	18,715	795	21	5,109	7,548	228	255	32,671	
Rangpur	2,02,873	15,263	10	5,526	1,13,271	3,433	6,375	4,06,751	
Bogra	88,540	5,274	...	1,656	44,862	1,160	2,229	1,43,721	
Pabna	1,93,042	11,719	4	3,209	67,871	4,726	3,772	2,84,343	
Total for 1894-95 ...	9,98,390	55,459	114	29,035	3,81,185	16,600	20,768	15,01,551	
Total for 1893-94 ...	9,51,318	54,780	147	27,765	3,71,928	21,268	20,772	14,47,977	

The year under report brings in an increased stamp revenue of Rs. 53,574, or 3·8 per cent. over the receipts of the preceding year. The increase is mainly in court-fee stamps, which account for Rs. 47,072. The steady growth of the revenue is due to the progress of the country in population and wealth. Compared with the previous year, it appears that the proportion of revenue to population is stationary in the case of both non-judicial and court-fee stamps in all the districts except Rajshahi, Darjeeling, and Bogra. Rajshahi shows a proportion of ·1 against ·09 in the case of court-fee stamps. Bogra shows a proportion of ·06 against ·05 in the case of non-judicial stamps, and Darjeeling a proportion of ·05 and ·08 against ·06 and ·1 in the case of both the stamps respectively. The divisional average for non-judicial and court-fee stamps is ·05 and ·1, respectively, as was in the preceding year. The number of cases in which duty and penalty were realized by Civil Courts under section 34 of the Indian Stamp Act, I of 1879, was 242, against 275 in the previous year, showing a decrease of 33. The amount of duty and penalty realized was Rs. 1,510, against Rs. 2,043 in the preceding year, showing a decrease of Rs. 533. The number of cases in which duty and penalty were levied by Collectors under section 37 was 299 against 306, showing a decrease of 7 cases, and the amount of duty and penalty realized was Rs. 2,428 against Rs. 2,587, showing a decrease of Rs. 159. Two cases occurred in Rajshahi in which duty and penalty to the amount of Rs. 46 were realized during the year under sections 19E and 19G of the Court-fees Act, VII of 1870. The number of prosecutions instituted for the infringement of the provisions of the Indian Stamp Act was 126 against 118, the number of persons brought to trial was 160 against 109, the number of convictions was 141 against 90, the amount of fines imposed was Rs. 812-8 against Rs. 460, and the amount disbursed as rewards was Rs. 187-8 against Rs. 124 in the preceding year.

XXI.—INCOME-TAX.

75. The general result of income-tax operations is summarised in the following abstract:—

YEARS.	Number of persons assessed.	Demand (tax).	Collections.	Percentage of collections to demand.	Distress warrant.	Penalties.	Expenditure.	Percentage of expenditure to collections.	Objections.
1	2	3	4	5	6	7	8	9	10
		Rs.	Rs.			Rs.	Rs.		
1893-94	12,942	3,03,559	3,01,608	99·3	539	2,315	16,754	5·5	773
1894-95	13,342	3,08,139	3,04,274	98·7	601	3,476	16,813	5·5	739
Increase or decrease	+400	+4,580	+2,666	—·6	+62	+1,161	+59	...	—34

With the increased number of assessees the demand and collections increased by Rs. 4,580 and Rs. 2,666, respectively. The percentage of expenditure to collections was stationary. The realizations were satisfactory, being 98·7 per cent. of the demand. In no district did they fall below the minimum standard of 95 per cent. The proportion of persons assessed to population for the Division was 1 to 600, against 1 to 619 in the preceding year, and the average incidence of tax was the same as in the preceding year, viz., 1 to every 26 persons. The incidence of tax is highest in Darjeeling (1 to every 5 persons) and lowest in Rangpur (1 to every 41 persons). There was a decrease of ten cases in the number of sales in the districts of this Division, the figures of the year being 60, against 70 of the previous year.

XXII.—MONETARY ARRANGEMENTS.

76. The circulation of currency notes during the year and the preceding year will be seen from the following statement:—

	Rajshahi.				Dinajpur.				Jalpaiguri.				Darjeeling.			
	Value of notes received.		Value of notes issued.		Value of notes received.		Value of notes issued.		Value of notes received.		Value of notes issued.		Value of notes received.		Value of notes issued.

The value of notes received during the year declined from Rs. 50,28,555 to Rs. 48,26,635 and of issues from Rs. 51,44,520 to Rs. 47,10,510. The falling off was in the district of Jalpaiguri, and is attributed by the Deputy Commissioner to the fact that planters preferred this year paying dues in cash rather than in notes. I noticed that rupees were more plentiful at the station this year than formerly, and that one could not remit to Calcutta at par; but I could not ascertain the reason; perhaps the establishment of a branch of the bank of Bengal there had some influence, though of this I am not sure. The decline in issue was a consequence of that in receipts; notes paid at Jalpaiguri are in the end sent to Calcutta.

77. The following table shows the number of depositors and the amount of deposits in the Savings Banks at the close of the year 1894-95 as compared with the previous year:—

Here, again, we find the increase to be expected with the growing wealth of the district.

XXIII.—RAILWAYS AND OTHER PUBLIC WORKS.

(a) Railways and railway feeder roads.

79. An application was made during the year for a concession to run a light tramway from Siliguri to Naxalbari in the Terai of the Darjeeling district, but I had to return it, as it contained none of the details required by the Tramway Act. Survey operations were taken up for a railway line to Gaibandha through Ghoraghat in the district of Dinajpur. In the Bengal Duars Railway the following lengths were opened for traffic during the year:—

From Lataguri to Ramshai for passengers ... ... = 5·40 miles.
From Mal Bazar to Damdim for passengers and goods ... = 4·15 „

During the year under report 36·40 miles were open for both passenger and goods traffic.

The following branch lines to the Railway were ordered to be surveyed, and parties of surveyors took the field in January last :—

Damdim *viâ* Bagrakote to Siliguri	...	25 miles.
Sivok to Tista Bridge	...	18 "
Mal Bazar to Hantupara	...	35 "
Bagrakote to Daling Coalfield	...	6 "
Total	...	84 "

Railway feeders.

The Public Works Department cart road at Kurigram in the district of Rangpur by the side of the railway line, being insufficient for traffic, a new feeder was constructed at a cost of Rs. 2,281. This road forms a feeder to the Kurigram railway station. A diversion of road No. 62 in the district which feeds both the stations of Badarganj and Saidpur was also made. No new feeder roads were constructed in the other districts of this Division.

Other public works.

There is no irrigation or other public works of importance in this Division.

The Imperial and Provincial buildings were kept up by the District Boards economically. The Boards also undertook the construction of some original works at the expense of Government.

(*b*) Steamer service.

80. The subsidy which the District Board of Rajshahi used to pay to the India General Steam Navigation Company was withdrawn during the year. It is reported that at present there is no regularity in the times of arrival of the steamer between Damukdia and Rampur Boalia and between the latter and Malda. The service has consequently become unpopular. The Pabna District Board subsidises a steam ferry between Pabna and Kushtia.

(*c*) Tanks, wells, roads, etc., constructed by private individuals and by the District Boards.

81. The total number of tanks and wells, roads and bridges, and other works of public utility constructed and repaired by private individuals during the year 1894, and the cost of their construction and repairs in the several districts of the Division, are shown in the following table :—

Districts.	Number of tanks and wells.	Cost.	Number of roads and bridges.	Cost.	Hospital, school, and other buildings of public utility.	Cost.
1	2	3	4	5	6	7
		Rs.		Rs.		Rs.

Total for 1894-95	2,32,294	1,59,239	2,27,866	1,97,244	4,60,160	3,56,483	77·5
Total for 1893-94	2,32,448	2,02,980	2,05,622	1,86,269	4,38,070	3,89,249	88·8

(a) This amount includes Rs. 3,906 expended out of Rs. 4,000 contributed by tea planters for the improvement of the Nagrakata road

(b) This amount does not include bills for works done during the year but not paid within the year.

It is stated in the reports that the roads in the districts of Rajshahi, Dinajpur, Darjeeling, Rangpur, and Bogra and the important roads in Jalpaiguri were kept in fair order. In Bogra the failure to work up to the estimates is very remarkable. It is explained that bills for Rs. 13,268 on account of work done during the year were submitted on the 30th and 31st March, but not paid during the year. Even if credit be allowed for this sum, there remains a considerable deficiency: and it is not satisfactory that such large demands should be crowded into the two last days of the financial year. The Ramshaihat to Nagrakata road which was severely damaged by the floods of 1893-94, stood

the rains of 1894 with the help of the protective works constructed. Many new roads have been opened in the Duars during the last few years, but more are still wanted. All important roads in the district of Darjeeling are in charge of the Public Works Department. That connecting the Tista Bazar and the Rungpo bridge has been completed by the Political Officer of Sikkim at a cost of Rs. 2,000, the money being supplied by the Public Works Department.

Village roads.

83. The amounts spent in the construction and repairs of village roads in each district are shown below:—

	Rs.
Rajshahi	4,809
Dinajpur	1,699
Jalpaiguri	303
Darjeeling	240
Rangpur	10,239
Bogra	2,765
Pabna	2,458
Total ...	22,273

As stated in the previous year, little can be gained by comparing these figures, because the system of classifying village roads is different in each district. The amounts spent under this head in the districts of Jalpaiguri and Darjeeling are very small. As regards Jalpaiguri, it is explained by the District Officer, Mr. R. H. Renny, that the income of the District Board is limited, and the demand on account of construction and maintenance of important roads is great, consequently sufficient money could not be found for village roads. In Darjeeling the village roads in the hill khas mahals are repaired by the raiyats at their own cost under a condition of the patta; hence Rs. 240 only were spent by the Road Fund Committee on repairs of village roads in the Terai. In Bogra, besides the expenditure of Rs. 2,765, a sum of Rs. 525 was advanced to the Manager of Jaipur Government estates and Rs. 150 to the villagers of Kola, respectively, for the construction and repairs of the khas mahal village roads and Kola village road, but the advance could not be adjusted during the year. The agency employed in the construction and repairs of village roads was generally composed of the headmen of villages. In Rajshahi, Dinajpur, Jalpaiguri, Rangpur, and Pabna the work was, for the most part, executed by petty contractors under the supervision of the overseers and sub-overseers.

Arboriculture.

84. No money was specially allotted by the District Board of Rajshahi during the year under this head, but the existing trees on the sides of roads were attended to. A sum of Rs. 58-13-3 is reported to have been spent by the Naugaon Local Board in maintaining the plants. It is stated by the District Officer that it cannot be gathered how much the District Engineer spent for the purpose, because such charges have been met from the road allotment, and charged to repairs. The District Board of Dinajpur planted 1,430 trees, and maintained old trees at a cost of Rs. 989. The species of trees planted are given in the margin. In Jalpaiguri the planting operation of new trees was not extended on any of the important roads in the district during the year, but 200 vacancies caused by casualties were filled up by new trees. The cost of planting new trees and of maintaining the existing trees amounted to Rs. 882. In Darjeeling Rs. 1,183-9 were spent in planting trees, of which Rs. 50 were spent by the Road Fund Committee, Rs. 20-9 by the Darjeeling Improvement Fund, and Rs. 1,113 by the Public Works Department. The District

Mahua	2
Mango	964
Sisoo	72
Seris	131
Champa	4
Moonchigandha ...	31
Chandan	4
Jack	66
Bokom	19
Debdaru	1
Bokul	3
Foreign	133
Total ...	1,430

Board of Rangpur planted 130 trees, and maintained 10,857 existing trees at a cost of Rs. 494. These are mostly mango and jack fruit trees. At the head-quarters there are some sisoo, teak and mahogany trees, but they are not thriving. Recently two species of plants, soapnut (reetha) and akrot, are being largely raised, and from their thriving growth seem to be congenial to the soil. Effort is made from time to time to grow good timber or avenue trees, but with very little success. In Bogra the total cost of maintaining the existing trees was Rs. 273-6-6, but the charges have not been shown in the accounts owing to the payment of the amount being made in April 1895. The District Board of Pabna planted 400 new trees at a cost of Rs. 692-7-6, and maintained the existing trees at a cost of Rs. 1,318-15-3. The trees planted are mango, jack, peepul, banian, bot, seris, gambher, jam, and kadam.

I am not satisfied with the degree of progress made in tree planting throughout the Division generally. Rangpur and Bogra are particularly deficient in this respect, as they are in working up to their estimates.

XXV.—WORKING OF THE LODGING-HOUSE ACT.

85. The Act is not in force in any district in this Division.

XXVI.—EDUCATION.

86. The progress made during the year in education is illustrated by the following table:—

CLASS OF SCHOOL.	Number of schools at the end of March—		Number of pupils at the end of March—		Cost per head per pupil.	
	1893-94.	1894-95.	1893-94.	1894-95.	1893-94.	1894-95.

The figures indicate a very satisfactory improvement in the number of schools and pupils, with a corresponding economy in the cost of education to the individual scholar. In 1892-93, the progress in regard to pupils was less than three per cent., last year it was six per cent., and this year it has risen to twelve per cent. The District Officers will do well if they can maintain this rate of geometrical progression. There is still ample room for improvement, the proportion of boys of school-going age under tuition in this Division being only 19 per cent., against 26 per cent. in Bengal generally. I think that the people of Rajshahi are as forward as the average of the province, and can only attribute the comparative illiteracy of the masses to neglect in the past, for which we should now atone.

87. In the order of educational merit the districts rank as follows:—

DISTRICTS.	Number of boys of school-going age.	Number under instruction.		Percentage of pupils to school-going age.		Improvement.
		1893-94.	1894-95.	1893-94.	1894-95.	
1	2	3	4	5	6	7
I. Bogra ...	62,837	12,487	13,932	17·7	22·1	4·4
II. { Pabna ...	101,587	19,883	21,073	19·0	20·7	1·7
II. { Darjeeling ...	18,456	3,474	3,831	17·4	20·7	3·3
III. Rajshahi ...	98,150	13,486	18,880	13·9	19·2	5·3
IV. Dinajpur ...	121,807	22,046	22,304	17·2	18·3	1·1
V. Jalpaiguri ...	54,698	8,655	9,843	13·7	17·9	4·2
VI. Rangpur ...	159,271	24,038	26,479	14·1	16·6	2·5
Total ...	616,806	104,069	116,342	16·7	18·9	2·2

88. The progress made in each district, as indicated in this table, is fair, and in some instances very remarkable; but it must be sustained for a considerable time before the results can be regarded as in themselves satisfactory.

89. The Rajshahi College passed two students for the M.A. examination, the first from the institution to obtain that distinction. At the B.A. examination it passed only one, against two last year; at the F.A. 32 passed, against 24. The collegiate school was not as successful as formerly at the Entrance examination.

90. The number of schools and pupils in the high English class increased largely, as was to be expected, considering the great rewards which attend proficiency of this kind; on the other hand, there was some falling off in the number receiving middle class education. Rangpur and Pabna took the first place among the zilla schools; Shazadpur, Sirajganj and Dighapatia among those aided by Government. In regard to mass education Bogra stands highest. The Board raised all rates of reward by one-third, with results which may induce other districts to follow this good example. The increased outlay is stated to have been Rs. 1,205. I am glad to notice a great improvement in the Rajshahi returns. Last year I commented on the want of zeal and success in dealing with primary education which has long been a tradition of that district, on the refusal of all rewards to small schools, and the arbitrary maximum restricting the amount of rewards in the large schools. The rule as to the maximum has been abolished, an additional sum of Rs. 2,500 has been granted, and the Deputy Inspector has urged his subordinates to start new patsalas. A more doubtful measure was taken in holding out hopes of reward to inspecting pandits who may increase the number of schools and pupils. The effect has been to raise Rajshahi from the lowest place in the table of educational merit to a position in the centre. The expenditure in the Division generally on primary education rose from Rs. 77,364 to Rs. 111,796—a fact which by itself explains the increase in the number of pupils. Progress in primary education under the system of payment by results is very much a matter of money; there are pupils eager to learn and teachers ready to instruct; it needs only a moderate amount of financial assistance to bring them together. The Maharaja of Kuch Bihar set an example by granting Rs. 1,824 for the support of schools on his estate in Jalpaiguri. Among special institutions I may mention the Rangpur Technical School, the number of pupils in which rose from 72 to 95. Raja Gobinda Lal Rai Bahadur contributes Rs. 1,200 a year to its support. It attracts pupils from many districts, and is doing excellent work. Marked progress has been made during the year in female education, the number of schools having risen from 133 to 160, that of pupils from 4,335 to 5,158. The number of Muhammadan pupils has increased from 59,974 to 68,558, and the proportion from 56 to 57 per cent. The educational results of the year are creditable to the officers of the department.

XXVII.—DISPENSARIES AND HOSPITALS.

91. *The following table shows the working of the dispensaries in the several districts in this Division :—*

Districts.	Number of dispensaries.	Income from— Municipal grant.	District Board grant.	Government.	Private subscriptions, endowments, &c.	Total.	Expenditure.	Total number treated. In-patients.	Out-patients.	Total.	Daily average number of in-patients.	Daily average number of out-patients.	Cost of diet per in-patient.	Ratio per cent. of the number of out-door patients to population.

Total for 1893 ...	49	19,943	7,990	2,269	38,234	68,436	65,682	4,278	211,360	215,638	154·71	1,276·92	0 2 3	2·63

There were 54 dispensaries, against 49 in the year 1893. One new dispensary has been opened by Setab Chand Lahar Bahadur at Bochaganj in the district of Dinajpur. This dispensary has not yet been placed under Government supervision, but will be this year. It is at present located in a room of the zamindar's cutcherry. A dispensary building with a ward for in-patients is about to be built. A new dispensary was also opened at Naxalbari in the district of Darjeeling on the 5th September 1894. It is doing good work and is appreciated by the inhabitants. A resident named Kazi Azimale has provided a building free of cost, and the people of the neighbourhood have promised to contribute Rs. 100 a year, payable in advance, towards the expenses. The Government dispensary at Kalimpong was closed on the 27th August 1894, a superior institution for in-door and out-door patients having been established there by the Mission of the Scotch Church under the immediate care of C. J. Ponder, M.B.C.M. A grant of money equivalent to the expenses of the former dispensary is given in aid by Government. An admirable hospital has been erected, and the arrangements are most complete. In Rangpur there were 15 dispensaries under the supervision of the Civil Surgeon; three of these, viz., Domer, Dimla, and Jaldhaka, were brought under supervision in 1894. In addition to these there are private dispensaries in Nawabganj and Mahiganj at the head-quarters of the district and at Kurigram. The Eastern Bengal State Railway has dispensaries at Kaunia and Saidpur. The Maharaja of Kuch Bihar maintains a private dispensary at Panga in the Kurigram subdivision. An excellent dispensary is maintained at Govindganj by the Tagore Estate. The Shazadpur dispensary in Pabna was burnt down, and was therefore closed throughout the year.

On the whole there was increase in the number of admissions of both in-door and out-door patients due to the opening of new dispensaries, to the unhealthiness of the year, and in some instances to increasing popularity. In Rajshahi and Bogra, where health has been good, and the number of institutions the same, the largely increased attendance (it was from 40,574 to 45,215 and from 22,525 to 25,644, respectively) must be attributed solely to the latter cause, and is highly creditable. Jalpaiguri, on the other hand, shows a falling off in work done, though the year there was unhealthy. The increase in Rangpur, from 55,473 to 75,578, is due to all these causes.

XXVIII.—LIBRARIES.

92. As stated in the reports of previous years, the number of public libraries in the Division is very limited. The Rajshahi institution was maintained very efficiently. It is under the management of a Committee with an Honorary Secretary, the salaried staff consisting of a librarian and 4

peons. The accommodation in the present building being insufficient, a proposal is under contemplation to construct a more spacious building at a cost of Rs. 8,000. There are two public libraries in the district of Rangpur, one at the Sadar station and the other at Nilphamari, both maintained by public subscriptions. The Bogra Public Library is reported to have been in good condition. As reported last year, there are three public libraries in the district of Pabna, one at Pabna, another at Sirajganj, and the third at Porjona in the Sirajganj subdivision. They are reported to have been in good condition. The public library at Pabna is managed efficiently by a Committee of 25 members presided over by the District Judge. It has a librarian at Rs. 10 and a peon at Rs. 6 per mensem. There are no public libraries of any importance in Dinajpur, Jalpaiguri, and Darjeeling. A proposal is now on foot to establish a combined public library and museum in Darjeeling.

XXIX.—MUSEUMS.

93. There are no museums in this Division.

XXX.—LOCAL SELF-GOVERNMENT INSTITUTIONS.

94. The average attendance at the important Committees was as follows in the several districts in this Division:—

Districts.	Names of Committees.	Number of Members.									Number of meetings held.			Average attendance at each meeting.					
		Municipal Commissioners.			District and Local Boards.			Education Committee.			Municipal Committee.	District and Local Boards.	Education Committee.	Municipal.		District and Local Boards.		Education.

N.B.—The figures shown in columns 6, 7, 8, 13, 17 and 18 against Darjeeling refer to the District Road Cess Committee. (*a*) official and non-official.

In the matter of attendance there has been no great change since last year. Local institutions continue to work smoothly, and with the degree of efficiency noticed under the different headings of this report dealing with the several departments of their business. During the year under report a Local Board has been established at Thakurgaon, in the district of Dinajpur, consisting of eight members with the Subdivisional Officer as its Chairman.

XXXI.—EMPLOYMENT OF MUHAMMADANS.

95. The following statement shows the offices held by Muhammadans in the several districts of this Division during the year 1894-95:—

Districts.	Number of Gazetted Officers.		Number of Muhammadans holding Gazetted appointments.				Ministerial Officers.			Menials.		
	Above Rs. 100 salary.	Rupees 100 and under.	Above Rs. 100.		Rupees 100 and under.		Total number.	Muhammadans.		Total number.	Muhammadans.	
			1893-94.	1894-95.	1893-94.	1894-95.		1893-94.	1894-95.		1893-94.	1894-95.
1	2	3	4	5	6	7	8	9	10	11	12	13
Rajshahi	16	...	1	1	...	...	147	23	23	240	99	120
Dinajpur	16	...	1	2	...	...	120	17	18	239	121*	125
Jalpaiguri	11	...	1	...	...	...	102	5	4	106	50	56
Darjeeling	5	...	...	...	...	...	40	6	5	72	21	19
Rangpur	21	1	...	...	...	1	213	41	43	350	199	195
Bogra	9	...	...	...	...	...	102	36	38	136	81	78
Pabna	16	1	1	1	...	...	166	23*	24	226	123	121
Divisional Total ...	94	2	4	4	...	1	890	151*	155	1,360	694*	714

* Revised figures.

From the foregoing table it will be seen that the number of Muhammadan ministerial officers in the Division was 155, against 151 in the previous year. The proportion of offices held by Muhammadans is 17·4 per cent., against 16·9 per cent. in 1893-94—a small number in a Division where the majority are of that creed. The causes which have led to this result are well known.

XXXII.—POST-OFFICE AND TELEGRAPH.

96. The department was worked during the year with its usual efficiency.

Post-office.

Two new post-offices were opened in Jalpaiguri during the year, one at Ramshaihat and the other at Deomoni. In Darjeeling a new post-office was opened at the Clarendon Hotel (Kurseong). New post-offices have been opened at the following places in the district of Rangpur:—Bathor Lalmonirhat, Haripur *alias* Kalirbazar, Nawdanga, Khariabanda, and Dhopadanga. One branch office was opened in Bogra. A branch post-office was also opened at Salgaria in the town of Pabna, but it was afterwards closed as it failed to prove self-supporting. A case of mail robbery occurred in Dinajpur in February last, in which Rs. 610 were stolen. The case was detected, and the runner who committed the offence was sentenced to two years' rigorous imprisonment. The whole of the property stolen was recovered with the exception of one rupee. In Jalpaiguri the contents of a value-payable parcel were tampered with; suspicion has fallen on a postal delivery peon. The runner of the line Dulai to Talat in the district of Pabna stole Rs. 115 from the mail bag, he was prosecuted and sentenced to one year's rigorous imprisonment and to a fine of Rs. 5. The mail from Pabna to Sara was robbed near Arankola on the 30th of August 1894. The runner was severely wounded, and currency notes worth Rs. 1,450 and one silver ornament of the value of Rs. 20-12 were taken away by the robbers. A police enquiry was made, but there was no detection of the offenders.

97. The Telegraph Department worked satisfactorily during the year.

Telegraph.

A new office was opened in connexion with the post-office at Nagrispur in the district of Darjeeling and another at Nilphamari in the district of Rangpur.

XXXIII.—ZAMINDARI DÁK.

98. The demand on account of dák cess was Rs. 47,005 for the current year, and Rs. 2,416 arrears, making a total of Rs. 49,421. The collections, Rs. 8,378, advanced in the previous year, amounted to Rs. 48,207. The outstanding balance was reduced from Rs. 2,416 to Rs. 1,287; more than half of this is in the Pabna district. These results are very satisfactory.

The following statement shows the expenditure and balance of the Zamindari Dák Fund in the districts of the Rajshahi Division during the year 1894-95:—

DISTRICTS.	Collection on all accounts.	Balance in hand from the previous year.	Total.	Expenditure.	Balance in hand.	REMARKS.
1	2	3	4	5	6	7
	Rs.	Rs.	Rs	Rs.	Rs.	
Rajshahi ...	8,844	2,456	11,300	9,521	1,779	
Dinajpur ...	9,900	8,730	18,630	9,309	9,321	
Jalpaiguri ...	3,668	7,531	11,199	3,943	7,256	
Darjeeling ...	......	......	...	......	......	
Rangpur ...	10,743	7,188	17,931	10,454	7,477	
Bogra ...	5,694	1,496	7,190	5,441	1,749	
Pabna ...	9,358	5,639 (a)	14,997	9,183	5,814	
Total ...	48,207	33,040	81,247	47,851	33,396	
Total for 1893-94	53,833	27,311	81,144	47,983	33,161	

(a) These are the correct and revised figures.

It will be seen that in every district there is an adequate balance. In some instances the amount in hand is excessive. The rates per Rs. 100 of revenue at which the cess was levied were as follows:—

	Rs. A.		Rs. A.
Rajshahi ...	1 0	Rangpur ...	1 0
Dinajpur ...	0 10	Bogra ...	1 4
Jalpaiguri ...	2 0	Pabna ...	2 4

These rates have been fixed by Government for the five years commencing from the 1st January 1893.

Fairs.

99. The most important fair in the Division is that held at Nekmurd in Dinajpur during the month of April. In regard to it the following statistics have been collected through police agency:—

DESCRIPTION OF ANIMALS SOLD.	NUMBER SOLD.		TOTAL PRICES REALIZED.		AVERAGE PRICE PER HEAD.	
	1893.	1894.	1893.	1894.	1893.	1894.
1	2	3	4	5	6	7
			Rs.	Rs.	Rs.	Rs.
Elephants	145	100	1,16,000	80,000	800	800

Earthenware	30	2,500	2,000
Total ...	1,208	4,89,700	2,63,500
Total for 1893 ...	977	4,04,550	2,26,200

The only fair worthy of notice in the district of Rajshahi is the one which is annually held at Khetur, in thana Godagari, before the temple of *Gourango*, who is believed by the *Baisnavas* to be an incarnation of *Bisnu*. About 35,000 pilgrims and other persons are reported to have been present in the last fair which commenced from the 16th and lasted till the 21st October 1894. English piece-goods, country cloth, brass utensils, cane-baskets, earthenware and condiments of various descriptions were exposed to sale.

As reported last year, three fairs are annually held in the district of Jalpaiguri, viz , Jalpesh fair, Alipur fair, and Falakata fair. The principal and the oldest is the Jalpesh fair. It commenced on the 22nd February 1895, the day of *Sivaratri* festival, and lasted for three weeks. The income derived from different sources amounted to Rs. 1,102, against Rs. 1,154 in the previous year, and the expenditure incurred in its management was Rs. 140 only, which was met from the Duars Market Fund. The Alipur fair commenced from the 20th day of January and continued till the end of the month. Out of the sanctioned amount of Rs. 200, Rs. 173-10 were spent on erecting booths, arranging conservancy, providing amusements and on guarding. The Falakata fair was held from 31st January to the 14th February 1895, just after the breaking of the Alipur fair. Out of the Government grant of Rs. 300, Rs. 258 were expended on its management. The Alipur and Falakata fairs are intended to encourage trade with Bhutan, as well as to bring within reach of the people articles which would not otherwise find their way to these remote parts.

There are no important fairs in Darjeeling. The annual agricultural show at Kalimpong was held on the 28th and 29th November 1894. The Rev. J. A. Graham and a local Committee undertook the supervision. About 4,000 persons assembled. A large number of Europeans visited the show. Rupees 500 were contributed by the Darjeeling Improvement Fund and Rs. 400 by Government. A large amount was raised by local subscriptions.

There are numerous petty fairs held in all parts of the district of Rangpur from the month of November to May. The only fair of any importance is that held at Darwani in the months of February and March, lasting for a month.

No important fairs are held in the districts of Bogra and Pabna. The "Basanta mela," held in the town of Pabna in March every year, since 1892, has ceased to exist during the year under report.

Sanitary arrangements were made, where necessary, and there was no outbreak of any disease in any of the fairs mentioned.

Ferries.

100. The receipts during the year on account of ferries were Rs. 1,16,526, against Rs. 1,01,860 last year, the expenditure being insignificant, except when now and then a new ferry is acquired. This is because the cost of management is borne by the farmers; considerable improvement is being effected in the quality of the boats maintained. For this purpose I have always advocated the use, on ordinary rivers, of floating platforms, on to which a loaded cart can be driven. In Dinajpur all the crossings are now supplied with this convenience, and their use is also general in Jalpaiguri and Rajshahi. The Bogra Board has sanctioned the plan of a model platform, and prescribed its universal adoption. It is only in Rangpur that nothing has been done to promote this very desirable improvement. I am distinctly of opinion that the ferries are at present regarded too much as a mere source of revenue, to be farmed out to the highest bidder, without securing adequate expenditure on maintenance; the exception made regards the ferry at head quarters where a steamer may be subsidised. They are in reality the weak links in the chain of communications, needing more care than any other. A District Officer's efficiency may often be measured as well by the state of his ferries as by the quality of the reports he prepares for his superiors. Some estimate as to the care taken in selecting good men as farmers of ferries may be formed from the returns of certificates issued for the realization of dues. As a general rule, the farmer who does not discharge the duty of paying with punctuality can be trusted in nothing; if he does not keep his contract in regard to the clause, a breach of which is sure to be resented, he will not observe it in matters he can hope to conceal, such as the supply of proper boats, and illegal exactions. A hundred and nineteen certificates were issued during the year, of which 74 were in Rangpur; the amount thus demanded was Rs. 16,802, of which Rs. 11,722 relate to Rangpur. An Inspector of ferries was appointed in the latter district during the year, and I have no doubt his services are required. In Rajshahi no certificates were issued, and the results elsewhere were fairly good except in Jalpaiguri. I am urging on District Boards the expediency of farming ferries for terms of years to respectable men, and hope that a proposal so obviously reasonable will be ultimately adopted. No one defends the old system of letting the ferries, with all the power for evil this implies, to any rogue who may bid the highest at an annual auction, but it is difficult to get District Officers to take the trouble which any reforms would involve. It should, I think, be understood that the Boards have a claim only to the surplus profit which remains after ferries are properly managed in the public interest, and any attempt to increase the revenue by sacrificing the work should be discouraged.

Pounds.

101. There were 625 pounds in the Division during the year, the number being almost the same as in 1893-94. They are leased out, like ferries, every year to the highest bidders. I do not find that their state is anywhere considered satisfactory, except from the revenue point of view, the object of a farmer on these terms necessarily being to make what he can in the year. In Rangpur, a beginning of a better system was made by leasing six pounds for a term of three years. The receipts rose from Rs. 86,197, the revenue of the previous year, to Rs. 92,456; the expenditure fell from Rs. 4,192 to Rs. 3,487. The number of certificates issued was 365—more than one for every two pounds; in Rangpur there were more certificates than pounds. The difficulty with which the revenue is collected indicates the class of men with whom the owners of cattle have to deal. Nine prosecutions of pound-keepers are reported. New forms for pounds were introduced during the year by order of Government. The Collector of Rangpur notices that these were not properly maintained, the farmers always keeping the accounts so as to show a loss, with a view to keep down the rents at the auction sales.

XXXIV.—SOCIAL AND POLITICAL INSTITUTIONS.

102. The following table shows the number of social and political institutions maintained in this Division during the year 1894-95:—

DISTRICTS.	Serial No.	Names of Institutions.	REMARKS.
1	2	3	4
Rajshahi ..	1	Boalia Hindu Dharma Sabha.	Besides the institutions mentioned in column 3 there is a Brahmo Samaj in each district, and also one in the subdivision of Sirajganj.
	2	Rajshahi Association.	
Dinajpur ...	3	Dinajpur Dharma Sabha	
	4	Branch Indian Association.	
Jalpaiguri ...	5	Rate-payers' Association.	
	6	Duars Planters' Association.	
Darjeeling ...	7	The Darjeeling Tea Planters' Association.	
	8	The Terai Planters' Association.	
	9	The Darjeeling Association.	
	10	The Kurseong Association.	
Rangpur ...	11	Dharma Sabha.	
	12	Muhammadan Association.	
	13	Branch Committee of the Indian Association.	
	14	Nilphamari Sanmilani Sabha.	
Bogra ...	15	People's Association.	
	16	Standing Congress Committee.	
Pabna ...	17	Pabna Ariya Dharma Sabha.	
	18	Sirajganj Arja Dharma Procharini Sabha.	

Both of the institutions in Rajshahi are important, the one from the religious and the other from the political point of view. Once a year, at the time of Dol Jatra, a large assembly of learned pandits from different quarters is collected by the Hindu Dharma Sabha, questions of philosophy and theology are discussed, and lectures are delivered. A title examination for Sanskrit students is also held under the auspices of this institution. The Rajshahi Association interests itself in political movements. During the year under report this Association gave opinions on the Sanitary Drainage Bill, the Public Demands Recovery Act, the Revenue Sale Law Bill, and the Police Bill. The Branch Indian Association at Dinajpur exists only, while the Rate-payers' Association has already ceased to work. The Darjeeling Tea Planters' Association and the Terai Planters' Association take interest in matters concerning the district, such as construction of bridges, roads, &c., as well as in what more directly concerns the tea industry. There is only one Muhammadan Association in this Division—that at Rangpur. The Collector of Bogra writes:—"Both the People's Association and the Standing Congress Committee do not regularly meet to discuss questions of public interest, but only when meetings are advertised with a view to depute representatives."

State of public feeling.

103. The political views of the European residents of the Division, including the influential body of the planters, are made known to Government through their Associations, and need not be repeated by me. The large and increasing class of natives educated on the European system has also its accredited organs, which leave us in no doubt as to its opinions. Among the people at large, political feeling has been singularly quiescent during the year. They are learning to leave public affairs more and more to the class which has made them a speciality, following in this respect the Hindu principle of keeping every occupation to a single caste. There was no agitation on the subject of kine-killing, the only topic which really interests the masses. Mr. Walsh, Collector of Rajshahi, observes that among the Muhammadans the members of the sect known as Rafadani (the same as Wahabi) is steadily increasing. As a consequence the worship of pirs is on the decline, and there is a tendency towards the observance

of a more puritanical form of faith. I have long noticed the movement to which he alludes, but was not aware that it had been particularly marked during the year.

The public press: its tone and influence.

104. The subjoined table exhibits the newspapers published during the year:—

DISTRICTS.	Serial No.	Names of Newspapers.	How often published and in what language.
1	2	3	4
Rajshahi ...	1	*Hindu Ranjika*	Weekly, Bengali.
	2	*Shilpa* and *Krishi Patrika* ...	Fortnightly, ditto.
Dinajpur ...	3	*Dinajpur Masik Patrika* ...	Monthly, ditto.
Darjeeling ...	4	*The Darjeeling News*	Weekly, English.
	5	*Masik Patrika*	Monthly, Hindi.
	6	*Darjeeling Standard*	Weekly, English.
	7	*Eastern Himalayan Mission, Darjeeling, Kalimpong and Sikkim News* ...	Monthly, ditto.
Rangpur ...	8	*Rangpur Dik Prakash*	Weekly, Bengali.
Bogra ...	9	*Bogra Darpan*	Ditto ditto.

The number of the newspapers has risen to 9, against 8 of the previous year, owing to the starting of the *Bogra Darpan*, a vernacular weekly paper of limited circulation and moderate tone. The papers read by all classes are those which find favour among the native community in the capital, among which may be mentioned the *Hindu Patriot*, the *Statesman*, the *Indian Mirror*, the *Amrita Bazar Patrika*, the *Bengali*, the *Indian Nation*, the *Bangavasi*, and the *Sanjivani*. The tone of the vernacular press in this Division is that of Bengal generally, and is too well known to need description. It is precisely the same as that of the newspapers written by natives of Bengal in English. Its influence is almost confined to those who adopt European ideas, but among them is very great.

XXXV.—SUBORDINATE EXECUTIVE ESTABLISHMENT AND CHARACTER OF OFFICERS.

105. I desire to record no remarks under this head, a character report being appended.

XXXVI.—CONDUCT OF ZAMINDARS.

106. The zamindars of this Division are of every class, from the independent Chief, holding estates in British territory, or the millionaire, with property in a dozen districts, to the small money-lender, who has bought a few acres with a view to getting a profit by raising the rents. It is difficult to make any observation which will apply to the body as a whole, except that they do not effect agricultural improvements, such works being, by ancient custom, the business of the cultivators. They are generally liberal, in regard both to public and to private charities. The Kumar of Dighapatiya is mentioned by the Collector of Rajshahi as setting an example much needed, by refraining from the levy of illegal cesses and keeping proper accounts. His Highness the Maharaja of Kuch Bihar continues to manage his estates well; the Deputy Commissioner of Jalpaiguri states that he spent a month in this zamindari and in that of the Raikhat, without receiving a complaint. The worst accounts, as usual, come from Sirajganj, where the Subdivisional Officer complains that the zamindars keep professional *lathials*, and quarrel whenever they get an opportunity. The most serious dispute in the subdivision is being settled satisfactorily under the provisions of the Bengal Tenancy Act.

XXXVII.—GENERAL REMARKS.

107. All matters of importance having been dealt with under their respective heads, I have no special remarks to make.

RESOLUTION ON THE ADMINISTRATION REPORT OF THE ORISSA PORTS FOR THE YEAR 1894-95.

No. 1858Marine.

GOVERNMENT OF BENGAL—MARINE DEPARTMENT.

Dated Calcutta, the 16th September 1895.

RESOLUTION.

READ—

The Administration Report of the Orissa Ports for the year 1894-95.

The following table shows the receipts of the year, as compared with those of the previous year:—

PARTICULARS.	1893-94.	1894-95.	Increase.	Decrease.
1	2	3	4	5
	Rs.	Rs.	Rs.	Rs.
Port dues on vessels ...	2,095	1,675	......	420
Do. on mail steamers ...	11,920	11,626	......	294
Miscellaneous	117	488	371	......
Total Receipts ...	14,132	13,789	......	343

The largest part of this net decrease of Rs. 343 was at False Point. It was due to a falling off in the export of rice.

2. The expenditure of the year, as compared with that of the previous year, is summarised in the table below:—

PARTICULARS.	1893-94.	1894-95.	Increase.	Decrease.
1	2	3	4	5
			Rs.	Rs.
Establishment	11,237	10,470	......	767
Lighthouse establishment ...	3,563	3,952	389	......
Vessels and boats establishment ...	2,671	2,762	91	......
Dockyard services and supplies ...	6,958	7,981	1,023	......
Miscellaneous	1,529	184	......	1,345
Other charges	178	154	...	24
Total charges ...	26,136	25,503	......	633

3. The expenditure has far exceeded the revenue in the last two years shown as well as in the year previous, and the matter was brought prominently to the notice of the Government in view to effecting such economies as were possible, but it was not found possible to effect any great reductions, as the staff employed had been reduced to almost the lowest possible limit. It has been decided to amalgamate the appointment of Customs Officer and Port Officer, Chandballi, and to dispense with a boat's crew. The latter has already been done, and the former will be accomplished in November next, when the present Port Officer retires from the service. At False Point it has not been formed possible to effect a reduction of a boat's crew, but as the greater portion of the time of one boat is occupied by customs work, it has been finally decided that two thirds of the wages of the crew shall be debited to that Department. With these reductions, and a possible increase of revenue due to a higher rate

and more frequent levying of port dues, it is hoped that the great deficit now shown will gradually lessen. One item of the heavy expenditure is the large expenditure on Dockyard services and supplies. This expenditure should be carefully scrutinized by each Port Officer and reduced to the lowest possible limit, consistent with efficiency.

4. The following Table shows the number and tonnage of vessels that entered and cleared during the year, as compared with those of 1893-94.

	Year.	Entered.		Cleared.	
		No.	Tonnage.	No.	Tonnage.
False Point ...	1893-94	51	79,842	50	78,368
	1894-95	46	74,220	47	75,694
Balasore ...	1893-94	313	82,133	319	80,535
	1894-95	312	80,743	325	82,834
Puri ...	1893-94	16	20,447	15	19,179
	1894-95	21	26,224	21	26,224

Altogether 379 vessels entered the ports during the year, and out of these 304 were steamers, all of which, with the exception of one, were engaged in the coasting trade. Of the 75 sailing vessels, 5 were engaged in the foreign trade and 70 in the coasting trade.

At the ports of False Point and Balasore there was a decrease both in the number and tonnage of vessels which entered these ports, but there was a small increase in the number and tonnage of vessels which cleared from Balasore.

5. The following shows the value of the trade of the ports during the years 1893-94 and 1894-95:—

	Private trade.		Government stores.		Total.	
	1893-94.	1894-95.	1893-94.	1894-95.	1893-94.	1894-95.
1	2	3	4	5	6	7
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Exports	67,63,667	55,11,034	5,890	7,584	67,69,557	55,18,618
Imports	49,50,125	62,36,499	2,31,078	2,39,009	51,81,203	64,75,508
Total ...	1,17,13,792	1,17,47,533	2,36,968	2,46,593	1,19,50,760	1,19,94,126

There was a decrease in the value of exports which was entirely due to the falling off in the rice trade already noticed. On the other hand there was an increase under imports due to the import of salt from Madras, and rice from Gopalpur. There was a falling off of imports by the Coast Canal.

6. A regular steam service is maintained between Calcutta and Chandballi. Since September 1894, four steamers belonging to the India General Steam Navigation Company and the River Steam Navigation Company have been plying every week between these two ports, carrying passengers and cargo. The practice was for the Companies to start their steamers on the same days twice a week from each port, but by an arrangement between the Companies, steamers have recently left Chandballi and Calcutta five days in the week.

Communication between Cuttack and Chandballi was kept up throughout the year by the canal steamers of the same two Companies, as in the previous year.

By order of the Lieutenant-Governor of Bengal,

A. D. McARTHUR, *Lieut.-Col.*, R.E.,

Offg. Secretary to the Government of Bengal.

OFFER OF BHYA DIRGAJ DEO, ZAMINDAR OF UNTARI, IN THE DISTRICT OF PALAMAU, TO CONTRIBUTE RS. 8,000 TOWARDS THE CONSTRUCTION OF A DISPENSARY BUILDING AT DALTONGANJ.

No. 446T.M., dated Darjeeling, the 16th September 1895.

From—H. H. RISLEY, ESQ., C.I.E., Secy. to the Govt. of Bengal, Municipal Dept.,
To—The Commissioner of the Chota Nagpur Division.

I AM directed to acknowledge the receipt of your letter No. 423J., dated the 31st August 1895, forwarding a copy of a letter from Bhya Dirgaj Deo, Zamindar of Untari, in the district of Palamau, in which he offers to give a donation of Rs. 8,000 towards the construction of a dispensary building at Daltonganj, on the condition that the cost of the entire structure, or the main portion of it, be met out of his donation, and that his gift be duly commemorated. You recommend that the gift be accepted, and that, in deference to the wishes of the donor, a tablet be erected in the dispensary building as a memorial of his liberality.

2. In reply I am directed to say that the Lieutenant-Governor accepts the offer made by Bhya Dirgaj Deo, and to request that the thanks of Government may be conveyed to him for his liberality. As a memorial of his liberality the dispensary will be named after him.

No. 423J., dated Ranchi, the 31st August 1895.

From—W. H. GRIMLEY, ESQ., C.S., Commissioner of the Chota Nagpur Division,
To—The Secretary to the Government of Bengal, Municipal Department.

I HAVE the honour to submit copy of a letter, dated the 12th August 1895, from Bhya Dirgaj Deo, Zamindar of Untari, in the district of Palamau, in reply to a circular letter issued by the Deputy Commissioner of Palamau, inviting attention of the zamindars of the district to the miserable condition of the charitable hospital building at Daltonganj and subscriptions to meet the total cost of Rs. 8,000, estimated for the erection of a suitable building in the place of the existing one. It will be seen that the Bhya has very liberally offered the entire amount of Rs. 8,000, on condition that the building, or at any rate the main portion of it, should be erected entirely at his expense, and that his gift be duly commemorated. This liberal and public-spirited offer of the Bhya may, I think, be accepted, and I also agree to the proposal of Mr. Streatfield, the Officiating Deputy Commissioner of Palamau, to erect a tablet in the dispensary as a memorial of the liberality of the Donor. I would further ask that Government may be pleased to take such other notice of his liberal gift as may be thought proper.

Dated Daltonganj, the 12th August 1895.

From—BHYA DIRGAJ DEO, Zamindar, Nagar Untari,
To—The Deputy Commissioner of Palamau.

I HAVE the honour to acknowledge the receipt of your letter of the 1st August 1895, inviting the attention of the zamindars of the district to the wretched condition of the Daltonganj Charitable Hospital building, and pointing out the desirability of building a suitable and commodious hospital adapted to the increasing needs of the station and the district at an estimated cost of Rs. 8,000.

In reply, I have the honour to state that I am willing to contribute the entire sum of Rs. 8,000 requisite for the construction of the said building in case the main building at least be constructed solely through my subscription, and Government should be pleased to allow some memorial of the recognition of the contribution made by me to be permanently placed in the new building, and that the contribution received from any other zamindars be devoted to any other purpose.

A reply is solicited.

WEATHER AND CROP REPORT.

For the week ending the 16th September, 1895.

Burdwan.—Rainfall at Burdwan 0·70. Weather extremely hot. Prospects of *aman* rice bad. Crops withering for want of moisture. Rain urgently wanted. Condition of cattle good. Fodder and water sufficient. Common rice sells at an average price of 16¼ seers a rupee.

Midnapore.—Rainfall at Sadar 0·41. Weather hot. Transplantation of paddy not yet completed for want of rain. Rain urgently needed everywhere. Common rice selling at—

	Srs.	
Sadar	17½	per rupee.
Contai	24	
Tamluk	16	
Ghatal	14	

24-Parganas.—Rainfall at Sadar 0·86. Weather hot. Harvesting of *aus* and jute continues. Prospects of *aman* poor. Transplantation completed. Health of cattle generally good. Fodder and water sufficient. Rice sells at—

	Srs.	c.	
Sadar	12 to 14	0	per rupee.
Barasat	15	0	
Basirhat	17	7	
Diamond Harbour	16	0	

Murshidabad.—Report not received.

Khulna.—Rainfall at Khulna 0·84, Bagerhat 2·31, Satkhira 0·59. Weather very hot. Transplantation of *aman* still going on in Sadar and Satkhira. *Aus* and jute being harvested. The grain in the ear of the *aus* is not full. Fodder and drinking water sufficient. Prices of common rice:—

	Srs.	
Sadar	16 to 20	per rupee.
Bagerhat	19¼	
Satkhira	15	

Dinajpur.—Average rainfall 4·81. Weather seasonable. Condition of standing crops good. Price of common rice 14 to 15 seers a rupee. No outbreak of cattle-disease, nor any complaint for fodder or drinking water.

Rangpur.—Average rainfall 8·24. Weather cloudy and rainy. Prospects generally favourable. Transplantation of *aman* and steeping of jute going on. Rice selling from 12 to 14 seers per rupee. Fodder sufficient. No cattle-disease.

Pabna.—Rainfall 2·66. Weather partially cloudy and rainy. Rivers steady. Prospects of crops good. Common rice selling at 16 seers per rupee at Sadar and 14 seers at Sirajganj. Jute at Sirajganj selling at Rs. 4 to Rs. 5 per maund. Fodder sufficient. Health of cattle good.

Dacca.—Rainfall 3·96. Weather hot with rain at intervals. Prospects of crops favourable. Cutting of jute going on. Common rice selling at 17 seers per rupee. No cattle-disease. Fodder available.

Chittagong.—Report not received.

Patna.—Rainfall at Sadar 0·82. Harvesting of *marua* and Indian-corn approaching completion. Rain urgently wanted in Barh and Bihar thanas for paddy crops. Condition of cattle good. Fodder and water sufficient. Common rice selling from 17 to 19½ seers per rupee.

Gaya.—Rainfall at Sadar 0·53. *Marua* and maize are being harvested. Paddy crops doing well. Price of common rice at Sadar 16 seers per rupee, which is cheaper than average.

Champaran.—Rainfall at Motihari 1·92. *Bhadoi* crops are being harvested. Transplantation of *aghani* crop finished. Prospects good. Cattle-disease less.

Darbhanga.—Rainfall at Sadar 3·46, Madhubani 5·89. *Marua* and *makai* are being reaped. Transplanting of paddy finished. Common rice selling from 18 to 19½ seers per rupee. Fodder and water sufficient.

Bhagalpur.—Rainfall at Sadar 1·37, Banka 0·69. Rain deficient for this time of year. More rain wanted. Weather hot and inclement. *Marua* and *makai* are being reaped with 16 annas outturn. Transplantation of paddy completed. Area transplanted is slightly less. Prospects of paddy favourable. Fodder and water sufficient. No cattle-disease. Common rice selling at 18 seers per rupee.

Purnea.—Rainfall at Sadar 2·94. Transplantation of *aghani* paddy finished. *Bhadoi* paddy and jute are being cut with fair outturn. Cattle-disease in Kasba and Diugra outposts. Fodder and water sufficient. Common rice selling at 24 seers per rupee at Sadar.

Cuttack.—Rainfall 0·89. Weather seasonable. Early *beali* being harvested; outturn estimated at 12 annas. Late *beali* in ear. Weeding and transplanting of *sarad* continue. Condition of cattle good. Fodder sufficient. Common rice sells at—

	Srs.	c.	
Cuttack	21	0	per rupee.
Jajpur	22	12	
Kendrapara	26	4	
Banki	22	5	

Hazaribagh.—Rainfall at Sadar 0·8, Giridi 0·89. Heavy rain now urgently needed all over the district. So far no damage has been done and paddy crops promise well. *Bhadoi* crops are being harvested with generally good results everywhere. Ploughing for *rabi* crops in progress. Fodder abundant. Prices of common rice—

	Srs.	
Hazaribagh	16	per rupee.
Chatra	14	
Giridi	14	

General Summary.—There was heavy rain in some of the northern and eastern districts; elsewhere light showers are reported. Except in the Burdwan and Presidency Divisions, the prospects of the winter rice crop continue so far good, but in several districts more rain is now required. Transplanting operations are nearly finished. Jute is still being cut and steeped in some districts, and the harvesting of *bhadoi* rice and other autumn crops is going on. Cattle-disease is still reported from Purnea and Champaran, but has diminished in the latter district. The price of common rice is generally steady, but has fallen in a few districts.

By order of the Lieutenant-Governor of Bengal,

	Inches.
The mean pressure of the seven days	29·711
The average pressure of the corresponding period for 24 years, Surveyor-General's Office	29·655
	Hours.
The total number of hours of bright sunshine	29·1
The maximum possible number of hours of sunshine	86·3
	°
The mean temperature of the seven days	84·4
The average temperature of the corresponding period for 24 years, Surveyor-General's Office	83·2
The extreme variation of temperature	16·1
The maximum temperature	91·7
	Miles.
The highest velocity of the wind in one hour	12
	%
The mean relative humidity	85
The average relative humidity of the corresponding period for 24 years, Surveyor-General's Office	86
	Inches.
The total fall of rain from 8th to 14th September 1895	0·86
The average fall of the corresponding period for 24 years, Surveyor-General's Office	3·16
The total fall from 1st January to 14th September 1895	34·14
The average fall of the corresponding period for 24 years, Surveyor-General's Office	53·95

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h., 10h., 16h., and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No. 86, formerly at the Surveyor-General's Office.*

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; g, gloomy; d, drizzling rain; p, passing temporary showers; t, thunder; <, lightning; ⏏ dew.

METEOROLOGICAL OFFICE, GOVT. OF INDIA;
Calcutta, the 16th September 1895.

J. H. GILLILAND,
For Meteorological Reporter to the Govt. of India.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE MONTH OF AUGUST 1895.

WEATHER has been unusually settled over the Bay, as, though a number of depressions have formed in or crossed the northern part, they have, without exception, been shallow and unimportant. They were more frequent in the first-half of the month than during the latter half, and moved into the north-west angle of the Bay and across Orissa, causing a good deal of rain in the districts affected. The monsoon weather, which extended gradually over the province after these slight disturbances passed westward was usually of short duration, but the depression which formed about the middle of the month was exceptional in this respect. Instead of moving westward after passing the Orissa coast, it turned towards the north, moved slowly across Chota Nagpur, becoming steadily more shallow, and as it approached the Himalayas, spread out into a trough of low pressure over the northern districts. Very heavy rainfall followed this arrangement in North Bengal and Bihar, and it is chiefly owing to the heavy falls on the 14th and subsequent days that the mean rainfall for the month is normal in Bihar and not much below the normal in North Bengal.

During July a distribution of pressure similar to that referred to at the close of the previous paragraph was very persistent and caused the heavy rain in North Bengal, which was a prominent feature of the weather during that month. During August it has obtained for only a short period, and hence the rainfall has been less heavy. On the other hand the tendency of the monsoon current has been towards the Orissa coast, and the rainfall there has been slightly above the normal, though not so heavy as might have been expected from the frequently recurring depressions. These, if not of sufficient depth to cause stormy weather, might have been accompanied by heavy falls of rain. In other parts of the province rainfall has been lighter than usual, especially in South-West Bengal and Chota Nagpur, where there has been a deficiency of more than 30 per cent. Consequently, though excess falls have occurred in Orissa and Bihar, the monsoon has been weaker than usual in August. The falls have been irregular both in distribution and amount, and were frequently due to local thunderstorms. This irregularity is not so marked in the tables giving mean values for the larger divisions; but in the percentage table given towards the end of this report, where the total falls are given for individual stations, it will be seen how they vary in all districts, except South-West Bengal and Chota Nagpur, where there is a fairly uniform defect. In North Bengal, for example, the difference from the normal varies from defect of 23 at Bogra to excess of 27 at Jalpaiguri, and in Bihar from defect of 15 at Gaya to excess of 43 at Darbhanga.

At the beginning of the month conditions were recovering from the effects of a depression which had crossed Orissa in a north-westerly direction, and which on August 1st was in the North-West Provinces. Ordinary monsoon weather became general in Orissa, Chota Nagpur and Lower Bengal, but rainfall was usually light and temperature remained above the normal over the whole province. As the sky became more cloudy, temperature fell, but the steady increase of pressure led to high readings both over the province and the Bay. The effects of the disturbance were consequently of short duration. Rainfall diminished in the south-western districts, and by the morning of the 3rd temperature was above the normal over the whole province.

Pressure remained high in the north-east of the province till the 5th, when a rapid fall began there. Moving slowly across the province to the south-west, the change was most marked in Orissa, the Circars and the adjacent part of Bay on the 6th. The second shallow depression of the month resulted, but the greatest defect was a tenth of an inch in Orissa. Gradients, however, became fairly steep over the Bay, and there was a slow increase of wind velocity at Diamond Island. On the 7th the centre was near Balasore, and after crossing the coast it moved quickly to the westward.

Showery weather had been general in all parts of the province except the south-west, and especially in North Bengal up to the 6th. A change began on the 7th. Heavy rain fell in Orissa on that day, and the showers in North Bengal became light and scattered. In the central and south-eastern districts there was little change, the light showers continuing.

The settled weather which followed was of only short duration. Pressure rose steadily till there was a small excess in Orissa and Chota Nagpur. Easterly winds continued in all districts and heavy rain fell in Orissa. It was also more general in Lower Bengal and Chota Nagpur. But while pressure was rising in the western districts of Bengal, a fall had commenced in the south of Burmah and the east of the Bay. The pressure distribution first became more uniform, then a shallow depression appeared. It was this depression which ultimately caused the heavy rainfall in North Bengal about the middle of the month.

On the 11th the depression having moved in a north-westerly direction, lay over the north of the Bay and part of Lower Bengal and Orissa. It caused a fairly regular cyclonic circulation of light winds, but in crossing the sea area there was no further development. On the 12th, the centre crossed the Orissa Coast between False Point and Gopalpur, at which time the depth of the depression was small, as shown by the greatest defect being only ·14 inch in the south of Orissa and the Circars. During the previous day or two very little rain had fallen in any part of the province, but an inrush of monsoon winds commenced and rain became almost general. Though temperature fell 3,° it was still above the normal by small amounts, except in the south-west, where the influence of the disturbance was more decided.

After crossing the coast, the depression changed its course. On the 13th the area of lowest pressure was in Orissa and part of Chota Nagpur; on the 14th in Chota Nagpur; and on the 15th a fall of pressure in North Bengal and Assam caused it to become diffused over the northern districts. Westerly winds began in the west of Bihar and gradually became general in the west and central districts. The monsoon current, which had been flowing with some freedom over South Bengal, received a check in North Bengal, and very heavy rain fell in Assam, North Bengal and Bihar. Pressure gradually recovered in North Bengal, and the heavy rain ceased, but showers chiefly due to local disturbances continued in most districts. Settled weather became general and remained practically uninterrupted till the end of the month, the diminishing rainfall becoming more marked towards the end of the month, except in Orissa, where heavy rain again fell during the last week, in consequence of another shallow depression which moved across the Circars and was too far south to have much influence on the weather in other parts of the province.

The last depression of the month began, like most of the others, in the south-east of the Bay or the south of Burmah. The first signs appeared on the 19th. It moved westward, and between the 20th and 23rd its influence on weather at the coast stations was barely noticeable. On the 23rd it was near the west-coast, which it crossed as a very shallow depression, giving lowest readings in the Circars. The moderate rise of pressure that followed forced the area of lowest pressure northwards, and the slow northerly motion continued day by day till the end of the month, when it was in Bihar. The slight changes which were in progress during this northerly displacement appear to have led to the occurrence of thunderstorms and the more heavy falls of rain in the western districts, as the days on which rain was most general in Orissa and South-West Bengal were the 27th to 29th, in Chota Nagpur the 30th, and in Bihar the 30th and 31st.

Pressure.—As the depressions which have formed during the month have generally been very shallow, pressure oscillations from day to day have not been so large as usual. There has been the customary fall during the formation of the depression and the rise more or less rapid after it has moved away. Being of minor importance, it is unnecessary to detail the changes minutely. The only days on which they exceeded a tenth of an inch were the 1st, 8th and 9th, when there was a rise, and the 5th and 11th, when there was a fall. Mean pressure for the month is below the normal by small and fairly uniform amounts, the greatest difference being ·039 inch at Cuttack.

Temperature has, like pressure, been subject to the regular but not very large oscillations which accompany slightly disturbed weather. It has fallen with a more cloudy sky and increasing rainfall, and has risen after the showery weather passed away. The means for the month are in consequence nearly normal in all districts except Orissa, Chota Nagpur and Assam. In Chota Nagpur there is excess of more than half a degree, and in the other two defect of more than half a degree.

Rainfall.—The average rainfall for the larger divisions has not differed to any great extent from the normal amounts, except in South-West Bengal and Chota Nagpur, where there has been defect of between 4 and 5 inches. Orissa received nearly 2 inches more than is usual in August, and North Bengal and East Bengal about the same amount less, while in Bihar the rainfall on an average was very nearly normal. Though the general result does not show any very decided weakness in the monsoon current, the absence of any but shallow depressions prevented the occurrence of strong bursts of monsoon winds. The rainfall was more of the character of local showers caused by thunderstorms, and because of this greater irregularity may be observed in the various amounts recorded at the different stations than might be anticipated from the fairly regular averages. The number of rainy days has been normal if an average be taken for the whole province, and there is no striking disparity if a comparison be made between the districts. The number is slightly above the average in Bihar and rather below in South-West Bengal and Orissa.

The comparison of the actual rainfall in the various large divisions of the province with the normal is most accurately and conveniently shown in the form of a percentage. The figures representing the rainfall for the month, calculated in this way, are included in the table below under the heading of August. This table really gives a condensed summary of the rainfall statistics of the present year up to date for each meteorological division, the first eight columns giving the actual average rainfalls in each division in each month expressed as a percentage of the normal, while the ninth column gives the total rainfall for the first eight months expressed as a percentage of the normal rainfall for that period:—

Meteorological Divisions.	January.	February.	March.	April.	May.	June.	July.	August.	Actual rainfall of first eight months of 1895 expressed as a percentage of the normal fall for the period.
South-West Bengal ...	44	9	29	111	86	82	67	67	72
North Bengal .	27	5	49	129	91	43	165	87	93
East Bengal ...	11	1	38	140	133	47	81	90	89
Bihar ...	71	88	34	129	70	72	120	102	98
Orissa ...	49	101	29	194	46	212	79	116	117
Chota Nagpur ...	66	52	71	418	70	109	98	67	91

Owing to the irregular distribution of the rainfall, only a rough idea of the amounts at the different stations can be gained in any other way than by a reference to the tables. Generally, in the south of Orissa and the west of Chota Nagpur, the falls varied from 10 to 17 inches. In part of South-West Bengal, the easthern half of East Bengal, and in a great part of Bihar they exceeded 10 inches and in places 20 inches. In North Bengal they were about 10 inches, except over a narrow tract including the Kuch Bihar and Jalpaiguri districts, where very heavy rain fell about the middle of the month, and several places received nearly 40 inches. The remainder of the province, including the central districts, received generally less than 10 inches, and at a few places the falls were less than 5 inches.

The following table gives full data for comparison of the actual and normal rainfall of the month of August in all districts of the province. The figures are derived from the average and actual rainfall of the rain-recording station in each district, due allowance or weight being made for the area which each station represents. This gives a more accurate average than the arithmetical means given in the weekly and monthly meteorological tables. The first column gives the normal or average district rainfall as determined from the rainfall observations of the past 15 years; the second column gives the actual district rainfall as determined from the weighted actual rainfalls of the month at the reporting stations in each district; the third column expresses the ratio of the actual district rainfall of the past month to the normal rainfall as a percentage; the fourth column states as a percentage how much the district rainfall of the month varied from the normal :—

Percentage Table for August 1895.

Division.	District.	Normal district rainfall for August.	Actual district rainfall for August 1895.	Percentage of actual to normal rainfall.	Percentage excess (+), defect (−).

* Mean for 6 days.

Explanation.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period for the ...

The *humidity* of the atmosphere is expressed at percentage, saturated air being represented by 100. A clear sky is denoted by 0 and an overcast sky by 10. The mean at the numerical means or average of the rainfall in that district determined from the returns sent in by the subdivisional stations for the period in question station in the district sending in return divided by the number of stations. A rainy day is one on which at least a tenth of an inch fell.

Statement of rainfall in Bengal for the week ending Saturday (8 a.m.), the 14th of September 1895—contd.

			Monahorpur										?		?		

Explanation.—... indicates that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the retur[ns are] wanting, the corresponding spaces in the total rainfall columns are left blank. With reference to the column of rainy days, the definition of a rainy day is when at ·10 inch of rain has fallen.

[illegible] the 17th September 1895

r the week ending Saturday, the 14th of September 1895.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE WEEK ENDING, 8 A.M., SATURDAY, THE 14TH OF SEPTEMBER 1895.

IT will be remembered that in the report for the previous week a depression, which proved to be of considerable depth near its centre, crossed the coast of the Circars, moving in a westerly direction. The most important facts in connection with the weather of the week under review are the after-effects of that depression as they developed over Bengal, but especially in the eastern and northern districts.

In consequence of the rapid increase of pressure in the north-west of the Bay; and of a moderate fall over North Bengal and Assam, the distribution on the 8th, the first day of the week, was favourable for the northerly movement of the monsoon current which had been set up by the cyclonic storm a few days before. As the winds were westerly as far east as Rangpur, Mymensingh, and Comilla, the moist air current from the Bay was being confined to Burma and the extreme east of Bengal. The area over which precipitation was possible being more limited than usual, very heavy rain fell and continued to fall for three days, during which some large falls occurred in parts of Assam and the eastern parts of East and North Bengal. As pressure rose briskly in Assam on the 9th, the westerly winds, which indicated the easterly deflection of the monsoon, were not so general in East and North Bengal. Rainfall therefore extended further west, that is, as far as Dinajpur Pressure again fell on the 10th, but the area of lowest pressure was now more to the west, and rainfall became more general in all districts, with the heaviest falls still in North Bengal. The wind system was gradually becoming more normal, and the easterly winds which were prevalent in East and North Bengal on the 10th were almost general in Bihar on the 11th. At the same time, the pressure distribution was more uniform over the Bay. The changes of pressure which led to this result were rather large on the 11th, varying from a rise of ·07 inch in Bihar to a fall of ·03 inch in the south-east of the Bay, and as the gradient previous to these changes had not been steep, the uniformity over the province and the north of the Bay became very marked. The rise in the north and the fall in the south continued on the 12th, and a wide shallow depression appeared over the Bay. The monsoon current at once fell off, and rainfall became first scattered and light and then almost entirely ceased. During the last two days of the week the wide depression remained, causing either northerly or light irregular winds over Bengal and the north of the Bay. Generally in the western districts, the winds were westerly with almost cloudless skies, while in the east the light winds were easterly, and scattered showers continued to fall. Pressure fell steadily on these days, and the moderately large excess which had developed in the north of the province practically disappeared, so that at the end of the week readings differed very little from the normal in any of the districts.

Pressure has undergone a good deal of oscillation from day to day, often of moderate, but never of large, amount. The difference from the normal has, in consequence, not been large, and means for the week are high by small amounts, except in Orissa, where excess is ·07 inch. In the other districts excess varies from ·05 inch in Chota Nagpur and South-West Bengal to ·02 in Assam, North Bengal and Bihar.

Temperature fell very much in Assam and North Bengal in the early part of the week, when the heavy rain was falling, and it remained below the normal in these parts throughout the week. At times it fell in East Bengal and Bihar, but in the other districts there was excess practically without interruption. The mean defect in Assam is 3°·6, in North Bengal. 2°·2, and in East Bengal nearly 1°. In Bihar there is a small excess, but in Chota Nagpur, Orissa and South-West Bengal it is considerably larger, varying from 1°·3 to 2°·

Rainfall.—As stated above, very heavy rain fell in Assam, North Bengal, and East Bengal during the early part of the week. After that it became more general in the central and western districts, chiefly as showers caused by local thunderstorms. Towards the end of the week it to a very large extent ceased in all districts. Some very heavy falls occurred on the 8th and 9th in parts of East Bengal, Assam, and North Bengal, several stations reporting on those days more than 6 inches. The means for the week are much above the normal in East and North Bengal. The total fall for the week at Sibsagar is 12·58 inches and at Dhubri 17·56, while the average fall in North Bengal is 6·9 and in East Bengal 4·9 inches. Excess in North Bengal is 3·9 inches and in East Bengal 2·5 inches. In the other districts the average fall for the week is deficient by considerable amounts, in South-West Bengal and Bihar by about half an inch, and in Orissa and Chota Nagpur by more than 1 inch.

The following table gives the summary of the temperature and rainfall data of each of the six meteorological divisions of the province for the week ending Saturday, the 14th of September 1895 :—

METEOROLOGICAL DIVISIONS.	TEMPERATURE.						RAINFALL.

RESOLUTION ON THE ANNUAL GENERAL ADMINISTRATION REPORT OF THE DACCA DIVISION FOR THE YEAR 1894-95.

GENERAL DEPARTMENT—MISCELLANEOUS—No. 283 T.G.

Darjeeling, the 18th September 1895.

RESOLUTION.

THE Lieutenant-Governor directs the publication of the Commissioner's Report on the General Administration of the Dacca Division for the year 1894-95 for general information.

2. The questions of special importance on which Mr. Luttman-Johnson has made remarks, which His Honour commends to the attention of all officers, are the following:—

Paragragh 14*a*.—Provident Societies. The growth and spread of these financially unsound associations may cause serious loss to the public.

Paragraph 16.—The concentration of criminal work in the hands of two or more Deputy Magistrates and its territorial distribution.

Paragraphs 31, 33 *and* 65.—The prevalence of riots and dacoities in all the districts of the division, and the use of guns for homicidal purposes in Backergunge.

Paragraph 42.—The prevalence of unfounded charges against the police in Mymensingh.

Paragraphs 51-53.—The reorganisation of the village police.

Paragraphs 131-133.—The improvement of water-ways and tow-paths.

Paragraphs 174-178.—The conduct of zamindars.

Paragraph 187.—General remarks.

By order of the Lieutenant-Governor of Bengal,

C. E. BUCKLAND,

Secy. to the Govt. of Bengal.

INDEX.

ANNUAL GENERAL ADMINISTRATION REPORT OF THE DACCA DIVISION FOR THE YEAR 1894-95.

No. 1291L.R., dated Dacca, the 26th June 1895.

From—H. LUTTMAN-JOHNSON, Esq., Commissioner of the Dacca Division,

To—The Secretary to the Government of Bengal, General Department.

I HAVE the honour to submit the General Administration Report of the Dacca Division for the year 1894-95.

I remarked in my report for 1893-94 that with a view to relieve my office and District Officers of the pressure which the annual reports entail in March and April, I proposed to get the calendar year chapters of this report prepared and submitted before the close of the financial year. All districts except Dacca have succeeded in doing this. I submitted Mr. Faulder's difficulties in regard to the important sections 13, 14, and 15 to other District Officers, who have explained how they surmounted them. They should not, I think, be insurmountable even in Dacca, and I hope that in future years Mr. Faulder will do as well as his neighbours. I remarked that the sections of the Annual General Administration Report are but epitomes of the detailed reports. Mr. Faulder points out with justice that this is not exactly the case. It would no doubt save much labour and expense if sections 12, 13, 14, and 15 of this report, and the statements accompanying them, could be reduced to this status.

All the Collectors lent me clerks for three weeks to help compile this and other reports. The table below shows the dates on which the earliest and latest sections came to hand, separately for calendar and financial year sections, and the dates on which complete information was received.

Calendar year.

DISTRICT.	Date of receipt of earliest section.	Date of receipt of last section.	Date of receipt of complete information.
1	2	3	4
Dacca ...	18th March 1895 ...	8th June 1895 ...	22nd June 1895.
Mymensingh ...	14th ditto ...	20th March 1895 ...	15th ditto.
Faridpur ...	18th ditto ...	1st April 1895 ...	25th ditto.
Backergunge ...	13th ditto ...	23rd March 1895 ...	25th ditto.

Financial year.

DISTRICT.	Date of receipt of earliest section.	Date of receipt of last section.	Date of receipt of complete information.
1	2	3	4
Dacca ...	17th April 1895 ...	4th June 1895 .	18th June 1895.
Mymensingh ...	17th May 1895 ...	3rd ditto ...	15th ditto.
Faridpur ...	1st ditto ...	27th May 1895 ...	25th ditto.
Backergunge ...	11th April 1895 ...	1st June 1895 ...	24th ditto.

Encouraged by the Lieutenant-Governor's remarks in paragraph 1 of his Resolution No. 102T.G., dated 18th September 1894, on my report for 1893-94, I have much curtailed this report; but I have not, I am afraid, reduced it to 80 pages.

I.—CHARGE.

Division.

2. I was absent on deputation, as Commissioner of Patna and on privilege leave, from July 29th to November 26th. Mr. A. C. Tute, C.S., officiated for me during my absence.

District.

The following officers held charge of the several districts:—

DISTRICT.	Name of officer.	Period of incumbency.
1	2	3
Dacca ...	The late Mr. T. L. Jenkins	1st April to 20th July 1894.
	Babu Akhoy Kumar Sen ...	1st to 29th July 1894.
	Mr. C. J. S. Faulder ...	30th July 1894 to 31st March 1895.
Mymensingh ...	" A. Earle ...	1st to 4th April 1894 and 5th June 1894 to 31st March 1895.
	" C. A. Radice ...	5th April to 4th June 1894.
Faridpur ...	" R. R. Pope ...	1st to 30 h April 1894.
	" J. L. Herald ...	1st May 1894 to 31st March 1895.
Backergunge ..	" H. LeMesurier ...	Whole year.

Mr. LeMesurier succeeded Mr. Savage in Backergunge on 6th March 1894, so he was new to the district. Three out of four districts, therefore, have been administered by new hands.

Subdivisions.

The following officers were in charge of the subdivisions:—

DISTRICT.	Subdivision.	Name of officer.	Period of incumbency.
1	2	3	4
Dacca ...	Munshiganj ...	Babu Srish Chandra Ghose	1st April to 7th May 1894.
	Ditto ...	" Gagan Chandra Das ...	8th May 1894 to 31st March 1895.
	Narayanganj ...	Mr. L. T. R. Lucas ...	Whole year.
	Manikganj ...	Babu Ram Sadan Bhattacharjee.	Ditto.
Mymensingh ..	Kishorganj ...	The late Babu Srinath Chatterjee.	1st to 27th April 1894.
	Ditto ...	Babu Kailas Gobinda Das ...	29th April 1894 to 31st March 1895.
	Tangail ...	" Gagan Chandra Das ...	1st to 30th April 1894.
	Ditto ...	" Shib Chandra Nag ...	1st May to 6th October 1894.
	Ditto ...	" Uma Prasanna Guha ...	7th October to 3rd November 1894.
	Ditto ...	" Barada Kanta Ganguli	4th November 1894 to 31st March 1895.
	Netrakona ...	" Annada Prosad Bose ...	1st April to 5th August 1894 and from 6th to 27th September 1894.
	Ditto ...	" Saroda Prosad Sarkar	6th August to 5th September 1894.
	Ditto ...	Maulvi Faizuddin Hosein ...	28th September 1894 to 31st March 1895.
	Jamalpur ...	Babu Chandra Sekhar Kar ...	Whole year.
Faridpur ...	Goalundo ...	" Rajani Nath Chatterjee	Ditto.
	Madaripur ...	Maulvi Fazlal Karim	Ditto.
Backergunge ...	Perojpur ...	" Faizuddin Hosein ...	1st April to 27th July 1894.
	Ditto ...	Babu Chandra Bhusan Chakrabatti.	28th July 1894 to 31st March 1895.
	Bhola ...	" Chandra Kumar Dutt	Whole year.
	Patuakhali ...	" Prasanna Kumar Karforma.	Ditto.

There were permanent changes in five out of twelve subdivisions only. In this respect my division may be considered to have been lucky.

In these days when the Magistrate-Collector is obliged to delegate so much of his authority even in the Sadar subdivision, changes in the personnel of the senior officers attached to head quarters do almost as much harm as changes in the charge of subdivisions. Dacca was lucky in retaining the services of Babu Akhoy Kumar Sen as senior Deputy Magistrate-Collector throughout the year. Mymensingh and Faridpur were also very fortunate in this respect. The Collector of Backergunge complains of the frequent changes in his district.

We are very fortunate that we have few changes in the office of District Engineer under the District Board system.

II.—TOURS AND INSPECTION OF OFFICES.

(a) Tour of Commissioner.

			Days.
April	1894	...	8
May	"	...	6
August	"	...	16
September	"	...	16
October	"	...	12
November	"	..	12
December	"	...	2
January	1895	...	24
February	"	...	20
March	"	...	14
	Total	...	130

3. The Commissioner spent 130 days on tour, as noted in the margin. Of these, Mr. Tute did 56 days while I was on deputation to Patna. *En revanche* I spent 53 days on tour in the Patna Division. I also visited the Provincial head-quarters on several occasions. I find I have spent on the average 161 days on tour in the last thirteen years of actual service.

The Commissioner visited the head-quarters stations of all the districts and those of all the subdivisions except Manikganj, Tangail, and Kishorganj. My trip to Tangail and Manikganj was frustrated by want of water in the Dallessury river. Mr. Tute made a trip to the *Bil* country in the Faridpur district, in September, to enquire into alleged scarcity.

My steamer was away from her anchorage at Dacca for 153 days, but she ran only 72 days with the Commissioner and 37 days with other officers.

(b) Tours of Collectors.

The Collectors were on tour—

			Days.
Dacca	...	...	127
Mymensingh		...	132
Faridpur	...	...	115
Backergunge	..	...	129

or 125·75 days on the average—4·75 days above the average of the preceding year. The Collectors generally spent some days of each month on tour. Mr. C. J. S. Faulder has managed to put in 98 days since he joined the Dacca district in July.

The Magistrates of Dacca and Mymensingh have now been relieved of much of their criminal appellate work.

Under Police I have given some account of our establishment of steam-launches and of the use made of them. Backergunge also requires a good house boat.

(c) Tours of Subdivisional Officers.

The Subdivisional Officers made the following tours:—

					Days.
Dacca ...	Narayanganj	...	...	..	95
	Munshiganj	...	...	...	98
	Manikganj	...	...	...	125
Mymensingh ...	Jamalpur	...	...	...	94
	Kishorganj	...	...	...	91
	Netrakona	...	...	...	90
	Tangail	...	...	...	113
Faridpur ...	Goalundo	...	...	...	107
	Madaripur	...	...	...	147
Backergunge ...	Perojpur	...	...	...	104
	Patuakhali	...	...	...	120
	Bhola	...	...	...	95
	Average	...	... 106¼ days.		

I have satisfied myself that Subdivisional Officers have provided themselves with means of locomotion.

On the whole the Subdivisional Officers have done very well. Maulvi Fazlal Karim, at Madaripur, again heads the list with 147 days. Babu Ram Sadan Bhattacharjee at Manikganj, and Babu Prasanna Kumar Karforma at Patuakhali also did excellent service in this respect.

The Income-tax Deputy Collectors were on tour —

			Days.
Dacca	...	...	164
Mymensingh	...	...	119
Faridpur	...	...	164
Backergunge	...	...	161

Inspection of district offices and treasuries.

4. The Commissioner inspected the Magistrate-Collectors' offices more or less thoroughly. My March inspection of the Mymensingh offices was postponed, the circuit-house of that place being occupied by the Additional Judge. Since the end of the year I have spent six afternoons in the Dacca offices. Only the Mymensingh treasury was not inspected.

With reference to circular memorandum dated 30th June 1894, from the Chief Secretary, I have supplied that officer with copies of the questions I use in inspecting the Criminal Courts, the Arms and Ammunition, and the Rural Police Departments of Magistrates' offices.

I was fortunate, while on deputation to Patna, in being able to inspect five head-quarters and six subdivisional offices in that Division. This has been a great help to me here.

The following table shows the dates of inspection of district offices and treasuries by the Commissioner and by Collectors:—

DISTRICT.	By whom inspected.	Dates of inspection of district offices.	Dates of inspection of treasuries.
1	2	3	4
Dacca ..	By Commissioner	17th and 25th April, 12th, 18th, and 26th June, and 2nd July 1894.	16th April 1894.
	„ Collector ..	September 1894 and March 1895 ...	18th September 1894 and 29th March 1895.
Mymensingh ...	By Commissioner	24th November 1894	None.
	„ Collector ...	3rd September 1894 and following days, and 7th March 1895 and following days.	31st March to 2nd April 1894, 1st October 1894, and 1st and 2nd April 1895.
Faridpur ...	By Commissioner	28th April, 17th September 1894, and 22nd March 1895.	18th September 1894.
	„ Collector ...	20th to 30th June 1894 and parts of February and March 1895.	6th April and 2nd October 1894.
Backergunge ...	By Commissioner	8th and 9th August 1894 and 10th to 12th and 19th January 1895.	9th August 1894.
	„ Collector ...	9th to 11th May, 28th June, 12th, 16th, and 18th July, 28th to 30th August, 1st, 3rd to 7th, and 10th to 12th September 1894, and 16th to 25th March 1895.	1st June and 1st and 10th November 1894.

Inspection of subdivisional offices and sub-treasuries.

The following table shows the dates on which the subdivisional offices and treasuries were inspected by the Commissioner and Collector:—

DISTRICT.	Subdivision.	DATES OF INSPECTION OF SUBDIVISIONAL OFFICES — By Commissioner.	By Collector.	DATES OF INSPECTION OF SUB-TREASURIES — By Commissioner.	By Collector.
1	2	3	4	5	6

	Bhola ...	16th January 1895	6th to 7th June and 5th to 6th November 1894.	16th January 1895 ...	6th June and 5th November 1894.

III.—WEATHER AND CROPS.

5. The average rainfall was 78·71 inches against 88·49 in the previous year. The average of the five years ending 1893-94 was 75·83 inches, so we had in the year under report 2·88 inches more than the average of the previous five years. Generally the rainfall was well distributed and was favourable to crops, except to those of the cold weather, which suffered from drought.

The Collector of Dacca says the district has not had such a rice crop for some years, although September floods washed away a good deal. The jute crop also was almost a bumper one. Oil-seeds suffered from rain in November, and pulses later on from drought.

The outturn of the principal crops in Mymensingh was satisfactory. The unusually heavy rains in the months of October and November retarded the growth of pulses, oil-seeds, and tobacco to some extent.

In Faridpur, though the floods were heavy, the year was favourable, on the whole, for the growth of paddy. Jute and sugarcane also did well. The late floods and heavy rain in November retarded the sowing of the rabi crops, and their growth was checked by want of rain in January and February.

In Backergunge the outturn of the principal food-crops, *aus* and *aman*, was good. The want of cold weather rain in January and February is said to have affected the growth of the rabi crops in certain parts of the district. The outturn of other crops such as jute, sugarcane, and tobacco was moderate. On the whole the year was a very good one for crops.

The year has been fortunate in the matter of cyclones and tornados, but after its close on April 29th a severe tornado passed over the Padma river and a portion of thana Harirampur in the Dacca district. It was preceded by rain and hail, but the actual storm lasted only five minutes. It appears to have followed a zig-zag rather than the usual circular course. This course measured some 12 miles in the Harirampur, four miles in the Manikganj, and a few miles in the Sealo thanas. The thana buildings, chaukidar's parade hall, post-office, &c., at Lesraganj were entirely destroyed. It was chaukidar's parade day, and they suffered severely, 37 being wounded. The sub-inspector, head-constable, and writer constable are also among the wounded. Thirty-four villages in Harirampur, 4 in Sealo, and 2 in Manikganj thanas were affected. The butcher's bill totals up to 24 killed and 135, including the police and chaukidars at Lesraganj, wounded more or less severely. Only 15 of these, however, went to the Dacca hospital for treatment. These figures do not include travellers, &c. The value of property destroyed is estimated at Rs. 80,000. Cattle curiously did not suffer much. This storm, so near that important *entrepot* Goalundo, reminds me that the life-boat which Nawab Ahsunullah, C.I.E., presented and maintains at that place, has again done good work, having saved, it is stated, 194 lives. In 1893-94 it saved 247 lives.

Aman is returned $16\frac{5}{8}$ annas and jute $13\frac{9}{10}$ annas.

These figures are but the aggregate impressions of a number of observers. I am inclined to think statistics, if we had any, would show that the *aman* and jute crops were better than $16\frac{5}{8}$ and $13\frac{9}{10}$, 16 representing an average crop.

IV.—PUBLIC HEALTH AND SANITATION.

6. The death-rate for the year 1894 is 27·8 against 30·4 in 1893. The decrease is due entirely to cholera, but we are still ahead of 1892.

YEAR.	Cholera.	Small-pox.	Fever.	Bowel complaints.	Injuries.	Other causes.	TOTAL.
1	2	3	4	5	6	7	8
1893	56,703	1,456	186,009	3,895	3,475	48,275	299,273
1894	26,847	1,252	187,153	4,993	3,474	50,183	273,902

"Other causes" and "bowel complaints" are now attracting the rural policeman's attention. Though on the whole fever has proved as destructive as usual in the rural policeman's view, he has reported 12,000 more deaths

than in the previous year in Mymensingh, and 9,000 fewer in Backergunge from this cause.

In the first three months of 1895 we have had 6,693 deaths from cholera and 732 from small-pox. Small-pox is ordinarily not a very destructive disease here. In Backergunge in 1894 there were only 93 deaths, in Dacca only 176. Vaccination is not very prevalent, especially in Backergunge. The number of persons vaccinated in the year was—

DISTRICT.	Number.	Per 1,000 of population.
1	2	3
Dacca ...	122,133	50·4
Mymensingh ...	73,447	21·1
Faridpur ...	49,472	27·5
Backergunge ...	30,914	14·3

The following statement illustrates the progress made in reporting:—

DISTRICT.	Number of deaths reported in—			Date-rate per mille in—		
	1892.	1893.	1894.	1892.	1893.	1894.
1	2	3	4	5	6	7
Dacca	60,024	74,415	68,511	24·79	30·74	28·8
Mymensingh	42,991	87,587	88,930	12·38	25·02	25·61
Faridpur	54,866	60,115	51,237	30·4	33·4	28·5
Backergunge	93,958	77,156	65,224	49·6	35·8	30·28
Total ...	251,839	299,273	273,902	25·5	30·8	27·8

Probably the Backergunge figures are near the truth, as the rural police have been well worked up in that district. Perhaps in 1892 arrears of previous years were included. That, in spite of a decrease of 11,183 in cholera, Mymensingh still maintains its rate, is perhaps evidence of better reporting. Considering how backward Dacca is in rural police business, results are good. In the face of these figures, and of the undoubted fact that the population is increasing, the Division, in spite of its horribly insanitary conditions, cannot be considered unhealthy. Improved water-supply is much needed in many parts.

The following table shows the expenditure incurred by the District Boards and Municipalities for the improvement of the water-supply during the past three years:—

NAME OF DISTRICT.	BOARDS.			MUNICIPALITIES.		
	1892-93.	1893-94.	1894-95.	1892-93.	1893-94.	1894-95.
1	2	3	4	5	6	7
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Dacca ...	315	994	1,359	21,104	14,773	14,702
Mymensingh ...	2,879	2,896	3,677	612	1,343	6,924
Faridpur ...	6,264	2,295	3,710	480	185	2,100
Backergunge ...	496	6,146	3,734	1,316	748	122
Total ...	9,954	12,331	12,480	23,512	17,049	24,048

Besides this, the Mymensingh District Board has paid Rs. 30,000 as contribution towards the Nasirabad water-works.

The expenditure in Dacca and Mymensingh towns is for maintenance of water-works. In Faridpur town a large tank, to be called the Jubilee Tank, is being excavated in the centre of the town. In Barisal town a large tank is being re-excavated.

The permanent settlement is an impediment to the improvement of the water-supply as to most other improvements. On this subject the Collector of Backergunge, Mr. LeMesurier, writes—"The District Board cannot do so much as it might on account of the shortsighted greed of village maliks, who not only refuse to give sites for tanks free even when old tanks are ready to hand, but obstruct their acquisition and demand enormous prices." So in Sylhet town we could not improve old tanks because the Civil Court gave full basti rates for their acquisition, so much per square foot. As reported last year, land-owners sometimes levy a tax from private persons who dig tanks. But I think we shall improve the water-supply in spite of the permanent settlement.

In Dacca and Mymensingh the District Boards prefer wells to tanks. The form of well has not yet been decided on. The Dacca Board is now experimenting in tube-wells which had such a vogue 15 to 20 years ago. In Faridpur and Backergunge tanks are preferred; in the latter district wells do not give sweet water. I disapprove of the policy of digging tanks, costing Rs. 700 or so, as being beyond our means. But we are digging such tanks in these districts. In some cases in Faridpur the persons benefited have contributed to the cost. The Mug settlers in Backergunge are said to reserve tanks for drinking.

We pressed for the full rate of cess in Backergunge on the ground of sanitation and public health. The District Board, however, proposed to spend the increase on roads, &c. They proposed no increase under water-supply. I remarked on the budget that I should like to see something done which would bring home to the people that they are getting something for their money. I should like to see the grant for water-supply increased and a commencement made to provide reserved tanks. Two tanks to each thana per annum would give 400 tanks in ten years. Five new dispensaries and an increase in the grant for village works from Rs. 12,300 to Rs. 16,000 were moves in the right direction. I expressed a doubt and a hope that cart traffic would develop on the roads we were making. The Board was not able to do more for water-supply. There is great difficulty about getting suitable sites which will benefit more than a few houses. There is difficulty about reserving the tanks when made. Several cases are quoted in which grants have been made, but could not be expended for want of sites; that is, until we have some form of Local Self-Government, we cannot manage to spend the money we have got on the object we desire.

As I have said before, the "bucket" system of removal of night-soil, in force in the Dacca town, might be very much improved. And the Commissioners are quite prepared to improve it. But as long as proposals for a sewage system in imitation of Calcutta hold the field, it is not worth while spending money on the improvement of the bucket system.

Mr. Silk, Secretary to the Sanitary Board, has been to Dacca, and after an inspection of the town has asked the Commissioners to select 50 sites for sewage depôts and latrines, in addition to the 12 now in existence. It is proposed to carry the sewage from these depôts to the trenching-ground or sewage farm by water pumped up from the river. The high flood level in the rains and the absence of sufficient natural fall are difficulties. The Magistrate of Dacca, Mr. Faulder, writes:—"I am afraid it will be years before the new system is carried out, much as it is wanted. The present system of removing the night-soil is most disgusting; it is a matter of surprise to me that it has been tolerated by the inhabitants so long."

The Dacca Commissioners have prepared an estimate for laying a separate line of pipes for watering the streets with unfiltered water and flushing the drains.

Only the Commissioners of the Jamalpur Municipality sent water for analysis to the Chemical Examiner, and they received no report from him. We much want a local laboratory.

A Deputy Magistrate in his tour diary notes:—"The local munsifs complained that the river water was rendered unfit for drinking by the

decomposition of dead bodies which are thrown into it." This matter has lately attracted the attention of the Lieutenant-Governor. A local paper accuses the permanent settlement of impeding cremation. Zamindars, it says, tax the cremation of dead bodies.

Local officers in their tours make enquiries about the sale of quinine at post-offices. The sale is good in all districts except Backergunge.

V.—MATERIAL CONDITION OF THE PEOPLE.

7. We had had a succession of bad seasons. In the months of August and September 1893 the price of common rice rose to 8 seers; jute sold at Rs. 7 per maund. Producers who saved their crops no doubt made money. But generally high prices meant bad times. We even imported food. This year we have had extraordinarily good rice crops, such as have not been seen for years. The jute crop has also been nearly a full one. But in spite of this, the year has not been wholly prosperous. High prices, though falling, continued until the month of October 1894, and the sudden fall when the *aman* was thrown on the market has much curtailed profits. The previous bad years had been leaner in the south than in the north. The northern districts have therefore recovered more rapidly, and for them the year has been more prosperous. Sections XII Civil Justice, XX Stamps, XIX Excise, XVI Registration, and XXXI Post Office, of this report illustrate this. I of course use the term prosperous in a relative sense. Our lean years would be rich beyond the dreams of avarice in Bihar.

8. In my report for 1893-94 I pointed out how lightly taxed the people of my Division are, Re. ·87 per head, exclusive of customs duties, and compared this with the taxation in my old Division Assam, Rs. 2·94 per head. Relying on my intimate knowledge of the two Divisions, I said that the people of this Division can afford to pay two rupees where the people of Assam can afford to pay Re. 1. I did not suggest that the greater the population, the greater the taxable income. As a matter of fact, however, where, as in these two Divisions, the population has not yet begun to press on the means of subsistence, other things being equal, the larger population would, no doubt, have the larger taxable income. I, however, based my opinion on my personal experience. The difference is no doubt due in a large measure to the cultivation of jute, and also to the climate, if it is the climate which makes the Assamese opium-eaters and unproductive. Mr. C. J. S. Faulder makes a similar comparison between Dacca and his former district Purnea, and shows that Dacca is very much richer and is much more lightly taxed. Exclusive of salt and other customs duties, the incidence of taxation in Mymensingh is 12 annas 9 pies per head. And there has been an increase of nearly 20 per cent. in ten years, chiefly in stamps. Dacca pays some 13 annas 6 pies per head. Backergunge, the Collector makes out, pays Re. 1-4 per head, the land revenue being heavier. There can be no doubt that this Division could easily afford to pay much more than this, and that the recent re-imposition of a 5 per cent. duty on cotton piece-goods is a step, so far as we are concerned, in the right direction. We could afford to pay 20 per cent. All clothing is a luxury and a superfluity here. The poor still use the coarser and more durable country cloth. The well-to-do indulge in the smarter imported article. Mr. LeMesurier invites attention to betel-nuts as a source of taxation. Betel-nut trees are as easy to tax as toddy trees. Like them, they yield a pure luxury.

How expenditure may be reduced and revenue increased is the bed-rock of administration. District Officers have given me their ideas on the latter branch of the subject, but not on the former branch.

9. In paragraph 18 of my report for 1893-94, I gave some account of the distress which the failure of the rice crops in the *Bil* country in Backergunge and Faridpur had entailed, and of the steps taken to alleviate it. Before the close of the year I had satisfied myself that no further relief measures on the part of Government were necessary. The distribution of the amount already sanctioned for advances under the Agriculturists' Loans Act—Faridpur Rs. 5,000, Backergunge Rs. 3,000—was left to the Collectors. The Collector of Faridpur devoted Rs. 3,500 to the *Bil* country, and the Collector of Backergunge his whole grant, Rs. 3,000. The road works already

opened by the District Boards were, of course, continued, and I did not consider it necessary to prohibit such minor measures of relief as the District Boards might think it advisable to undertake in aid of private beneficence or otherwise. The District Board of Faridpur spent Rs. 1,824 in paying women for husking paddy and in other more or less gratuitous relief. The cold weather crops were good. The *boro* and *aus* rice were almost bumper crops, but still prices were maintained. The prospects of the *aman* crop were, however, good, and by September the price of common rice had fallen to twelve seers per rupee. The District Board of Faridpur having applied for leave to advance Rs. 300 to the Revd. Mathura Nath Bose, to be spent on relief work, and alarming accounts of the state of affairs having appeared in the public prints, the Officiating Commissioner, Mr. A. C. Tute, C.S., made a local enquiry in September, the result of which he reported to Government in his letter No. 3T., dated 21st September 1894. Under date September 27th, the Secretary to the Indian Association addressed Government inviting attention to the alarmist accounts in the newspapers, and especially to the experiences of Babu Devi Prasana Chowdhury. This gentleman and other well-meaning persons, as noticed in my report for last year, took an exaggerated view of the situation, not knowing what famine is. As I said last year, I think we went quite as far as was possible without demoralizing the people. The zamindars who have the best means of ascertaining the facts, and who are the persons most interested, undertook no measures of relief.

The recovery of loans made in 1893-94 and 1894-95 in the distressed tracts has been very good. Of the amount due in Backergunge, only Rs. 245 remained outstanding by latest advices, and in Faridpur only Rs. 1,992.

VI.—EMIGRATION AND IMMIGRATION.

10. As reported last year, there is, properly speaking, no regular emigration from, or immigration into, this Division. There is, however, much temporary migration in search of work, both within the Division and from outside. The people of my Division are, as a rule, too well off to work as coolies—I might almost say as day-labourers. Earthwork is almost all done by immigrants from Bihar and the North-Western Provinces. The same class supply such palki-bearers, punkha pullers, &c., as there are. They are to some extent displacing local men as domestic servants. The great jute business of Narayanganj depends almost entirely on this immigrant labour. A few special migrations may be mentioned. At the commencement of the cold weather, labourers from the neighbouring districts migrate to Backergunge for the paddy harvest. These reapers receive one-fifth of the crop they have reaped. A Backergunge cultivator likes to sit and see other men reap his crop for him.

The Kishorganj subdivision of the Mymensingh district is said to supply Chandni Bazar, Calcutta, with many of its shop-keepers. Though they will not do hard work at home, people of this subdivision are said to roam as far as Moulmein in search of employment. Gangs of Muhammadans from the Tangail subdivision go to Rangpur and the Bhowal pargana in the Dacca district to reap paddy. Fishermen from Sylhet and other districts come to catch fish in the east of the Mymensingh district during the cold weather.

11. The following statement shows the number of coolies embarked at Goalundo for the labour districts, as compared with the preceding year. I also give the figures for the first three months of the current year compared with the first three months of 1894:—

Class of Emigrants.	1893.			1894.		
	Assam.	Cachar and Sylhet.	Total.	Assam.	Cachar and Sylhet.	Total.
1	2	3	4	5	6	7
Contractor ...	2,930	1,163	4,092	1,571	1,432	3,003
Sardari	8,919	4,736	13,655	9,821	4,203	14,024
Free	13,041	10,594	23,635	13,006	12,615	25,621
Total ...	24,890	16,492	41,382	24,398	18,250	42,6[illegible]

Class of Emigrants.	During first three months of 1894.			During first three months of 1895.		
	Assam.	Cachar and Sylhet.	Total.	Assam.	Cachar and Sylhet.	Total.
1	2	3	4	5	6	7
Contractors ...	400	432	832	453	808	1,261
Sardari ...	6,247	2,263	8,510	7,863	3,973	11,836
Free ...	5,211	3,169	8,380	5,022	12,491	17,513
Total ...	11,858	5,864	17,722	13,338	17,272	30,610

The business is in a flourishing condition generally on the Surma Valley side. The enormous extension of free emigration is very remarkable. Would that it meant free labour on the gardens.

Steamers have now entirely superseded boats in this side.

In May 1894 I inspected the depôts and lodging-houses at Goalundo, and found things in good order. I saw Dr. Kishori Lal Banerjee, the Embarkation Agent, put the coolies starting for the labour districts through their examination. The coolies I saw were a fine lot, although by no means all junglis. I again inspected the depôts and lodging-houses in March last. On this occasion I inspected the embarkation depôt also.

The India General Steam Navigation Company has opened a line of steamers on the Ganges between Revelganj in the Saran district and Goalundo. This will much help employers who employ so-called North-westers. Immigrants by this line are inspected at Goalundo under paragraph 26 of the rules under Act I of 1889.

In my report for 1893-94 I said Babu Kishori Lal Banerjee's conduct of the business leaves nothing to be desired. The Indian Tea Association have, however, lately declared that "matters as they stand at present are not at all satisfactory," "sardars and their coolies are interfered with," "the present arrangements are susceptible of considerable improvement"; and on these grounds have asked that a European Embarkation Agent may be appointed. No doubt a native officer has great advantage over a foreigner in work of this nature. I have said that in the absence of anything to the contrary which I could submit to the test of investigation, I adhere to the opinion I expressed last year.

There was no criminal prosecution during the year under the Act and Rules.

VII.—PRICES OF FOOD AND LABOUR.

12. At the beginning of the year the price of rice, our principal food crop, was high on account of the partial failure of the winter crop of 1893-94. The winter crop of 1894-95 having proved a bumper one, the price rapidly fell, with the result that at the end of the year it was the lowest on record since 1887-88. In that year the gold price of the rupee was 16¼*d.*; it is now 13¼*d.* The price of common rice in the last six years in the last fortnight of March has been—

			Sr.	Ch.
1889-90	...	...	15	14
1890-91	...	...	15	12
1891-92	...	...	13	14
1892-93	...	...	11	11¾
1893-94	...	...	11	8¾
1894-95	...	...	17	11

The wages of labour were almost the same as in the preceding year, notwithstanding the fact that there has been a heavy fall in the price of rice. A slight increase has taken place in Dacca in the wages of carpenters and masons and thatchers; women and boys are apparently doing a little better in

this district. In Mymensingh the wages of domestic servants are gradually increasing. Up-country men are fast replacing local residents in the above capacity—a significant fact as showing the comparative wealth of this part of Bengal. In Backergunge, too, almost all hard labour and handicraft is done by immigrant foreigners, the indigenes being too well off to do such work. Our rates compare as follows with those of the Patna Division :—

		Dacca.	Patna. As. P.
Superior mason	...	... 8 annas to 1 rupee.	4 6
Do. carpenter	...	... 8 " 1 "	4 6
Do. blacksmith	...	8 " 1 "	5 0
Thatchers	...	... 4 " 12 annas.	2 9
Cooly	...	... 3 " 8 "	2 3

Milk costs seven seers the rupee at Dacca, at Bankipore 16 to 20 seers. Lately, Mymensingh carters demanded Rs. 50-6 per month for carts. I actually paid Rs. 44-9. In the Patna Division they cost Rs. 12. I was much struck, when lately on deputation to that Division, with the difference in the cost of living. No wonder officers quartered here sigh for the delights of the Patna Division; no wonder the poor and needy of that Division seek the comparative luxury of this Division.

VIII.—MINES AND MANUFACTURES.

13. Cotton weaving, for which the town of Dacca was once so famous, has now dwindled to insignificant proportions. Country piece-goods cannot compete with the cheap European articles. Few people can afford to buy these costly muslins at the prices at which they can be made by hand, and with the cessation of demand the art is rapidly being forgotten. It is said that muslin of first quality cannot now be produced. Embroidery is practised by Musulmans and the females of almost all the castes of Hindus in the town. *Kasida* cloths are still exported to Persia, Egypt, and Turkey. Gold and silver work is carried on upon a small scale. Shell work is an important trade at Dacca, shell bracelets being in much request among Hindu females.

Cheese continues to be manufactured in the cold season in the east of Mymensingh and west of Sylhet district. This tract is many feet under water in the rains, and in the dry season produces the most delicious pasture. It is said that agriculture is encroaching on the pasture. No doubt the tract in question is rising slowly.

The steam oil-mill at Jhalakati in Backergunge district, mentioned in previous reports, is still working. The business is said to be profitable.

The flour and oil mill at Dacca has ceased to exist.

Articles of brass and bell-metal are manufactured at several places, notably at Islampur and at Tangail in the Mymensingh district, and at Hasherkandi in Faridpur.

Other manufactures are *sitalpati* and *hoogla* mats, cloth to a certain extent, *daos* and sacrificial knives, earthenware for domestic consumption. But generally the Division imports its manufactured goods and exports raw produce.

The date-sugar manufacture of Jessore extends to the tracts of this Division adjoining that district.

We have 17 steam jute-presses at Narayanganj and 7 in the Mymensingh district. Besides this there are 25 hand-presses, 14 at Narayanganj and 11 at Mymensingh. There are no less than 16 soap manufactories in the town of Dacca. Ærated waters are manufactured at four places in Dacca and at two places in Mymensingh. In spite of the climate, ice is manufactured at Dacca only.

IX.—TRADE AND COMMERCE.

14. The Collectors submit reports on this subject direct to Government, copies of which are sent to me. The trade of this Division is very large both on its own account and on account of the province which lies on its north and east. The chief *entrepots* are Goalundo, Madaripur, and Narayanganj. The

latter place has a large trade with Chittagong and coast ports, and with Calcutta both by water *viâ* Sunderbans or the Eastern Canal, and by rail *viâ* Goalundo. Being a customs port, we have accurate statistics of its trade with Chittagong and other coast ports. Imports have fallen from Rs. 4,21,896 to Rs. 3,38,618, chiefly in salt and kerosine oil, both of which can now be imported more cheaply from Calcutta. Exports also fell from Rs. 66,98,274 to Rs. 62,67,705, chiefly in jute, though more jute was exported.

The Agents, Rivers Steam Navigation and India General Steam Navigation Companies, state that the exportation of jute from Narayanganj by river steamers has increased from 1,10,21,420 maunds to 1,35,63,669 maunds. The jute season was an unusually long one and prices ruled low.

Returns of traffic along the Calcutta and Eastern Canal show that 2,90,000 maunds of salt, 9,400 maunds of sugar and 4,000 maunds of kerosine oil came to Dacca district by this route, while 8,25,000 maunds of raw jute, 8,500 maunds of gram and pulses, and 83,000 maunds of mustard seed were exported.

The Collector of Mymensingh reports that 9,64,254 maunds of jute were exported from that district to Calcutta, against 9,00,168 maunds in the preceding year. When he wrote, a large quantity still remained undisposed of in the hands of the cultivators. It is not stated how these figures are obtained. 6,51,000 maunds appear to have been exported *viâ* the Calcutta and Eastern Canal. Only 4,440 maunds went down the Nadia Rivers. 18,600 maunds of mustard seed was exported by the Calcutta and Eastern Canal. The Collector also reports that European cotton piece-goods, valued at Rs. 20,47,788, were imported from Calcutta in 1894, as against Rs. 19,50,185 in the preceding year. Imports of petroleum fell off, 23,496 maunds against 29,317 maunds. Besides these imports, cocoa-nuts and betel-nuts from Backergunge, refined sugar from Ghazipur and other places, and timber from Dhubri, were imported on a large scale.

Backergunge exported 33,37,000 maunds rice by the Calcutta and Eastern canals, 54,000 maunds jute, and 9,500 maunds gram and pulse. It imported by the same route 5,00,000 maunds salt and 34,900 maunds kerosine oil. The next important article of trade in Backergunge is betel-nuts, from the proceeds of which it is said one-third of the rent is paid. The outturn was an unprecedented one, and about two lakhs of maunds were exported to Burmah, Calcutta, and the neighbouring districts, as against one lakh of maunds in the preceding year. About seven lakhs of cocoanuts were exported to Calcutta, Rajshahi, Dacca, Jessore, Faridpur, and Pabna. The Collector notices the rapid increase in the imports of *bahaduri* and *chhota dusti* wood used for building purposes. Also of delf pottery all made at Maestricht, which I referred to in my report for 1892-93. This is now exposed for sale on a large scale in all our bazars. The shapes are better adapted for native food than ordinary European plates, &c. It is used chiefly by Muhammadans.

Faridpur also does a good trade by the Calcutta and Eastern Canal. It exported 59,000 maunds gram and pulses, 6,54,000 maunds jute, and 19,500 maunds mustard-seed, and imported 2,06,000 maunds salt and 17,400 maunds kerosine oil by this route

I have no statistics of trade along our two railways—the Dacca-Mymensingh and the Goalundo-Calcutta. The gross receipts on the former line have increased from Rs. 4,52,000 to Rs. 5,23,000, or 15·7 per cent. The increase is said to be due to the development of the jute traffic. The Goalundo-Calcutta line has also done well.

Though owing to the absence of registering stations and other causes my information is very incomplete, I think I am justified in saying the year has not been a bad one for trade. On the other hand, depression of trade is given as the cause of the extraordinary decrease in the sale of hundi stamps.

The number of banks seems sufficient for the trade of the Division. Besides the numerous private banks, the Bank of Bengal has a branch at Dacca which does a large business.

All over the Division there are now loan offices. One of the oldest established is that at Faridpur, which has paid a dividend of 22·5 per cent. this year. The Dacca and Munshiganj Loan Banks only pay 5 and 6 per cent. respectively. Out of nine loan offices in Mymensingh, one at Arvali in the Tangail

subdivision has collapsed. That at the Sadar station has been unfortunate, the Secretary having misappropriated some of its funds. The other offices in this district are said to be doing well. The Barisal Loan Office is reported to be in a prosperous condition. It has a capital of $1\frac{1}{2}$ lakhs. The dividend declared at the end of the year was 24 per cent. against 12 per cent. in the previous year.

IX-A.—PROVIDENT SOCIETIES.

14a. The Commissioner of the Presidency Division, in his report for 1893-94, made some remarks on the provident societies which had sprung up in the Khulna district; and in their Resolution No. 5306Stats., dated the 31st October 1894, on the reports of Registrars of Joint-stock Companies on the working of the Indian Companies Act during the official year 1893-94, the Government of India referred to the same subject. I find there are no less than 76 such societies in my division, viz.—

		Registered under the Companies' Act.	Unregistered.
Dacca	...	1	3
Mymensingh	...	3	1
Faridpur	...	2	1
Backergunge	...	62	3

The societies returned as unregistered have only lately been started. The general idea of these societies is that each member pays a certain sum to a particular member or his nominee on the occurrence of a certain event. In the Barisal Family Relief Fund Company the death of a member is the event, and the payment is made to his nominee. It is obvious that it would not pay a young man to join such a society. In other cases, marriage, birth of children, pilgrimage, and even the raising of a tin-roofed house, is the event which entails a payment from all the members. The Barisal Family Relief Fund Company, Limited, which was established in 1891, is conducted, the Collector says, on business principles. It publishes an annual balance-sheet. It has a cash balance of Rs. 20,384, and has put out Rs. 3,091 on loan.

Of these societies generally the Collector, Mr. LeMesurier, writes:—"A much less satisfactory feature in the history of our progress to civilization is the sudden out-crop of small provident companies all over the district. A special enquiry regarding these undertakings has been made, and it is reported that they started in the Bagirhat sub-division of the Khulna district, and were imported by speculators till now every considerable village has one or more; indeed, in Raerkati, a village two miles off from Pirojpur town, and included within the Municipality, there are eight such funds besides one in the town itself. The natural result was that only old men with a foot in the grave joined the death funds, and the young men on the eve of matrimony, the marriage funds. Hence many of the companies collapsed, the share-holders refusing to pay their contributions. Some of the companies tried to improve matters by promising pensions to subscribers paying regularly for so many years, or making payment for a special number of years a condition to the enjoyment of a marriage or house-building bonus."

"The business of these companies is usually carried on ostensibly by a Secretary and Managing Directors acting under bye-laws framed by the companies. But section 76 of the Act, which provides for changes in the bye-laws only by virtue of a general meeting, is ignored, and everything is done according to the fancy of the Secretary, who is usually the promoter. Accounts are seldom, if ever, kept, the realizations are slack and not brought to book, and there are loud complaints of favouritism and dishonesty in the way claims are brought up out of turn and the rules twisted or evaded according as the subscriber is or is not a friend of the Directors. In fact, the management of these companies is on a par with their organization, and they are rapidly being discredited and collapsing." One promoter of such a society candidly confessed that his object in starting the fund was to provide for a relative who was sitting idle at home.

X.—ADMINISTRATIVE CHANGES.

15. The following administrative changes have taken place:—

(1) Certain villages of the district of Dacca have been transferred to the district of Faridpur under paragraph 2 of Government order No. 486J.D., dated the 26th May 1894, and notification No. 4172J., dated the 6th November 1894.

(2) Under Government orders No. 970J., dated the 4th February 1895, the quasi-subdivision established at Gopalganj in the Madaripur subdivision of the Faridpur district has been abolished.

(3) Some outposts have been abolished and others have been converted into police-stations in accordance with the recommendation of the Police Redistribution Committee.

(4) Five new sub-registry offices at Rahamatpur, Rajapur, Kawkhali, Daulatkhan, and Tazumuddin, in the district of Backergunge, have been opened.

16. In paragraph 3 of Resolution dated 1st January 1873, in which orders on the new Code of Criminal Procedure, which came into force on that date, were passed, the then Lieutenant-Governor, the late Sir George Campbell, said:—

"At large stations one court should sit regularly as the Police Court, and take up at once ordinary police cases as they are sent in by the police. It seems wholly unnecessary that the work should be distributed in driblets, a little to every man who has powers of a Magistrate, as is now too often the case; it is not necessary to employ all the Magistrates at all times on criminal work. It is better that certain officers should be adequately employed and the others set free for other work."

In paragraph 51 of my report for 1892-93 and in paragraph 27 of my report for 1893-94, I noticed this subject, and stated that in the Mymensingh district an attempt had been made to separate magisterial and collectorate functions. In paragraph 5 of the Resolution on my report for 1892-93, the Officiating Lieutenant-Governor called for a special report on the subject, which I lately submitted. In paragraph 7 of the Lieutenant-Governor's Resolution on my report for 1893-94, he approved generally of the arrangements made at Mymensingh. Mr. Earle writes that they have been a complete success. He is surprised that any other arrangement was ever thought of. He writes:—

"The Magistrates in charge of the two subdivisions into which the Sadar subdivision has been divided, have shown far greater interest in their work than I could possibly have expected of them had they taken up cases from any and every thana and outpost. This is the result of their having become fully acquainted with the areas placed under their charge and the people inhabiting the same both in the course of their judicial work and during their tours in the interior, which lasted 90 and 75 days. The disposal of revenue work has, I consider, decidedly improved under the system. Officers have not had the chance of complaining that they had to neglect such business on account of criminal judicial work, and have, as heads of departments, evinced far more zeal than would have been possible had their thoughts been constantly distracted by such engrossing business. In conclusion I would note that the public, as far as their opinion can be gathered, approve of the system, and would resent a return to the previous arrangements."

As the Treasury Officer, who naturally takes all the other collectorate work of a non-peripatetic nature, must have three years' service, and as at all of my head-quarters, except perhaps Faridpur, two first class Magistrates are required, to operate such a division of labour as is above described only three senior officers are required. The normal establishment of senior officers, that is, officers with first class powers, viz.—

Dacca	3
Mymensingh	4
Faridpur	4
Barisal	5

is therefore ample for the purpose. Though so large a staff of senior officers is thought necessary at Backergunge, Mr. LeMesurier complains that he was

unable to make the arrangements which have proved so successful at Mymensingh, because his establishments so often fell short of sanctioned strength and there were so many transfers. On January 1st, 1885, he had only two instead of five Magistrates with first class powers at head-quarters.

However, on April 1st, Mr. LeMesurier was able to give up one first class and one second class Magistrate entirely to criminal judicial work. On that date two first class Magistrates at Faridpur and one at Dacca were able to devote themselves exclusively to criminal judicial work.

17. Narayanganj is growing so rapidly and has already become a place of so much importance that I have thought (Joint-Magistrates being extinct) it should again be brought directly under the District Magistrate. It is one hour by road, and half an hour by rail, only from Dacca. It is indeed the commercial part of Dacca. The Magistrate of the district already in some matters supersedes the Subdivisional Officer. What with passing through *en route* elsewhere, inspections and excursions, he already spends a good deal of time at Narayanganj. I make out he spent some 45 days there in the year under report. So the Commissioner is a frequent visitor. If the Magistrate of the district elected to live at Narayanganj in preference to Dacca, I should not oppose his choice. But the mercantile community, for reasons which it is easy to understand, prefer to maintain their comparative autonomy.

XI.—STATISTICAL ENQUIRIES.

18. No statistical enquiries of any importance have been undertaken.

The result of the registration of vital statistics in certain areas where registration is compulsory is given in the following statement:—

District.	Selected area.	Population of census in 1891.	Births.			Deaths.		
			Total birth in 1894.	Ratio per 1,000 of population.		Total deaths in 1894.	Ratio per 1,000 of population.	
				1893.	1894.		1893.	1894.
1	2	3	4	5	6	7	8	9
Dacca	Dacca	82,321	1,769	24·67	21·48	2,342	31·02	28·44
	Narayanganj	17,715	377	37·18	21·28	383	33·07	21·67
	Total for the District ...	100,036	2,146	26·94	21·45	2,726	31·38	27·25
Mymensingh	Nasirabad	11,555	97	9·43	8·39	243	20·16	21·02
	Muktagacha	4,923	112	32·3	22·75	125	23·76	25·39
	Jamalpur	15,398	429	36·15	27·87	391	41·72	25·40
	Sherpur	10,744	321	36·95	29·87	314	37·36	29·22
	Kishorganj	13,938	331	25·30	23·66	281	19·37	20·08
	Bazitpur	9,399	236	29·25	25·10	226	35·96	24·04
	Tangail	17,073	521	26·70	28·98	378	18·91	21·03
	Netrakona	9,821	285	33·29	29·01	249	33·49	25·35
	Total for the District ...	93,791	2,332	28·52	24·86	2,207	27·33	23·53
Faridpur ...	Faridpur	10,774	254	29·8	23·50	242	25·4	22·4
	Madaripur	13,772	485	17·3	35·20	345	26·2	25·0
	Total for the District ...	24,546	739	22·85	30·10	587	25·40	23·91
Backergunge	Barisal	15,482	296	24·93	19·11	326	24·60	21·05
	Nalchhiti	1,675	22	19·10	13·13	26	16·11	15·52
	Jhalokati	2,305	26	5·49	10·99	25	24·49	10·57
	Perojpur	12,246	294	21·55	24·00	278	21·55	22·70
	Patuakhali	4,885	105	15·35	21·49	131	29·27	26·81
	Total for the District ...	36,053	743	21·03	20·27	786	23·81	21·44
	Total for the Division ...	255,026	5,960	26·2	23·37	6,306	28·2	24·72

The general rate for the Division is 35·4 for births and 28·1 for deaths. In 1893 it was 36·1 and 30·4. So the results of compulsory registration, 12·03 below average in births and 3·38 below average in deaths, are apparently very unsatisfactory. Were these compulsory areas urban in character, the low rates could be accounted for. In urban areas males preponderate, and many persons are not permanent residents. Many, even if ordinarily resident, retire to their original homes for domestic events. But our compulsory areas are to a great extent rural. As noted under police, we make a more liberal allowance of police in rural than in urban areas, and we depend on the police for the report of these events.

The Magistrate of Faridpur, Mr. Herald, thinks that many of the births at Madaripur properly belong to the previous year. No doubt in 1893 there was much arrear reporting both in compulsory and non-compulsory areas. But we should have made up arrears by now.

There has been a large increase in the number of prosecutions under Act IV (B.C.) of 1873 for not reporting births and deaths in all districts except Dacca:—

	1894.		1893.	
	Prosecuted.	Convicted.	Prosecuted.	Convicted.
1	2	3	4	5
Dacca	41	30	42	30
Narayanganj	5	5	8	8
Mymensingh municipal areas ...	85	78	34	30
Faridpur ditto ...	140	135	1	...
Backergunge ditto ...	13	12	...	...
Total for the Division ...	284	260	85	68

There is improvement in Backergunge, but this district, with a municipal population of 36,653, is still behind hand. Mr. Earle in Mymensingh, and Mr. Herald in Faridpur, show great determination in enforcing the law. The Municipal Commissioners being no longer responsible for collecting these statistics, are inclined to forget that they get all the fines under the Act. They have been persuaded to give rewards for information leading to convictions under the Act.

19. Births were first generally registered in 1892, and generally in that year results were not good. I now give the results in 1892, 1893, and 1894 in each subdivision with the rate per thousand. The rate varies from 23·9 in Netrakona subdivision to 47·9 in Perojpur subdivision. Generally the birth-rate in the Backergunge district is creditable to the rural police. Mymensingh is improving. The fall in Dacca and Faridpur may be due to the fact that the figures for 1893 included arrears.

There is more reason that a birth should be concealed than a death. It is therefore fair to assume that if deaths are not reported, the births are more so.

The fact that over the whole Division the birth-rate exceeds the death-rate by 7·3, in spite of imperfect recording, is most impressive.

Total number of births registered in 1892, 1893, *and* 1894.

District.	Subdivision.	Population according to census of 1891.	Total number of births in 1892.	Total number of births in 1893.	Total number of births in 1894.	Birth ratio per 1,000 of population. 1892.	1893.	1894.

5th class	......	......
4th "	......	......
3rd "	......	......
2nd "	......	......
1st "	......	......
Coal, edible grain, and other low-priced staples to be carried at special rates	......	......

APPENDIX C.

Working of proposed tramway.

No agreement has yet been arranged with any existing Tramway or Railway Administration under which the projected tramway is to be worked, but when completed it is proposed to offer the working to the ______________________ Company on the following terms:—

(i) ____

(ii) ____

(iii), &c. ____

OR

It has been provisionally arranged with the ________________ Company to work the projected tramway when completed on the following terms :—

(i) ________________

(ii) ________________

(iii), &c. ________________

RESOLUTION ON THE ADMINISTRATION REPORT OF THE COMMISSIONERS OF THE PORT OF CHITTAGONG FOR THE YEAR 1894-95.

No. 1921Marine.

GOVERNMENT OF BENGAL—MARINE DEPARTMENT.

Dated Calcutta, the 21st September 1895.

RESOLUTION.

READ—

The Administration Report of the Commissioners of the Port of Chittagong for the year 1894-95.

Financial.

The financial position of the Chittagong Port Fund, on the 31st March 1895, is shown in the following statement:—

	1893-94.	1894-95.
1	2	3
	Rs. A. P.	Rs. A. P.
Opening balance of the year	38,223 12 11	7,341 11 3½
Receipts during the year	77,584 1 4	16,599 0 0
Total ...	1,15,807 14 3	23,940 11 3½
Expenditure during the year	60,516 3 8	9,050 6 5
Balance at the close of the year	55,291 10 7	14,890 4 10½
Total ...	1,15,807 14 3	23,940 11 3½

2. The subjoined table shows the number and tonnage of the vessels which visited the port during the year, as compared with the figures of the two previous years:—

Shipping.

		1892-93.		1893-94.		1894-95.	
		Number.	Tonnage.	Number.	Tonnage.	Number.	Tonnage.
1		2	3	4	5	6	7
European vessels trading with foreign ports ...	Entered ...	26	39,926	17	30,272	32	50,861
	Cleared ...	27	41,028	16	26,694	20	20,637
British Indian vessels trading with foreign ports	Entered ...	11	1,824	17	2,572	7	1,206
	Cleared ...	2	187	...	...	...	...
Vessels trading with home ports	Entered ...	734	211,362	626	202,030	595	210,834
	Cleared ...	762	213,357	617	208,885	566	219,942

In paragraph 7 of the report under review, the number of European vessels which cleared for foreign ports during the year 1894-95 is stated to be 22, and that of British Indian 1, the total number sailing for foreign ports being thus given as 23. From the statement given in paragraph 11 of the report, it appears that this total includes three vessels which sailed for ports situated in the island of Ceylon: but those ports come under the category of home ports and not of foreign ports, under the provisions of Act I of 1859. The figures in the table above have been corrected accordingly.

of serious crime for the Dacca and Backergunge districts (where the increase is largest), and I find the increase thus distributed :—

1st quarter	...	...	...	+140
2nd do.	...	...	...	+183
3rd do.	...	...	...	+213
4th do.	...	...	...	+ 25

There is, again, a heavy increase in burglaries and theft in Backergunge in first quarter of 1895 compared with first quarter of 1894, and in Mymensingh in burglaries. In other respects serious crime in the first quarter of 1895 has declined, as might have been anticipated with falling prices.

As noticed in former reports, the practice differs as to what should be entered as a crime in the crime returns. I have satisfied myself that in Mymensingh the increase is largely due to a change of practice in this respect, and I cannot help suspecting that the same cause has operated to some extent in Backergunge and Dacca.

No doubt the reorganization of the village police has resulted in better reporting. The Magistrate of Backergunge, who joined the district in March 1894, has reason to believe that a great deal of crime is suppressed, not so much by the rural as by the regular police. He says thefts of cattle and boats, where the thief is unknown, are not taken up by the police. Although he admits that more crime is now reported, he is convinced that the increase has been real and is not, as I suggest, more or less artificial. That the increase is so large in crimes against property supports the Magistrate's view. On the other hand, improved reporting would necessarily swell the returns of house-breaking cases.

29. In burglaries the increase is 16·4 per cent. on the whole. In Backergunge 39·1, in Dacca 30·1. In thefts the increase, on the whole, is 16·1 per cent.—the largest in Dacca 18·8, the smallest in Backergunge 11·4. There was increase in 1892 and 1893 as compared with 1891, and there is now increase as compared with 1892 and 1893.

30. There was one very important case under class I, offences relating to coin. A gang of coiners carried on their operations in a boat on the river near Rajabari in the district of Dacca. Four men were caught with a large number of coins, dies, moulds and other implements for coining. One of them was admitted as approver. The other three were convicted and sentenced to seven years' rigorous imprisonment.

Offences by public servants.

30*a*. Serious charges of bribery and corruption were brought against a Deputy Magistrate at Dacca. After due enquiry I recommended his prosecution in the criminal courts or before a commission. He has been prosecuted before a special commission consisting of Mr. C. W. Bolton, c.s., and Babu Pyari Mohan Banerjee, Deputy Magistrate, and has been convicted.

Riots.

31. We have long had an evil reputation for riots and murders. I accordingly devote special paragraphs to these classes of crime. The number of cases of riot has risen in all districts, especially in Mymensingh. But it is explained that in this district the increase is due partly to a change in the preparation of the returns of true crime. The increase in other districts is small.

District.	True cases of riot.					
	1889.	1890.	1891.	1892.	1893.	1894.
1	2	3	4	5	6	7
Dacca	79	111	81	111	190	140
Mymensingh	104	106	170	146	127	204
Faridpur	94	166	134	116	147	166
Backergunge	100	95	133	93	107	124
Total ...	377	478	518	466	500	634

Of these, the following resulted in loss of life:—

District.	1890.	1891.	1892.	1893.	1894.
1	2	3	4	5	6
Dacca	3	2	3	3	3
Mymensingh ...	6	4	8	6	5
Faridpur	5	4	1	1	2
Backergunge... ..	10	8	9	10	13
Total	24	18	21	20	23

All these 23 cases came to trial; 13 resulted in conviction and 10 in acquittal.

In none of these 13 cases was the death sentence inflicted, yet in all of them probably both parties went into the riot, well knowing that they would cause death, and practically intending to cause it. In only one case was any one sentenced to transportation for life. In Mymensingh both sides were sent up for trial in 12 cases, in Faridpur in 19 cases, in Backergunge in 5 cases, and in Dacca in one case only. In Sylhet, where riots are more common, but not generally so serious as they are here, both parties were usually guilty.

Riots here are nearly always premeditated, in the sense that the parties have had ample time to have recourse to the constituted authorities. The Magistrate of Backergunge states that no decrease in riots can be expected so long as the courts hold themselves practically bound to acquit the party whom they find to have been in possession of the land in dispute. It is stated that the actual rioters are, for the most part, strangers to the quarrel and often to the locality, brought down with the deliberate intention of fighting. The Magistrate is disposed to think that matters might improve if the police would make a practice of sending up both sides for trial whenever cross-charges are made and it is found foreign *lathials* have been employed.

I submitted a typical case to the Inspector-General of Police. Both sides were sent up and both were acquitted because they had not exceeded the legal right of private defence. I wrote:—

"The evidence that there was a riot as defined by clause 4, section 147, Penal Code, is to my mind conclusive. The fact is practically admitted on both sides. How the riot originated appears to me to be immaterial. It cannot be argued for a moment that either side had any right of private defence in face of clauses 3 and 4 of section 99, and it is clear that what provocation there was, was not grave and sudden. The only question was who took part in the riot on either side."

I quote one case of riot as illustrative of the lawless character of the people of Backergunge. There was a dispute about a piece of land close to the jail wall at Barisal, and three constables were sent to the spot to maintain order. In spite of this, a gang of men came in the middle of the night, attempted to set up a house on the disputed land, and attacked the constables. The police lines being near at hand, the reserve turned out. The rioters, however, attacked the reserve, who only succeeded in arresting them after a free fight.

I was able to report that no cases of riot between Hindus and Musulmans had occurred in this Division in the last five years.

32. The following statement shows the number of cases of murder returned as true in each district as compared with 1893 and 1892:—

Murder.

District.	1892.	1893.	1894.
1	2	3	4
Dacca ...	12	13	7
Mymensingh ...	24	15	24
Faridpur ...	15	13	11
Backergunge ...	41	57	63
Total ...	92	98	105

Of these, two were by robbers and two by poison, as compared with three and one in the previous year. In three of the Dacca cases the murderers were lunatics.

The ease with which poison can be obtained for murderous purposes is illustrated by the fact that in two cases wives obtained arsenic on pretence that they wanted to administer it to their husbands to make them love them.

In two cases the husband was convicted of causing the death of his girl-wife by forcing her. In one of these cases, six months, in the other one year's rigorous imprisonment only was inflicted, in consideration of the habits of the people in this matter.

In Backergunge in no less than 13 cases the death was caused by gun-shot. In ten of these cases the deed was done at night when the victims were eating or sleeping in their houses. In only one of these cases were the assassins detected, and that only because they were so foolish as to leave the gun with which the deed was done outside the house. The Judge did not hang them because he could not make up his mind who fired the shot. In one case a man was shot when assisting a poon to execute a civil court process. The use of guns for homicidal purposes has become a serious matter in this district. In the current year I have received special reports of 17 such cases. In the last four years guns have been used in cases of unlawful assembly, riot, murder, and grievous hurt.

1895 up to 1st May	...	in 26 cases.
1894	...	in 24 "
1893	...	in 19 "
1892	...	in 37 "

In 1891 they were used in 24 cases of riot and murder only.

Dacoity.

33. In dacoity, too, especially river dacoity, we have been notorious in former years. The district figures for the last three years are—

	1892.	1983.	1894.
Dacca	7	...	3
Mymonsingh	6	17	5
Faridpur	5	6	15
Backergunge	...	3	9
Total ...	18	26	32

One of the three cases reported from Dacca was of a very serious nature. A gang of dacoits, said to be 100 to 125 in number, carrying torches and armed with axes, &c., broke into the house of a respectable gentleman, maltreated the inmates and carried off property to the value of Rs. 3,363. No clue was obtained by the local police, and the case was in due course reported in C form true. Lately, however, a dacoit, arrested in the Saran district on another charge, has made a full disclosure, which it is hoped may lead to the conviction of the offenders.

The serious case of dacoity in the Mymensingh district, alluded to in last year's report, ended in the conviction of that notorious dacoit Moharkhan. Special Inspector Babu Dina Bandhu Bhoumick did excellent service in this case. This man's escapes and attempts to escape are interesting.

November 1893	...	Escape and re-capture, Jamalpur thana.
December "	...	Do. Serajganj; re-arrested in a few days.
March 1894	...	Do. from Dubri jail.
May "	...	Re-arrested, Jamalpur.
" "	...	Attempted escape from Jamalpur lock-up.
November "	...	Escape from Dhubri jail; re-arrested in a few days.
March 1895	...	Do. from Gouhati jail.

I am glad to say he has been caught again. The frequent re-captures are perhaps more remarkable than the frequent escapes.

The increase in this crime in the Faridpur district is serious, and has not been satisfactorily accounted for. Ten of the cases were river dacoities.

The Magistrate of Backergunge states that the number of dacoities reported in his district does not represent the actual number committed during the year, and that there is reason for believing that many cases occur which are never reported.

As mentioned in last year's report, special enquiries were made into the increase in dacoity in the Mymensingh district in 1893. The conclusion come to was that they were generally the work of local bad characters who had been allowed too free a hand.

Non-cognizable crime.

34. Except in Mymensingh, non-cognizable crime has remained almost stationary in the last few years—12,476 cases in 1891 and 12,530 in 1894. In Mymensingh, however, there has been an increase of 84·3 per cent., from 4,965 to 9,154, from one to 699 persons to one to 379. In the rest of the Division there is one to 508 persons:—

District.	1893.	1894.	Increase or decrease.	Per cent.	Persons to a crime.
1	2	3	4	5	6
Dacca	6,495	6,383	— 112	1·7	379
Mymensingh ...	7,838	9,154	+1,316	16·7	379
Faridpur	3,278	3,036	— 242	7·3	678
Backergunge ...	3,287	3,111	— 176	5·3	692
Total ...	20,898	21,684	+ 786	3·7	453

In 1891 there were 12 Magistrates' Courts in the Mymensingh district; in 1894 there were 15; so we have provided increased facilities. There have been more cases under section 174, Indian Penal Code (non-attendance in obedience to summons), and under section 106, Criminal Procedure Code, than in former years. There is also increase under heads Assault, Hurt, Mischief, said to be due to prosperous times. To the same cause is attributed a large increase under offences relating to marriage. That the increase is rather in the latter part of the year supports this explanation.

The variations in non-cognizable crime outside of Mymensingh are not worth notice.

Prevention.

35. There has been a very large increase in bad livelihood cases from 252 to 600, especially in Mymensingh and Backergunge.

	1893.	1894.
Dacca	42	73
Mymensingh	98	278
Faridpur	68	90
Backergunge	44	159
Total ...	252	600

The increase in offences against property has provoked enquiries into bad characters. Of these 600 cases, 498 came to trial, 294 in the village of the accused and 204 in court. In 371 cases the accused were bound over.

36. The following table shows the extent to which sections 106 and 107, Criminal Procedure Code, were made use of in each district of the Division:—

District.		Number of cases under section 106, Criminal Procedure Code.	Number of persons bound down to keep the peace under section 106, Criminal Procedure Code.	Number of such persons who were able to find security.	Number of persons who were imprisoned in default of furnishing security.	Number of cases under section 107, Criminal Procedure Code.	Number of persons bound down to keep the peace under section 107, Criminal Procedure Code.	Number of such persons who were able to find security.	Number of persons who were imprisoned in default of furnishing security.	Remarks.
1		2	3	4	5	6	7	8	9	10
Dacca ...	... 1893 ...	66	169	160	...	137	594	594	...	(a) Of these one person was released after undergoing imprisonment for some days.
	1894 ...	90	289	237	2(a)	115	395	395	...	
Mymensingh	... 1893 ...	50	146	146	...	354	131	131	...	
	1894 ...	115	281	281	...	799	809	809	...	
Faridpur ...	... 1893 ...	52	145	145	...	460	2,246	2,246	...	
	1894 ...	40	182	182	...	307	1,361	1,361	...	
Backergunge	... 1893 ...	160	367	367	...	1,119	1,913	1,913	2	
	1894 ...	135	310	310	...	1,016	1,421	1,421	4	
Total	... 1893 ...	328	827	827	...	2,070	4,884	4,884	2	
	1894 ...	380	1,012	1,010	...	2,237	3,986	3,960	4	

Though there has always been a good deal of rioting in Mymensingh, the preventive provisions of the Code have not, in former years, been much resorted to in that district.

I am glad that out of so many persons bound down under the above sections, only two persons in Dacca and four in Backergunge had to go to jail.

37. The panchayats under Act VI of 1870 are responsible for reporting serious crime including riots, and all attempts and preparations to commit, and abetments of, such crime. One of the members of each panchayat has now been appointed village headman under section 45 of the Code of Criminal Procedure as amended by Act X of 1894.

38. Special enquiries were made regarding the existence of the practice of hook-swinging at the Charack Puja festival. Two cases came to light—one in the Madaripur subdivision of the Faridpur district, the other in the Tangail subdivision of the Mymensingh district. The discovery of these cases reflects on the administration, as it had been thought and reported that this practice no longer existed.

XIV.—POLICE.

Regular Police.

39. The following statement shows the strength of the police force as it stood on the 31st December 1894:—

Establishment and cost.

District.	District Superintendent of Police.	Assistant Superintendent of Police.	Inspectors.	Sub-Inspectors.	Head-constables.	Constables.	Town constables.	Rural police.	Total.	Number of population per policeman.
1	2	3	4	5	6	7	8	9	10	11
Dacca ...	1	1	5	22	51	554	...	3,776	4,410	548
Mymensingh ...	1	...	7	36	64	428	95	7,016	7,647	454
Faridpur ...	1	...	4	21	49	317	20	3,491	3,903	460
Backergunge ...	1	1	5	38	57	421	46	4,801	5,370	401
Total ...	4	2	21	117	221	1,720	161	19,084	21,380	461

On the whole the force is, I think, sufficient. Mymensingh should have two Assistant Superintendents and Backergunge one. There was no Assistant Superintendent of Police in the latter district for over six months.

When the high wages paid to coolies and the distaste of the people for active pursuits are considered, it is difficult to understand how the ranks of the police are filled.

District.		Actual expenditure on—		Total.
		Regular police	Rural police.	
1		2	3	4
		Rs.	Rs.	Rs.
Dacca	...	1,14.960	1,88,800	3,03,760
Mymensingh	...	99,648	3,50,800	4,50,448
Faridpur	...	88 512	1,74,550	2 63,062
Backergunge	...	1,30,330	2,40,050	3,70,380
Total	...	4,33,460	9,54,200	13,87,650

Of the total cost, some Rs. 9,54,200 is raised by local taxation. The actual expenditure on the rural police is not known. I have estimated Rs. 50 per rural policeman.

A police reserve of 25 armed police has now been established in each district. No doubt the force of regular police in Mymensingh is small compared to area, population, and work. But then it always has been small. We have lately relieved the police of the service of all processes in cognizable cases except warrants, and we are organizing our village police for the first time. Under these circumstances, I am not prepared to support the Magistrates' or the Inspector-General's cry for larger establishments in that district. Already, under the Police Redistribution Committee's proposals, Sub-Inspectors are being substituted for head-constables, and the number of constables is to be increased.

The reorganization of the rural police has entailed some increase in numbers, as explained below.

The recommendations of the Police Redistribution Committee regarding the abolition of out-posts, and the establishment of police-stations in place of out-posts, have all been carried out.

We have now an investigating centre to—

			Square miles.	Population.
1			2	3
Dacca	...	...	155	134,480
Mymensingh	...	...	226	124,006
Faridpur	...	...	126	99,851
Backergunge	...	...	140	82,844

When the difficulty of communication in some parts and at some seasons is considered, our investigating centres are, especially in Mymensingh, from an administrative point of view, impossible. But we manage somehow as we have managed for the last hundred years. And some day each panchayati union will be an investigating centre.

General conduct of the Regular Police.

40. The Magistrates of Dacca, Faridpur, and Backergunge are generally satisfied with the conduct of the police. The Magistrate of Mymensingh is now more satisfied than he was last year. He thinks the police of his have already been aroused from their torpor, and expects results in the year. I am glad to be able to report that after the submission of my

The inc

characters.

accused and &

report for 1893, the Court Sub-Inspector, who, the Munsif found, had taken a bribe, was exonerated by the Judge in appeal. Similarly, the head-constable, Ananda Kishore Pal, was acquitted by the Hon'ble High Court of the serious charge of causing hurt in order to compel the restoration of certain property, and was found guilty of simple assault only. I omitted to state that he was found guilty of extortion in another case and sentenced to a year's imprisonment. The District and Sessions Judge, who has many opportunities of observing the conduct of the police in the cases which come before him, is still very much dissatisfied. On the whole, I think there has been improvement as compared with 1893, but I wish we could afford two Assistant Superintendents in this large and important district.

Mr. LeMesurier thinks very decided strides have been made towards protecting the public against misconduct on the part of the police. He adds that in districts like Backergunge, where the people are naturally independent and tenacious of their rights, it may be said there is no longer any danger of oppression. He points out some defects, and thinks the remedy lies probably in the improvement of the rural police.

In my report for 1892, I said that the police must be unpopular everywhere, specially so in India where they represent not merely authority, but alien authority, and where the level of public morality is so low. I do not, therefore, attribute much importance to the abuse lavished on the police in the native press. Judging from what one reads in the papers, one would expect that the removal or abolition of a thana or out-post would bring joy and gladness to the neighbourhood. We have lately abolished some out-posts, and in almost every case the neighbours have protested loudly against the loss of their protection.

41. Dismissals and departmental punishments have somewhat decreased, rather as compared with 1893 than with previous years. Judicial punishments were at a low ebb in 1893, and have now resumed their normal development.

Punishments and rewards.

I reported last year that the Mymensingh Police had got out of hand. The increase in punishment in 1894 in this district, was, I think, absolutely necessary. There is also a large increase in rewards in this district.

Eighty-eight officers and 159 men received money rewards against 86 and 120 in 1893. While 38 officers and 75 men were rewarded in Mymensingh, only two officers and no men were rewarded in Dacca.

42. Only one case of torture was reported true. It was not prosecuted because there was no disinterested witness, and the evidence obtained was not considered sufficient.

Criminal charges against the police.

No very remarkable cases of extortion are reported, but there were a good many charges brought, especially in Mymensingh and Backergunge. Both Mr. Earle and Mr. LeMesurier complain that Sub-divisional Officers have no time to try charges of extortion against the police. The former officer transferred all charges against the police to the file of the Joint-Magistrate at the Sadar. During the year as many as 71 criminal charges were instituted against the police in this district, out of which 30 were declared, on enquiry, to be true and 34 false. Seven cases were not enquired into. Convictions were obtained against the police in ten of the true cases, and in ten of the false cases the complainants were punished either under section 560, Criminal Procedure Code, or under section 211, Indian Penal Code. In ten other cases they would have been punished had not the superior courts interfered. In four they were prosecuted and discharged. The cases against three are pending, and against seven no action was taken. I had occasion to go into the cases in which superior courts interfered in behalf of the persons who brought false complaints against the police. The interference, I found, was on technical grounds. The complaints were no doubt false and the complainants would have been punished had the cases against them been conducted with due regard to law. I quote the following remarks from Mr. Earle's report:—

"I consider that false complaints have been to a considerable extent encouraged by the damaging remarks which the Deputy Magistrates have from time to time levelled against the police in the course of their judgments—remarks which were too often based on bare suspicions. This action on the

part of the courts I have checked by pointing out to all officers that if they have any complaint to make against the police it is their duty to inform me forthwith, and that aspersions on the members thereof in their judgments, unless based on solid facts, merely make mischief."

As Judge and Magistrate I never allowed myself to make remarks on the conduct of the police either in my judgments or in charging my juries. I have lately addressed the Inspector-General of Police with a view to this practice being put a stop to.

Additional police and special constables.

43. In Dacca a strong force was located at Krokir char for one year from the 7th April 1894. It is stated that the parties interested have not yet come to terms, and that it will be necessary to apply for the retention of the force for a further period. This char has now been transferred to the Faridpur district.

Special constables were appointed in one case in Mymensingh—a dispute about a bazar. It has come out that in some instances special constables have been appointed without reference to me. In the district of Faridpur when the panchayat neglected to nominate a rural policeman, the Magistrate, instead of making the appointment himself, in some cases appointed the members of the panchayat to be special constables, apprehending, in the absence of any policeman, a disturbance of the peace. This apprehension was, I think, hardly reasonable. The Magistrate did not report the appointment of these special constables to me.

In cases of disputes about land it is often obvious that the owners (often absentees) are entirely responsible for the disturbances. In these cases it is unfair that the people of the neighbourhood, who are only harassed by the disturbances, should be saddled with the cost of their suppression.

Patrol boats.

44. A good many years ago I was interested in the police patrol boats on the border water between Sylhet and Mymensingh. These boats paraded the rivers with tom-toms beating. I never knew of their catching any dacoits, who no doubt kept out of their way; but they were a protection to traders, or the traders thought them so. The following establishment of patrol boats is maintained in this division:—

Dacca	2
Faridpur	2
Backergunge	5

Where means of communication are generally water—at some seasons only water—the subject of river police is a very important one. The Magistrate of Mymensingh has lately applied for new patrol boats. Up to 1891 there was a patrol boat at Bhairab Bazar in that district. The Magistrate of Faridpur thinks he wants more boats. The Magistrate of Dacca states that patrol boats enable the police to get about and look up badmashes. This is their principal use in Backergunge too. In this district the District Superintendent says no work was done by the patrol boats. They go with the wind and tide from one place to another. But though no work was done, they may have a moral effect, and no doubt they convoyed other boats.

The following steamers are maintained in this Division for police and other purposes. The number of miles each steamer ran during the year 1894, and the cost incurred, are shown in the following table:—

Number of steamers.	Number of miles run.	Cost incurred.
1	2	3
		Rs. A. P.
Lorna ...	4,350	5,799 15 2
Marian, Dacca ...	3,963	4,468 15 9
Teal, Faridpur ...	3,673	3,070 0 0
Alice, Backergunge ...	4,920	4,404 0 0

The flotilla is fairly efficient, but is hardly equal to our needs. The *Peel* attached to Faridpur is a crazy craft for our large and rough rivers.

Town Police.

45. In the towns of Dacca and Narayanganj the police have worked fairly efficiently. No town chaukidars are employed in these towns. It is thought that the regular police deal more efficiently with urban bad characters. In six of the other towns only such local police are employed; in the remaining nine, the force is mixed—partly regular, partly local. As is well known, our towns are, to a large extent, rural in character; consequently there are difficulties in maintaining round and patrol duty efficiently. Leaving out Dacca and Narayanganj, in the remaining 15 towns there is a policeman, local or regular, to 704 persons, to ·4 square mile, and to 143 occupied houses. We provide one rural policeman to about 80 houses and 400 persons. But then they have something like a square mile to patrol on the average. There seems a general consensus of opinion that the town chaukidars' salary, Rs. 5 per mensem, does not attract good men, and that the town police force is generally inadequate. It is thought the substitution of local for regular police has proceeded far enough. Some officers describe this measure as the sacrifice of efficiency to economy.

The Magistrate of Mymensingh states the town police are a worthless lot, spending most of their time in the houses of prostitutes. To dismiss them would be useless, because no better men are available for the sanctioned pay. Mr. LeMesurier says the town constables simply will not stay out of their beds at night, and think it unreasonable to be asked to do so. Natives of Backergunge will never take kindly to night work and discipline.

Street lighting has improved in Dacca, Narayanganj, Barisal, and Madaripur. Pirojpur has ordered 20 new lamps, 25 have just been set up in Nasirabad. Oil for bulls-eye lanterns is still a bone of contention. Some municipal bodies say they will supply oil if the constables will go their rounds regularly.

Crime returns.

46. The following table shows the percentage of cognizable cases—(*a*) refused enquiry under section 157, (*b*) excluded from returns of crime as brought by mistake of fact or law, (*c*) declared false—to total number reported in the last three years:—

District.	Not enquired into.			Excluded from returns.			Declared false.		
	1892.	1893.	1894.	1892.	1893.	1894.	1892.	1893.	1894.
1	2	3	4	5	6	7	8	9	10
Dacca ...	5·0	3·3	2·5	2·5	3·3	3·4	2·8	3·4	4·3
Mymensingh ...	15·3	14·2	9·9	4·3	5·5	13·2	4·1	5·8	6·5
Faridpur ...	5·8	4·6	6·1	15·2	4·9	4·8	3·2	2·3	4·3
Backergunge ...	8·0	5·9	5·7	8·0	5·9	4·9	3·8	2·2	3·8

I am afraid we have not yet arrived at a common understanding regarding the preparation of crime returns.

In my report for 1892 I described the Mymensingh percentage of cases refused enquiry as preposterous. I am glad to see it has been reduced under the auspices of the present District Superintendent of Police.

In this district, Mr. Earle insists on Magistrates declaring all cases true, false or erroneous, especially cases dismissed under section 203, Criminal Procedure Code. In Dacca, also, great care is now taken in this matter. When I inspected the Dacca Magistrate's office in June 1894, I found that the classification of cases for the crime returns was a good deal left to muharrirs.

Mr. LeMesurier is inclined to think that Magistrates are misled by the absence of some such classification as "erroneous" in place of "false by mistake of fact or law," and are apt to class maliciously false cases as "false by mistake." It also appears to him that if Mr. Savage's principle of giving the complainant the benefit of the doubt, if there be any, regarding the truth

or falseness of his complaint is followed, the doubt may be imported into the returns.

The enormous increase in Mymensingh in cases excluded from the returns is attributed to the fact that direct cases dismissed under section 203, Criminal Procedure Code, and declared by the Magistrate to be false through mistake of fact or law, are now being included in column VIII of Statement I, whereas in previous years, though excluded from Crime Return A, Part I, they were not included in column VIII, Statement I, merely because Magistrates neglected to pass orders regarding them. The Magistrate states that in his district numerous cases under section 447, Penal Code, a cognizable section, are dismissed under section 203, Criminal Procedure Code, as civil disputes. Magistrates now declare these "false by mistake."

47. The following statement shows how many of the cognizable cases were reported to the Magistrate direct, and how many were reported to the police:—

District.	Direct cases.		Cases sent up by police.		Total cases reported		Proportion of direct cases to the total.	
	1893.	1894.	1893.	1894.	1893.	1894.	1893.	1894.
1	2	3	4	5	6	7	8	9
Dacca ...	590	878	3,579	4,616	4,169	5,494	14·1	15·9
Mymensingh ...	1,548	2,689	4,842	4,924	6,390	7,613	24·2	35·3
Faridpur ...	683	638	3,222	2,678	3,905	3,316	17·4	19·2
Backergunge ...	425	477	2,063	2,697	2,488	3,174	17·08	15·02
Total ...	3,246	4,682	13,706	14,915	16,952	19,597	19·1	23·8

The large increase in Mymensingh is ascribed to the order of the present District Superintendent of Police that the police are not to take up unimportant cases to the detriment of their duties in respect of serious crime. The Magistrate states that it is out of such unimportant cases that the police, if so inclined, are able to make money. The District Superintendent's order seems to me a legitimate application of the principles laid down in section 157, Criminal Procedure Code. A similar order appears to be required in Backergunge, where the Magistrate states that in many of the direct cases the complainants said they had been to the thana first, but nothing had come of it. In every such case the sub-inspector had been away, and the report was made to a writer-constable or other person not empowered to record first informations. That so many people take their complaints direct to the Magistrate in Mymensingh, instead of going to the police, perhaps illustrates their want of confidence in the latter body.

Warrants.

48. The following table shows the number of warrants issued against accused and witnesses, and the number returned unexecuted:—

District.	Number of warrants against accused.		Number of warrants against witnesses.		Total.		Returned unexecuted.	
	1893	1894.	1893.	1894.	1893.	1894.	1893.	1894.
1	2	3	4	5	6	7	8	9
Dacca ...	3,902	5,484	3.403	4,255	7,305	9,739	(a)	3,009
Mymensingh ...	2,933	2,872	2,984	2,276	5,917	5,148	3,190	1,850
Faridpur ...	3.627	3,218	2,756	2,619	6,383	5,837	2,516	1,885
Backergunge ...	3,612	3,027	2,713	2,712	6,325	5,739	937	895
Total ...	13,220	14,601	10,594	11,862	23,814	26,463	(a)	7,639

(a) Dacca cannot produce figures for 1893.

As noted in my report for last year, the police are not responsible for all the warrants returned unexecuted. In Mymensingh they were responsible for 630 out of 1,850, in Faridpur for 1,027 out of 1,885. In the former district in 1893 they were responsible for 1,880 out of 3,190. In these two districts there has been very great improvement as compared with previous years. Warrants are no longer returned for "want of time" in these districts. In Dacca warrants were returned unexecuted instead of being passed on to other thanas. They were often returned on the date made returnable, although, if kept a day or two, they might have been executed. At each thana there is a file of unexecuted warrants which inspecting officers examine. Besides this, the Inspector-General of Police has lately prescribed a form of inspection statement showing the working of the police in the matter of warrants. In Faridpur it has been found necessary to impose a monthly return as a temporary measure. We expect great help from the rural police. But generally fine or stoppage of pay, if systematically applied, proves a remedy for non-execution. Mr. Thomas, District Superintendent of Mymensingh, deserves great credit for the improvement in that district.

In Mymensingh, Faridpur, and Backergunge there is a reduction in the number of warrants, though serious crime increased. In Mymensingh and Faridpur this is due to the more frequent prosecutions for non-attendance in obedience to summons. The increase in number of warrants in Dacca has not been explained. Unexplained it indicates lax administration.

The question whether the police should be allowed to retain fine warrants until fully executed has come up. The law and rules are not explicit on the point.

Post-mortem examination.

49. At all head-quarters stations and at four out of twelve subdivisions we have Assistant Surgeons. At other subdivisions the Civil Hospital Assistants are allowed to perform *post-mortem* examinations in special cases under Government Circular No. 31, dated 28th August 1890; but I find this permission has not been taken advantage of. For Backergunge the Magistrate has laid down some rules on the subject.

Miscellaneous.

50. Inspections have been, as a rule, frequent and thorough. Mr. Thomas, District Superintendent of Police, Mymensingh, is indefatigable.

District Officers are not very enthusiastic about the manner in which police cases are prosecuted in court, now that Court Sub-Inspectors have been relieved of so much work. They, however, agree that the conduct of prosecutions was, if possible, worse before this change was made.

I have made out lists of criminal processes to be served by police and by peons, which I think will prove useful.

RURAL POLICE.

51. The reorganization of the rural police is the most important matter which has engaged my attention and that of my subordinates in the course of the year under review. I submit no special report on this subject, and have therefore devoted much space to it here.

Revision of villages and beats.

The revision of panchayati unions and of beats has continued in all districts except Dacca, resulting, of course, in an increase in the number of rural policemen and a large reduction in the number of panchayats. At one time I thought Mr. Earle was going too fast in Mymensingh; but so far there has been no hitch, and I have had to admit he was right. I give the figures for this district up to May 1st, as much of the revision only came into force at the beginning of the Bengali year.

In Dacca the Magistrate says:—

"In the Sadar subdivision it has come to light that many villages have never been properly defined. In some instances one village has some houses in the midst of another."

* * * * * * *

"When the Act was introduced no trouble was taken to arrange the beats upon a rational principle, but the old system of chaos was adopted. Again, the term of office of many panchayats has expired and no trouble has ever been taken to appoint fresh men."

This was what I found in Sylhet 17 years ago when I was revising the rural police circles. Dacca is a little behind the times.

District.	Number of Rural Police.			Number of villages or panchayats.			Number of occupied houses.	Number of men to a panchayat.			Number of houses to a policeman.		
	1892.	1893.	1894.	1892.	1893.	1894.		1892.	1893.	1894.	1892.	1893.	1894.
1	2	3	4	5	6	7	8	9	10	11	12	13	14
Dacca	3,680	3,723	3,776	2,229	2,220	2,108	4,19,972	1 6	1·6	1·7	113	112	111
Mymensingh	6,118	6,916	7,016	3,827	3,827	788	5,99,084	1·5	1·8	8·9	97	86	85
Faridpur	3,169	3,217	3,491	1,890	1,890	646	3,34,896	1·6	1·7	5·4	105	103	96
Backergunge .. .	4,771	4,785	4,801	933	794	630	4,29,353	5·1	6·0	7·6	89	90	89
Total ...	17,744	18,641	19,084	8,870	8,740	4,172	17,82,805	1·9	2·1	4·5	100	95	9

52. Inefficient policemen have been weeded out and efforts have been made to improve the status of the force. Mr. LeMesurier states that in filling up the vacancies in his district it has usually been found possible to combine a certain amount of deference for the hereditary principle with the qualification that a man must be able to read and write. One applicant offered to learn to read and write in order to qualify. It is reported from Mymensingh that a Hindu of Kayasta caste, who has passed the minor scholarship examination, lately applied for the post of rural policeman. The Subdivisional Officer of Munshiganj in Dacca says that he has known men described as "son of a chaukidar." In the Golachipa and Gulshakhali thanas, in Backergunge, men worth Rs. 3,000 to Rs. 5,000 enlist as chaukidars. They are really the village headmen. Such men, I presume, perform their duties by deputy. On the other hand, it is said rural policemen, like punkha-pullers, find it difficult to marry their daughters. As I have said before, we must be careful not to enlist in the force men too proud for the work.

Status of Rural Police.

The following table shows the proportion of Musalmans in the force in each district:—

Name of district.	Number of men.	Number of Musalmans.	Percentage of Musalmans.
1	2	3	4
Dacca	3,776	2,001	52·9
Mymensingh	7,016	1,897	27·0
Faridpur	3,491	1,597	45·7
Backergunge	4,801	4,274	89·0

In Mymensingh, where over 69 per cent. of the population is Muhammadan, only 27·0 per cent. of the rural police are of this persuasion. It is found difficult to get rural policemen where the population is wholly Musalman. In Backergunge, and to some extent in Faridpur, the service is popular with Musalmans. The cause of this curious difference has not been traced.

53. As might have been expected, the present Magistrate of Dacca thinks with His Honour the Lieutenant-Governor, that it was a mistake to raise all salaries in that district at once to Rs. 5. Both in Mymensingh and Backergunge increase in salary will in future depend on good service.

Salary of Rural Police.

54. The following table shows the extent to which coercive measures were adopted for the realization of salaries in 1893 and 1894:—

Coercive measures.

District.	Year.	Number of panchayats.	Number of cases in which salaries were realized.	Number of warrants issued.	Number of cases in which no interference was necessary.	Remarks.
1	2	3	4	5	6	7
Dacca ..	1893	2,220	8,916	3,110	5,806	The figures in column 4 have been obtained by multiplying those in column 3 by 4 (instalments by which the pay of chaukidars is realizable).
	1894	2,108	8,432	4,514	3,918	
Mymensingh ...	1893	3,827	15,308	5,021	10,284	
	1894	3,487	13,948	839	13,109	
Faridpur ...	1893	1,890	7,560	3,268	4,292	
	1894	646	2,584	2,334	250	
Backergunge ...	1893	794	3,176	309	2,867	
	1894	630	2,520	539	1,981	
Total ...	1893	8,740	34,960	11,711	23,249	
	1894	6,871	27,484	8,226	19,258	

Here, again, Dacca not only lags behind, but has actually done worse than in the previous year. Mymensingh under Mr. Earle has made quite a colossal stride ahead. Last year I expressed a hope that warrants in this district would soon be a remembrance only. The difference between Dacca (and to a certain extent Faridpur) and the other districts is due to the fact that Mr. Earle and Mr. Savage have been able to make panchayats come to thanas to pay the rural police, while the Magistrates of Dacca and Faridpur were, as stated last year, unable to introduce this reform.

55. The following statement shows the punishments inflicted on, and the rewards paid to, the rural police:—

Punishments and rewards.

District.	Year	Number of men.	Number judicially punished— For neglect of duty.	Number judicially punished— For substantive offences such as theft, &c.	Number dismissed.	Number fined departmentally.	Percentage of men punished.	Number rewarded by judicial officers.	Number departmentally rewarded.	Percentage of men rewarded.	Total amount disbursed as rewards.
1		2	3	4	5	6	7	8	9	10	11
											Rs.
Dacca	1893	3,723	29	10	33	712	21·8	60	54	3·06	463
	1894	3,770	50	12	53	932	27 7	6	87	2·4	465
Mymensingh	1893	6,910	64	17	296	924	18·8	7	32	·5	310
	1894	7,016	7	7	542	2,638	45·5	17	261	3·9	2,271
Faridpur	1893	3,217	28	7	81	1,616	54·1	1	59	1·8	191
	1894	3,401	34	10	195	1,674	52·7	...	160	4·5	804
Backergunge	1893	4,785	34	8	125	1,325	31·1	10	53	1·3	408
	1894	4,801	41	12	97	1,450	33·3	26	37	1·3	615
Total ...	1893	18,641	165	42	535	4,607	28·6	78	198	1·4	1,371
	1894	19,064	132	41	817	6,604	40·2	49	545	3·1	4,155

Here Mymensingh takes a lead and Dacca again lags behind. It is mortifying to find that only 87 rural policemen have been rewarded in the latter district and that only Rs. 465 have been spent on rewards. That no rural police were considered worthy of reward by judicial officers in Faridpur in 1894, and only one in 1893, goes to show that judicial officers in this district want waking up. The Magistrate writes: "I could not induce Deputy Magistrates to report for reward in cases in which the chaukidar's conduct deserved reward. I discovered many such cases myself in going through the records of appeal cases. The excuses given were forgetfulness, or that chaukidar only did his duty, &c." He adds: "More discrimination was shown in awarding punishments. Formerly the system was to award a small fine without enquiring into the chaukidar's explanation of absence and without consulting his previous record of conduct. Now a full enquiry into the reason for absence is insisted on, and previous attendance is looked up." The increase in the number of men rewarded departmentally and in the amount expended in this district is satisfactory. In Backergunge medals were given as rewards and were much appreciated by them. In Faridpur, too, the best men in each thana were specially rewarded. The number of punishments and dismissals in Mymensingh is astounding The Magistrate reports that useless, incorrigible policemen have been weeded out. A good many have been removed because they lived at long distances from their beats. The Magistrate explains that much of the punishment really appertains to the year 1893. He maintains confidently that he has been fully justified in his action in view of the general slackness which prevailed, and that he has done what has been done under a full sense of responsibility and of knowledge that it is undesirable to punish more than is absolutely necessary. I can only say I await results.

District Reward Funds.

56. The subjoined table shows the amount realised as fines and penalties in 1893 and 1894, the amount paid as rewards in those years, and the balances to credit of the several District Reward Funds at end of 1894:—

District.	Amount realised as fines and penalties in 1893 and credited to Reward Fund.	Amount paid as rewards in 1893.	Balance.	Amount realised as fines and penalties in 1894 and credited to Reward Fund.	Total of columns 4 and 5.	Amount paid as rewards in 1894.	Balance.
1	2	3	4	5	6	7	8
	Rs A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs A. P	Rs. A. P.
Dacca	354 9 4	209 0 0	145 9 4	785 0 0	930 9 4	192 0 0	738 9 4
Mymensingh ...	2,795 0 3	161 0 0	2,634 0 3	,856 3 3	10,490 3 6	2,271 0 0	8,219 3 6
Faridpur	855 1 6	159 0 0	696 1 6	1,564 14 3	2,260 15 9	804 4 0	1,456 11 9
Backergunge ...	2,568 1 3	186 0 0	2,382 1 3	3,617 10 3	5,999 11 6	805 0 0	5,194 11 6
Total ...	6,572 12 4	715 0 0	5,857 12 4	13,823 11 9	19,681 8 1	4,072 4 0	15,609 4 1

Though I deprecate unnecessary punishment, I cannot think that Rs. 785, levied as penalties on 3,776 rural policemen in the Dacca district, is sufficient to maintain discipline, when in our model district, Backergunge, Rs. 3,617 has been raised from 4,801 rural policemen. In Dacca the average fine per head of men fined is annas 13, in Mymensingh Rs. 2-15-7, in Faridpur annas 15, and in Backergunge Rs. 2-7-0. The Magistrate of Faridpur proposes to levy substantial fines in future.

A very curious difficulty arose in the matter of the payment of rewards, and one which might have had disastrous consequences had I not interfered in time. Allotments for rewards were made in the Police Budget for 1894-95, such as had been made for some years without reference to the new District Reward Funds. When these allotments for 1894-95 were exhausted, Magistrates in some cases ceased paying rewards and applied for extra grants. Of course the success of the new system of rewards depends largely on prompt payment. I had to point out that rewards must be paid irrespective of budget allotments, so long as the fund was not bankrupt.

57. The following table shows the number of rural policemen in arrear for the first and second quarters of 1301 (B.S.), on 31st December 1894:—

Payment of Rural Police.

District.	Year.	Number of Rural Police in arrear on 31st December 1894 for— First quarter of 1301 (B.S.)	Second quarter of 1301 (B.S.)
1	2	3	4
Dacca	1933 ...	35	406
	1894 ...	56	682

	1894 ...	2	89
Faridpur	1893 ...	1	12
	1894 ...	1	149
Backergunge ...	1893 ...	...	...
	1894 ...	10	252
Total ...	1893 ...	46	682
	1894 ...	69	1,172

The contrast between Mymensingh and Dacca is appalling—in Dacca 738 out of 3,776 rural police, or 19·5 per cent.; in Mymensingh 91 out of 7,016, or 1·2 per cent. In the Sadar subdivision of Mymensingh, Maulvi Ahmed and Babu Ganga Narain Ray have no arrears. No one could have believed that administration could show such widely different results in adjoining districts. Not only does the administration vary in this extraordinary manner from district to district, but the results even in subdivisions of the same district exemplify what can be done by the application of a little interest and energy. At the end of the year in the Sadar subdivision of Dacca, 536 rural policemen were in arrear for the first two quarters of 1301 (B.S.), in Manikganj only 18, and in Narayanganj only 6. And in other ways these two subdivisions have gone ahead of the other two.

58. In all the districts the Magistrates have, with my approval, delegated all their powers under the Act, with the exception of those under sections 11, 12 and 38, to the Subdivisional Officers. I am not sure that powers under sections 3 to 10 should not have been reserved and powers under section 38 delegated to Subdivisional Officers. As regards the Sadar subdivision, the Magistrate of Dacca delegated all his powers, except those under sections 11, 12, and 38, to the District Superintendent of Police. The Magistrate of Faridpur has done the same, reserving powers under sections 3, 11, 12, and 38. In Mymensingh it was at first arranged that two, and in Backergunge one, first class Magistrates in the Sadar subdivision should be authorized to exercise all the Magistrate's powers except those under sections 11, 12, and 38; but I understand that in Backergunge powers were not actually delegated to any first class Magistrate. For the Sadar subdivision the Magistrate kept all powers in his own hands, except powers under section 35, which were delegated to the District Superintendent of Police.

Delegation of powers.

59. The control of a force of 19,084 rural police throws much work on the ordinary establishments at head-quarters and subdivisions. The average number of men in each subdivision is 1,192, and not only has this force to be controlled and provided

Establishment.

for, as the regular police are controlled and provided for, but in addition we have to supervise the collection and payment of salaries, &c. We have further to look after assessments. We cannot allow this first practical attempt to provide these vast and teeming provinces with an organized police force to fail for want of proper supervising establishments.

Power of arrest.

60. It seems an anomaly that seventeen-twentieths of our police force should have no power of arrest which is not conferred by section 59 of the Code of Criminal Procedure on private persons. I have proposed to confer on all police officers, whether regular or rural, the same power of arrest. It is not much use giving power of arrest to the regular police. The malefactor has decamped long before they can arrive on the spot. Fortunately neither panchayats nor rural police are fully alive to the narrow limitation of their powers, and are apt to arrest malefactors whenever they think it necessary to do so.

Miscellaneous.

61. Parade halls have now been erected everywhere. In Dacca they have cost from Rs. 155 to Rs. 1,283, or Rs. 3-0-7 per rural policeman on the avarage. This, I think, was too heavy a charge. In Mymensingh they have cost Re. 1-8 per man, and in Faridpur 9 annas 2 pies. In Backergunge the money was not made over to the thana police; the rural police bought the materials and made their own contracts. In this district the parade halls cost from Rs. 25 to Rs. 895. No less than four have cost over Rs. 500. The cost per man on the average has been Re. 1-11-4.

Supply of Act and Rules, &c.

The supply of the Act, and of the rules and orders passed under it, to members of panchayats and to rural policemen is a most important administrative necessity. Fortunately several private persons have come to our aid in this matter.

Sardars or dafars.

The question of the appointment of sardars over gangs of rural police has been discussed. The Inspector General of Police is in favour of this measure. No doubt if we had such officers we might reduce the burden of attendance at parade, and should perhaps have better supervision. On the other hand, we should do nothing which might impair the responsibility of the panchayats under section 41. Some experimental sardars have been appointed in all districts except Dacca.

Rounds.

We have complaints about rural policemen omitting to go their rounds. If panchayats would report men for neglect of duty in this respect they would be fined.

Boats are most necessary to enable the rural police to go their rounds during the rainy season.

General.

62. In my report for 1893 I described how Mr. Savage had employed his panchayats to collect information regarding the registration of landed titles. This has been a great success. Mr. Earle has made a similar experiment in Mymensingh, which has also proved a success. It is stated that the panchayats in this district afforded considerable assistance in starting night schools for Muhammadan cultivators.

In my letter No. 3672J., dated $\frac{10}{15}$th December 1893, I proposed to make our rural police unions with their committees, when they have been established on a sound footing, into unions under the Local Self-Government Act. This measure has been partially sanctioned in Government Resolution No. 3600L.S.G., dated 1st September 1894. Some duly constituted village authority, to whom we could look for information, and who would not only perform the police and other duties laid upon the panchayat by Act VI (B.C.) of 1870, but would also help us in carrying out sanitary measures, is a crying necessity. We want jungle cut, holes filled up, wells and tanks constructed. We want to prevent the noisome practice of throwing dead bodies into the rivers. Without a village authority we can do none of these things.

ARMS AND AMMUNITION.

63. A special report on this subject has been submitted with my No. 655J., dated 1st April 1895.

Licenses in Form VII.

The following table shows the number of licenses in Form VII to sell arms and ammunition as well as sulphur, compared with area and population:—

DISTRICT.	Area in square miles.	Population.	Number of licenses in Form VII.		Proportion of licenses to area.		Proportion of licenses to population.	
			1893.	1894.	1893.	1894.	1893.	1894.
1	2	3	4	5	6	7	8	9
					Square miles.	Square miles.	Persons.	Persons.
Dacca	2,707	2,420,656	5	5	1 to 559·4	1 to 559·4	1 to 484,131	1 to 484,131
Mymensingh	6,332	3,472,186	10	10	1 to 633·2	1 to 633·2	1 to 347,218	1 to 347,218
Faridpur	2,267	1,797,320	2	2	1 to 1,133·5	1 to 1,133·5	1 to 898,660	1 to 898,660
Backergunge	3,649	2,153,965	7	6	1 to 521·2	1 to 608·1	1 to 307,709	1 to 358,994
Total ...	15,045	9,844,127	24	23	1 to 626·8	1 to 654·1	1 to 410,171	1 to 428,005

The Magistrates of Dacca and Mymensingh consider the number of shops in their districts sufficient to meet the requirements of their people. In the latter district, however, one shop is wanted at Kishorganj. Compared with area and population, the facilities offered in the Faridpur district seem small in comparison with the other districts. Now that licenses can be renewed by applications at thanas, the Magistrate of Backergunge expects a demand for mufassal shops, and counts upon receiving several applications for new licenses.

Licenses in Form VIII.

64. The statement below shows the number of licenses in Form VIII, as compared with area and population.

DISTRICT.	Area in square miles.	Population.	Number of licenses in Form VIII.		Proportion of license to area.		Proportion of licenses to population.	
			1893.	1894.	1893.	1894.	1893.	1894.
1	2	3	4	5	6	7	8	9
					Square miles.	Square miles.	Persons.	Persons.
Dacca	2,797	2,420,656	4,293	4,573	1 to ·6	1 to ·6	1 to 563	1 to 529
Mymensingh . ..	6,332	3,472,186	3,413	4,050	1 to 1	1 to 1·5	1 to 1,017	1 to 857
Faridpur	2,267	1,797,320	1,071	1,080	1 to 2·1	1 to 2·09	1 to 1,678	1 to 1,664
Backergunge ...	3,649	2,153,965	1,561	1,587	1 to 2·3	1 to 2·3	1 to 1,379	1 to 1,357
Total ..	15,045	98,44,127	10,338	11,200	1 to 1·4	1 to 1·3	1 to 952	1 to 871

Though under the orders of Government licenses should be freely given, the number allowed in Dacca is, I think, too large. In the town of Dacca there is a license to 229 persons. This appears to me to be a very large allowance of licenses for a town.

The increase in Mymensingh is attributed to the fact that no license in this form was issued for more than one weapon. In Faridpur in 1893 permits to purchase guns were classed as licenses in Form VIII. In Backergunge licenses are more freely granted now that licensed guns are numbered.

The system of marking guns has now been introduced in all the districts of the Division. In Dacca, Mymensingh, and Backergunge, separate serial numbers are given for each thana, while in Faridpur the numbers are given for the whole district.

In my report for 1893 I said that the attention of the Magistrate had been drawn to the necessity of tracing out and accounting for arms the licenses for which are not renewed. This is now generally done.

Prosecutions.

65. There were 329 prosecutions under the Act, as compared with 174 in 1893. We have been generally more active in enforcing the provisions of the Act. In Backergunge in 1893 six persons, and in the year under report 24 persons, were sentenced to imprisonment for illegal possession, &c. Among the latter, three were sentenced to eighteen months, and six to one year's rigorous imprisonment. These sentences were inflicted on the ground of the prevalence of gun-shot homicide. In my letter No. 419J., dated 4th March 1895, I submitted a special report on the maladministration of the Arms Act in this district, in which I said that the sentence of one year and eighteen months' rigorous imprisonment, passed on persons accused of carrying or possessing unlicensed guns, appeared to me to be monstrous and unjustifiable in themselves, as wholly incommensurate to the offences committed, and from the point of view of administration inept in the last degree. The High Court have released some of these victims on revision, and the Lieutenant-Governor has released the others, saying at the same time that those orders are not to be understood as implying that His Honour thinks the sentences were excessive when given, or that it was not necessary to show extreme severity in order to inspire terror in the district, and that His Honour hopes that that result has been produced. As regards the terror I have no reliable information. As regards the use of arms in cases of murder, grievous hurt, riot and unlawful assembly, the figures are—

1892	...	37
1893	...	19
1894	...	24
1895 (up to 1st May)		26

I have received 17 special reports of gunshot murders up to date since January 1st.

Limits within which a licensed gun may be carried.

66. In 1889 Mr. Savage, then Magistrate of Backergunge, restricted the use of licensed guns to the village in which the licensee resides. In ignorance of this order, during my absence on deputation to the Patna Division, Mr. A. C. Tute, C.S., directed that ordinarily in the Backergunge district the privilege of carrying arms should be limited to the village in which the licensee resides. The other Magistrates of the Division were also requested either to carry out these directions *mutatis mutandis*, or to suggest any other plan more applicable to their districts. Accordingly the Magistrate of Dacca has restricted the licenses in his district to the licensees' villages (in case of the town of Dacca, to the town).

The enforcement of this restriction has caused some complaint in the Dacca district, and a question has been asked on the subject in Council. This restriction having proved so singularly ineffectual in the Backergunge district, where it has been in force for six years, I have said that if a man wants to use his gun outside the limits of his village, I do not see why he should not be allowed to do so. In Mymensingh licenses are still granted for the whole district, but in Faridpur the Magistrate has limited them within four miles of licensee's residence, or say to fifty villages.

67. The issue of the Government of India's rules under the Act, and of the Local Government's supplementary rules corrected up to date, has much facilitated the administration of the Act.

Persons killed by wild animals and snakes

68. I have submitted a special report, No. 567J., dated 25th March 1895, on the results of the measures adopted for the extermination of wild animals and the destruction of human and kine life caused by them.

Two hundred and seventy-three persons are reported to have been killed by wild animals in 1894, against 197 in the previous year.

Alligators are responsible for 168 deaths against 80 in 1893. These animals have been extraordinarily destructive in all districts of the Division. Rewards are only sanctioned for specially dangerous and destructive specimens haunting particular spots.

There have been 690 deaths from snake-bite against 865 in the previous year and 660 in 1892. There was no extraordinary flood, so deaths from snake-bite have come down to the normal figures.

Cattle killed by wild animals.

Two thousand and thirty-three cattle are reported to have been killed against 1,927 in the previous year, increase in Dacca and Mymensingh, decrease in Backergunge.

Wild animals destroyed.

Rewards were given for 71 wild animals destroyed, against 155 in the previous year. There is remarkable decrease in Mymensingh from 115 to 38, chiefly under heads leopards and tigers. People are more than ever careless about claiming rewards; 976 animals are reported to have been killed, for which no rewards were paid.

Rewards.

During the year a sum of Rs. 813-11 only was granted in rewards, against Rs. 1,492-12 in the previous year and Rs. 1,391 in 1892. No special rewards were paid. Though under the rules four annas can be given for any venomous snake wherever killed, such rewards are very sparingly granted. The following table shows the amount of such rewards paid in the last two years in each district:—

District.	Total number of snakes for which rewards were granted.		Total amounts of rewards granted.		Amount of rewards paid from municipal funds.		Amount of rewards paid outside municipalities.	
1	2	3	4	5	6	7	8	9
			Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.
Dacca	24	42	5 14 0	10 8 0	5 4 0	7 12 0	0 10 0	2 12 0
Mymensingh	23	19	5 12 0	4 4 0	...	4 0 0	5 12 0	0 1 0
Faridpur	106	70	49 0 0	15 15 0	41 0 0	14 7 0	8 0 0	1 8 0
Backergunge	43	83	10 11 0	20 0 0	7 10 0	17 12 0	3 1 0	2 4 0

In the face of these poor results I consulted Magistrates whether the rule should be maintained. Though the people are generally too well off to think of claiming rewards of four annas, and though they hardly want encouragement to kill venomous snakes, the Magistrates generally are in favour of maintaining the rule.

As no deaths of men or cattle were ever caused in the Faridpur district by wolves and hyenas, I made enquiries regarding them in the other three districts. In Mymensingh these animals had been very destructive in previous years; in Dacca and Backergunge less so. They are now reported non-existent in any of these districts.

Clearance of jungle.

The Municipal Commissioners have generally taken measures for the clearance of jungle within municipal limits. In Dacca and Backergunge the District and the Local Boards did something in this direction. The Magistrate of Mymensingh states that until some local agency is available nothing practicable can be done in this direction. But surely our panchayats and rural police as reorganized will be exactly such an agency.

Shooting parties.

In Mymensingh Raja Surja Kanta Acherjee, Bahadur, organized two shooting parties and bagged six tigers and two leopards. Parties arranged by Babu Jagat Kishore Acherjee also killed four tigers and 12 leopards.

XV.—CRIMINAL JUSTICE.

69. I devote a good deal of space to this subject, because, though the supervision of the Criminal Courts other than Sessions Courts is one of my most important duties, the annual reports on the working of those courts are not submitted through me, nor, except in this report, have I any opportunity of recording the results of my supervision and inspection.

The following statement shows the criminal judicial work under the Penal Code at each subdivision, extracted from the High Court's Annual Statement No. 2:—

District.	Name of subdivision.	Population.	Number of cases. — Offences reported.	Complaints dismissed under section 203, Criminal Procedure Code.	Other cases struck off as false.	Balance returned as true.	Brought to trial during the year.	Number of persons— Under trial during the year.	Acquitted or discharged.	Convicted.	Died, escaped, or transferred.	Remaining under trial at close of the year.	Number of persons to a case reported.	Number of persons to a person brought to trial.	Percentage of convictions to number of persons tried (column 11 to total of columns 10 and 11).
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16

	Karimganj	381,638	1,493	245	200	1,048	604	1,178	593	532	4	49	257	636	47·3
	Sunamganj	413,381	1,329	165	48	1,116	720	1,323	581	722	3	17	311	574	55·4

Mymensingh Sadar is far the heaviest subdivision in my division absolutely. Madaripur, Jamalpur, Dacca Sadar, and Munshiganj come next *longo*

intervello. Madaripur includes the quasi-subdivision of Gopalganj (since abolished), and in the Jamalpur subdivision the Bench at Sherpur receives complaints. Of the Sylhet subdivisions, only Habiganj compares with these. There is always a second officer there, I understand.

Compared with population, Mymensingh Sadar and Jamalpur are far ahead. Munshiganj and Madaripur run them close.

With regard to the small number of cases which came to trial at Bhola out of the number returned as true, the Magistrate, Mr. LeMesurier, writes:—"This is due to numerous complaints of wrongful confinement, hurt, and other compoundable offences which are at once reported owing to the good road communication of the subdivision, but are subsequently settled out of court when the complainant's anger cools down."

The contrast between different subdivisions is most interesting, *e.g.*, between Madaripur and Goalundo.

The percentage of convictions should depend to some extent on the proportion of cases brought to trial to cases declared to be true, and on the proportion of cases summarily dismissed. I give these proportions for the three subdivisions which have the highest and for the three which have the lowest percentage of conviction:—

NAME OF SUB-DIVISION.	Proportion of cases dismissed under section 203 to cases reported.	Proportion of cases tried to cases returned as true.
1	2	3
Faridpur Sadar ...	17·0	62·2
Madaripur ...	24·4	66·8
Patuakhali ...	20·9	60·8
Munshiganj ...	26·3	51·8
Pirozpur ...	28·5	56·5
Tangail ...	21·9	43·2

On the whole 25·5 per cent. of cases reported were dismissed under section 203. It must be remembered that cognizable cases refused enquiry, or reported on by the police and not proceeded with, are not included in this column. Adding these the percentage is 33·1. The Jamalpur subdivision has the highest and the Goalundo subdivision the lowest percentage.

On the whole 55·8 per cent. of cases returned as true came to trial. The highest percentage is in the subdivision of Madaripur, the lowest (Bhola being left out of account) in Tangail.

The percentage of cases struck off as false has risen from 2·0 in 1893 to 3·5 in 1894. The percentage was highest in Tangail 6·8, and Netrakona 6·0, and lowest in Faridpur Sadar and Patuakhali, being only ·9. The percentage in Dacca Sadar has risen from 1·4 in 1893 to 4 in 1894. The Magistrate, Mr. Faulder, says that much more attention is now given to the question how a case is to be entered which does not end in conviction. The percentage was also low in the following subdivisions:—

1.	Bhola	1·4	3.	Madaripur ...	1·7
2.	Munshiganj ...	1·6	4.	Pirojpur ...	1·9

The number of cases reported false by the police was 864, and the number declared false under the Penal Code was 1,209.

In inspecting criminal courts, I impress upon Magistrates the importance of passing clear orders on each case, showing how it is to be entered in the returns. In the face of the above figures, it is impossible to believe that the same principles are adopted in this matter in all subdivisions.

70. Though Penal Code business is far the most important and occupies more time, the business under Chapter VIII of the Code of Criminal Procedure is very heavy in some of the subdivisions:—

District.	Name of subdivision.	Population.	Number of cases.				Number of persons.						Number of persons to a case reported.	Number of persons to a person brought to trial.	Percentage of convictions to number of persons tried (column 11 to total of columns 10 and 11).
			Offences reported.	Complaints dismissed under section 203, Criminal Procedure Code.	Other cases struck off as false.	Balance returned as true.	Brought to trial during the year.	Under trial during the year.	Acquitted or discharged.	Convicted.	Died, escaped or transferred.	Remaining under trial at the close of the year.			
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16
Dacca	Sadar ...	790,936	143	39	1	103	95	358	161	186	...	11	5,531	2,209	53·6
	Narayanganj	574,516	132	92	...	40	39	96	43	45	...	8	435	5,984	51·1

Here Madaripur takes a long lead of the other heavy subdivisions, except Mymensingh Sadar. Backergunge subdivisions, except Bhola, though not conspicuous in the Penal Code table, here approach their neighbour Madaripur.

These cases do not occupy much time where, as at Madaripur, accused consent to be bound down. There has been increase in Mymensingh. The Magistrate, Mr. Earle, writes:—"Neither the police nor the Magistrates in former days seemed to understand that it was their duty to prevent offences involving violence; but I have succeeded in some measure, in the year under review, in initiating a change in this respect."

The number of cases returned as true in the Backergunge district is 1,175 against 1,165 in 1893 and 1,603 in 1892.

In paragraph 35 above it will be seen that on the whole 75·9 per cent. of the business under Chapter VIII is preventive of riots. Cases under this chapter cannot be dismissed under section 203.

71. The following statement shows the Criminal Courts' business under Acts other than the Penal Code and chapter VIII of the Code of Criminal Procedure:—

District.	Name of subdivision.	Population.	Number of cases. — Offences reported.	Complaints dismissed under section 203, Criminal Procedure Code.	Other cases struck of as false.	Balance returned as true.	Brought to trial during the year.	Number of persons— Under trial during the year.	Acquitted or discharged.	Convicted.	Died, escaped or transferred.	Remaining under trial at close of the year.	Number of persons to a case reported.	Number of persons to a person brought to trial.	Percentage of conviction to number of persons tried (column 11 to total of columns 10 and 11).

Here Dacca Sadar with its large town takes a long lead. Among the heavy subdivisions, Madaripur, Mymensingh Sadar, and Jamalpur take good places, while Munshiganj, as under chapter VIII of the Code of Criminal Procedure, is near the bottom. It is difficult to understand how the percentage of convictions in this category can drop below 50 in Munshiganj and Manikganj.

Taking all these tables, it is clear that Madaripur, now that the quasi-subdivision of Gopalganj has been abolished, must have a second officer. Jamalpur also seems to require one, though here benches do a good deal of work.

72. The following statement shows the appellate and revisional work district by district of Sessions Judges and District Magistrates:—

District.	Court.	Number of persons whose applications were heard. — Revisions.	Appeals.	Number of persons whose applications were rejected or sentence confirmed. — Revisions.	Appeals.	Ratio per cent. of column 4 to column 3. — Revisions.	Appeals.	Number of cases preferred. — Revisions.	Appeals.
1	2	3	4	5	6	7	8	9	10
Dacca	Judge ...	207	550	161	421	77·7	76·5	90	386

	Magistrate ...	243	91	162	75	66·6	82·4	75	98

(a) Dacca.	By Magistrate	592	442
Do.	By Deputy Magistrate	50	37
	Total ...	642	459
(b) Mymensingh.	By Magistrate	286	246
Ditto.	By Deputy Magistrate	153	95
Ditto.	By Joint-Magistrate	55	36
	Total ...	494	377

Both the appellate and revisional work of the Dacca district is heavy. Since September 1894 the Magistrate has been relieved of much of the appellate work, senior Deputy Magistrate Babu Okhoy Kumar Sen having been invested with powers to hear appeals from the orders of Magistrates of the second and third class. Babu Ganga Narain Ray, senior Deputy Magistrate of Mymensingh, was invested with appellate powers in May 1894. The Magistrate of Faridpur seems to require similar assistance. I intended to relieve the District Magistrate of appeals from the sadar subdivision only, but the relief has been made general. I think the District Magistrate should take up appeals from outlying subdivisions from time to time.

Appellate work before both the Judge and Magistrate and the revisional work before the Magistrate in Mymensingh has declined. The increase in revisional work before the Judge and decrease before the Magistrate is due, Mr. Earle says, "to the fact that I am not so inclined to allow applications as the Judge." There is a choice of remedies against an order of a first class Magistrate.

In both the Courts in Faridpur the appellate work increased and the revisional work decreased.

The Magistrate of Backergunge has very little appellate work, because his benches have first class powers, and stipendiaries with second and third class powers do little criminal judicial work.

Column 5 is interesting. Either the Judges or the first class Magistrates of Mymensingh and Faridpur must differ widely in their views, as to the evidence necessary to support a conviction, from those of Dacca and Backergunge, that is, the high percentage of confirmation in the latter districts as compared with the former must be due either to some difference in the first class Magistrates or to some difference in the Judges. The Mymensingh Judge's percentage, 45·7, under revision is also very low. The Dacca Magistrate's percentage under appeals has risen from 58·9 to 71·4, and under revision from 46·5 to 65·1, though the Magistrate was only changed in July.

73. The following statement compiled from the High Court's Annual Statement 4 shows the duration of cases in the different classes of courts in each subdivision in 1893 and 1894:—

District.	Subdivision.	Honorary Magistrate sitting singly.				Stipendiary Magistrates.				Benches of Magistrates.		District Magistrate under ordinary powers.	
		2nd and 3rd class.		1st class.		2nd and 3rd class.		1st class.					
		1893.	1894.	1893.	1894.	1893.	1894.	1893.	1894.	1893.	1894.	1893.	1894.
1	2	3	4	5	6	7	8	9	10	11	12	13	14

	Netrakona	7·8	8·21	...	...	11·5	8·23	18·4	15·39	9·5	10·1	...	...
Faridpur	Sadar	...	...	...	8·8	4·7	12·1	12·9	10·2	12·6	12·8	3·8	4
	Goalundo	2	1	...	...	...	..	7·8	7·4	6·2	5·8	...	...
	Madaripur	...	8	...	...	10·5	8·8	4 2	3·1	11·8	13·	...	...
Backergunge.	Sadar	...	3	...	...	7	12·8	16 6	10·7	10·0	18·8	4	2·6
	Pirojpur	16·8	16·7	...	..	4·4	11·4	8·2	12·6	10·2	11·9	...	...
	Patuakhali	...	...	...	...	..	4·8	15·8	11·8	6·5	5·1	...	...
	Bhola	...	...	...	...	3·1	...	3·1	4·3	1	3·4	...	...

Benches in Narayanganj, Munshiganj, Barisal Sadar, Tangail, Manikganj, and Jamalpur show worse than last year. Those at Netrakona, Madaripur, and Pirojpur have not improved. Among Stipendiary Magistrates, Munshiganj, Narayanganj, and Faridpur Sadar are distinctly bad, while Kishorganj, Munshiganj and Pirojpur are better than in the previous year. Backergunge Sadar, Patuakhali, and Mymensingh Sadar have much improved. Considering the work, the result at Madaripur is wonderful. Goalundo and Bhola are very light subdivisions, and therefore of course give good results. Except Tangail, Mymensingh subdivisions do badly.

The percentage of A form cases decided on first and second hearing was 41 in Dacca, 42 in Mymensingh, 51 in Faridpur, and 42 in Backergunge. For the Division it is 44, as last year.

Detention of witnesses.

74. The ratio of witnesses detained over two days was, as in the previous year, highest in the Mymensingh district. I see this district comes out badly for detention in hajat in the Jail Report. Detention is endemic at Tangail. Babus Dwarka Nath Bose, Sub-Deputy Collector; Shib Chandra Nag, Subdivisional Officer; Gogan Chandra Das, Subdivisional Officer—all of that place—have a high percentage. Kali Prosad Chatterjee, Sub-Deputy Magistrate; S. K. Agasti, Joint-Magistrate; C. A. Radice, Joint-Magistrate; Kailash Govindo Das, Deputy Magistrate; and Babu Banka Behari Bakshi, are also distinguished. The detention was lowest before Babus Baroda Kanta Ganguli, Nikhil Nath Roy, Upendra Chandra Mazumdar, Rajoni Nath Chatterjee, and Maulvi Fuzlal Karim. Though their work is on the whole much lighter, Magistrates at head-quarters are less prompt in the discharge of witnesses than the Magistrates at subdivisions. The bar at head-quarters being as a rule better than that at subdivisions, a different result might have been anticipated. There was no detention before the Subdivisional Officer of Bhola.

75. Mymensingh Sadar, which is the heaviest subdivision generally in the matter of criminal justice, as usual gives the largest income from fines. Madaripur and Jamalpur come next. Only these three subdivisions run into double figures of thousands. I regret to find that the balances have increased in all the subdivisions of the Backergunge district. They have also increased in the Madaripur, Tangail, and Kishorganj subdivisions. The balance in Dacca Sadar is enormous. Magistrates have been authorised to remit fines in Government No. 4261, dated 13th November 1894. Formerly balances were partly due to delay in obtaining Commissioner's sanction to remission.

76. The following statement shows the number of prosecutions in false cases and the result of those prosecutions:—

District.	Cases declared false.		Number of false cases in which prosecutions were instituted.		Number of cases in which conviction was obtained.		Number of persons convicted.		Percentage of Prosecutions to cases.		Percentage of Convictions to prosecutions.	
	1893.	1894.	1893.	1894	1893.	1894.	1893.	1894.	1893.	1894.	1893.	1894.
1	2	3	4	5	6	7	8	9	10	11	12	13
Dacca	145	263	15	12	7	2	7	2	10·3	4·5	46·6	16·6
Mymensingh ...	377	497	20	26	5	6	5	64	5·3	5·2	25·	23·07
Faridpur	92	144	27	42	14	10	14	10	29·3	29·1	51 8	23·8
Backergunge ...	57	121	9	19	2	2	2	2	15·7	15 7	22·2	10·5
Total ...	671	1,025	71	99	28	20	28	78	10·5	9·6	39·4	20·2

Only in Faridpur is there apparently a fair proportion of prosecutions. The Magistrate, Mr. Herald, writes that preliminary enquiry was held into every case declared false, and says that it is difficult to get Deputy Magistrates to treat as false complaints founded on some slight substratum of grievance. Mr. Savage's view was that such cases should not be declared false. The present Magistrate of Backergunge complains of the difficulty of getting convictions in cases which are declared false by Subdivisional Officers and which are transferred to the district head-quarters for trial. This I noted last year as a great obstacle to prosecutions.

77. Sessions work does not increase, which supports my view that there is no real increase in crime. The proportion of conviction in Mymensingh is still very low, and points to some anomaly. Mr. Faulder, Magistrate of Dacca, writes that the result would have been very satisfactory but for the breakdown of a fiercely contested case of riot with arson, in which 19 persons were committed.

78. The following statement extracted from Part IV of the High Court's Annual Statement 5-A shows the extent to which the punishment of whipping is resorted to in the different subdivisions of this Division:—

Punishments.		Number.																
		Dacca.				Mymensingh.					Faridpur.			Backergunge.				
		Sadar.	Narayanganj.	Munshiganj.	Manikganj.	Sadar.	Tangail	Jamalpur.	Kishorganj.	Netrakona.	Sadar.	Goalundo.	Madaripur.	Sadar.	Pirojpur.	Patuakhali.	Bhola.
1		2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17
1. Total number of whippings awarded.	1893	21	13	9	8	18	10	17	5	4	18	44	19	10	19	4	1
	1894	29	23	19	16	20	24	11	31	16	17	56	26	12	17	18	23
2. Total number of other punishments in cases in which whipping might have been inflicted.	1893	350	127	118	130	175	85	79	66	131	180	156	132	137	13	44	26
	1894	850	148	153	128	125	78	98	99	51	279	81	397	105	36	40	19
3. Total number of all punishments in cases in which whipping might have been awarded (total of headings 1 and 2.	1893	371	140	127	138	193	95	96	71	135	198	200	151	147	32	48	27
	1894	879	171	172	144	145	102	109	130	67	296	137	423	117	54	57	42
4. Percentage of whipping on total number of all punishments (percentage of heading 1 on heading 3).	1893	5·6	9·2	7·0	5·7	9·3	10·5	17·7	7·04	2·9	9·09	22·	12·5	6·8	59·3	8·3	3·7
	1894	3·2	13·4	11·04	11·1	16·	23·5	10·09	40·3	23·88	5·7	40·8	6·1	10·2	36·3	20·5	54·7

I cannot help suspecting that the figures in heading 2 for Netrakona, Goalundo, and the Backergunge subdivisions are wrong. The increase under this heading in Dacca, Sadar, and Madaripur is curious.

79. According to High Court's Annual Statement I, the receipts of criminal courts exceed the charges in all subdivisions except Goalundo. The receipts from that fine subdivision Madaripur are larger than from the Faridpur Sadar subdivision and nearly as large as from the Dacca Sadar subdivision. The 12 outside subdivisions produce a surplus of Rs. 45,101; the four head-quarter subdivisions a deficit of Rs. 65,476. But this is owing to one-half the salary of the Magistrate of the district being debited to Criminal Courts, which is manifestly unfair.

The normal establishment of Magistrates outside of special officers for each district was sanctioned by Government in 1881, and revised in 1889.

Since that year the work on the criminal judicial side alone has increased 53 per cent. The number of offences reported in 1889 was 29,793; it was 45,602 in 1894. And in other departments there has also been an increase.

Magistrates have complained that Judges will not allow them to look at records for other than judicial purposes. Magistrates often want to look at records, especially when the Judge impugns the conduct of the police.

I have been surprised to find that no accommodation is provided for parties and witnesses in connection with our offices and courts. In this wet climate such accommodation is much required. It is provided in the adjoining district of Sylhet.

Process-serving.

Criminal process-serving was amalgamated with revenue process-serving from January 1st, 1893. We have at length adopted the same definition of "process" on both sides. Much remains to be done. The rules both for process-serving on foot and for process-serving by boats should be the same on both sides. Boat hire should be, like process fees, a fixed charge. The chief advantages of the amalgamation scheme have been:—(a) Abolition of the temporary peons without corresponding increase in the number of permanent peons, and consequent reduction in cost. (b) Appointment of extra baxis and naib nazirs. Baxis to assist the nazir,

who is usually also treasurer, were much wanted at subdivisions. (c) Exemption of Court Sub-Inspectors from doing the duties of criminal court nazirs except as regards warrants. The general result is that while the cost remains much the same, very much more work is done. Had the old separate system continued, the increase in work must have involved extra cost.

80. Next to the reorganization of the rural police, the development of the gratuitous administration of criminal justice is the most important subject at present engaging my attention and that of my subordinates. I need not therefore offer any excuse if I treat the subject in some detail.

Honorary Magistrates.

No new Bench of Honorary Magistrates has been established, yet the number of nominal benches has increased from 40 to 57. This simply means that 17 gentlemen have been authorized to sit singly. But though there are nominally 57 benches, there are really only benches at 28 places, of which 16 are head-quarters of districts and subdivisions. As the independent Honorary Magistrate at Raipura in the Narayanganj subdivision of the Dacca district does no work, I have not included him as a bench.

The following table shows the work done by the Honorary Magistrates in 1893 and 1894:—

District.		Number of cases disposed of.		Number of persons disposed of.		Number of persons convicted.		Number of persons acquitted.	
		1893.	1894.	1893.	1894.	1893.	1894.	1893.	1894.
1		2	3	4	5	6	7	8	9
Dacca ...	Sadar	375	1,347	465	1,454	334	1,234	131	220
	Munshiganj ..	513	474	617	589	210	137	407	462
	Manikanj	548	507	613	598	212	253	401	345
	Narayanganj ...	248	271	280	363	151	170	129	193
Mymensingh	Sadar	402	577	468	661	283	354	185	307
	Netrakona	317	211	375	257	180	110	195	147
	Jamalpur	611	780	676	895	384	545	292	350
	Kishorganj ...	402	497	445	605	220	290	225	316
	Tangail	78	188	108	237	50	75	58	159

	Pirojpur	306	374	369	648	154	298	214	350
	Patuakhali ...	15	75	16	79	12	30	4	49
	Bhola	1	23	1	24	1	16	..	8
Total ...		5,453	6,978	6,355	8,625	3,353	4,828	3,002	3,796

The number of cases disposed of has increased by 27·9 per cent., and the number of persons by 35·7 per cent. This is fairly good for one year, but it is sad to find an actual decrease in Faridpur. This is largely due to the absence on leave of the Goalundo Ghât Magistrate, but also to Madaripur, where the number of cases disposed of has fallen by 30·0 per cent. It is said petty cases are no longer available for benches' apprentice hands. The Magistrate, Mr. Herald writes:—"Leaving aside municipal and nuisance cases, the trial of which consists simply of confession and sentence, the number of cases disposed of by benches has really increased almost double those of last year, taking time occupied into account." Dacca, with an increase of 54 per cent., does best; but this is wholly due to Dacca town, where the bench has been made much more use of than in former years. Backergunge shows great progress, but this district is still much behind hand compared with other districts. Out of 22,618 cases disposed of in the Division, the Honorary Magistrates disposed of 6,978 or 30·8 per cent, against 24·7 per cent. in 1893. This is also fair progress.

The percentage of convictions, only 55·9, though a better result than the past year (52·7), is still much below what Stipendiary Magistrates attain to with cases of a similar class. The benches at the head-quarters of districts all sit daily. So they do at the head-quarters of the Munshiganj, Tangail, Kishorganj, and Pirojpur subdivisions. It is said the benches at Bhagyakul, Teota, and Balla in the Dacca district also sit daily, but this must be a very nominal sitting. Six sit four days and six two days a week. The remainder sit one day a week. The permanent roster system has been adopted in all districts except Dacca. The under-study system is also now generally in vogue, that is, one member who

lives handy is not included in the permanent roster, but stands by to take the place of any absent member. Generally rosters provide for the attendance of two members only (two members form a quorum), but in Backergunge three members are arranged, so that work can proceed even if one member does not attend.

I regret to say that I have still to complain that Stipendiaries have been allowed to take the bread out of the mouths of the Honoraries.

The court accommodation for Honorary Magistrates has improved since I called attention to the subject, and in my Division I hope there is now little to complain of on this score. But in the Patna Division I found Honorary Magistrates relegated to very mean court-rooms.

81. The Magistrate of Dacca, Mr. Faulder, writes:—"The Honorary Magistrates have given me much assistance. I particularly noticed one feature in their punishments, which is not found in the case of Stipendiary Magistrates. The fines are always paid down and hardly any remain outstanding. This is probably due to the local knowledge which prevents them from inflicting fines inconsistent with the means of the accused."

The Magistrate of Backergunge, Mr. LeMesurier, writes:—"I may now say that all suitable cases are as a rule made over to them. One class of cases has been largely made over to benches with very great success, viz., proceedings to keep the peace under section 107, Criminal Procedure Code. Benches are also, I think, well qualified to deal with matrimonial cases.

Attendance.

82. The attendance of Honorary Magistrates has been generally good. The Magistrate of Mymensingh, Mr. Earle, says that in spite of his permanent roster and other measures, some of the Honorary Magistrates preferred their own to the public convenience. He suggests that Honorary Magistrates should be appointed for a term of one year, with promise of re-appointment if they attend regularly. The present practice of making such Magistrates as do not attend resign comes to the same thing in the end, but is decidedly a less gentle method. Honorary Magistrates before appointment are called on to state how many attendances they are prepared to give.

The following statement shows on how many days the benches should have sat and on how many days they failed:—

DISTRICT.	Name of Bench.	Number of days the Bench should have been held.	Number of days the Bench was held.	Number of days the Bench failed.	Percentage of column 5 on column 3.
1	2	3	4	5	6
Mymensingh ...	Sadar	274	231	43	15 6
	Tangail	209	186	23	11·
	Netrakona	174	156	18	10·3
	Jamalpur	236	200	36	15·2
	Sherpur	121	121	...	...
	Kishorganj	146	135	11	7·5
	Bazitpur	96	82	14	14·5
	Total ...	1,256	1,111	145	11·5
Faridpur ...	Sadar	226	212	14	6·1
	Bhanga	102	102	..	...
	Madaripur	174	89	85	48·8
	Palong	95	81	14	14·7
	Goalundo	78	71	7	9
	Total ..	675	555	120	17·7
Backergunge ...	Sadar	168	167	1	·6
	Pirojpur	222	243*	...	...
	Patuakhali	37	32	5	13·5
	Jhalakati	44	41	3	6·8
	Total ...	471	483	9	1·9

* The Bench sat more days than required to dispose of pending cases.

The Mymensingh percentage of failure, 11·5, is fair. Sherpur figures must be considered doubtful. Faridpur, 17·7, is not so good, but this is entirely owing to Madaripur, where the Subdivisional Officer, great as he is in many things, fails in his management of his bench. Except Madaripur, the percentage is 6·9. Backergunge does far the best, probably because there three Magistrates are called, though only two are wanted. Dacca has been unable to supply this interesting return.

83. Nine of the twelve mufassal benches are allowed muharrirs. These gentlemen have a very easy time, as only two of these benches sit daily, two four times a week, two twice, three only sit one day in the week. At head-quarters stations the Magistrates' establishments are large, and a muharrir can be found for a bench even when it sits daily. But at subdivisions, where the bench sits daily or four days a week, the difficulty of providing muharrirs is very great, as the subdivisional establishment is much over-worked. As the benches' work is often largely municipal, and as the municipalities are under existing rules often obliged to entertain larger establishments than they require, it has been suggested that the municipal clerks shall do the benches' work.

84. Three-hundred and forty-eight appeals were preferred against the orders of the Honorary Magistrates. In 240 cases the orders were confirmed. In 108 cases the orders were set aside and modified; 14,925 witnesses were examined in 6,978 cases, or 2·1 per case. Of these, 1,288, or 8·6 per cent., were detained more than two days.

85. Though I reckon myself fairly liberal and progressive in the matter of Honorary Magistrates, some of my District Officers go beyond me. I am pressed to give benches first class powers and power to receive complaints. But so far I prefer that appeals from benches shall go to the District Magistrate, and I am afraid that complaints will not be properly sifted by officers who are not overworked. Except for cases under section 107, Code of Criminal Procedure, benches do not require first class powers. I wish to draw attention to the valuable assistance lent to the administration by those Rural Sub-Registrars who are acting as Honorary Magistrates.

XVI.—REGISTRATION OF DOCUMENTS.

86. The statement below shows the working of the Registration Department during the years 1893-94 and 1894-95:—

DISTRICTS.	Number of deeds registered in 1893-94.	Number of deeds registered in 1894-95.	1893-94.		1894-95.	
			Receipts.	Expenditure.	Receipts.	Expenditure.
1	2	3	4	5	6	7
			Rs.	Rs.	Rs.	Rs.
Dacca	34,925	37,316	46,822	23,247	46,328	23,506
Mymensingh ...	51,338	56,564	55,652	29,601	61,052	32,513
Faridpur	40,427	38,966	36,493	23,417	32,312	23,436
Backergunge ...	78,634	69,429	82,898	39,184	66,005	37,082
Total ...	205,324	201,275	221,865	115,449	205,697	116,537

Here again the fact that the year has not been a prosperous one in the southern districts comes out. As stated before, the first half-year was the end of a lean time. In Backergunge it is thought the low price of rice in the last half year kept people away from the registration offices.

The increase in Mymensingh is due to leases. In Dacca it is in leases and mortgages.

The net revenue is decreasing. In 1892-93 it was Rs. 1,22,348; in 1893-94, Rs. 1,06,419; in 1894-95, Rs. 89,160. The reduction of the fees for documents, the value of which does not exceed Rs. 50, from 12 annas to 8 annas, which came into force from 1st July 1893, is stated to have reduced receipts. It should have attracted more documents, and will probably do so in the long run.

There has been an increase in the number of operations under Act I (B C.) of 1876, voluntary registration of Muhammadan marriages, in Dacca, Faridpur and Mymensingh. Although a new Muhammadan marriage registration office was established in 1893-94 at Sarupkati in the district of Backergunge, there has been a decrease in registration of marriages in this district. The failure of this Act is so complete that I am thinking of registering marriages as we do births and deaths.

XVII.—CONDITION OF THE DIVISION AS REGARDS LAND AND LAND REVENUE ADMINISTRATION (INCLUDING CESSES).

87. The total number of estates in the Division was 27,099 against 26,052 in 1893-94. The increase of 1,047 estates is due chiefly to partitions.

The following statement shows the current and arrear demands, collections, and balances of the different classes of estates in each district:—

District.	Estates.	Demand.			Collection.			Remission.	Balance.		
		Current.	Arrear.	Total.	Current.	Arrear.	Total.		Current.	Arrear	Total.
1	2	3	4	5	6	7	8	9	10	11	12
		Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Dacca ...	9,350	4,99,592	24,728	5,24,320	4,80,401	19,793	5,00,194	1,213	19,101	3,722	22,913
Mymensingh ...	8,185	8,57,880	7,854	8,65,734	8,52,448	7,097	8,60,145	124	5,432	33	5,465
Faridpur ...	5,966	5,71,503	56,598	6,28,101	5,34,728	47,034	5,81,762	2,486	36,720	7,133	43,853
Backergunge ..	3,598	15,82,492	63,828	16,46,320	15,29,111	51,762	15,80,873	7,584	40,727	8,136	57,863
Total ...	27,099	35,11,467	1,53,008	36,64,475	33,96,688	1,26,286	35,22,974	11,407	1,11,070	19,024	1,30,094
Total 1893-94 ...	26,052	34,86,956	1,57,3[illegible]6	36,44,262	33,70,785	1,04,14[illegible]	34,74,930	32,448	1,15,724	21,160	1,36,884

The collections have increased by Rs. 48,044, and the balances have been reduced by Rs 6,790. The result is not good when it is considered that the last half of the year has been prosperous even for this prosperous country, while 1893-94 was one of the worst years on record. The percentages of total collections on total demand have been—

	1893-94.	1894-95.
Dacca	95·44	95·39
Mymensingh	98·04	99·35
Faridpur	89 97	92·62
Backergunge	95·91	96·02
Divisional	95·30	96·10

Dacca stands fast at 95·40 or so. The Mymensingh percentage is very good. Faridpur is still our worst district, but has improved.

88. The current demand has increased by Rs. 24,511. The increase is mainly in class III, and is due almost entirely to Backergunge, Rs. 19,902. Some estates in this district have been transferred to this class from classes I and II, and some estates have been resettled at an enhanced jama. In Faridpur the increase, Rs. 2,257, is due principally to the Kalkini estates, the collections of which are now being made at the enhanced jama.

Current demand.

89. The following table shows the percentages of current collection on current demand under each class in each district:—

Current collection.

District.	Class I—Permanently-settled estates.		Class II—Temporarily settled estates. (a) Settled for periods with proprietors.		(b) Private estates leased to farmers for periods.		(c) Government estates leased to farmers for periods.		Class III—Estates directly managed. (a) Those managed for proprietors.		(b) Those owned by Government as proprietors.	
	1893-94.	1894-95.	1893-94.	1894-95.	1893-94.	1894-95.	1893-94.	1894-95.	1893-94.	1894-95.	1893-94.	1894-95.
1	2	3	4	5	6	7	8	9	10	11	12	13
Dacca	99·10	98·6	85·70	92·94	48·71	51·35	54·34	51·88	63·66	67·61	88·81	80·63
Mymensingh	99·62	99·67	99·88	99·83	93·15	94·50	69·86	78·87	99·39	98·70	99·65	98·63
Faridpur	96·84	97·01	89·01	94·37	30·97	38·70	46·19	51·18	79·12	89·59	83·90	76·03
Backergunge	99·34	99·46	95·25	93·93	96·17	93·84	73·72	71·80	90·02	92·94	94·76	93·16

In Faridpur if the sum of Rs. 10,000 remitted by remittance transfer receipts could have been credited within the year, the collection in class I would be nearly cent. per cent.

In class II (*a*) Backergunge comes out badly; the result in Dacca is better than that in 1893-94, though the standard percentage of 95 per cent. has not been attained.

In class II (*b*) the contrast between Mymensingh and Backergunge on the one hand, and Dacca and Faridpur on the other, is very striking. The Collectors of the latter districts complain that farmers are habitually recusant. I can hardly believe that farmers are more recusant in the southern and northern than in the middle tracts. Further, it is a Collector's business in life to overcome recusancy. Faridpur is rising from the abyss.

In class II (*c*) the contrast between central and outlying tracts is the same, though not so marked. Improvement in Mymensingh is noticeable, and even Faridpur, though very bad, is not so bad as in the previous year. The results are sufficient condemnation of the farming system.

In class III (*a*) Faridpur shows great improvement. The standard percentage of 90 has not been reached by a small deficit. This is solely due to bad collection in the Kalkini estates. Dacca is getting worse. Backergunge percentage is a great performance when the large revenue is considered.

In class III (*b*) Mymensingh and Backergunge give good results, Backergunge especially. In Dacca raiyats were allowed to defer payment on the excuse that they objected to the rates. The Collector of Faridpur offers the following apology:—"A large sum of Rs. 5,239 is under suspension. The amount will have to be remitted, as the neighbouring zamindars have virtually dispossessed Government. Even deducting this sum, the collections are bad owing to the leniency shown to the raiyats during the last two years. They have got into a habit of deferring payments, which will not be corrected unless compulsory measures are at once adopted."

With regard to the low percentage of collections from estates farmed, &c., that pay direct into the treasury, the Collector of Backergunge states that of a total demand of Rs. 1,77,950, no less than Rs. 1,33,020 falls due according to the settlement douls on the first day of January, February, March; and that, under clause (2), section 5 of the Certificate Act, no steps are taken to realize these dues until after the last day of payment, March 28th. Under these circumstances, compulsory steps within the year are impossible. This arrangement is indeed a fatuous one.

Estates under direct management.

90. The total number of estates under direct management during the year, as shown in Return XLI, was 737 with an annual revenue of Rs. 5,63,504, against 719 estates with a revenue of Rs. 5,42,781 in 1893-94. There was an increase in the number of estates as well as in the revenue demand in all districts except Mymensingh, where one Government estate has been let in farm. On the whole, there was a net increase of 18 estates and of Rs. 20,723 in the revenue, chiefly by assessment of new lands and new estates, and by transferring estates from classes I and II. The revenue of estates under direct management in

Backergunge is Rs. 4,36,958, but of this only Rs. 1,74,546 is levied from the raiyats; the rest comes from tenure-holders.

91. As required by Government order No. 3502, dated 19th October 1894, particulars of the amounts expended on improvements in estates managed direct are given below:—

District.	Amount assigned.			Amount expended from—		
	Miscellaneous improvements including agriculture.	Sanitation.	Agricultural public works.	Seven and a half per cent. miscellaneous improvements including agriculture.	Two per cent. for sanitary improvements.	Grant for agricultural public works.
1	2	3	4	5	6	7
Dacca ...	238	752	...	238	752	...
Mymensingh ...	158	584	200	158	50	...
Faridpur ...	680	1,280	...	680	728	...
Backergunge ...	5,000	7,800	4,000	4,914	6,962	995
Total ...	6,076	10,366	4,200	5,990	8,492	995

The following table shows the nature of the work on which the amounts were expended:—

District.	Amount expended.							Total.
	In digging tanks and sinking wells for drinking water.	On drainage and embankments.	On roads, khals and bridges.	On improvements of market and hât.	In construction and repairing tahsil cutcherries and raising their land.	On sundry work.	Excavation of a khal out of grant for agricultural public works.	
1	2	3	4	5	6	7	8	9
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Dacca ...	...	752	77	84	75	2	...	990
Mymensingh ...	...	...	...	...	158	50	...	208
Faridpur ...	728	...	...	380	220	80	...	1,408
Backergunge ...	6,962	238	899	76	1,795	1,906	995	12,871
Total ...	7,690	990	976	540	2,248	2,038	995	15,477

It will be seen that Dacca spent the entire allotment. In the town of Dacca, for the Government estate Uari, we have received from 1889-90 to 1894-95 Rs. 2,781, and have spent on it about Rs. 16,000. The interest on this at 3½ per cent. is Rs. 560, and the revenue is Rs. 541 a year.

92. The following table illustrates the assessment of the cess. The rates have been fixed for five years from January 1st, 1893:—

Zamindari dâk cess.

District.	Rate at which the cess is levied.	Number of estates assessed to cesses.	Land revenue demand of these estates.	Proportion of estates assessed to cess to total number of estates.	Proportion of land revenue demand on which the cess is levied to total land revenue demand.
1	2	3	4	5	6
	Rs. A. P.		Rs.		
Dacca ...	2 0 0	1,294	4,06,123	13·8	77·4
Mymensingh ...	2 10 0	2,479	7,82,089	30·2	90·3
Faridpur ...	2 0 0	1,479	4,24,088	24·7	69·5
Backergunge ...	1 4 0	1,142	12,19,512	31·7	74·0
Total ...	1 15 6	6,394	28,31,822	23·6	76·7

As we assess what we require, balances of income over expenditure should not accrue. But I find the following balances on 1st April last:—

	Rs.
Dacca	19,246
Mymensingh	10,303
Faridpur	6,562
Backergunge	18,544

In Backergunge, with a low rate, the balance is gradually being worked off. In Dacca the balance is increasing, and the question has arisen whether the rate should not be lowered. I am enquiring whether the expenditure cannot be increased.

Estates paying revenue less than Rs. 50 per annum are not assessable to dâk cess, but separate accounts in estates paying Rs. 50 and above and estates cut off from such estates by butwara are assessed. I have proposed to exempt all separate accounts and separated estates where the demand is less than four annas. This would cost us Rs. 370 per annum, and relieve us of 3,164 entries on the ledger.

93. The subjoined table shows the demands, collections, and balances of the cess and the percentage of collection in each district:—

District.	Net demand of cess.	Collections	Balance.	Percentage of collection.
1	2	3	4	5
	Rs.	Rs.	Rs.	
Dacca ...	7,274	6,040	1,234	83·0
Mymensingh ...	15,232	14,902	330	97·8
Faridpur ...	8,536	7,922	614	92·8
Backergunge ...	11,483	11,372	111	99·
Total ...	42,525	40,236	2,289	94·6

...er them. ...the year was 544 ...; the number insti- ...against 113. The ...pending at the end of ...to Dacca and 210 to

Rupees 10,355 was realized in advance for 1895-96. In ...has been an increase of Rs. 13,375 was so realized. It is explained that many peo... ...Only 6,455 acres the two instalments, viz. January and September, in J... payable being very small.

In Faridpur the balance has increased. Sanction to assess and collect th increase, Rs. 15,390, due to revaluation, was only received in December, when i is said it was too late to take proper steps for its recovery within the year The percentages of total collections on total demand have slightly increased i all districts, but Faridpur is terribly behind in both years.

The number of estates, the valuation of which was completed during th year, was 2,163, resulting in an increase of cess amounting to Rs. 18,623, viz Rs. 4,385 in Dacca, Rs. 2,652 in Mymensingh, Rs. 445 in Faridpur, an Rs. 11,140 in Backergunge. It costs us between one and two years' improve income to get this increase.

Operation of the Sale Law.

95. The following table shows how the Sal Law was worked during the year:—

DISTRICT.	Number of estates and shares sold.		Number exempted.		Total number of estates and shares which became liable to sale.		Total number of estates subject to the Act.	
	1893-94	1894-95.	1893-94.	1894-95.	1893-94.	1894-95.	1893-94.	1894-95.

1894-95 Rs. 2,781, rdship, the Board of Revenue ordered the sale to be annulle
on this at 3½ per cent declined to accede to my recommendation, and one case wa

96. Ninety-nine estates have been settled. Of these, 13 are new estates, 69 have been finally re-settled, and 17 have been summarily settled, leaving 155 pending, including 17 summary settlements. Of the estates returned as settled, 35 have been kept under direct management. The net result shows an increase of Rs. 8,982 in Government revenue, owing mainly to assessment of lands gained by accretions. The increase due to changes in the classification of the soil and to enhancement of rates of rent is small. The settlement of new estates added Rs. 2,600. Of the total increase of Rs. 8,982, Dacca contributed Rs. 2,482, Mymensingh Rs. 2,180, Faridpur Rs. 2,509, and Backergunge Rs. 1,811. Of the 155 settlements, four are pending from 1886-87, two from 1887-88, and two from 1889-90. I have taken steps to have all these cases disposed of soon. I now get (though so far too late to be of any use) monthly and quarterly progress reports of settlements going on. Delays which have been too common should now be more difficult to arrange.

Settlements other than settlements under the Tenancy Act.

97. The number of certificates filed was 11,875 against 9,155 in the previous year. Including pending cases, the number of cases for disposal was 14,697 against 12,745; of these 11,131 were disposed of against 9,923. The district figures are summarized below:—

Certificate work.

DISTRICT.	Total for disposal.	Disposed of.	Pending.	Pending over six months.
1	2	3	4	5
Dacca ...	3,386	2,590	796	44
Mymensingh ...	3,771	2,789	982	40
Faridpur ...	4,437	3,338	1,099	46
Backergunge ...	3,103	2,414	689	39
Total ...	14,697	11,131	3,566	169

It is satisfactory to note that the number of cases pending over six months has decreased in all districts, though the total number pending has increased.

The separate ministerial establishment sanctioned in Government order No. 530, dated 30th January 1894, was appointed with effect from 1st April 1894 in all districts. The order of Government in this matter has given rise to a good deal of correspondence. Instead of a fixed scale, the establishment should vary by a sliding-scale according to the number of cases to be dealt with.

98. The year opened with 45 cases pending from the previous year, and 21 cases were instituted during the year of report, making a total of 66 cases for disposal. The number disposed of was 19 against 23 in the previous year. In none of the districts of the Division have difficulties been experienced in assessing the value of the lands acquired.

Land acquisition.

A curious feature about land acquisition work in Backergunge is that people will not take their compensation money, though repeatedly asked to do so. It is reported that the land-holders, as a class, refuse to accept such payments, lest they may have to give abatement of rent to those holding under them.

99. The total number of cases for disposal during the year was 544 against 554 of the previous year; the number instituted during the year was 126 against 113. The disposals amounted to 162 against 136, leaving 382 cases pending at the end of the year, against 418. Of the 382 cases, 168 belong to Dacca and 210 to Mymensingh. In the number of estates divided there has been an increase of 18 cases in Mymensingh and a decrease of 11 in Dacca. Only 6,455 acres

Partition.

have been divided in Dacca, against 15,315 in the previous year. In Mymensingh the area has fallen off from 30,046 acres to 19,565.

In Dacca three cases have been pending more than ten years. Sixty-three cases, covering 14,849 acres, have been instituted in Dacca, against 44, covering 60,396 acres, in the previous year. In Mymensingh 62, covering 18,468 acres, against 68, covering 10,717 acres. Though the number of cases pending has fallen from 418 to 382, the area pending is nearly exactly the same (434,920 acres to 434,810). Area is a fairer criterion of work than number of cases.

In Dacca the case of estate No. 10, pargana Bhowal, which His Honour the Lieutenant-Governor has characterised as a disgrace to all concerned, and which has been pending since 1884, has been the subject of special enquiry. I find the partition of this estate was conducted in the most careless and slipshod manner. I suspect this description will apply to the business generally in this district.

I have ascertained that the Butwara Deputy Collectors rarely go to the spot, as required by paragraph 6 of Board's Circular No. 17 of April 1893, and previous orders. During the year the Deputy Collector of Dacca actually visited only one estate.

Land registration work.

100. The total number of cases for disposal was 14,730, of which 10,799 were disposed of, leaving 3,931 pending against 2,739 at the end of the previous year. It is satisfactory, however, to find that the number of cases pending over six months has decreased from 204 to 35.

The percentage of applications registered under section 42 of the Act on the total number of interests registered under section 38 in each district, is shown below:—

	1893-94.	1894-95.
1	2	3
Dacca	8·8	9·9
Mymensingh ...	11·9	17·2
Faridpur	7·7	13·3
Backergunge ...	7·2	6·2
Total ...	9·3	12·05

The result of the year's working is satisfactory in all the districts of the Division except in Backergunge. The increase in Mymensingh is due to efforts made by Mr. Earle to secure registration. The cess revaluation proceedings have greatly assisted him. Mr. Herald, too, has secured improved registration by sending lists to thanas and ordering the police to make enquiries regarding mutations. In Backergunge the chaukidari panchayat of the village in which, according to the register, a proprietor resides, is required to report if he is living and still retains the interest registered in his name. This experiment was tried for one pargana and has been a success.

Advances under the Land Improvement and Agriculturists' Loans Acts.

101. A sum of Rs. 15,000 was allotted to this Division, but only Rs. 9,000 was advanced, Rs. 600 in Mymensingh under Act XIX of 1883, and Rs. 400, Rs. 5,000, and Rs. 3,000 to Mymensingh, Faridpur, and Backergunge, under Act XII of 1884. Under the former Act no application was made in any district except in Mymensingh, where steps were taken for the first time to make the fact that such advances were available known in the Sadar subdivision. No application was made in Dacca under either Act, probably because

it is not known that such advances are available. It would be easy to advertise these Acts in the mufassal through the chaukidars and panchayats. There would be danger that we might be flooded with applications. And we should no doubt under-sell the local money-lenders and the loan societies, of which there are a good many.

Bengal Tenancy Act.

102. Generally the Act appears to have worked smoothly so far as it did work. The following figures show that outside the Civil Courts no great advantage is taken of its provisions:—

		1893-94.	1894-95.
1.	Transfer of tenures voluntarily, section 12 (3)	2,413	2,201
2.	Ditto by decree sale, sections 13 (2) and 14	968	695
3.	Transfer of tenures by succession, section 15	186	238
4.	Commutation of rent, section 40 ...	...	1
5.	Appraisement of produce where rent is paid in kind, sections 69 and 70	...	1
6.	Registration of improvement, section 80 ...	18	14
7.	Notices of resumption of land by landlords, section 87 (2)	15	5
8.	Applications for survey and record of rights under chapter X	36	22
9.	Local enquiries held by order of Courts, section 158	16	...
10.	Notices of annulment of encumbrances under section 167	113	46

Last year Mr. Earle drew my attention to the neglect of the zamindars to comply with the provisions of the Act in regard to giving rent receipts in the form prescribed. I invited the attention of the District Judge to the matter, and the latter directed his subordinate officers to report instances of omission to the Collector. It is reported that only 17 cases were so reported by the Civil Courts.

Settlements under chapter X of the Tenancy Act.

103. Including cases pending from the previous year, 77 applications (63 private and 14 Government) were for disposal, of which 22 were disposed of and 55 remained pending at the close of the year. Of these, 44 were for private estates and 11 for Government estates.

Three Government estates were finally settled under the Act, one in Dacca (Jowar Joymongal) and two in Backergunge (estates Madhupura and char Lal Mohan). The increase of revenue actually obtained in them was Rs. 852, Rs. 1,601, and Rs. 10,361, respectively.

As reported last year, I found it very difficult to bring the cost per acre within the rate of eight annas prescribed in revised rule 43, chapter VI of the Government rules at page 55 of the Settlement Manual. These estates, especially in Dacca, comprise scattered blocks of land lying in several villages which are not sometimes within the same thana. The cost is high in some districts, because a Deputy Collector is employed to make four visits to the estates, (1) to test measurements, (2) to publish draft record, (3) for final publication, and (4) for preliminary attestation. In view of curtailing the expenses, I have directed the Collectors to employ their kanungoes in the first three works in the case of petty estates.

The following settlement case has attracted my attention. A Government estate No. 5251, char Kali, containing an area of 831 acres, in the district of Backergunge, was settled under chapter X of the Act for a period of 15 years from 1891-92, in 17 jotes at a nominal rent of Rs. 195, or 1 anna 3 pies per bigha a year for the first ten years, and at Rs. 625 a year, or at annas 4 per bigha, for the last five years. It turned out that there was nothing to settle. No boundary to the jotes were laid on the ground. The land was jungle and used to be farmed annually for grazing, &c. It has been ascertained that the so-called jotedars, instead of reclaiming the land, lease it for grazing purposes. They also sell the wood and reeds that grow on the char. They thus realize a large sum every year. As there was no condition in the khatian prohibiting subletting or compelling reclamation, no action could be taken against them.

By this settlement Government has lost revenue. As we have now khas tahsils in Backergunge, there is no reason for settling land until it has been brought under cultivation. In another case estate No. 5256, (char Umed) an uncleared tract of jungle, some 5,217 bighas of land measured in three blocks, was settled in 21—jotes, the boundaries of which were not defined.

XVIII.—ATTACHED ESTATES, INCLUDING COURT OF WARDS.

104. At the close of 1893-94 there were five properties under the management of the Court of Wards. Of these, four were taken over on the application of the Civil Courts under section 95(*a*) of the Tenancy Act. During the year three others came under charge of the Court under that section in the Backergunge district.

The properties belonging to A. C. Roy and others, which were taken over on 1st April 1894, contrary to my advice, consist of one revenue-paying estate, No. 1764 in pargana Dakhinshabazpur (held in common with No. 1763); of 62 revenue-paying estates in parganas Srirampur, Maizuddi, and Uttershabazpur; and of 54 under-tenures or shares in such under-tenures within those estates. They are situated partly in Bhola and partly in the Sadar subdivision.

The properties of Messrs. Lucas and Harvey, which were taken over in June 1894, are composed of 14 entire tenures, shares in 8 tenures, and 7 entire raiyati holdings and a share in one raiyati holding. These properties are mostly under direct management, but are partly let in sub-tenures. They are all situated within the Bhola subdivision of the Backergunge district.

The property of Babu K. M. Roy and others, which was taken over in December 1894, consists of only an 8 annas 2 gandas 16 dhurs share of a tenure in the Dakhinshabazpur estate.

There are therefore now eight properties in the Collector's hands, of which six are in the Backergunge district. A property is not an estate; it means shares in estates, tenures and under-tenures, generally fractional, scattered over different parganas, sometimes over different districts. I am wholly unable to imagine a reason why the Collector and I, who have so many important duties, should supervise the management of these gentlemen's properties for them. The gentlemen themselves are generally of mushroom growth; their properties have been put together in quite recent times. The Collector asks *cui bono*. We cannot manage these properties for ever, and when released they will lapse into their former condition.

105. I mentioned in my report for 1893-94 that the Board of Revenue had, contrary to my advice, taken charge of the Haturia and Bamna properties in the Backergunge district, the former consisting of shares in 415 estates, tenures, under-tenures, &c., the latter of shares in 519 estates, tenures, &c. I was able to add that the Board had already decided to withdraw from the management of the latter. I am not now able to report that it afterwards decided to withdraw from that of the former. Though there is no political or other reason why we should undertake the management of properties such as these, still, having taken them over, I am not sure that I would have withdrawn. The Collector complains that for six months a large portion of his time was spent in endeavouring to get these estates into order. I was wrong in saying in last year's report that the Bamna estate was hopelessly in debt.

106. The total demand, current and arrear, on account of Wards' and Attached Estates, less remissions, and excluding Haturia and Bamna, was Rs. 4,21,563, of which we only collected Rs. 2,42,330. The management of the Dakhinshabazpur properties in the Backergunge district and of the Talipabad properties in the Dacca district has been fairly successful; that of the Kanakshar properties in the Faridpur district is very unsuccessful. Mr. Herald, Collector of Faridpur, writes:—"It seems to me that the former tahsildars were in league with the raiyats. Since their dismissal in December, collections have vastly improved."

107. A Muhammadan gentleman in Faridpur left all his property to charitable uses, asking Government to appoint a mutwali. Government was obliged to decline because some of the uses might bear a religious construction. A Muhammadan finds it difficult to distinguish between religious and charitable uses.

XIX.—EXCISE.

108. The small increase, Rs. 11,566, is confined to the northern districts :—

		Rs.
Dacca ...	...	+ 5,393
Mymensingh ..	...	+ 14,597
Faridpur ...	...	− 5,306
Backergunge ...	...	− 3,118
Total	...	+ 11,566

Taking the principal exciseable articles, the increases and decreases are—

	Consumption.		Revenue.
	Gallons.		Rs.
Country spirits ...	− 208		− 19,644
	Mds. srs. ch.		
Ganja ...	− 3 11 10		− 531
Opium ...	− 1 30 0		− 873
Imported wines and rum	+ Unknown		+ 30,714
	Total	...	+ 9,666

In 1893 94 license fees for sale of imported wines and rum were credited to country spirits.

That we only get Rs. 8,21,133 out of 9,844,127 people, or ·08 per head, is not creditable to our administration. It is, however, the largest revenue on record. In the last six years we have taken—

			Rs.
1894-95	...	...	8,21,133
1893-94	..	...	8,09,567
1892-93	...	...	8 12,103
1891-92	...	...	8,19,124
1890 91	...	...	8,13,878
1889-90	...	...	7,76,974

109. Mr. Earle, the Collector of Mymensingh, says that there are reasons for thinking that the high prices of country spirits and ganja are in some measure driving people to take to rum and imported spirits, a most unfortunate result.

Another competitor of high-priced country spirits in the Backergunge district, to which I referred in last year's report, is a horrible compound of methylated spirit and some scented substance miscalled eau-de-cologne. The Collector, Mr. LeMesurier, writes:—"The local *mélas*, which number 71 and which are thronged by prostitutes and their clients, are the principle places where the sale of eau-de-cologne for drinking purposes goes on. It is also said that this liquor is largely used by schoolboys and other persons who fear detection by the smell of their breath if they drink ordinary spirits. Prostitutes make a practice of buying a small stock for retail to their customers."

Though the law on the subject is admittedly far from clear, it was, I am glad to find, decided, after consultation with the Commissioner of Excise, to prosecute persons found selling this so-called eau-de-cologne under such circumstances as showed a knowledge that it would be drunk. This eau-de-cologne contains much more alcohol than country spirit, and a phial of it is sufficient to make the most inveterate toper completely drunk. Mr. LeMesurier mentions that a prostitute drank carbolic acid out of an eau-de-cologne phial without detecting the difference.

110. Prosecutions for the manufacture of madak and chandu for domestic purposes continue. Licenses at 50 rupees each are never applied for.

111. We do not yet get the assistance we should get from panchayats and the rural police in excise matters. A member of a panchayat in Mymensingh was rewarded in an excise case. This matter has my attention.

XX.—STAMPS.

112. There has been a net decrease of Rs. 4,944, or ·7 per cent., in non-judicial stamps. The two northern districts give small increases—Mymensingh Rs. 11,822, or 4·7 per cent.; Dacca Rs. 6,672, or 3·3 per cent.; the two southern districts larger decreases; Faridpur Rs. 4,392, or 5·2 per cent.; and Backergunge

19,046, or 14·3 per cent. The increase in Dacca is attributed to the chance execution by the Nawab of Dacca of some documents requiring stamps of high value which alone contributed Rs. 8,750. The decrease in Backergunge and Faridpur is due to the depression in the money-lending business owing, the Collector of Faridpur says, to bad times; but, according to the Collector of Backergunge, to good crops.

There has been an extraordinary fall in the use of hundi stamps—

Dacca ...	...	35·5 per cent.
Mymensingh	...	20·2 „
Faridpur ...	...	68·5 „
Backergunge	...	50·4 „

due, it is said, to depression in trade.

Judicial or court-fee stamps give a net increase of Rs. 1,75,027, or 8·8 per cent., as compared with 1893-94. Here again the northern districts take the lead—

Dacca ...	...	...	10·0
Mymensingh	...	...	13·5
Faridpur ...	...	...	2·5
Backergunge	...	...	6·0

The increase in Mymensingh is due to the prosperity of the people, which made it easy for the litigious to indulge. There has been some increase in civil litigation in Dacca, large decrease in Faridpur, and small decrease in Backergunge. Though Mymensingh gives such a large increase in judicial stamps, there has been no corresponding increase in civil litigation. Fee paying criminal judicial business has, however, increased in this district. In Dacca and Backergunge there has been some increase in will and certificate work.

113. One thousand one hundred and forty-four cases of insufficiently stamped or unstamped instruments were detected during the year, as against 870 in the preceding year. Of these, 396 were detected by Civil Courts and 748 by the Revenue officers.

The number of prosecutions for offences against the Stamp Law has increased from 251 in 1893-94 to 289. In these cases Rs. 2,215-8 was imposed as fines and Rs. 881 was distributed as rewards to informants. Out of the sum disbursed to informants, the Income-tax Assessor of Dacca received Rs. 163 and the Assessor of Mymensingh Rs. 105, while those of Backergunge and Faridpur received only Rs. 53 and Rs. 25 respectively.

114. Besides rewards awarded by Magistrates out of fines imposed in conviction, Collectors, with the sanction of the Board, can award rewards out of the penalties imposed by them under section 37. The Collector of Dacca largely avails himself of this procedure in the case of his Income-tax Assessor. This officer has earned Rs. 365 in such rewards. No other assessor earns anything in this way. The Collector reports that a few petty cases of omission of stamp receipts were detected by their assessors, and that in all of them prosecutions were ordered and the rewards paid from the amount of fines imposed. It is remarkable that these stamp rewards are charged against contract contingencies.

115. The Collector of Backergunge proposed to vest the Subdivisional Officers of Bhola with the powers of a Collector under the Stamp Act, it being found very inconvenient for the people living on the island of Dakhinshahbazpur and the neighbouring chars to cross the big rivers and come to the Sadar station, specially in the rainy season. The Board are not prepared to give Subdivisional Officers such powers.

In Backergunge it has been the custom to charge court fees on copies taken for the private use of the applicants. Mr. Commissioner W. R. Larminie, in his letter No. 1147, dated 4th July 1888, issued instructions that the court fees prescribed by section 6 read with schedule I of the Court Fees Act must be paid in all cases. Article 9 of table I of remissions and reductions (pages 157 to 160 of the Stamp Manual), which was republished in Government of India's Notification No. 4650, dated 10th September 1889, had been overlooked. Though uncertified copies were given gratis in other districts, the legal ground for such remission I found had been forgotten.

XXI.—INCOME-TAX.

116. A special report on this subject has been submitted to the Board of Revenue. 99·4 per cent was collected within the year. Some late assessments bring Mymensingh below 99 per cent. and enhance its balance.

There has again been a small increase in the number of assessees from 11,164 to 11,448.

The following table gives the results of the year's assessment operations:—

District.	Original demand.	Reduced by— Collectors on revision to—	Commissioner on appeal to—	Total. Amount reduced on objection or otherwise.	Final demand. 1894-95.	1893-94.	Increase.	Decrease.
1	2	3	4	5	6	7	9	9
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Dacca	87,462	86,900	86,873	589	86,873	88,304	...	1,431
Mymensingh	96,892	96,537	96,383	509	96,383	94,772	1,611	...
Faridpur	43,365	42,163	42,163	1,202	42,163	41,668	495	...
Backergunge	65,348	64,984	64,977	371	64,977	60,969	4,008	...
Total ...	2,93,067	2,90,584	2,90,396	2,671	2,90,396	2,85,713	4,683	...

The decrease in Dacca was brought about by the exemption of an important European firm under Part II and of four others under Part IV, on account of the loss they sustained in the jute business in the preceding year. The aggregate amount of tax paid by these firms in 1893-94 was Rs. 4,992. Much of this loss has, however, been made good by new assessments and enhancements in other directions.

No special reason can be assigned for the petty increases in Mymensingh and Faridpur. And in Backergunge an increase of 6·5 per cent. can only be attributed to increased activity on the part of the Deputy Collector and assessor.

117. The following table shows the proportion of persons assessed to population and the incidence of tax:—

Incidence of the tax.

District.	Proportion of persons assessed to population.			Incidence of tax.		
1	2			3		
	Assessee.		Persons.	Re.		Persons.
Dacca	1	to	793	1	to	28
Mymensingh	1	to	935	1	to	36
Faridpur	1	to	803	1	to	42
Backergunge	1	to	880	1	to	33

118. The table below shows the number of persons against whom coercive measures were taken for the realization of the tax, as compared with the previous year:—

Coercive measures.

District.	Number of warrants. 1894-95.	1893-94.	Number of distraints. 1894-95.	1893-94.	Number of sales. 1894-95.	1893-94.
1	2	3	4	5	6	7
Dacca	78	46	35	8	2	3
Mymensingh	104	123	7	60	22	3
Faridpur	49	47	10	21	11	6
Backergunge	62	43	20	13	13	7
Total ...	293	259	72	102	48	19

119. The total cost of assessment and collection has further decreased, as shown in the following table:—

Expenditure.

District.	Total collection including penalties, &c.	Total expenditure.	Percentage of cost on collection.	
			1894-95.	1893-94.
1	2	3	4	5
	Rs.	Rs.		
Dacca	87,213	3,578	4·1	4
Mymensingh	96,181	3,173	3·3	3·5
Faridpur	42,989	2,671	6·2	6·4
Backergunge	65,190	3,160	4·8	5·3
Total ...	2,91,573	12,575	4·3	4·5

The increase in Dacca is nominal. Faridpur still costs us too much.

XXII.—MONETARY ARRANGEMENTS.

120. The practice of paying Government dues in notes is still on the increase. In Backergunge Rs. 5,40,340 was so received at our treasuries, against Rs. 1,90,565 in the previous year. And as might be expected there is almost an equivalent increase in the amount remitted in notes from our treasuries to Calcutta and other treasuries.

There has been no noteworthy change in the use of remittance transfer receipts.

121. The work at subdivisional treasuries is still increasing. Generally I have found that treasury work has been fairly well conducted. Special attention is now paid to the detection of counterfeit, light and defaced coin.

XXIII.—PUBLIC WORKS.

122. Outside of communications we have not many large public works in hand. The new Science School attached to the Dacca College to cost Rs. 40,139 is perhaps the largest. We are building a supplement to the madrassa at this place. The Magistrate-Collector, Faridpur, has got into his new offices, which have cost Rs. 67,600. We are also improving his cess office. New offices are in course of construction at the Kishorganj and Jamalpur subdivisions in the Mymensingh district, and those at Netrakona have been enlarged. Large improvements to cost Rs. 13,017 have been sanctioned in the Barisal offices. The new Civil Courts at this place have been put in hand, while those at Patuakhali have been completed. A new subdivisional residence bungalow has been commenced at Patuakhali.

In October 1893 the Telegraph Department vacated the premises they had occupied for 28 years at Dacca. As it is desirable to maintain the compound as an open space in the centre of the town, and as the telegraph cables land in it, I proposed to keep on the premises. This has been sanctioned and Rs. 11,442 has been advanced for their repair, to be recovered out of the rent, Rs. 160 per mensem. My office and the offices of the Inspectors of Works and Schools are at present accommodated in these premises. We have secured an excellent house as a residence for the Judge at Mymensingh on a ten years' lease, and have repaired it at a cost of Rs. 2,498.

Some new rest-houses have been constructed in the Mymensingh and Faridpur districts.

Most of these works are in charge of the District Board's establishments. For the Science School at Dacca and the Faridpur courts special arrangements were made.

XXIV.—COMMUNICATIONS.

123. No new lines of railway have been opened, but the survey for a line from Mymensingh *viâ* Jamalpur to Jaganathganj, near Subornakhali on the Jamuna, was undertaken with a view to connect the Eastern Bengal State Railway with the Northern Bengal and Assam lines. The Collector of Mymensingh thinks that the construction of a branch line from Gaffergaon station, on the Dacca-Mymensingh Railway, to Kishorganj, 15 miles, or at least to Hossenpur, on the old Brahmaputra, 5 miles, would undoubtedly be an advantage to the Kishorganj subdivision. The Collector further considers that in view of the jute traffic such a line might pay.

124. No further action has been taken with a view to connect Dacca-Narayanganj with Goalundo by rail. This is a matter which should be kept in view. The project to connect Madaripur with Singhia, on the Central Bengal Railway, is still before Government.

125. The approval of Government has been received to the construction of a pontoon bridge over the old Brahmaputra at Nasirabad, and a detailed project, with an estimate amounting to Rs. 1,86,071, has lately been sent up for sanction. As stated in last year's report, some of the landed proprietors benefited have promised Rs. 57,000 to this work. The old Brahmaputra is now fordable in the dry season in the neighbourhood of Nasirabad, and will perhaps silt up.

126. The working of the Dacca-Mymensingh Railway, according to the Collector of Dacca, from a passenger's point of view, was not as satisfactory as it might have been. An inconvenient time-table, slow trains, dawdling of trains at the stations, and unpunctuality, are complained of. The rush of bathers to Narayanganj on the occasion of the Nangalbund festival fairly swamped the rolling-stock.

127. Except in certain parts of the Mymensingh and Dacca districts, we have not much room for roads in this Division. The following statement shows the length of roads of different classes in each district:—

District.	District roads.								Village roads.	
	Embanked, bridged, and metalled.		Embanked, bridged, but not metalled.		Not embanked and not bridged.		Total.			
1	2		3		4		5		6	
	Miles.	Fur.	Miles.	Fur.	Miles.	Fur.	Miles.	Fur.	Miles.	Fur.
Dacca ...	6	7	174	7½	81	1½	263	0	141	0
Mymensingh ...	30	5	384	3	171	0	586	0	1,585	0
Faridpur ...	9	0	118	1¾	19	6¼	147	0	64	4
Backergunge ...	12	5	263	0	...		275	5	302	7
	59	1	940	4¼	271	7¾	1,271	5	2,093	3
1893-94 ...	55	3	935	2¼	264	3¾	1,255	1	1,896	0
Increase or decrease	+ 3	6	+ 5	2	+ 7	4	+ 16	4	+ 197	3

Though the increase in mileage was so small, the expenditure on new works was large.

DISTRICT.	AMOUNT SPENT IN—	
	1893-94.	1894-95.
1	2	3
	Rs.	Rs.
Dacca ...	9,272	13,722
Mymensingh ...	45,670	62,051
Faridpur ...	18,385	17,069
Backergunge ...	37,062	54,403
Total ...	1,10,389	1,47,245

Many of the roads included in the statement are incomplete, and it is fortunately the policy of the District Boards to complete the present roads before commencing new ones. In Mymensingh and Dacca special attention is given to roads which may feed the Dacca-Mymensingh Railway.

The expenditure on the maintenance of roads has been—

DISTRICT.	Amount spent in—	
	1893-94.	1894-95.
1	2	3
	Rs.	Rs.
Dacca	34,084	25,755
Mymensingh	26,388	35,652
Faridpur	14,900	5,908
Backergunge	25,382	25,604
Total ...	1,00,754	92,819

In Dacca the injuries caused by the floods of 1893-94 were made good in that year. In Mymensingh the work was postponed to this year. In Backergunge some of the bridges were rickety and stood in need of thorough repairs. Salt water breeds teredos, and the wooden bridges therefore do not last long. In Faridpur there is again a decrease in expenditure, due not to neglect of the roads, but to the non-payment of several bills that were not submitted till 31st March 1895.

Village roads.

128. The subjoined table shows the expenditure on village roads:—

DISTRICT.	1893-94.			1894-95.		
	Original works.	Repairs.	Total.	Original works.	Repairs.	Total.
1	2	3	4	5	6	7
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Dacca ...	2,598	4,948	7,546	2,378	7,987	10,365
Mymensingh ...	10,240	9,389	19,629	15,019	8,420	23,439
Faridpur ...	5,364	6,845	12,209	4,708	4,541	9,249
Backergunge ...	11,789	13,585	25,374	7,810	12,571	20,381
Total ...	29,931	34,767	64,758	29,915	33,519	63,434

The District Boards of Mymensingh and Backergunge have spent considerable sums on the maintenance of these roads. The reduced expenditure under this head in Faridpur is accounted for by the fact that during the year a portion of the funds allotted to the Local Boards for this purpose was diverted towards the digging of tanks.

129. The following statement shows the number of ferries of different classes in each district :—

District.	Number of Ferries.							
	Under Government management.		Under District Board management.		Under Municipal management.		Total.	
	1893-94.	1894-95.	1893-94.	1894-95.	1893-94.	1894-95.	1893-94.	1894-95.
1	2	3	4	5	6	7	8	9
Dacca ...	2	2	66	66	4	4	72	72
Mymensingh ...	4	3	71*	106	1	2	76	111
Faridpur ..	...	...	16	17	6	2	22	19
Backergunge ...	1	1	23	23	3	3	27	27
Total ...	7	6	176	212	14	11	197	229

* In the report for 1893-94 the number of ferries in that year was shown as 69 by mistake.

The steam ferry between Narayanganj and Munshiganj continued to be managed by the District Board. The receipts were Rs. 3,705 as against Rs. 2,498, and the working expenses Rs. 2,193 as against Rs. 1,784 in the previous year. The net income of the ferry therefore rose from Rs. 714 to Rs. 1,512. This is sufficient to cover wear and tear of the steamer. I am glad to be able to report that the District Board of Dacca have introduced a new kind of ferry boat provided with flaps and rails, which is well suited for horses, vehicles, &c. "Mar" boats are unknown.

130. The following steamer services are now running :—

(1) India General Steam Navigation Company's daily service *viâ* the Padma and Meghna between Goalundo, Narayanganj and Cachar, carrying mails.

(2) India General Steam Navigation Company's daily service *viâ* the Padma and Meghna between Goalundo, Narayanganj and Sylhet, carrying mails.

(3) Daily service between Madaripur and Sausa Khal junction, carrying mails in conjunction with daily Sylhet service.

(4) Daily service between Barisal and Khulna, carrying mails.

(5) Daily service between Barisal and Chandpur, carrying mails.

(6) Daily service between Barisal and Madaripur, carrying mails.

(7) Service between Barisal and Icchakhali for Noakhali, carrying mails four times a week.

(8) Service between Barisal and Amtoli *viâ* Patuakhali on alternate days.

Besides these the Dhaleswari service between Sabhar and Goalundo ran during the rains on alternate days. In the dry season the Dhaleswari is now unnavigable for steamers. Some of these lines receive subsidies from the District Board and the Zamindari Dák Funds, an account of which will be found under heading Postal.

The Railway Despatch service between Goalundo and Narayanganj was withdrawn from July 1st. There are loud complaints that the India General Steam Navigation Company's steamers have no second or intermediate class, such as the railway steamers had, with private accommodation for native ladies.

131. In my Resolutions on their budget estimates for 1895-96, I invited the attention of the Dacca Municipal Commissioners and of the members of the Dacca District Board to the silting up of the Dhaleswari and Buriganga rivers.

The latter is the branch of the former which washes Dacca. The maintenance of these rivers or waterways is as much a matter of sanitation as of navigation. As I publicly stated when His Honour the Lieutenant-Governor addressed the Municipal Commissioners on the subject of sanitary drainage, unless something is done the Buriganga is likely to give place to a rice-field before many years have passed. At a recent meeting of the District Board it has been proposed to appoint a joint committee, consisting of two members of the District Board and two members of the Municipality, to deal with this subject. Nawab Ahsunullah Khan Bahadur, C.I.E., who, with his usual liberality, has offered to contribute to the expenditure, has been invited to nominate one of the District Board members.

In the year 1893 the India General Steam Navigation Company tried to maintain the Dhaleswari, at the worst part where it emerges from the Jamuna, by the Bandel system which has been so long in use on the Nadia rivers. The experiment was successful so far as it went.

132. Though our communications are chiefly by water, we have no canals except those running alongside of certain roads in the Backergunge and Faridpur districts. Such attempts as have been made with canals have been frustrated by silting. Some useful short cuts have been made between waterways.

Tow-paths.

133. I am personally aware that the tow-paths along the banks of rivers and khals are often impassable. Except at the height of the floods, which, however, last for three months, the foreshore, that is, the space between the highest and lowest levels, supplies a natural tow-path which is often impeded by cultivation and jungle. I am glad to find that in Mymensingh a good deal has been done with a view to the maintenance of tow-paths. Mr. Earle, the Collector, writes that the tow-paths on the banks of all navigable rivers have been surveyed at a cost, to the District Board, of about Rs. 450, and 27 estimates, amounting to Rs 16,377, for their improvement have been prepared. When these paths are once improved they will be placed under the charge of the Local Boards, and regular allotments will be provided for their maintenance. In Faridpur and Dacca nothing appears to have been done for the maintenance of the tow-paths. The District Board of Faridpur have, however, allotted a sum of Rs. 500 for this purpose for the current year. The only tow-path properly maintained in the district of Backergunge is from Barisal to Pirojpur *viâ* Jhalakati along the Calcutta and Eastern Canal. The District Board has provided Rs. 1,000 for maintenance of tow-paths in the current year's budget. It is curious that sections 73, 74, 76, and 78 of the Local Self-Government Act, III of 1885 (B.C.), make no special mention of tow-paths.

Arboriculture.

134. In accordance with orders contained in Government Resolution No. 4366, dated 28th December 1894, I give some information on this subject. The expenditure in each district has been—

	Rs.
Dacca	1,346
Mymensingh	439
Faridpur	513
Backergunge	456
Total ...	2,754

In Dacca, trees that had withered or died were replaced by new ones. These consisted of mango, jack, sisso, karanj, mahogany, and sirish. Almost all the road-side plants were provided with bamboo gabions for protection against cattle. In Mymensingh 2,109 young plants were raised in nursery gardens within the compounds of inspection bungalows. About 500 young trees already planted out along the sides of roads were maintained and 175 young trees (teak 50, badam 100, and jamun 25) were transplanted from one of the nursery gardens. In Faridpur the existing trees were maintained. In Backergunge no new trees were planted. All the young trees planted on the road-sides were provided with bamboo hedges. The total number of trees already planted up to the end of the preceding year is 1,328, consisting of jack, mango, date, jhao, teak, badam, sal, pepal, jamun, sirish, red sandal, &c. Of the trees planted, 768 are mango and 122 jhao trees. The trees are reported to

be in a thriving condition. The rain tree (*Pithecolabium*) is an excellent shade tree for markets, compounds, &c. I caused seed of this tree to be supplied to all Subdivisional Officers in June 1894, but I am sorry to say in some instances the sowing and growing has not been carefully looked after. Where there is clay in the soil, shade is incompatible with heavy cart traffic on cutcha roads in this wet climate.

XXV.—EDUCATION.

135. I am indebted to Babu Dina Nath Sen, Inspector of Schools, Eastern Circle, for this section.

The number of schools has increased by 1,196 and of pupils by 26,276, or 10·7 per cent. Mymensingh with 19·3 per cent. shows the largest and Dacca with 4·1 per cent. shows the smallest increase. We have now 33 per cent. of boys and 3 per cent. of girls of school-going age at school. Backergunge with 50·7 and 4·0 per cent. is far the best; Mymensingh with 20·4 and 1·5 is far the worst district. But Mymensingh under Mr. Earle is making up ground lost under his predecessors. The proportion of Muhammadan boys at school has increased somewhat in all districts.

Though the total expenditure has risen by Rs. 39,118, Government expenditure has fallen off by Rs. 405. The expenditure from municipal and local funds has risen from Rs. 1,10,200 to Rs. 1,25,740.

The following table shows the number of schools and pupils classified according to management:—

Classification.	1893-94.		1894-95.	
	Number.	Pupils.	Number.	Pupils.
1	2	3	4	5
Public institutions under public management—				
Maintained by the department	39	2,808	17	2,803
Ditto by District or Municipal Boards ...	25	1,398	24	1,425
Total ...	64	4,206	41	4,228
Public institutions under private management—				
Aided by the department or by Municipal or District Boards	6,106	162,363	6,157	168,265
Unaided	1,866	42,752	2,594	60,973
Total ...	7,972	205,115	8,751	229,238
Private institutions for indigenous instruction ...	3,746	35,135	4,186	37,266
Grand Total ...	11,782	244,456	12,978	270,732

The increase, it will be observed, is chiefly in unaided schools.

136. Four hundred and forty-eight young men went up from our four colleges for the F.A. examination. Of these 232 passed—five in the first division. Sixty-six went up for the B.A. examination, of whom 15 passed—six in honours. The Brojo Mohan College did best out of the four in the First Arts examination.

Out of 755 boys who went up for the Entrance examination, 460 passed, of whom 116 were placed in the first and 203 in the second division. These are better results than in the previous year. The Brojo Mohan Institution at Barisal did best.

Middle schools.

The result of the Middle English Scholarship examination was not so good as in the previous year. But in the Middle Vernacular Scholarship examination we did well, passing 62·4 per cent.

Primary schools.

Out of 2,079 candidates who appeared at the Upper Primary examination, 896, or 43·1 per cent., were successful, against 52·6 per cent. in 1893-94.

At the Lower Primary examination 3,686 out of 6,885 candidates, or 53·5 per cent., were successful against 39·6 per cent. in 1893-94. These are satisfactory results.

137. The reward examinations are held in this Division, in consideration of its peculiar circumstances, at central gatherings simultaneously all over each district on one day. The total number of pupils that passed this examination by the different standards was 24,726, of whom 10,817 passed by the A standard, 12,205 by the B standard, and 1,704 by a lower standard especially intended for girls, Muhammadan pupils of maktabs, and children of aboriginal races. These results are satisfactory in comparison with those of the previous year.

Female education.

138. In the subjoined table are compared the statistics of female education for the past two years. The increase is general and satisfactory:—

District.	Girls' schools.				Girls in boys' schools.		Total.	
	1893-94.		1894-95.		1893-94.	1894-95.	1893-94.	1894-95.
	Schools.	Girls.	Schools.	Girls.	Girls.	Girls.	Girls.	Girls.
1	2	3	4	5	6	7	8	9
Dacca	211	3,023	159	2,824	3,398	4,392	6,421	7,216
Mymensingh ...	242	3,334	253	3,537	278	357	3,612	3,894
Faridpur	217	3,289	296	4,361	316	361	3,605	4,722
Backergunge ...	112	1,877	116	2,047	3,363	4,340	5,240	6,387
Total ...	782	11,523	824	12,769	7,355	9,450	18,878	22,219

The only high English school for girls in this Division is the Eden Female School at Dacca, under the superintendence of a European lady. As remarked last year, this institution has not proved a success. Two girls appeared at the last entrance examination, but failed to pass. No girl appeared at the Middle English or the Middle Vernacular examination. Two girls appeared at the Upper Primary examination, but both of them failed. None appeared at the Lower Primary examination. In 17 years only three girls have passed the Entrance examination, and one of these had been educated elsewhere. These results are exceedingly unsatisfactory in view of the large expenditure of Government money. The total expenditure on this school was Rs. 7,658. Of this Government found Rs. 7,038. The balance is made up of Rs. 120 contribution from municipality and Rs. 500 in fees and subscriptions.

There is no girls' school of the Middle English class. There are two Middle Vernacular girls' schools, one at Mymensingh and the other at Barisal. Both these schools are aided from the grant-in-aid fund. No girl appeared at the last Middle Vernacular examination. The girls were not successful at the Higher Primary examination, but they did well in the Lower Primary.

There are three zanana associations, one in each of the districts of Mymensingh, Faridpur and Backergunge. All these associations are examining bodies, their main object being to encourage female education in the zanana. They receive aid from district funds.

Special education.

139. The guru-training schools having proved a failure have been abolished. We have now only 21 schools for special education. The Kasi Kisore Technical School at Mymensingh was opened in July 1893. There were 16 boys on the roll at the close of the year. The subjects taught are arithmetic, geometry, drawing, carpentry, and blacksmith's work. Eight boys appeared at the last annual examination from the second year class and four from the first year class. Seventeen boys received stipends varying from Rs. 4 to Rs. 2 a month.

The institution is under the direct management of the District Board, but all its expenses are borne by Babu Jogendra Kishore Ray Choudhuri of Ramgopalpur. The sale-proceeds of the articles manufactured amounted to Rs. 2,109.

The Barisal Technical School has completed the fourth year of its existence. It had 41 pupils on 31st March against 43 in the previous year. The total expenditure on the school was Rs. 3,499 against Rs. 2,765, and the income from fees Rs. 273 against Rs. 261 in the previous year. In addition to the subjects taught in the Mymensingh Technical School, mensuration and surveying also are taught in this school. The expenses of this school are paid by the District Board. His Honour the Lieutenant-Governor visited this school in August last, and was afraid it was not doing much good. Trades were subordinated to surveying, and the teaching in surveying was not good.

Muhammadan education.

140. The Dacca Madrassa is the only institution of its kind for the higher education of Muhammadan boys in the Division. It maintains its popularity. Out of 59 candidates sent up to the central examination of the Bengal madrassas, 12 passed in the first division, 7 in the second, and 15 in the third division, or 34 in all, which gives a percentage of 57·6 against 58·7 of the previous year. Twelve candidates appeared at the last Entrance examination from this institution, of whom 7 passed, 2 in the first division.

We have now two Muhammadan Sub-Inspectors of Schools in the Mymensingh district. The Muhammadan Assistant Inspector, Maulvi Abdul Karim, B.A., has unfortunately been transferred to the Presidency Division. While here he made many useful suggestions for making our educational system more attractive to Muhammadans.

Indigenous education.

141. The following table gives the statistics for indigenous education for the past two years:—

	1893-94.		1894-95.	
	Schools.	Pupils.	Schools.	Pupils.
1	2	3	4	5
Advanced, teaching — Arabic or Persian	84	1,956	114	1,790
Advanced, teaching — Sanskrit	434	3,605	417	3,547
Elementary, teaching a vernacular only or mainly — With ten pupils and upwards — For boys ...	70	1,099	57	908
Elementary, teaching a vernacular only or mainly — With ten pupils and upwards — For girls ...	..	...	...	...
Elementary, teaching a vernacular only or mainly — With less than ten pupils — For boys ...	598	2,486	661	2,913
Elementary, teaching a vernacular only or mainly — With less than ten pupils — For girls ...	31	138	31	119
Teaching the Koran only	2,474	25,847	2,895	27,824
Other schools not conforming to departmental standards — For boys ...	1	46	1	19
Other schools not conforming to departmental standards — For girls ...	59	318	10	146
Total ...	3,746	35,135	4,186	37,266

142. I visited all the zilla schools in my Division and also the following schools and colleges:—

Brojo Mohan College and School (Asvini Babu's).
Behari Babu's School and College.
Barisal Girls' School.
Collegiate School, Mymensingh.

In July last, Sir Alfred Croft, the Director of Public Instruction, Bengal, paid a visit to Dacca, Mymensingh and Faridpur, in company with His Honour the Lieutenant-Governor.

General remarks.

143. Mr. Faulder, the Collector of Dacca, reports: "As an instance of the density with which secondary schools are now scattered over south and east Dacca, I may mention that in the course of one ride of ten miles from Kaliganj to Narsinghdi I was able to inspect one higher and three middle English schools. One of these,

it is significant to remark, is a circle school, that is, one of a class of schools largely assisted by the department in backward parts. This particular village has sent its sons to earn Government pay all over Bengal; it has passed two of them into the Covenanted Civil Service."

Mr. Earle, the Collector of Mymensingh, states as follows:—

"The feature of the year under report was the impulse given to primary education in the area under the control of the District Board. More money was spent on this branch of education; two new Muhammadan Sub-Inspectors of Schools were appointed especially with a view to advancing simple education among the cultivating classes, the majority of whom are Muhammadans, and night schools were opened on an extensive scale with a view to affording the means of education to those (the vast majority) who cannot afford to give up their days to learning. To further facilitate progress in the above directions, the assistance of the village panchayats was, with much advantage, secured, while the complete control over this branch of education was decentralized by transfer from the District Board to the Local Boards. The large increase in the number of primary schools and scholars attending the same, as also of the number of Muhammadans attending schools, amply testifies to the initial success of the measures taken."

At Dacca, Backergunge, and Mymensingh we have excellent private institutions competing with our Government Entrance schools. It is a question whether we are justified in maintaining Government schools in the face of this competition. At Backergunge we have a very handsome school-house which rather ties our hands. I shall shortly make a representation about the Mymensingh school. At Dacca a new science building is being built in the compound of the Dacca College.

On my recommendation, the Government of Bengal in its No. 536L.S.-G., dated 9th February 1895, sanctioned as an experiment for one year only, with effect from April 1895, the transfer to the three Local Boards of Faridpur of the control of primary education including the payment of teachers on the authority of the Sub-Inspector of Schools, the appointment or the confirmation of the appointment of teachers, and the selection of backward schools for stipends.

XXVI.—HOSPITALS AND DISPENSARIES.

144. We have made some progress, but are still far behind our neighbours in Sylhet—far behind most parts of India. 282,819 persons, or 2·9 per cent. of the population, were treated at our dispensaries, against 224,862, or 2·2 per cent., in 1893, and 181,209, or 1·78 per cent., in 1892. Two new dispensaries have been opened in the Mymensingh district and two in the Backergunge district, while three private dispensaries have come under inspection.

145. The District Board of Faridpur have proposed to establish a dispensary at the head-quarters of each thana on condition that the cost of building and doctor's quarters is raised locally.

Twenty-one of our dispensaries are aided by the District Boards, while 14 are mainly supported by Municipalities.

The success of the dispensaries established at Durgapur, Bhairab Bazar, Bowfal, Matbaria, and Jhalakati is most encouraging.

146. Only the Mitford Hospital at Dacca is of much practical use as an indoor hospital. There is no reason whatever why hospitals offering similar advantages should not be established at all large centres of population; only a Mr. Mitford of pious memory is wanting. The new Eye ward erected by Raja Srinath Rai attracted 113 patients, and the new European ward 13 patients, in 1894. The dispensaries at subdivisional head-quarters in the Mymensingh (except Tangail) and Backergunge districts and in the Munshiganj and Manikganj subdivisions of the Dacca district have very small accommodation for in-door patients; the figures against these dispensaries represent little more than persons concerned in police cases. I am glad to say that the District Boards have now recognized their responsibilities in this matter.

147. The dispensary at Faridpur has been a disgrace to the district. Mr. Herald has been able by great exertions to raise a sum of Rs. 800, and has received promise of a further sum of Rs. 400 for the construction of a new building.

148. The following statement shows the percentage of women and children on total treated in each dispensary in 1893 and 1894:—

District.	Names of Dispensaries.	Women.		Children.	
		1893.	1894.	1893.	1894.
1	2	3	4	5	6
Dacca ...	1. Mitford	8·9	15·38	18·5	15·57
	2. Narayanganj ...	8·2	8 56	12·5	8·12
	3. Munshiganj ...	7 6	9 26	25·4	22·41
	4. Manikganj	10 6	11·65	17·9	21 14
	5. Jaydebpur	12·01	11 9	20·8	18·3

	38. Bhanga	7·5	4·94	13·5	10·79
Backergunge ...	39. Barisal	4·3	8·97	9·1	8·82
	40. Perozepur	11·5	26·03	17·5	21·06
	41. Patuakhali	7·9	7·03	16 5	14·55
	42. Bauda .. .	7·0	7·54	16·0	12·48
	43. Matbaria	8·4	8·92	23·1	13·13
	44. Bokal	23·7	22 51	20 0	25·35
	45. Luta	5·0	6·51	10·5	13·84
	46. Boufal	5·3	9·12	17 6	16·64
	47. Doulatkhan ..	3·9	5·66	9·7	13·73
	48. Shibpur	......	11·23	......	22·63
	49. Jhalokati	......	8·3	......	12 30

Some progress is being made. The causes which make Shologhar, Bhagyakul, Maluchi, Baliati, Shukhomoyee, Perojpur, and Bokal so much more attractive to these classes than other dispensaries would well repay investigation.

149. In connection with the Mitford Hospital at Dacca, a new ward is being built by public subscription for the accommodation of females of the upper classes in memory of the visit of the Viceroy Lord Dufferin to Dacca in 1888. In memory of the same occasion the Nawab Ahsanulla with his usual liberality has given a sum of Rs. 50,000 for the entertainment of a lady doctor. I am glad to hear that such a doctor has at last been entertained.

In the Mymensingh district separate female wards in connection with the Kishorganj, Jamalpur, and Sherpur dispensaries are under construction. A large masonry hospital is about to be built at Shontosh, in which ample accommodation for females will be provided.

In the Backergunge district the dispensaries at Barisal, Perojpur, and Patuakhali have separate consulting accommodation for females, and the Magistrate is trying to arrange for this at every dispensary in his district.

Since June 1894 a lady doctor (passed Civil Hospital Assistant) has been attached to the Nasirabad Hospital. She earned Rs. 180 in fees up to December 31st, and treated 336 cases, of which seven were cases of delivery. A midwife employed by the Tangail Local Board since June 1892 seems to be doing good work. She earned Rs. 201 in fees in 1894. Midwives entertained at Kishorganj, Jamalpur, Madaripur and Goalundo have not been a success. A lady doctor entertained at Barisal appears to have made nothing by private practice. Husbands and children somewhat interfere with the usefulness of female practitioners.

150. Only at the Mitford Hospital at Dacca are many major operations performed, and the number is increasing—

1894	...	...	...	757
1893	...	...	...	619
1892	...	..	...	568

I doubt if any other hospital out of Calcutta can beat this record.

At Barisal 79, at Nasirabad 124, and at Faridpur only 10 have been performed out of the thousands which might and should have been performed.

151. The Commissioner inspected the following dispensaries:—

Dacca, Narayanganj, Nasirabad, Kishorganj, Netrakona, Jamalpur, Faridpur, Goalundo, Barisal, Patuakhali

His Honour the Lieutenant-Governor visited the Dacca Mitford Hospital and the Barisal Dispensary. The Inspector-General of Civil Hospitals paid us two visits.

152. The total income of the dispensaries from all sources was Rs. 87,208-3-10, and the total expenditure was Rs. 81,613-5-10½. Of the receipts, Rs. 28,788-7-6 was contributed by the Municipalities, Rs. 10,764-6-6 by District Boards, Rs. 2,327-14-6 by Government, and Rs. 45,327-3-4 by private charity. The District Boards might perhaps do more. Some of the municipal dispensaries cost more than the municipalities can well afford, owing to the heavy cost of superintendence. I think in these days an Assistant Surgeon on Rs. 100 per month could be found of sufficient capacity for the charge of such institutions. The gentlemen in charge of the private dispensaries at Tangail and Shontosh get Rs. 100 per mensem, and devote the whole of their time to their dispensary work.

XXVII.—LIBRARIES.

153. The office libraries at the head-quarters of districts and subdivisions are reported to be in good order.

Office libraries.

I find my own library contains much useless material, which I am weeding out. I am inclined to think Collectors' libraries may also be reduced in bulk. Some reduction was made in 1893-94 under my orders.

Public libraries.

154. Of the public libraries in this Division the principal ones are—

(1) Northbrook Hall Library at Dacca, founded in 1882 and containing 4,304 volumes.
(2) Hemango Library at Sherpur in the district of Mymensingh, containing 4,770 volumes.
(3) Town Hall Library at Mymensingh, containing 1,629 volumes.
(4) Barisal Public Library, founded in 1847, contains 1,830 volumes.

The Tangail and Manikganj subdivisions boast of small libraries. There are also several Bar libraries.

XXVIII.—MUSEUMS.

155. There are no museums in this Division, I am sorry to say.

Formerly there was a Central Committee at Calcutta of the Bengal Economic Museum with sub-committees in each district. This Committee was dissolved on the 1st April 1887, *vide* page 53, part I of the Bengal Administration Report for 1886-87. Nevertheless the Commissioner of Dacca (including

myself for 1892-93 and 1893-94) has gravely reported year by year that no meetings of the sub-committees were held. I find in 1893-94 all four Collectors report no meetings. For 1894-95 only one Collector, Dacca, reports that this long defunct Committee has held no meetings. This section will not appear in future reports.

XXIX.—LOCAL SELF-GOVERNMENT INSTITUTIONS.

156. In our Honorary Magistrates, in our village panchayats who control the rural police, and in our municipalities, we have such institutions. A proposal has been made, and has been partially sanctioned, to extend the control of the village panchayats to sanitary and other matters.

157. * * * *

District and Local Boards.

As observed before, these Boards are swamped by the legal and zamindari interests. The officials represent the masses.

All the District Boards, and most of the Local Boards, held a sufficient number of meetings. In Dacca Local Boards are rather remiss.

I am glad to be able to report that I still receive very satisfactory accounts of the working of District and Local Boards.

The Magistrate of Mymensingh, Mr. Earle, writes:—

"The District Board continues to be a very efficient and intelligent body of men, whose advice in all important matters I fully appreciate. I find them amenable to reason, while at the same time they hold decided opinions of their own. In short, the Boards of this district well fulfil the office of a council to aid the District Officers. Left to themselves, I fear they would not be sufficiently attentive to the interest of the public at large, as is amply proved by the fact that up to the year under review no serious attempt had been made to advance the cause of primary education among the masses, whereas secondary education has always received the most marked and praiseworthy consideration. As agents of the District Board, the Local Boards continued to work as well as can be expected of bodies of men whose hands are tied by want of a proper agency to carry out the ideas underlying the enactment of the Local Self-Government Act."

Mr. Herald, Magistrate of Faridpur, writes:—"It is difficult to imagine a large Committee which could work more harmoniously than does the Faridpur District Board. In many cases there were differences of opinion, but only as regards minor points of detail. The general policy of the Board received on all occasions the support of an overwhelming proportion of the members. As Chairman I have never had to give a vote on any matter. At meetings the members showed the same intelligent interest on the subjects under discussion, which I remarked last year as an agreeable improvement over some Boards I could name. Their chief fault is irregularity in attendance."

"The Local Boards," Mr. Herald adds, "have done the small amount of work allotted to them with fair success. I hope that by the additional responsibility of primary education thrown upon them for the first time this year, the effect will be an improvement all round."

Mr. Earle in Mymensingh has much extended the power of the Local Boards in the matter of primary education.

The Legal Remembrancer holds that in the case of a Hindu the fixed place of abode, section 13 of the Local Self-Government Act, means his ancestral home where his social and religious performances are performed. He distinguishes fixed place of abode, section 13, from resident within the area, section 9. The matter is of some importance, as a good many persons ordinarily resident with their families at the head-quarters stations of districts and subdivisions have family houses in other parts of the district.

The Local Board of Netrakona failed in five successive attempts to elect a Chairman or to ask the Local Government to appoint one, two-thirds of the members not having attended any of the meetings convoked.

158. Out of 226 members of municipal bodies, only 17 are merchants, traders, and money-lenders; the law, 70, is over represented; while the landed interest, 48, has quite its fair share of representatives.

Municipalities.

The following table shows the incidence of the municipal taxes per head of population in the Municipalities. The taxes paid by Government have been excluded from the calculations:—

Name of Municipality.			Incidence of taxes per head of population.
1			2
			Rs. A. P.
Dacca	...	...	1 0 3
Narayanganj	...	...	1 15 7
Nasirabad	...	...	1 2 1
Muktagacha	..	...	0 12 1
Jamalpur	...	...	0 6 4
Sherpur	..	...	0 6 3
Kishorganj	...	...	0 4 1
Bazitpur	...	...	0 3 11
Netrakona	...	...	0 5 0
Tangail	...	...	0 3 6
Faridpur	...	...	0 10 8
Madaripur	...	...	0 4 10
Barisal	...	...	1 0 7
Nalchity	...	...	1 0 9
Jhalokati	...	...	1 3 9
Pirojpur	...	...	0 3 9
Patuakhali	...	...	0 6 8

The proportion of the taxes paid by Government is very high in the following Municipalities:—

	Per cent.		Per cent.		Per cent.
Dacca	... 5·	Tangail	... 9·57	Barisal	... 18·0
Narayanganj	... 5·1	Faridpur	... 19·1	Pirojpur	... 6·8
Nasirabad	... 16·05	Madaripur	... 9·7	Patuakhali	... 7·6

It has hitherto been the custom to include the Government contributions in the incidence.

The following table shows the financial position of Municipalities in each district:—

District.	Opening balance.		Income during the year.		Total.		Total expenditure.		Closing balance.	
	1893-94.	1894-95.	1893-94.	1894-95.	1893-94.	1894-95.	1893-94.	1894-95.	1893-94.	1894-95.
1	2	3	4	5	6	7	8	9	10	11
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Dacca	16,233	8,532	1,92,592	2,02,332	2,08,825	2,10,864	2,00,293	2,02,134	8,532	8,730
Mymensingh ...	13,719	12,964	1,02,848	84,976	1,16,567	97,940	1,03,603	84,654	12,964	13,286
Faridpur ..	2,763	2,023	17,714	20,216	20,477	22,239	18,454	20,649	2,023	1,590
Backergunge ...	3,481	2,397	41,530	40,730	45,011	43,127	46,614	39,549	2,397	3,578
Total ...	36,196	25,916	3,54,684	3,48,254	3,90,880	3,74,170	3,64,964	3,46,986	25,916	27,184

The annexed statement shows the percentages of important items to the local expenditure of the Municipalities in this Division during 1893-94 as compared with other Divisions of this province:—

Name of Division.	Total expenditure.	General establishment.	Lighting.	Water-supply.	Drainage.	Conservancy.	Medical.	Public works.	Education.
1	2	3	4	5	6	7	8	9	10
	Rs.								
Burdwan	7,26,205	10·2	9·6	5·8	1·5	34·7	5·7	16·3	6·9
Presidency	5,28,253	12·5	6·6	5·9	3·9	27·6	7·6	22·07	3·8
Rajshahi	2,94,245	13·3	4·3	3·2	5·0	28·9	9·2	21·9	4·9
Dacca	3,39,058	9·2	4·0	14·6	5·0	26·4	13·2	19·3	1·7
Chittagong	70,701	11·9	3·3	1·4	3·5	25·1	13·1	23·6	11·9
Patna	6,91,600	9·6	3·7	·22	20·5	20·3	10·7	15·3	3·04
Bhagalpur	1,84,002	13·02	2·5	7·1	2·9	30·2	14·2	18·5	4·38
Orissa	1,00,240	10·5	4·6	·6	8·8	34·5	8·6	16·9	4·9
Chota Nagpur ...	66,222	15·3	3·1	7·08	2·1	26·6	15·7	12·4	5·4

We do better than our neighbours in cost of establishment, far better in water-supply. In medical we do well. We are far below other divisions in education, because so much education here is self-supporting.

The Commissioner inspected the following Municipalities:—

Faridpur.	Nalchiti.	Pirojpur.	Jamalpur.
Barisal.	Jhalokati.	Patuakhali.	Nasirabad.

The following statement shows the amount of fines realised during the year under the Cruelty to Animals Act XI of 1890. Curiously enough, the Subdivisional Officer of Narayanganj was not aware of the Act being in force in Narayanganj. His attention has been drawn to the Government notification. The Municipal Commissioners do not take a very lively interest in this matter. A movement is on foot at Dacca to organize an association for the prevention of cruelty to animals:—

NAME OF MUNICIPALITY.	Number of cases instituted in—	Amount of fines realised and credited.	
	1894-95.	1893-94.	1894-95.
1	2	3	4
		Rs. A. P.	Rs. A. P.
Dacca	8	5 0 0	3 0 0
Nasirabad	15	41 4 0	106 4 0
Muktagacha	11	20 2 0	55 0 0
Jamalpur	4	......	143 6 0
Sherpur	2	......	44 15 0
Netrakona	12	......	9 12 0
Tangail	4	......	1 8 0
Faridpur	26	......	7 7 0
Barisal	9 (Barisal, Jhalokati, Pirojpur and Patuakhali together)	2 0 0	16 4 0
Jhalokati		1 0 0	3 8 0
Pirojpur		0 2 0	0 10 0
Patuakhali		......	0 6 0

There were three prosecutions at Madaripur, two for carrying fowls hanging by the legs, and the other for drawing plough by a bullock unfit for the work on account of a sore on the shoulder. The Subdivisional Officer held these cruelties to be "the custom of the country," and acquitted the accused.

XXX.—EMPLOYMENT OF MUHAMMADANS.

159. Two subdivisions are in charge of Muhammadan officers, and one of the principal officials at Mymensingh is a Muhammadan. Out of 59 rural sub-registrars, 32 are Muhammadans. Out of 271 Honorary Magistrates, 49 are Muhammadans. Out of 1,906 jurors and assessors, only 248 are Muhammadans. On the different Boards we have—

	Total number of members.	Number of Muhammadan members.
District Boards	104	13
Local do.	196	34
Municipal Boards	223	39

We have now two Muhammadan Sub-Inspectors of Schools out of 27 Deputy and Sub-Inspectors. The teachers in the district Entrance schools are almost to a man Hindu.

Mr. Earle, Collector of Mymensingh, writes:—"Wherever there is any doubt as to the capacity of a Muhammadan for a post, I make a point of giving the candidate a fair trial by taking him on probation. In this way I prevent myself from being entirely guided by the opinions of others."

Mr. LeMesurier, Collector of Backergunge, writes:—"The claims of Muhammadans have been borne in mind when vacancies occurred, but suitable candidates are few, and as a rule rather high-flying in their ideas."

I think the claims of Muhammadans to employment under Government are fairly weighed.

XXXI.—POST OFFICE AND TELEGRAPH.

160. The postal business is extending, but not rapidly:—

District.	Number of post offices on 31st March—			
	1892.	1893.	1894.	1895.
1	2	3	4	5
Dacca	114	114	117	120
Mymensingh ...	118	121	122	129
Faridpur	94	79	80	81
Backergunge ...	66	67	69	76
Total ...	392	381	388	406

The increase in number of articles delivered is estimated to be 7·1 per cent., 5 per cent. in Dacca and Faridpur, 9 per cent. in Mymensingh, and as much as 10 per cent. in Backergunge:—

District.	Mail lines on 31st March.							
	Lines.				Miles.			
	Imperial.		Zamindari.		Imperial.		Zamindari.	
	1894.	1895.	1894.	1895.	1894.	1895.	1894.	1895.
1	2	3	4	5	6	7	8	9
Dacca	58	58	16	16	495	487½	208	208
Mymensingh	57	58	28	28	483	486	481	483
Faridpur	35	36	21	21	208	212	344	338
Backergunge	21	23	25	30	172	190	709	756
Total ...	171	175	90	95	1,358	1,375½	1,742	1,785

Five post offices in Dacca, 15 in Mymensingh, 3 in Faridpur, and 6 in Backergunge are supported by the Zamindari Dák Fund. One zamindari dák office in Faridpur has been converted into Imperial. It would be a good thing if all offices were made Imperial.

Though most of our post offices are Imperial, our lines are largely supported from local sources. The zamindari lines are managed by the Postal Department, and ordinary letters, &c., are carried over them on the same terms as over other postal lines. But official letters, &c., concerning magisterial business are carried free of service stamps over such lines. This does not apply to letters, &c., concerning collectorate business, though of course Magistrates' and Collectors' letters go in one cover. In my report last year I suggested it was time this distinction between different postal lines was abolished. An instance of its inconvenience has lately occurred. As parcels containing criminal courts' records are carried free of service postage over local lines, the Postal Department give no receipts for them as they do for ordinary parcels. A valuable record having been lost, a long correspondence ensued, which has resulted in the Postal Department giving receipts for such parcels, not as parcels, but as registered letters.

Rupees 55,453 was spent in the management of the zamindari dák lines and offices in this Division from the zamindari dák cess:—

		Rs.
Dacca	... ...	9,921
Mymensingh	... ...	19,517
Faridpur	... ...	9,576
Backergunge	... ...	16,439
	Total ...	55,453

The following statement compares the sales of ordinary and service postage stamps in 1893-94 and 1894-95 :—

District.	1893-94.		1894-95.	
	Ordinary.	Service.	Ordinary.	Service.
1	2	3	4	5
Dacca ...	85,160	8,809	92,386	8,740
Mymensingh ...	61,477	6,178	65,972	6,870
Faridpur ...	44,351	4,123	40,499	4,265
Backergunge ...	45,497	6,248	48,400	8,520
Total ...	236,485	25,358	247,257	28,395

The increase in service postage is deplorable.

161. There has been an increase in the number of accounts in the Post Office Savings Banks in all districts. The amount deposited has increased in all districts except Dacca. On the whole the amount deposited has increased 5·6 per cent., in Mymensingh the increase amounts to 17 per cent., in Faridpur 6 per cent., and in Backergunge 4 per cent. In Dacca the decrease is 1·3 per cent.

Dacca has sent away less and has received more in money-orders than in the preceding year. Last year this district paid some eight lakhs more than it issued; in the year before some twelve lakhs. This year the difference is some fifteen lakhs. Only Backergunge has sent away a little more than in the previous year. All districts have received more than in 1893-94. Mymensingh and Backergunge have as usual sent away more than they received. Faridpur as usual has received more than it has sent away. On the whole the Division has sent away Rs. 2,53,000 more than it has received. In 1893-94 the difference was Rs. 13,60,000, in 1892-93 Rs. 6,19,000. On the whole there is a very small increase in money-order business.

There is no increase or decrease worth mentioning in the use of money-orders for remitting land revenue. They were less used for remission of rent in Mymensingh than in the previous year.

162. The post office is now made more use of for the service of processes. It has been proposed to serve certain revenue notices by post in addition to those already so served, a list of which I gave in my report for 1893-94. Indirectly, too, the post office is daily growing more useful in this direction, in that process-serving establishments are being distributed. Process-servers send in executed and receive new processes by post.

163. The District Board of Backergunge pays the following subsidies to steamer companies:—

				Rs.
To B. C. F. & Co.,	for Barisal	and Khulna steamer service		5,400
To ditto	ditto	and Patuakhali	ditto	1,200
To I. G. S. N. Co.,	ditto	and Chandpur	ditto	1,500
				8,100

And both in Backergunge and Faridpur some small contributions are made from the Zamindari Dák Fund.

164. The combination system of post and telegraph business is developing.

DISTRICT.	Number of combined offices.		Number of messages sent.		Number of messages received.	
	1894.	1895.	1894.	1895.	1894.	1895.
1	2	3	4	5	6	7
Dacca ...	6	13	8,819	14,591	9 513	16,750
Mymensingh ...	10	14	8,321	10,020	8,774	10,244
Faridpur ...	3	4	3,156	3,762	3,082	3,936
Backergunge ...	4	5	6,870	7,884	6,229	7,708
Total ...	23	36	27,166	36,257	27,598	38,638

The following new telegraph lines have been opened:—

Mymensingh ... (1) Mymensingh to Subarnakhali.
(2) Kishorganj to Bhairab.
(3) Ditto to Bajitpur.
(4) Ditto to Karimganj.

Backergunge ... (1) Nalchity to Pirojpur.
(2) Jhalokati to Backergunge.

We have still three subdivisions without telegraphic communication,—Netrakona, Bhola, and Patuakhali.

165. When the telegraph line from Barisal to Khulna was opened, some of the resident zamindars and merchants verbally agreed to guarantee any loss for five years, but unfortunately no written agreement was taken from them. The loss was Rs. 3,279, not a penny of which has been recovered, and the Government has been advised that the expense of civil suits is prohibitive.

XXXII.—FAIRS.

166. There are a good many fairs in this Division, of which the following are the most important:—

Fairs.

Dacca ... ... (1) Kartick Barani fair.
(2) Nangalband fair.

Mymensingh ... (3) Jhulan méla.
(4) Jamalpur méla.

Faridpur ... (5) Faridpur méla.
(6) Goalundo ghat méla.

Backergunge ... (7) Kalisuri méla.
(8) Lákatia Rásh fair.
(9) Kalaskáti fair.

The Kartick Barani fair was held as usual on the bank of the Dhaleswari river close to the head-quarters of the Munshiganj subdivision. It was opened on 10th December 1894 and lasted up to 12th February 1895. The usual sanitary arrangements costing Rs. 567 were made at the cost of the proprietors, to whom the fair is very profitable. A small police force and a Hospital Assistant were deputed. The number of visitors is estimated to have been 122,322 against 102,000 in the previous year. With the increased attendance the business increased considerably. The value of goods brought for sale and of goods actually sold is reported to be Rs. 16,14,838 and Rs. 15,38,242, against Rs. 15,91,768 and Rs. 8,27,150 respectively in the previous year.

The Nangalband bathing festival, which takes place at a point where the old river Brahmaputra has dwindled into a blind khal four miles south of Narayanganj, to which the five Pandavas are said to have extended their travels, was held in the beginning of April and was of unusual sanctity owing to its falling on Wednesday. It is said some 350,000 persons attended it. The visitors were chiefly old women. The site is not a good one. There is very little open ground. Behind the site (a narrow strip along the bank of the river) are villages imbedded in jungle. It was difficult to enforce sanitary precautions. Such arrangements as were possible were made. There were 16 cases of cholera, nine of which ended fatally, and there were a few

accidents. A writer in the *Samay* states that the number of people who died from cholera and injuries received in the course of the rush and tumult was very large, while the number seriously injured was by no means inconsiderable. These statements I have been unable to verify.

Rupees 215-12-8 was spent by the Local Board on conservancy.

A native doctor with a stock of medicines attended the fair, and a police force consisting of four inspectors, three sub-inspectors, six head-constables, and 85 constables, and all the chaukidars of the surrounding villages, were deputed to maintain order.

I visited the festival myself. The bathing takes place from six ghâts within a space of about three-quarters of a mile. The bathers bathe from all these ghâts in succession, and only about five hours are auspicious. The water is shallow, the khal narrow and full of boats. It was very difficult to control the crowd.

Mr. Faulder writes :—

"There were enormous crowds of pilgrims, chiefly old women, swarming to the méla from all directions. Owing to their following so many routes and to their being scattered far and wide, it was impossible to help them *en route*. They neither made nor found any adequate arrangements for their board and lodging on their way to the méla; the weather was inclement, and they had to suffer great hardships. Cholera of course broke out, on the return journey especially, and started an epidemic all over the district."

The fair at the Goalundo ghât is a new one. It is a kind of agricultural exhibition. Samples of various kinds of paddy, sugarcane, potato, clay figures, &c., were exhibited. Rupees 3,612 was realised as subscription, of which Rs. 208 was distributed as prizes to the exhibitors. Prizes were given for boat, pony, and foot races. Jatras and other amusements were provided.

XXXIII.—POUNDS.

Pounds.

167. The following statement shows the pound business of the year as compared with that of the preceding year:—

District.	Pounds under the District Board.				Pounds under the Municipality.			
	1893-94.		1894-95.		1893-94.		1894-95.	
	Number.	Receipts.	Number.	Receipts.	Number.	Receipts.	Number.	Receipts.
1	2	3	4	5	6	7	8	9
		Rs.		Rs.		Rs.		Rs.
Dacca ...	175	6,680	179	6,077	12	1,865	12	2,034
Mymensingh ...	246	33,821	257	33,805	12	4,817	13	4,602
Faridpur ...	122	6,050	125	5,662	6	262	6	614
Backergunge ...	80	15,003	82	11,599	5	698	6	472
Total ...	623	61,563	643	57,143	35	7,642	37	7,722

All the pounds outside the municipal limits are under the control and management of the District Boards. These as well as the municipal pounds are generally farmed out at public auction to the highest bidders. The Narayanganj pound in Dacca and the Barisal pound in Backergunge are held under the direct management of the Municipality.

In spite of an increase in the number, there has been a general decrease in the income, especially in Backergunge. Want of competition, high floods, and bad times are given as reasons for the decrease. Municipal pounds are doing rather better than district pounds.

A good deal of inspection is done and the new forms have been generally introduced. It is suggested that stricter supervision must result in diminished income. Supervision is, however, strictest in Mymensingh, which alone is maintaining its income. In this district the jurisdiction, so to say, of each pound has been fixed, the District Board is providing sheds, and all pounds are provided with teak-wood tariff boards. There is a proposal to employ a special officer to settle pounds and ferries. There are complaints of illegal impounding. Pound-keepers are said to employ impounders who get one or two annas per head of cattle impounded.

XXXIV.—SOCIAL AND POLITICAL INSTITUTIONS, STATE OF PUBLIC FEELING, AND THE PUBLIC PRESS.

Political institutions.

168. The Land-holders' Association at Dacca met three times during the year and discussed certain projects of law which had been before the Bengal Council. The Association as was natural, protested against the provisions of the Police Act Amendment Bill which were designed to make landlords pay for the disturbances they promote.

The Zamindars' Association at Mymensingh and the branches of the Indian Association at that place and at Jamalpur have not done much.

The Land-holders' Association at Sherpur is said to be the only institution in the Mymensingh district that has any political importance. The Association has 51 members with Rai Radha Ballav Chaudhri, Bahadur, as its Secretary. It held four sittings during the year under report, the average attendance of members being 27. It has recently resolved to move the High Court to vest the munsif at Sherpur with powers to grant certificates under Acts VII of 1889 and VIII of 1890 on the ground that parties are put to needless expense in having to go to Mymensingh to obtain such certificates. This Association was erroneously reported last year to be a branch of the Indian Association. It is, however, independent, and does not in any way share the views of the Association in question.

In Barisal the People's Association held meetings to petition Parliament to give effect to the Resolution of the House of Commons on the Simultaneous Examination Question. It is said that a petition numerously signed was sent to Parliament. The Association submitted their opinion on some Bills now before the Bengal Council. It sent delegates to the Indian National Congress and the Bengal Provincial Conference.

The People's Association at Faridpur, of which the Chairman of the local Municipality, Babu A. C. Mazumdar, is Secretary, is the only institution in the district which takes much interest in public affairs. It held three general public meetings, one in support of simultaneous examination for Civil Service, another with a view to affording relief to the distressed people of Kotwalipara thana, and a third for electing delegates to the 11th session of the Indian National Congress. It also held three committee meetings to consider and report on certain proposed new laws.

Mr. Morgan-Brown visited Dacca, Mymensingh, and Faridpur in the interests of the English Congress Committee. He collected Rs. 1,227 in all.

Social Institutions.

169. The Students' Welfare Association at Dacca exhibited considerable life and vigour. Ordinary meetings were held once a fortnight; philosophical and moral subjects were discussed. The Secretary of the Association, the Rev. Wright Hay, of the Baptist Mission, takes much interest in its work.

The Anjamani Islamia in Mymensingh is a branch of the Central Muhammadan Association of Calcutta. It has at present 1,600 members with Hafez Muhamed Ali Khan of Karatia as its President. It has 15 branches in the district. The Association has been trying to establish a madrassa and a public library at the head-quarters station of the district.

The Surhid Sabha of Faridpur opened out relief centres in the Madaripur, Kotwalipara, and Ainpur thanas, where more than Rs. 5,000 collected by public subscription is reported to have been spent in affording relief to the most needy. The Sabha also spent a little over Rs. 300 in free distribution of homœopathic medicines when cholera prevailed. There were two general meetings of the institution during the year.

In Backergunge four new social institutions have been started—

(1) The Barisal Students' Association.
(2) The Students' Union, B. M. Institution.
(3) The Barisal Temperance Society.
(4) The Anjaman Hemayat Islam.

The object of the Students' Association is to promote the general welfare of the student community. During the course of the year lectures were delivered by the Rev. Mr. Whitehead, M.A., and Babu Kali Charan Banerji, M.A.,

on the formation of character. The Association got up an entertainment for Entrance candidates from the mufassal.

The Anjuman Hemayat Islam owes its existence to the exertions of Maulvi Syed Muhammed Hafez. Its object is to promote the interest of the Muhammadan community. It is composed of the leading Muhammadan gentlemen of the place. With the generous help of Nawab Ahsanullah Bahadur, of Dacca, the Anjuman has secured a suitable site for the foundation of a boarding-house for the Muhammadan pupils attending the schools at Barisal. At a recent public meeting substantial subscriptions were collected, and many promises of support received in furtherance of that object.

Besides the institutions named above, there is a Sarasvat Somaj at Dacca for the encouragement of Sanskrit learning.

State of public feeling.

170. I have little or nothing to report on this subject. The landlords naturally objected to pay for suppressing the riots they got up, and organised meetings against the Police Act Amendment Bill in all districts. They also view with great disfavour the proposal to make them open out obstructed drainage. The proposals regarding Local Self-Government are viewed with disfavour by the educated classes. But, generally, I have been surprised to find how little opposition there has been to the reorganization of the rural police, which entails extra taxation generally, and a good deal of unpaid service on individuals.

The Baidyas of Eastern Bengal do not wear the sacred thread as those of Western Bengal do. Some of the former have lately taken to the thread, and have thereby given some offence, especially to the Kayastha community. The object is to make marriages between the two classes of Baidyas possible.

Hindus and Muhammadans generally get on very well together in this Division. The Muhammadans, though in the majority, do not interfere with the idolatrous practices of the Hindus. Mr. Earle reports that "at the time of the last Bakrid festival there was some likelihood of a breach of the peace at Tangail in connection with the question of cow-killing, but timely preventive measures having been taken, the festival passed off quietly." He adds that "some of the Hindu zamindars of that subdivision very foolishly take offence because their Muhammadan raiyats kill cows on their estates, and levy fines from them on this account."

At Barisal an attempt was made to get up an agitation over the District Board's decision to levy the full rate of road cess, and a certain number of meetings were held and placards posted, but the attempt fell flat.

State of Public Press.

171. The monthly newspaper *Faridpur Hitoishini* has ceased to exist. The *Dacca Bharatbasi* no longer appears. A new monthly paper, the *Samiti Sahachar*, has appeared at Barisal, and a new weekly, the *Charumihir*, at Mymensingh. So we have still nine newspapers. Our four periodicals have declined to three, the *Santi* having fallen through.

The editor of the *Bengal Times* was prosecuted by one of the Deputy Magistrates at Dacca for defamation. The prosecution was withdrawn on the editor making an apology. This is not the first time this editor has had to apologise.

The *Charumihir* of Mymensingh discusses matters of local interest, and the Magistrate finds the publication useful in discovering faults in the administration in various quarters of the district. There can be no doubt that in this regard the native press serves a very useful purpose.

As reported last year, the periodicals are mostly religious.

The publishers of the *Dacca Prokash*, the *Sarasvat Patra*, the *Kashipur Nibasi*, the *Charumihir*, now supply me with copies free of cost. I am very glad to be able to refer to these papers.

XXXV.—CHARACTER OF OFFICERS.

172. In my report for 1892-93, I wrote, with the exception perhaps of Mymensingh, the administration of the districts has been fairly successful. The change wrought in the administration of this district, during the two years he has been in charge, by Mr. A. Earle, is simply marvellous. I consider this

officer one of the ablest administrators I have ever had under me. Mr. J. L. Herald found Faridpur, as I have described it in former reports, to say the least laxly governed. He has already greatly strengthened the administration of this district. Succeeding that able officer Mr. H. Savage, Mr. H. LeMesurier could not well improve in Backergunge. Though hampered by special difficulties (see paragraph 16 above), he has succeeded in maintaining the administration of this difficult district at its previous high level. Among Subdivisional Officers, Maulvi Fazlal Karim at Madaripur, Maulvi Faizuddin Hossein, formerly at Perozepur, now at Netrakona, and Babu Prosonna Kumar Karforma at Patuakhali, are distinguished. Babu Ram Sadan Bhattacharjee at Manikganj is an able officer; but while I was away the Officiating Commissioner had occasion to comment in very severe terms on his conduct in a particular case.

173. The following officers were in training in this Division in the course of the year:—

DISTRICT.	Name of officer.	Nature of employment.	Date from and to which employed.
1	2	3	4
Dacca ...	H. T. S. Forrest, Esq. ...	Assistant Magistrate ...	From 1st April 1894 to 31st March 1895.
Do. ...	D. Weston, Esq. ...	Ditto ...	From January to 31st March 1895.
Mymensingh ...	B. C. Sen, Esq. ...	Ditto ...	From 14th April 1894 to 31st March 1895.
Dacca ...	L. J. Clarke, Esq. ...	Offg. Deputy Magistrate	From 1st April 1894 to 17th May 1894.
Do. ...	R. A. Stephen, Esq. ...	Ditto ...	From 16th October 1894 to 31st March 1895.
Do. ...	Ditto ...	Probationary Deputy Collector.	From 29th May 1894 to 15th October 1894.
Backergunge ...	Babu Kumud Bundhu Das Gupta.	Ditto ...	From 29th May to 23rd September 1894.
Ditto ...	Ditto ditto ...	Offg. Deputy Collector ...	From 24th September 1894 to 31st March 1895.
Faridpur ...	Babu Kali Mohon Sen ...	Probationary Sub-Deputy Collector.	From 2nd June to 31st October 1894, and then Sub-Deputy Collector.
Ditto ...	,, Reboti Mohan Chakrabutty.	Offg. Sub-Deputy Collector.	From 4th June 1894 to 3rd March 1895.

In the course of my inspections I have satisfied myself that proper attention has been paid to the training of these officers. The senior Assistant Magistrates were taught surveying. Mr. Weston joined only in January 1895. Messrs. Forrest and B. C. Sen were deputed to the Backergunge district and placed under the Settlement Officer, Babu Pyari Mohan Bose, in Government estates Hessamuddin and Tooshkali. Mr. Forest arrived at Barisal on the 21st February 1895, and Mr. Sen on the 20th January 1895, and both remained in settlement camp up to 16th March 1895.

XXXVI.—CONDUCT OF ZAMINDARS.

174. In my report on the Land Revenue Administration, with reference to the relations between landlords and tenants, I wrote:—"The raiyats in this Division are generally too strong for the landlords. The latter do not often venture to harass the former."

The Collector of Mymensingh writes:—"On the whole the raiyats in the Mymensingh district are well off, and though they will tolerate a good deal, they know how to combine, and have sufficient means at their disposal to make combination a serious matter for the landlord. In some villages the tenants are able to withhold rents, while the landlords are afraid to take coercive measures lest their men be hauled before the Criminal Court."

Besides the usual abwabs, a special enquiry made at the commencement of the year established the fact that with a few honourable exceptions the zamindars and talukdars (in Backergunge) habitually charge their tenants with road

and public works cesses at rates varying from 1 to 2¼ annas in the rupee. From Mymensingh and Faridpur also it is reported that road and public works cesses are realized from the tenants at illegal rates. Rupee 1-4 on every mill for crushing sugarcane is new to me. Cesses on funerals are said to interfere with cremations, while those on tanks to a certain extent prevent their construction.

In less advanced districts I have known zamindars sell titles—sardar, chaudhri, &c. This practice is said to prevail to some extent in Backergunge.

Dacca.

175. The Nawab Ahsunullah Khan Bahadur, C.I.E., has fully maintained his reputation as a liberal and public-spirited landlord. He has given a further donation of Rs. 2,781 in aid of the ward for native females, which has been erected in connection with the Mitford Hospital at Dacca. He has given us Rs. 2,000 for the Pasteur Institute and Rs. 500 for the up-keep of the ancient monuments in the Dacca district. He lately brought up the famous "Star" Theatre Company from Calcutta, and entertained some 2,000 persons with their excellent performances. Raja Rajendra Narain Rai Bahadur of Bhowal, Raja Srinath Rai of Bhagyakul, and the zamindars of Teota, have maintained their character as loyal, liberal, and law-abiding zamindars.

There have been some disturbances on the char lands in the Narayanganj subdivision. The Magistrate complains that non-resident landlords do not sufficiently control their subordinates.

Mymensingh.

176. The year has been an exceptionally peaceful one, and the evils of absenteeism I noticed in last year's report have not been so conspicuous.

Raja Surja Kant Acharji of Muktagacha has continued to act in accordance with the wishes of the authorities. Certain matters in dispute between the Raja and his cousin Babu Jagat Kishore Acharji were satisfactorily settled by the intervention of the Collector. This cousin, like the Raja, a very wealthy and influential zamindar, has given some trouble by setting up new háts in proximity to old-established ones.

Babu Jogendra Kishore Rai Choudhuri of Ramgopalpur has maintained his reputation as an exemplary landlord. He was made a Rai Bahadur on the Queen's birthday. Babu Brojendra Kishore Rai Choudhuri of Gouripur is still an absentee. His estates are not well managed. Regret is expressed that this gentleman does not do more for the district.

The Maharaja of Shusang is unfortunately at feud with his Hajang raiyats. He wants them to pay fair rents instead of the services rendered in former years. But his co-sharers will not join him in an application under section 103 of the Tenancy Act.

Srimati Jhanhavi Chaudhurani and Srimati Bindubasini Chaudhurani, whose amla have been a fruitful source of trouble in the Tangail subdivision in former years, are being closely watched. The former lady rendered herself conspicuous on the occasion of the last Bakrid festival by bullying one of her tenants who had killed a cow, though the sacrifice took place outside the limits of her zamindari. She was warned, and her agent was bound down to keep the peace.

Faridpur.

177. The conduct of zamindars, the principal of whom are non-resident, continues to be generally satisfactory. The Collector has been able to collect a sum of Rs. 770 towards the erection of a charitable dispensary at Faridpur. The Administrator-General was unable to render any help to the charitable dispensary lately established at Baliakandi from the Paikpara estate, because the will of the late proprietor, Kumar Indra Chandra Singh, gave him no such authority.

The Collector writes:—"The big zamindars known as the Narail zamindars, whose income from the district is said to be enormous, were conspicuous by their refusal to join in any charitable object."

Babu Bepin Behari Rai of Manikdaha in the Sadar subdivision, and Syed Abdur Rab Chaudhuri in the Madaripur subdivision, are distinguished among the resident zamindars for their liberality and good management. The latter gentleman wears some half-a-dozen gold medals presented by his grateful tenantry and others. He has a school, a madrassa, a dispensary, a public library, and a masjid, which he either has established or maintains in an efficient condition.

178. Beyond donations of Rs. 2,000 and Rs. 500 by Nawab Ahsunullah Bahadur and Maulvi Syed Monazzem Hossein, Khan Bahadur, towards the construction of a Muhammadan boarding-house at Barisal, and one of Rs. 600 by Babu Bissessur Rai Chaudhri to the new dispensary at Patuakhali, there are no acts of public beneficence to record.

Backergunge.

The Dacca Nawab's estates continue to be well managed, and his amlas are kept well under control. The Nawab maintains two charitable dispensaries, a beneficence I can conscientiously recommend to other zamindars.

Since its release by the Court of Wards in September last, the troubles on the Haturia estates have shown signs of recrudescence. The Magistrate fears that nothing will ever bring home to the proprietors the necessity of union among themselves and of fair dealing with their tenants.

XXXVII.—MISCELLANEOUS.

179. Correspondence between Collectors and the Legal Remembrancer, on the subject of civil suits, passes through my office, and I exercise a general supervision over the business. But the annual returns are submitted to the Legal Remembrancer direct. The following statement gives the results of our litigation in the Civil Courts for 1894-95:—

Civil suits.

Government Litigation.

	Original cases.	Appeals before—	
		Lower Court.	Higher Court.
1	2	3	4
Decided in favour of Government ...	17	5	...
Do. against Government ...	14	2	...
Compromised, remanded or withdrawn	5	...	1
Total ...	36	7	1
Percentage in favour of Government ..	54·8	71·5	...

Wards' Litigation.

Decided in favour of Court of Wards ...	23	2	...
Do. against the ditto ...	67	...	...
Compromised, remanded or withdrawn	4	1	...
Total ...	93	3	...
Percentage in favour of Court of Wards	25·5	100	...

The results cannot be compared with those of the previous year, as the Legal Remembrancer's printed report for 1893-94 has not yet been supplied to this office. We are apparently very unsuccessful in our Court of Ward's litigation. But I observe that out of 67 cases lost, 60 are rent-suits in which the Court, representing the Dakhinshahbazpur properties, intervened to dispute the extent of the claim of a co-tenure-holder. In all these cases the Court's contention was the same.

I do not often give an opinion which may clash with that of the Legal Remembrancer. But in my letter No. 2891, dated 8th December 1893, I deprecated the institution of a suit for ejectment against Babu Jagat Kishore Acharjee, from some land occupied by him in the Mymensingh station. We have lost the suit, and the present Legal Remembrancer finds no ground for appeal.

180. The question of the effective publication of Government notices and orders and of local notices and orders which are at present buried in the *Calcutta Gazette*, English and vernacular, has been before me. I have suggested the vernacular press as a useful and cheap means of advertisement. Notice boards at all post-offices, such as they have in Sylhet, have been proposed.

181. I have pursued my campaign against unnecessary registers and returns. I have succeeded in abolishing the practice of registering papers in the revenue record-room, which are to be destroyed after two years. We register some 20,000 revenue processes in two process registers instead of one, but I cannot persuade the Board of Revenue that this is unnecessary. I have not been able to induce the High Court to abolish their register B (1), Petitions.

Stationery and forms.

182. The subject of stationery and forms receives attention. Generally a decrease in consumption as compared with the previous year is reported. Short letters are now written on the inside of the receipt docket slips of the office addressed, and short drafts on the inside of issue docket slips.

Forms have been kept under the charge of a special clerk or muharrir, and regular account books have been opened to show their consumption.

The horrible practice of opening new registers before the old registers were filled up has been put a stop to. We are now even recovering unused forms from their limbo, the record-room. More care is taken to make each page of a register contain as many entries as possible. Where columns contain much writing and require much space they are allowed to overflow into columns which contain little writing and require perhaps only one line.

I have reduced expenditure on telegrams in my office to Rs. 81. I am afraid there is little decrease generally in the consumption of service postage stamps. Covers issuing from my office and from district offices are now filled up to the weight of ten tolas. Parcels can often be sent more cheaply by special messenger.

183. I submitted the Annual Reports on the following dates :—

		Latest date.
Crime report ...	... 9th March 1895	... 15th March 1895.
Report on the extermination of wild animals and venomous snakes.	25th " "	... 1st " "
Arms Act report ...	... 1st April "	... No date fixed.
Customs report ...	... 29th " "	... 1st May 1895.
Salt report ...	... 29th " "	... 1st " "
Income-tax ...	... 18th May "	... 31st " "
Land revenue ...	... 28th " "	... 30th " "
Stamp report ...	... 30th " "	... 1st June "

184. We have had our fair share of distinguished visitors. His Honour the Lieutenant-Governor, with a brilliant suit, visited Faridpur, Dacca, and Backergunge in July. His Excellency the Commander-in-Chief and the Hon'ble the Chief Justice of the Calcutta High Court and Mr. Monmohan Ghosh, Barrister-at-Law, were the guests of Raja Surja Kanta Acharjee at Mymensingh in February last, and shot a *rogue* elephant.

185. A most unfortunate case of embezzlement of public funds occurred at Madaripur. Money sent in by the police (other than fines) has been dealt with at this subdivision, since the transfer of the Court Inspector's duties to the Magistrate's amla, to say the least, in a desultory manner. Manuscript instead of printed counterfoil receipts were given, and the police appear to have accepted almost anyone's receipt. The head clerk, who was on the eve of his retirement, received, but did not pay into the treasury, Rs. 320 of such moneys. When caught he produced the money. He was convicted by the Magistrate, and the conviction was upheld by the Judge on appeal. The High Court, however, held that though he had kept the money some months, he had not converted it to his own use. He as well as the nazir have been dismissed from Government service. There were several embezzlements of municipal funds.

186. When I came here I found all letters went to record-room for reference. We now keep two years' files in the office (in accordance with Board's Rule 13, section 1, page 4 of the Records' Manual), and do all our referencing, so far as these files are concerned, in the office. This much facilitates work.

XXXVIII.—GENERAL REMARKS.

187. This year, on the whole, though we inherited the burden of the bad seasons of the two previous years, the seasons have worked in our favour. Yet I can only point to progress in two or three directions. Unquestionably we have made an advance in the matter of police. I do not say we have yet a really effective police force, but it is more effective than it was, and is daily improving as our reorganization of the rural branch progresses. Honorary Magistrates have been a greater relief to our paid staff than in former years, and I take this opportunity of acknowledging their excellent services. We have made some progress towards the separation of judicial and executive functions. The principle of Local Self-Government has been at last admitted, and we are within measurable distance of the establishment of parish or township councils. Process-serving, though not yet established on a proper basis, has been much improved. We are even doing something for tow-paths in some districts. Generally I think the above sections show that even where I cannot point to real advance, still there has not been retrogression. For this result all my subordinates are more or less responsible. In my Land Revenue Report I have given the first place to Mymensingh, under Mr. Earle. Paragraphs 6, 16, 18, 48, 95, 96, 101, 134, 136, and 168 above show that this district now takes the first place generally. I do not mean to say that Backergunge has retrograded under Mr. LeMesurier. Mymensingh has made greater progress because there was so much more room for improvement. Faridpur under Mr. Herald has no doubt stolen a march on Dacca, which must now be looked on as the worst administered district in the Division: see paragraphs 1, 48, 51, 54, 88, 90, 134. This district has been somewhat unfortunate in changes and in short establishments. In taking leave of the year 1894-95 my feeling is that we might have done much more than we have done for the improvement of the administration and the good of the people, and that our failure to do more than we have done has not been altogether our own fault.

RESOLUTION ON LAND REVENUE ADMINISTRATION OF BENGAL FOR 1894-95.

REVENUE DEPARTMENT—LAND REVENUE.

Darjeeling, the 12th September 1895.

RESOLUTION—No. 495T.—R.

READ—

The Report of the Board of Revenue on the Land Revenue Administration of the Lower Provinces for the year 1894-95.

The report follows the lines laid down in previous years, and presents, as usual, a synopsis of the main statistics and variations of the Land Revenue and the several branches of the administration connected with it. It is exactly the same length as last year, and has been submitted in time; the maps have been since received. Their usefulness in illustrating the progress of the survey and settlement work of the year has been previously acknowledged, but they should be in the hands of the Board while the report is being written.

COLLECTION OF THE LAND REVENUE.

Standards of collections.

2. The Lieutenant-Governor has in previous Resolutions prescribed standards of success in the collection of the current demand of the Land Revenue in the several classes of estates, and has repeatedly called attention to the orders of Government, and endeavoured to encourage officers not to be satisfied with attaining the minimum percentages which will protect their work from unfavourable criticism. The Board have merely recorded the facts that certain districts came up to the standards, and that other districts have fallen more or less grievously short of them. Explanations of the deficiencies are given in a few cases, but there is little to indicate whether those explanations should be accepted as sufficient or not; and some of the officers in charge of the districts most unfavourably signalised—for instance, Shahabad and the 24-Parganas, Saran and Monghyr—are included among those brought to the favourable notice of Government. The Lieutenant-Governor would have been glad if the Board had laid more stress on the personal responsibility of those Collectors who fail to attain the minimum percentages required.

Financial results.

3. The current demand on account of the land revenue of the Lower Provinces for the past five years is shown in the following table:—

CLASS OF ESTATES.	1890-91.	1891-92.	1892-93.	1893-94.	1894-95.
1	2	3	4	5	6
	Rs.	Rs.	Rs.	Rs.	Rs.
I.—Permanently-settled estates ...	3,22,91,318	3,22,47,951	3,22,63,793	3,22,65,896	3,22,61,833
II.—Temporarily ditto ...	26,91,601	26,76,096	27,10,912	28,10,713	28,21,520
III.—Estates held direct by Government.	31,84,778	32,38,128	33,97,627	34,08,777	34,84,498
Total ...	3,81,67,697	3,81,62,175	3,83,72,332	3,84,85,386	3,85,67,851

The current demand, which is the real test whether the Land Revenue of a Province is progressing, was higher than in the previous year by

Rs. 82,465. The increase in four years amounts to three lakhs of rupees in Class III (of estates held direct by Government), and is derived from resettlements of Government estates, the revision of khas mahal rent rolls, and the transfer of estates to this class.

4. The demands, collections, remissions, and balances for the same period of five years are exhibited in the following statement:—

Year.	Demand.			Collections.			Remissions.	Balances.			Percentage of total collections to total demand (column 7 on column 4).	Percentage of total collections to current demand (column 7 on column 2).	Percentage of current collections on current demand (column 5 on column 2).
	Current.	Arrear.	Total.	Current.	Arrear.	Total.		Current.	Arrear.	Total.			
1	2	3	4	5	6	7	8	9	10	11	12	13	14
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.			
1890-91 ...	3,81,67,697	22,46,426	4,04,14,123	3,67,33,468	18,52,435	3,85,85,893	43,066	14,30,852	3,54,812	17,85,164	95·47	101·8	96·2
1891-92 ...	3,81,62,175	17,09,912	3,98,72,087	3,69,87,653	13,52,750	3,83,40,403	50,166	11,67,045	3,14,473	14,81,518	96·15	100·46	96·92
1892-93 ...	3,83,72,332	15,04,778	3,98,77,110	3,70,21,735	11,46,319	3,81,68,054	86,566	13,33,767	2,88,733	16,22,500	95·71	99·46	96·48
1893-94 ...	3,84,85,386	16,11,648	4,00,97,034	3,72,03,505	12,39,748	3,84,43,253	1,21,405	12,85,118	2,67,258	15,52,376	95·87	99·89	96·66
1894-95 ...	3,85,67,851	15,66,095	4,01,33,946	3,72,10,247	12,99,078	3,85,09,325	66,741	13,27,462	2,10,418	15,37,880	95·95	99·84	96·48

Collections, balances, and remissions.

5. While the current demand increased by Rs. 82,465 over that of 1893-94, the current collections rose by only Rs. 6,742, so that the percentage of current collections on current demand receded from 96·66 to 96·48 (the same percentage as in 1892-93). The average percentage of column 14 of this statement for five years is nearly 96·55. This is a considerable improvement over the percentages of the years 1887-88, 1888-88, and 1889-90, which were 95·37, 92·97, and 95·02 respectively. The collection of arrears has increased by nearly Rs. 60,000, so that the total collections were about Rs. 66,000 higher than in 1893-94. The current balances are higher by Rs. 62,344, while the arrear balances have been diminished by Rs. 56,840, so that the total balances are about Rs. 5,500 higher. As in four years the balances have been reduced by 2½ lakhs, there is no discredit in the fall in the percentage recorded in column 13. The remissions were Rs. 86,741, of which over Rs. 80,000 were in Class III. The remissions of grace were Rs. 40,769, granted, as usual, on account of failure of crops and local causes, chiefly in the 24-Parganas and Midnapore. It is not clear from the Board's report how these differed from some of the remissions of right, when it is stated that in Puri Rs. 9,939 were remitted principally on account of loss of crops by flood, and Rs. 2,230 in Bhagalpur on account of diluvion of holdings. Again, the remissions in Gaya, amounting to Rs. 11,706 and described as nominal, are attributed to low outturn of crops. The Lieutenant-Governor does not feel altogether satisfied that those classes of remissions have been distinguished on clear grounds.

Permanently-settled estates.

6. The total demand, current and arrear, from estates in Class I was Rs. 3,29,57,552, of which Rs. 3,23,14,102 were collected. The percentage, after excluding from the demand sums in suspense during the year, and adding the sums collected but not credited during the year, was 98·32, as compared with 98·12, 97·86, and 98·41 in preceding years. Even with the adjustment above indicated, the collections fall short of the prescribed standard of 99 per cent. Fourteen districts failed to attain that standard, and eight of these were below 98 per cent. In 1893-94 Patna and Shahabad only collected 89·06 and 88·23 per cent. respectively: in 1894-95 they were even less successful, the ratio being 88·27 and 86·96. The balances in these districts were enormous, amounting to Rs. 1,65,404 and Rs. 2,03,832, and the only explanation offered is that proceedings under the sale law must be taken. The Lieutenant-Governor would have expected from the Board a fuller account of this considerable and repeated delay in the payments of revenue, which deserves their particular attention. In the collections of the arrear demand nine districts failed to attain to 99 per cent. on the balances, and three of them were under 90 per cent. Champaran is again the worst of all; but the balance of Rs. 15,603 is attributable to the frauds discovered in the Tauzi Department, which are under adjustment. The total due from Wards' estates has fallen year by year, and is now only Rs. 7,579, of which the greater part is due from the Sheohar estate in Champaran, which suffered

by the embezzlement of its remittances in past years, and the concealment of the defalcation by frauds in the tauzi office.

Temporarily-settled estates.

7. In the case of temporarily-settled estates the minimum standard of 95 per cent. has been attained this year in some portions of the collections. It has been achieved in column 4 of the following statement as regards estates settled with proprietors, and nearly so as regards leased private estates:—

Classification of Estates.	Year.	Percentage of current collections on current demand.	Percentage of arrear collections on arrear demand.	Percentage of total collections on total demand.
1	2	3	4	5
(a) Settled with proprietors ...	1893-94 ...	94·77	84·99	94·20
	1894-95 ...	93·39	95·34	93·49
(b) Private estates leased to farmers ...	1893-94 ...	80·26	40 02	70·79
	1894-95 ...	76·72	94·25	79·98
(c) Government estates leased to farmers	1893-94 ...	85·16	76·26	83·71
	1894-95 ...	85·59	77·90	84·44
Total ...	1893-94 ...	92·38	75·95	91·05
	1894-95 ...	91·31	88·02	91·06

The total demand, current and arrear, from these estates was Rs. 30,58,726 against Rs. 30,58,092, and the total collections Rs. 27,85,316 against Rs. 27,84,531 of the previous year. The arrear collections from estates settled with proprietors and private estates leased to farmers show an improvement, but the current collections in both these sub-classes are worse than last year. The total collections from estates leased to farmers are better, and the unfavourable notice taken by Government of the financial results of farming out estates seems to have produced some effect. The remissions this year have fallen from Rs. 31,332 to Rs. 5,270, but the balances have increased from Rs. 2,37,206 to Rs. 2,68,140. The current collections were below the standard in 28 districts (the same number as last year) under one or more of the three heads, and, as the Board remark, "no sufficient explanation of the large outstanding balances in many of the districts named has been given, for it is no explanation to say that certificates will issue. The Board fear that leases were in many cases given in the first instance without adequate care, and that Collectors are inclined to be too lenient with lessees." Puri, Midnapore, Shahabad, Backergunge, Khulna, show the worst results as regards the amount of arrears, and the 24-Parganas as regards the proportion of the demand collected. The arrears were entirely collected in 17 districts, but in 18 the standard was not reached in one or more of the heads. On the whole the improvement in the management of temporarily-settled estates is infinitesimal.

Estates held direct by Government.

8. In Class III, or estates held direct by Government, the current demand has increased from Rs. 34,08,777 to Rs. 34,84,498, and the total demand from Rs. 40,54,015 to Rs. 41,17,668. The collections have increased, especially of the arrears, so that the total is Rs. 34,09,907: the remissions

are less, but the current and total balances are much greater, so that the percentages of collections, both current and total, have fallen from 87·63 to 85·74, and from 83·16 to 82·81, respectively. The following statement compares the results with those of the previous year:—

SUB-CLASS.	Year.	Percentage of current collections on current demand.	Percentage of arrear collections on arrear demand.	Percentage of total collections on total demand.
1	2	3	4	5
(a) Managed for proprietors ...	1893-94 ...	76·51	48·02	65·72
	1894-95 ...	67·14	56·71	63·78
(b) Owned by Government ...	1893-94 ...	89·61	69·39	87·04
	1894-95 ...	89·11	73·34	87·32
Total ...	1893-94 ..	87·63	59·53	83·16
	1894-95 ...	85·74	66·66	82·81

The prescribed standard of 90 per cent. was nearly attained, as last year, in the current collections of Government estates, but otherwise it has been regarded as a counsel of perfection if it has ever been remembered at all. In 21 districts, as against 16 last year, the standard for current collections was reached under both sub-classes; in 12 more it was attained under one or other of the sub-classes: explanations more or less unsatisfactory are offered in the other cases. In Midnapore, Nadia, Murshidabad, Pabna, Faridpur, Patna, Gaya, Shahabad, and Purnea the current collections from the estates held direct and owned by Government were between 60·36 and 78·10 of the current demand, while in Saran and Monghyr they fell as low as 35·11 and 53·01. These figures are not creditable to the officers in charge. The enormous balance of Rs. 1,19,723 of the current demand is shown against Midnapore, said to be due principally to the backwardness of collections in the Majnamutha and Jalamutha estates, caused by the damage done by floods in the Argoal and Udbadal circuits. At the same time there were heavy arrears, amounting to Rs. 85,857, outstanding against the same estates and in course of realisation. Some observations were recorded in the Resolution on the Board's Report of 1893-94 on the constant recurrence of these heavy balances, and the Lieutenant-Governor still remains of opinion that they are a blot on the administration and that they should be remedied.

Sale of Government lands.

9. The subject of the sale of petty Government estates has been under consideration during the year, and out of 3,186 estates it has been decided to sell 941, with an area of 33,624 acres, and yielding a rental of Rs. 53,859. The principles which have governed the decision are recorded in paragraph 36 of the Board's Report, and have received the approval of Government.

Particulars of estates held direct. managed by Government.

10. There were 2,353 estates held direct by Government in 1894-95, of which 2,109 (against 2,080 in the previous year) were Government estates, and 244 private estates managed by Government. The following statement shows the number of these

estates by divisions, the demands, cost of management, and total collections during the year:—

Division.	Government Estates.		Private Estates.		Total.		Cost of management.	Percentage of cost on current demand.	Current collections.	Percentage of current collection on current demand.
	Number.	Current demand.	Number.	Current demand.	Number.	Current demand.				
1	2	3	4	5	6	7	8	9	10	11
		Rs.		Rs.		Rs.	Rs.		Rs.	
Burdwan	412	64,145	4	2,24,983	416	2,89,128	20,207	6·9	1,49,700	51·7
Presidency	217	3,34,300	43	12,907	260	3,47,207	16,199	4·6	2,88,106	82·9
Rajshahi	98	5,40,078	35	11,702	133	5,51,780	33,943	6·15	5,09,461	92·3
Dacca	631	4,32,127	106	1,31,377	737	5,63,504	30,357	5·3	5,13,685	91·15
Chittagong	225	6,06,353	25	12,828	250	6,19,181	62,760	10·13	5,09,931	82·04
Patna	190	2,19,306	19	33,827	209	2,53,133	24,336	9·6	1,74,101	68·7
Bhagalpur	128	2,77,486	6	15,788	134	2,93,274	9,435	3·2	2,49,896	85·2
Orissa	31	3,99,879	5	73,826	36	4,73,705	21,101	4·4	4,42,923	93·5
Chota Nagpur	177	75,586	1	17,730	178	93,316	2,498	2·6	89,079	96·4
Total ...	2,109	29,40,530	244	5,34,968	2,353	34,84,498	2,20,836	6·3	29,87,782	85·7
In 1893-94 ...	2,080	28,94,264	237	5,14,513	2,317	34,08,777	2,37,588	6·9	29,87,366	87·6

An establishment for the management of estates held direct by Government is maintained in 34 districts, at varying strengths more or less proportionate to the work to be done. The Lieutenant-Governor is glad to find that the cost of these establishments exceeds 10 per cent. on the current demand only in Bogra, Dacca, Noakhali, Chittagong, Shahabad, Darbhanga, Malda, *i.e.*, in seven districts instead of ten as noticed last year. He trusts that the Board will carefully watch these establishments and effect such reductions as may be feasible. Only 29 estates, with an area of 113 acres, were sold for Rs. 6,906 during the year, but the orders referred to in the preceding paragraph had not had time to come actively into operation.

Road and Public Works Cesses.

11. As a special report on the working of the Road and Public Works Cesses is annually submitted and separately reviewed by Government, the Board give only the main figures and facts in their report now under consideration. The results of the last quinquennial period are as follows:—

Year.	Demand.			Collections.	Remissions.	Balances.	Percentage of balances on gross demand.
	Current.	Arrear.	Total.				
1	2	3	4	5	6	7	8
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	
1890-91	78,38,927	18,35,056	96,73,983	76,84,612	12,661	19,83,855	19·9
1891-92	79,67,933	19,44,615	99,12,548	80,61,032	25,453	18,35,454	18·51
1892-93	80,91,015	16,58,256	97,49,272	82,76,738	13,368	14,86,471	15·24
1893-94	82,35,859	15,02,319	97,38,178	82,12,800	20,404	14,82,876	15·22
1894-95	83,21,993	14,85,984	98,07,977	82,58,755	27,567	15,17,280	15·46

These figures indicate an increased current demand of nearly five lakhs of rupees in four years, while the collections have increased by 5¾ lakhs. The arrear demand is 3½ lakhs lower than it was four years ago, and in the same period the balances have diminished by above four lakhs: so that the percentage of the balance on the gross demand has fallen from 19·9 to 15·46. The total demand of the year increased by nearly Rs. 70,000, but the collections were only Rs. 46,000 higher, and the balances outstanding are accordingly higher than last year.

Revenue and rent money-orders.

12. The system of payment of revenue and cesses by money-orders has again developed, if the increase in the number of orders be taken as the test; but the amount of revenue paid by them is actually less than in the previous year. The number of orders has increased from 160,892 to 192,984 in four years, but the average value has fallen during the same period from Rs. 9-11 to Rs. 8-8.

The following table shows the variations in the working of the system during the last five years :—

YEAR.	Number.	Amount of revenue paid.	Average value of each order.
1	2	3	4
		Rs.	Rs. A.
1890-91 ...	160,892	15,64,268	9 11
1891-92 ...	167,229	14,68,037	8 12
1892-93 ...	183,403	16,35,409	8 14
1893-94 ...	190,785	16,46,450	8 10
1894-95 ...	192,984	16,39,658	8 8

The system of payment of rent by money-orders, which has been in force since 1st July 1891 in all districts in which the whole of the Tenancy Act is in force, has rather receded than advanced during the year. The following table gives the available statistics:—

YEAR.	Number of money-orders issued for rent.	Amount.	Number of such orders refused.	Amount.
1	2	3	4	5
		Rs.		Rs.
1891-92 (nine months)	37,944	5,07,819	12,544	1,27,153
1892-93 (whole year)	42,901	5,19,768	13,687	1,26,757
1893-94 ditto	43,206	6,17,146	16,959	1,59,606
1894-95 ditto	40,822	5,87,373	13,879	1,46,363

As previously, about one-third of the money-orders issued were refused, transmitting about one-quarter of the amount for which they were issued. The Board (in paragraph 47) write of the unpopularity of the system with the landlords, and repeat their opinion that it is only resorted to by the tenants when they are on bad terms with the former. From this point of view it is not desirable to see a larger number of such money-orders issued, but the system is a great benefit to those who are so unfortunate as to need it.

Operation of the sale laws.

13. The following statement shows succinctly, so far as it can be gauged by figures, the working of the sale laws during the years indicated:—

YEAR.	Number of estates and shares liable to sale.	SOLD.			Percentage of column 5 on column 2.	Revenue demand of estates sold.	Amount of defaults.	Amounts realised by sale.
		Estates.	Shares.	Total.				
1	2	3	4	5	6	7	8	9
						Rs.	Rs.	Rs.
1891-92	15,532	1,015	353	1,368	8·8	1,52,802	41,825	9,03,581
1892-93	16,913	960	395	1,355	8·01	1,38,912	47,640	10,06,773
1893-94	16,239	991	438	1,429	8·7	1,43,889	45,051	10,72,584
1894-95	15,275	950	516	1,466	9·6	1,93,872	72,024	11,11,334

These figures show that the law was enforced somewhat more strictly than in preceding years, though the fact that less than one out of ten estates and shares liable to sale was actually sold justifies the Board's remark that the law is worked with moderation. The increase in the number of sales was entirely in that of the shares sold: fewer whole estates changed owners. The Board comment on the extraordinary differences in the prices realised, varying as they do from 200 times the Government revenue in the Government estate of Panchannagram, in the 24-Parganas to one or two years' purchase in Backergunge and Noakhali. The stricter mode of administering the law, reported to have been introduced last year in Mymensingh and Saran, has had the effect of reducing the number of defaults, and similar measures have been taken in Dacca. Thus in Saran the defaults have fallen from 1,641 to 967, and the sales from 184 to 66: in Mymensingh the defaults were 1,085 and the sales 102 last year, and 744 and 50 respectively in 1894-95. The benefit to the people themselves of a strict working of the law is obvious. This year the largest number of defaults, 1,936, occurred in Shababad, and Muzaffarpur 1,418. These districts were bad in this respect last year also. In Patna, Monghyr, and Backergunge, too, the statistics are unsatisfactory, and greater attention should be paid to the subject. Altogether 319 appeals against sales were made to the Commissioners, 109 sales were annulled by them, and in 27 cases recommendations were made for the annulment of sales by Government. The percentage of sales to defaults was, as usual, highest in Chittagong, reaching 30·7; and it was high also in Backergunge, Dacca, and Nadia. It is matter for regret that the orders which have been repeatedly issued to the effect that the sales for the arrears of one kist day should take place before the next kist day should not have been universally observed: but the Lieutenant-Governor trusts to the new tauzi procedure, when it has come into working order, to improve the existing arrangements and put the whole system of revenue payments and recoveries on a better footing.

The Lieutenant-Governor notices the suggestion quoted by the Board from the Commissioner of Patna, that section 18 of Act XI of 1859 should be amended so as to give power to a Collector to inflict a fine; but he is not prepared to advocate a reconsideration of the question of legislating to amend the revenue sale law. There are other changes which other officers regard as equally important, and the question is under the consideration of Government whether it is not desirable to restrict by executive orders the discretion which the law gives to Collectors as to allowing defaulters to pay after the sale day has been fixed, so as to secure more uniformity of procedure in this respect.

Working of the Public Demands Recovery Act VII (B.C.) of 1880.

14. The following statement shows the number of certificate cases instituted and disposed of during the year under the different classes of demands:—

	Number pending from last year.	Number filed during the year.	Total.	Disposed of during the year.	Pending— More than six months.	Pending— Less than six months.	Pending— Total.
1	2	3	4	5	6	7	8
Demands of all kinds under section 5	510	1,507	2,017	1,552	48	417	465
Arrears of rent due to Government, clause 6, section 7	4,053	18,885	23,638	17,611	2,085	5,842	5,927
Embankment dues, section 50, Act VI (B.C.) of 1873	1,281	4,272	5,553	4,437	323	793	1,116
Water-rates, Act III (B.C.) of 1876	774	8,840	9,614	8,867	122	625	747
Cesses, Act IX (B.C.) of 1880 ...	37,431	83,811	121,242	80,490	11,857	28,895	40,752
Demands of the Court of Wards, clause 7, section 7	5,550	8,157	13,707	8,615	3,450	1,642	5,092
All other demands under section 7 ...	11,153	28,012	39,165	28,133	2,345	8,687	11,032
Total ... 1894-95 ...	61,352	153,484	214,836	149,705	20,230	44,901	65,131
Total ... 1893-94 ...	70,357	143,886	214,243	152,386	23,278	38,579	61,857

The number of certificates filed has risen by 9,598, from 143,886 to 153,484: the increase occurred in most of the classes of demands, and no special reason for the occurrence in each case is mentioned. The total number for disposal was slightly in excess of last year, but the disposals were 2,681 less: thus the arrears increased from 61,857 to 65,131. The number of water-rate certificates has

fallen off in all three Divisions, which testifies to the better working of the Irrigation Department:—

	Number filed in 1892-93.	Number filed in 1893-94.	Number filed in 1894-95.
Orissa Division ...	7,991	6,667	5,683
Patna " ...	2,914	2,219	2,506
Burdwan " ...	1,237	2,046	651
Total ...	12,142	10,932	8,840

The number of certificates filed for the recovery of cesses has risen from 77,500 to 86,716, the increase being specially marked in Hooghly, Gaya, Saran, Muzaffarpur, and Bankura. The Lieutenant-Governor, after his visit to Midnapore in February last, drew the Board's special attention to the mal-administration of the certificate establishment in the Midnapore district, and it is hoped that improvement will be reported next year from this district as well as from Hooghly, and from the districts of the Presidency Division regarding which His Honour notes the unfavourable remarks made by the Commissioner. The whole subject of the Recovery of Public Demands came under review during the year in connection with the passing of Act I (B.C.) of 1895, and the Lieutenant-Governor trusts to this Act, to the creation of the Arrear Collection Department, and the revision of the Certificate Department's establishment now in progress, to facilitate the recovery of Government dues in the future.

Compulsory measures for realisation.

15. The decrease which occurred last year in the total number of cases in which compulsory measures of sale were necessary has been continued, the number having fallen from 3,818 to 3,320. Demands were paid upon mere issue of notices in 45,780 cases, as compared with 44,827 in 1893-94. The Lieutenant-Governor observes with satisfaction that in only eight districts were persons imprisoned for non-payment of Government demands, the number so punished being 12. Taking all demands together, 41 persons were imprisoned, against 34 last year, and of these 20 were released after a short time on payment of their debts. Sir Charles Elliott desires that all District Officers will bear in mind his injunction that no one should be imprisoned for debt unless there is some admixture of fraud in the default.

ADMINISTRATION OF THE LAND REVENUE.

Estates under direct management.

16. Under the orders of Government the 12 per cent. deducted from the collections from estates under the management of Government is distributed as follows:—

(1) 1 per cent. to Education.
(2) $1\frac{1}{2}$ " to Communications.
(3) 2 " to Sanitary Improvements.
(4) $7\frac{1}{2}$ " to (*a*) Management Proper and (*b*) Miscellaneous Improvements.
(5) In addition to this there has also been a separate Agricultural Public Works grant for works of improvements in Government or temporarily-settled estates.

The sum to be devoted to (*a*) sanitary improvements and (*b*) miscellaneous improvements, including agricultural improvements and experiments, has always been (*i*) the 2 per cent. for sanitary improvements, *plus* (*ii*) as much as can be saved from the $7\frac{1}{2}$ per cent. above-mentioned. In February last the Board were requested to reduce the cost of management, so as to leave 3 per cent. clear for sanitary and agricultural improvements in Government estates: and the Lieutenant-Governor trusts that in future years this object will be achieved. Towards the end of the year under review, the sums devoted to sanitary and miscellaneous improvements and the Agricultural Public Works grant have been amalgamated, and are to be treated in one account.

The allotments and expenditure under the heads (3) to (5) above during 1894-95 are shown in the following statement:—

1	Allotment, 1894-95.	Expenditure, 1894-95.	Expenditure, 1893-94.
	2	3	4
	Rs.	Rs.	Rs.
(3) Two per cent. for sanitary improvements ...	3,70,000	53,658	50,476
(4) The 7½ per cent. for (a) Management proper		2,20,836 (a)	2,37,587 (a)
(4) The 7½ per cent. for (b) Miscellaneous improvements ..		56,469 (b)	1,16,844 (b)
		3,30,963	4,04,907
(5) Agricultural Public Works grant ...	60,000	46,765	54,017
Total ...	4,30,000	3,77,728	4,58,924

It is satisfactory that the cost of management proper has been reduced from Rs. 2,37,587 to Rs. 2,20,836, but it is lamentable that, when Rs. 4,30,000 were available for expenditure, only Rs. 3,77,728 were spent, and the Board should require full explanation from officers who fail to spend profitably the whole of their allotments.

Due provision is made for primary education in the Government estates, and in several districts, and especially in Jalpaiguri, large sums were expended in the construction and maintenance of roads.

Inspection of accounts.

17. The list of inspections of the registers and accounts of Government estates by Government officers of all grades now occupies an appendix of 11½ pages. The accounts, it is said, were tested by comparing the receipts granted to the raiyats with the counterfoils, and were generally found to be correct. In the Resolution on the Board's Report for 1893-94, Government pointed out that this comparison, though useful in itself, was not exhaustive, and should not be relied on as the sole method of testing for irregularities. There are many kinds of fraud and omission which would not be discovered by this test alone.

Surveys and settlements.

18. The survey and settlement work in Bengal for the survey year ending the 30th September 1894 was reviewed at full length in the Government Resolution of 13th April 1895, and, as usual, only the principal figures of the financial year under review are reproduced in this Resolution. The following table shows the progress made in the settlements of Government and temporarily-settled and private estates under the control of the Director of Land Records during the year:—

Government and Temporarily-settled Estates.

NAME OF ESTATE OR TRACT UNDER SETTLEMENT.	Estimated area in square miles under settlement of revenue or rents.	Total number of villages (and jotes and grants).	Area cadastrally surveyed during the year.	Total area cadastrally surveyed up to the end of the year.	Number of villages of which attestation has been completed. The survey of Calcutta, on a scale of 50 feet to the inch, lasted from November 1886 to 31st August 1894, and cost Rs. 2,38,063.

The settlement of ghatwali lands was undertaken during the year in Bankura. It is thus described by the Board (paragraph 47):—"The settlements of two ghâts, Bankdaha and Joybelia, were completed during the year, and that of other ghâts is proceeding. This settlement is one of interest and importance, as it aims at the abolition of the old service tenures by which the ghatwals have held their lands for about a century, the substitution of ordinary village police in place of the ghatwals, and the settlement of the service lands with the zamindars, the ghatwal dropping into the status of an ordinary raiyat with occupancy rights." These proceedings will, it is hoped, prove a final settlement of an old-standing class of disputes: the results are due to the able and conciliatory arrangements made by the Officiating Commissioner, Mr. Romesh Chunder Dutt, C.I.E., in co-operation with Raja Ban Behari Kapur, Manager of the Burdwan estate.

The following table shows the progress made in smaller settlements of Government estates under the Tenancy Act and under the supervision of the Commissioners of Divisions during the year:—

	Estimated area in acres under settlement of revenue or rents.	Total number of villages.	Area surveyed during the year.	Total area surveyed up to the end of the year.	Number of villages in which attestation has been completed.	Number of villages of which the final records of rights have been published under section 105(2) of the Tenancy Act.	Cost during the year.
1	2	3	4	5	6	7	8
	Acres.		Acres.	Acres.			Rs.
Government estates in the districts of Khulna, Pabna, Faridpur, Tippara, Shahabad, and Monghyr	59,124	179	36,516	52,487	115	19	10,98
Private estates in the districts of Midnapore, 24-Parganas, Nadia, Jessore, Dinajpur, Rangpur, Pabna, Dacca, Mymensingh, Faridpur, Tippera, Noakhali, Monghyr, Patna, and Saran	83,940	303	21,681	84,337	208	35	17,944

In the forecast of increase of revenue due to revision of settlements and other causes, a total increase of Rs. 1,35,520 was anticipated for the year 1894 95, but only Rs. 82,645 were obtained. The difference is accounted for by the non-completion of the assessment in Chittagong, from which an increase of Rs. 39,000 was expected, and by delay in Backergunge in approving farming settlements.

19. The following statement shows the number of interests registered under initial registration and the number of applications for mutation during the year:—

Land Registration.

1	2	3			4	5	6
Division.	Total number of interests registered under initial registration (section 38).	Number of Applications under Section 42 filed during the year—			Percentage of column 3 (c) on column 2.	Percentage during 1893-94.	Percentage during 1892-93.
		(a) On account of succession by inheritance, whether under will or otherwise.	(b) On account of succession by purchase, gift, or otherwise.	(c) Total.			
Burdwan	50,044	1,467	1,668	3,135	6·3	6·7	6·5
Presidency	63,008	2,040	1,542	3,582	5·6	7·3	5·2
Rajshahi	26,925	986	808	1,794	6·6	6·3	7·0
Dacca	99,454	6,516	5,475	11,991	12·0	9·3	8·2
Chittagong	184,598	4,978	5,667	10,645	5·7	4·2	4·1
Patna	287,642	10,714	11,128	21,842	7·5	8·5	6·4
Bhagalpur	96,614	1,121	1,666	2,787	2·9	3·5	3·8
Orissa	160,694	4,081	5,218	9,299	5·7	6·1	4·2
Chota Nagpur	4,211	191	169	360	8·5	11·7	3·5
Total ...	973,190	32,094	33,341	65,435	6·7	6·6	5·5
Total for 1893-94 ...	973,132	34,141	30,851	64,992	6·6		

The percentage of mutations on initial registrations shows a very slight increase from 6·6 to 6·7, the increase being specially marked in the Dacca Division, and in a less degree in Chittagong, and due to more energetic efforts of the Collectors of those Divisions to secure registration. The cess revaluation and settlement proceedings have also greatly assisted in stimulating registration. The total number of cases disposed of was 63,298, against 61,428 in 1893-94. Mr. Savage's plan of working through the panchayats, mentioned in paragraph 114 of the Report has been successful in one pargana, and might well be extended elsewhere.

20. The partition work elsewhere being comparatively small, the statement below contains the particulars of the number of cases instituted, disposed of and pending in only the Patna, Bhagalpur, and Dacca Divisions:—

Partitions.

Division.	Pending at close of—		Instituted during—		Total.		Disposed of during—		Pending at close of—
	1892-93.	1893-94.	1893-94.	1894-95.	1893-94.	1894-95.	1893-94.	1894-95.	1894-95.
1	2	3	4	5	6	7	8	9	10
Patna	1,545	1,510	327	264	1,872	1,774	402	545	1,229
Bhagalpur	101	115	42	75	143	190	28	58	132
Dacca	441	418	113	126	554	544	136	162	382

In consequence of the survey-settlement operations in the Patna Division, the number of partition cases instituted has materially diminished, while the number disposed of has risen, so that the arrears are lower; but it is not satisfactory to read that there are cases still pending of 26 and 23 years' standing. In the Bhagalpur Division more work has been done, but the arrears have increased. In the Dacca Division also more cases have been disposed of, and the pending cases are fewer. But Government have found it necessary during the year to take special notice of the careless conduct of the partition of the Bhowal pargana, which has dragged on for 11 years at great expense. The Bill to amend the law relating to partition of estates has advanced a stage during the year, and is now in the hands of the Board for further consideration of certain points: it is hoped that when it is passed into law the enormous delays now complained of will cease to exist.

21. The following table shows the quantity of land acquired during the year under the Land Acquisition Act, I of 1894, and the cost of acquisition, as well as the department for which it was acquired :—

Land acquisition.

For whom acquired.	Area of land acquired.	Abatement of Government revenue.	Cost of acquisition.
1	2	3	4
	A. R. P.	Rs A. P.	Rs. A. P.
Government	121 3 20	65 14 6	37,854 8 0
Irrigation	679 3 2	275 5 9	77,832 14 6
Municipalities	77 0 37	73 0 4	74,805 6 10
Railways	2,525 1 15	1,174 1 5	5,47,824 10 11
District Boards	112 3 15	79 2 3	22,520 1 3
Chaukidars' jagir lands ...	11 2 13	1 6 1	1,169 8 3
Lands for Port Commissioners ...	8 3 14	6 4 7	12,860 7 9
Grand Total ..	3,537 1 36	1,675 2 11	7,74,867 4 6

The land acquired for Government was again less than in preceding years: and the whole area acquired was only rather more than half of that taken up in 1893-94. Excluding, in both years, certain projects carried out at abnormally high prices, the average cost per acre amounts to Rs. 184 per acre in 1894-95 against Rs. 186 in 1893-94. During the year the acquisition of land was undertaken for the head works of the Howrah water-supply at Serampore, for the recreation ground in Marcus Square in Calcutta, and for a branch line of the East Indian Railway in Burdwan. The main work of the year was the acquisition of lands for the Assam-Bengal Railway in the districts of Chittagong, Noakhali, and Tippera. Certain irregularities of procedure occurred, of which due notice was taken. Land was also taken up for the East Coast Railway in Cuttack and Puri and for the Orissa irrigation works. Except in the case of one Land Acquisition Officer, the Board do not state whether the standard number of cases a month has been maintained: it is desirable that this point should never be overlooked.

22. The question of reorganising the kanungos and patwaris in Orissa for the purpose of maintaining the settlement records is still under consideration, but no scheme has yet been submitted, and the new settlement does not come into effect until September 1897. In Cuttack all the kanungos but one were trained by the officer in charge of the Orissa survey, and have qualified themselves in surveying. The same officer, Mr. Ewing, has had the sarbarahkars of Khurda under training, with a view to the revision of the village records and of the settlement which is about to expire. In Balasore 9 out of 12 kanungos have produced certificates of efficiency. The sarbarahkars of Angul, who are bound to perform the functions of patwaris, were furnished with copies of the maps of the villages and called upon to supply returns of mutations in forms prescribed by the Commissioner. Returns were filed for 322 villages during the year. In connection with the question of the agency to be employed in Bihar for the maintenance of the settlement records under the legislation which had to be undertaken for the purpose, the repeal or retention of the old Patwari Regulations was much discussed. Sir Charles Elliott strongly urged the desirability of abolishing the patwaris in Bihar, but the Government of India decided on not repealing the Regulations. The correspondence was published *in extenso* in the *Calcutta Gazette*.

Kanungos and patwaris.

23. The Collectors applied for Rs. 1,16,900 as advances under the Land Improvement Loans Act, XIX of 1883; Rs. 84,100 were allotted to them for distribution, and they disbursed only Rs. 35,620. It is said that in Burdwan the excellent harvest enabled people to carry out improvements by

Advances under the Land Improvement Loans Act.

means of their own resources; but, as the Board appropriately observe, if this be the correct explanation, it is not understood why the collection of revenue did not reach the prescribed standard in Government and temporarily-settled estates in this district. In previous years such large sums as Rs. 35,850 and Rs. 24,050 were expended in Gaya on works specially required in that district for irrigation; last year the small expenditure of Rs. 4,100 attracted notice, and this year the Lieutenant-Governor notices with satisfaction that Rs. 15,000 were spent as advances. In last year's Resolution it was pointed out that there was nothing to show how the opening balance, said to be Rs. 2,21,685, due on 1st April 1893, was arrived at, but the two columns 26 and 27 of Appendix XV, which show the balance due during the year but not recovered, and the balance outstanding at the end of the year but not yet due, ought together to make up a total equal to that shown in column 2 of the statement for next year. By this calculation the outstanding on the 31st March 1894 should have been Rs. 2,03,321, but the opening balance of the 1st April 1894 is shown as Rs. 1,96,708. The same calculation gives the closing balance of 1894-95 as Rs. 1,82,075, and if next year any error in this figure is found to exist, it should be explained. The balances were largest in Bankura, Gaya, and Saran, *i.e.*, the sums which were due and ought to have been paid in the year. In Bankura Rs. 12,172 principal and Rs. 1,973 interest for previous years were due; the collections were only Rs. 8,148, and Rs. 6,105 principal and interest remain outstanding from what ought to have been collected in the year. In Gaya Rs. 23,063 principal and Rs. 4,503 interest should have been paid in the year: the total collections were Rs. 25,027, leaving a balance of Rs. 3,190 in the year only. In Saran the figures were lower than before, but the balance on the year is greater, amounting to Rs. 3,150.

Advances under the Agriculturists' Loans Act.

The sums advanced under the Agriculturists' Loans Act of 1884 have fallen from Rs. 1,93,070 to Rs. 1,13,201 in the two years previous, and now to Rs. 50,143. The following districts took the largest sums, viz., Monghyr Rs. 16,387 for loans to help the poorer raiyats to cultivate the *rabi* where their *bhadoi* crops had been almost wholly destroyed in the Begusarai and Sadar subdivisions by the floods of August 1894; Darbhanga Rs. 6,000 to the raiyats where there was failure of crops owing to heavy floods; Puri Rs. 4,380 (no reason given), Faridpur required Rs. 5,000, and Backergunge Rs. 3,000 to meet the scarcity arising from failure of the *aman* crop in certain localities; in Gaya Rs. 2,500 were advanced for the purchase of seed, bullocks, &c.; in Cuttack Rs. 2,767 and in Balasore Rs. 1,999 to sufferers from floods. Out of the demand for the year, Rs. 2,33,282 principal and Rs. 33,423 interest, total Rs. 2,66,705, only Rs. 1,48,211 were collected and Rs. 2,402 remitted, leaving a balance of Rs. 1,16,092 on the year's transactions. The percentage of collections on the realisable demand of the year was only 55·5, and it is remarkable that the Board have no word of criticism to pass on the officers who have been most remiss in these collections. Two-thirds of the whole arrear of the Province is due from the three districts of Saran, Champaran, and Muzaffarpur.

RENT.

Relations between landlords and tenants.

24. The relations between landlords and tenants do not ordinarily undergo violent changes over a large area in the Lower Provinces, and this year is no exception. The two parties have in the greater part of the country arrived at a *modus vivendi*, which is only interrupted by some special causes, as follows. For instance, in Hooghly the disputed succession to the Tarkessur Mohuntship led to riots and disturbances between the supporters of the rival claimants. In Khulna a petty landlord managed to deprive his tenants of their occupancy rights, and was demanding a cess as much again as the rent, on account of the death of his grandmother: he was shot at night while sleeping in his cutcherry. In Rangpur a zamindar adopted, as a means of putting down his raiyats, the plan of letting loose his stud of elephants, without mahouts in charge, to wander through the crops and destroy them. This oppression was discovered by the Commissioner and has been stopped.

The Dacca Division is generally the worst for agrarian disturbances. In the Maharaja of Shushang's estate an attempt to enhance rents ended in a murder, and the Maharaja and his tenants have been bound down to keep the peace. The most disturbed parts of the estate are to be quieted by the introduction of a survey and record of rights. In Backergunge the exaction of illegal cesses and excessive subinfeudation continue to create ill-will between landlords and tenants; but surveys and record of rights are coming to be recognized as a panacea for the settlement of disputes, and as a golden bridge to bring the zamindar out of the slough of no-rent combinations. A fatal riot took place in an estate purchased by the Nawab of Dacca, whereupon that nobleman, much to his credit, returned the estate to the vendor. Local disturbances are reported on the estates of the Maksudpur Raja and the Madhuban and Madhubani Babus in the Patna Division regarding division and appraisement of crops and rights to land; and in the Bhagalpur Division, on the Lachmipur estate and those of Mr. Maling Grant and the Chanchal Raja, there has been much friction between the landlords and their tenants. In Balasore, certain of the zamindars behaved well and liberally on the occasion of the high floods of July 1894. In Chota Nagpur the majority of the landlords are described as ignorant and unable or unwilling to do anything to improve their estates. In Manbhum the relations between the European zamindars and their tenants are said to be still unsatisfactory, but those between Messrs. Watson and the ghatwals have improved. The Kolhan settlement is said to be judiciously conducted, and has caused no alarm in the minds of the Kols. A Bill for the application of the Tenancy Act, adapted to the circumstances of the Chota Nagpur Division, and for the commutation of predial services and conditions, has been remitted to the Commissioner for further consideration.

Operation of the Tenancy Act.

25. As in previous years, the Tenancy Act is generally reported to have worked smoothly. A short Act to amend it was passed during the year, of which the Board write as follows (paragraph 162):—

"On the 22nd August 1894, Act V (B.C.) of 1894, being an Act to remove doubts which had arisen in connection with the resettlement of land revenue in temporarily-settled estates, and to amend the Tenancy Act of 1885, was passed into law. This Act removed a doubt which existed as to the date from which proceedings may be undertaken with a view to the resettlement of the land revenue in temporarily-settled areas and of rents in Government estates, and as to the date from which it may be said that a resettlement of land revenue is being made in any local area. The Act provides that fair rents settled under section 104 (2) of the Tenancy Act, previous to the expiry of a land revenue settlement, shall take effect from the date on which the new settlement of land revenue comes into force, and has removed an obstacle which existed to the resettlement of fair rents in Orissa and Chittagong before the expiration of the current settlements of the land revenue."

The following statement shows the operation of some of the most important sections of the Tenancy Act in the various Divisions of the Province:—

Divisions.	Transfer of Tenures.			Commutation of rent payable in kind, section 40.	Appraisement of division of produce where rent is paid in kind, sections 69 and 70.	Registration of improvements, section 80.	Certificates of Collectors as to acquisition of land for building or other purposes, section 84.	Notices of resumption of land by landlords, section 87 (2).	Written permission to landlords to measure land, section 90.	Application by Collector for appointment of common managers, section 93.	Applications made for survey and record of rights (under Chapter X).	Applications made for survey and record of proprietors' private lands (under Chapter XI).	Local enquiries held by order of Court, section 158.
	(a) Voluntary, section 12 (3).	(b) By sale in execution of decree, sections 13 (2) and 14.	(c) By succession, section 15.										
1	2			3	4	5	6	7	8	9	10	11	12

Dacca	2,201	665	234	1	1	14	...	5	...	...	16	...	...
Chittagong	2,637	726	285	...	...	27	...	9	...	...	1	...	32
Patna	918	...	5	11	335	76	1	1,083	1	...	46	...	15
Bhagalpur	1,1.6	...	3	...	80	...	...	89	...	...	...	...	...
Orissa	..	...	...	...	...	269	...	...	...	...	...	...	...
Total for 1894-95 ...	18,237	1,877	901	263	429	638	1	1,211	1	...	80	3	48
Do. for 1893-94 ...	20,780	2,147	835	100	382	424	3	1,037	...	...	63	...	75

There was a considerable falling off in the number of tenures voluntarily transferred, viz., from 20,780 to 18,237: it is reported to be due to the restriction of the issue of these notices to permanent tenures and raiyats' holdings

at fixed rates, and to the discontinuance of the issue of notices in cases of transfer of fractional parts of tenures. A special report on the effect of the Tenancy Act on transfers of estates, tenures, and holdings generally was submitted during the year, and further statistics have been called for. The feeling of reluctance on the part of landlords to accept "landlords' fees" still continues. There were 80 applications, against 63 in the previous year, for surveys and the preparation of records of rights—40 in Government and 40 in private estates. The resources of the Province are strained by the effort to depute a sufficient number of experienced and qualified officers to carry out these operations, and it is necessary in some cases to postpone the work till the completion of other settlements sets free the requisite staff.

Rent suits.

26. The number of suits before revenue courts under the rent laws for the years 1893-94 and 1894-95 is shown in the following statement:—

Districts.	Number of cases instituted.		Increase.	Decrease.
	1893-94.	1894-95.		
1	2	3	4	5
Darjeeling	33	28	...	5
Jalpaiguri	4,709	3,861	...	848
Cuttack	3,582	3,261	...	321
Puri	2,9.9	2,374	...	565
Balasore	2,460	2,849	389	...
Angul	13	...	...	13
Hazaribagh	3,071	3,049	...	22
Lohardaga	7,626	8,057	431	...
Singhbhum	319	313	...	6
Manbhum	5,579	6,008	429	...
Palamau	237	318	81	...
Total ...	30,568	30,118	1,330	1,780

The fluctuations are not remarkable, and no special cause can be assigned for the net decrease of 450 cases.

Training of Junior Civilians in survey-settlement work.

27. The Lieutenant-Governor is glad to find, for the sake of the administration and the officers themselves, that more attention has been paid than formerly to the orders of Government regarding the training of junior members of the Covenanted Civil Service in survey and settlement work. He cannot imagine a better school of instruction for the young officers than the settlement camp, in which they are brought into immediate contact with the native population and the most material interests of their lives, and in which they have to study principles and nomenclature and a literature that will be useful to the end of their service. Such a system also enables Government to discern the zeal and capacity of its promising officers, and test their qualifications for higher responsibilities in the future. Five junior Civilians of less than seven years' standing were regularly employed in the larger settlements under the Director of Land Records. Seventeen others spent some time in the field, making themselves acquainted with various branches of the survey-settlement work. The Lieutenant-Governor trusts that the Board will bear in mind the orders of Government, and will insist on as many as possible of the junior officers being put through a course of training wherever survey-settlement operations are in progress in their districts.

General.

28. The Board repeat, in language very similar to that of previous years, their acknowledgments of the assistance received by them from the Commissioners, and consider it "needless and invidious to attempt to distinguish between the respective merits

and services of these high officers, whose qualifications are already well known to Government." Several district and subordinate officers are selected for a perhaps too indiscriminate commendation; their names will be duly noted in the Appointment Department. Sir Charles Elliott, while thanking the Board for their able and experienced supervision of the Revenue Department, desires to express a hope that they will remember his views as to the importance of making tours of inspection with a view to investigating local difficulties and peculiarities, adapting rules to the conditions under which they have to be carried out, ascertaining that new circular orders are understood and obeyed, training the younger officers of the Province in the administration of revenue work, and putting life and despatch into the disposal of business in those districts which most require it. The result of the Senior Member's visits to Singhbhum and Burdwan shows how useful such inspections can be, and the Lieutenant-Governor wishes that he had found it possible to make these longer and more frequent; he is confident that the Board desire to co-operate cordially with Government in carrying out this cardinal duty.

By order of the Lieutenant-Governor of Bengal,

C. E. BUCKLAND,

Secretary to the Government of Bengal.

FUTURE MANAGEMENT OF THE KRISHNAGAR COLLEGE.

GENERAL DEPARTMENT—EDUCATION—No. 269T.G.

Darjeeling, the 17th September 1895.

RESOLUTION.

In pursuance of the policy indicated by the Education Commission, Sir Rivers Thompson expressed in 1886 a desire to transfer the Krishnagar College to local management, if any body of native gentlemen could be found willing to give satisfactory guarantees for its permanent maintenance in an efficient state. The Municipality of Krishnagar clearly stated that they were unable to give the guarantees desired, and no other local body being willing to undertake the charge, the question was allowed to drop for the time being.

2. The idea was revived in 1891, and a plan for effecting the transfer of the College to a local body was given a definite shape. The Government proposal was that the management should be transferred to some local body, if a sum not less than Rs. 1,00,000, or a guaranteed income not below Rs 4,000 a year, could be provided locally in addition to the endowment of Rs. 40,000, then producing Rs. 1,600 a year, which had been accepted by the Government of Sir Richard Temple for the maintenance of the B.A. classes.

3. A committee was then formed, consisting of official and non-official gentlemen, European and Native, of the Nadia district, to raise subscriptions; but notwithstanding all their efforts, they failed to raise more than the promise of Rs. 2,200 in annual subscriptions and a sum of Rs. 7,000 in donations, representing a total income of Rs. 2,480 a year. The Committee presented a memorial to Government, praying that the donations and subscriptions then collected and promised might be accepted, the deficit being made good by a grant from Government.

4. Sir Charles Elliott expressed his appreciation of the liberality of the gentlemen who had come forward with offers of subscriptions and donations, and gave his consent to the continued retention of the College as a Government Institution, provided that the promised donations, amounting to Rs. 7,000, were added to the invested College fund of Rs. 40,000, and the annual subscriptions above mentioned were secured and properly guaranteed.

5. The promised donations of Rs. 7,000 have now been collected nearly in full, and Government securities of the nominal value of Rs. 6,500 have been added to the invested fund of the College, but no permanent guarantee can be obtained for the continuance of the annual subscriptions amounting to Rs. 2,200, the donors being prepared only to bind themselves for three years. In these circumstances the Lieutenant-Governor takes this opportunity to set forth exactly the views of the Government, as now constituted, in regard to the maintenance of the College. His Honour's intention is that the status of the College shall not be altered, and that it shall be kept up by Government on its present footing. If the subscriptions be not paid, Government will be at liberty to close the College, as the undertaking to maintain the College and the payment of the subscriptions will cease and determine together. At the same time Sir Charles Elliott would wish it to be clearly understood that no expression of the present intention of Government can operate so as to bind his successors, who must necessarily be guided by the circumstances of the time in deciding questions of this nature.

6. The large proportion of the cost of the College which devolved on Government in 1894-95, is shown by the following figures:—

	Rs.
From Provincial Revenues	14,990
" Fees	3,497
" Endowments	1,795
	20,282

Ordered that a copy of this Resolution be published in the Gazette for general information; and that a copy of it be forwarded to the Director of Public Instruction for information, and to the Commissioner of the Presidency Division for information, and for favour of communication to the Krishnagar College Endowment Fund Committee.

By order of the Lieutenant-Governor of Bengal,

C. E. BUCKLAND,

Secretary to the Government of Bengal.

RESOLUTION ON THE REPORT ON THE ADMINISTRATION OF THE CUSTOMS DEPARTMENT FOR THE YEAR 1894-95.

FINANCIAL DEPARTMENT—SEPARATE REVENUE.

Darjeeling, the 19th September 1895.

RESOLUTION—No. 474T.—F.

READ—

The Report on the Administration of the Customs Department for the year 1894-95.

The principal feature of the Report submitted by the Collector of Customs, Calcutta, is the insertion in it of coloured diagrams showing for the last twenty years (1) the rise and fall in customs revenue, (2) the total amount of duty collected, (3) the imports and exports of treasure, (4) the value of the trade of Calcutta with the more important foreign countries, and (5) the total value of the trade with the United Kingdom. These diagrams illustrate effectively the main facts of customs administration, and they should be continued in future Reports. The interest of diagrams 4 and 5 is, however, somewhat impaired by the inclusion of treasure, and this might with advantage be shown separately.

2. During the greater part of the year 1894-95, duties were collected under the Indian Tariff Act, VIII of 1894, which imposes duty on all articles, except cotton goods. The latter were, however, made dutiable from the end of December 1894 by Act XVI of 1894, which also revised the tariff fixed in March of that year. The imposition of duty on cotton goods imported involved the passing of the Cotton Duties Act, XVIII of 1894, under which a countervailing excise duty is levied on such of the cotton manufactures of India as compete with imports from England, yarns not finer than 20*s*. being exempted. The Collector of Customs, Calcutta, has been entrusted with the supervision of the working of the Act in respect of the cotton mills in Bengal.

3. *Customs duty.*—The following statement compares the gross and net customs duty, inclusive of the duty on imported salt, collected during the past five years, as well as in the years before and after the reduction of import duties on the 10th March 1882:—

	1880-81.	1881-82.	1882-83.	1890-91.	1891-92.	1892-93.	1893-94.	1894-95.

Import duty (excluding duty on salt).	72,72,128	61,72,991	14,87,018	26,75,754	28,08,900	31,06,025	35,94,860	87,46,193
Ditto on salt	2,27,44,388	2,37,15,928	1,74,72,613	2,30,66,656	2,39,34,018	2,40,16,651	2,36,63,961	2,44,40,899
Export duty	17,99,354	20,46,899	21,28,492	20,89,014	22,43,551	18,97,330	17,54,901	20,36,109
Total gross duty ...	3,18,16,170	3,19,35,818	2,10,88,123	2,78,31,424	2,89,86,469	2,90,20,006	2,90,13,722	3,52,23,201
Refunds and drawbacks—								
Imports	3,37,096	3,04,426	3,20,636	3,13,188	3,32,736	2,63,270	2,98,581	3,12,540
Exports	71,979	1,05,549	1,16,840	70,223	1,02,850	72,886	57,433	53,842
Total ...	4,09,075	4,09,975	4,37,476	3,83,411	4,35,586	3,36,156	3,55,964	3,66,382
Total net duty ...	3,14,07,095	3,15,25,843	2,06,50,647	2,74,48,013	2,85,50,883	2,86,83,850	2,86,57,758	3,48,56,819

The total net duty collected during the year under report rose from Rs. 2,86,57,758 in the previous year to Rs. 3,48,56,819, or by 21·6 per cent. The increase is mostly due to the re-imposition of customs duty from the 10th March 1894 on all imports, except cotton goods, and on the latter articles from the end of December of that year. Compared with 1880-81, the year preceding the reduction of the salt duty and the remission of most import duties, the net receipts of the past year show an increase of Rs. 34,49,724, or 11 per cent. To the increase of about 62 lakhs in the net receipts over those of 1893-94, the import duty on general merchandise contributed nearly 51½ lakhs, the duty on salt about 8 lakhs, and the export duty nearly 3 lakhs. The improvement in duty on salt is attributed to the large imports from Europe and the Red Sea ports, while

larger shipments of rice to foreign ports brought in more export duty. The charges of the year, inclusive of refunds and drawbacks, amounted to Rs 10,82,456, against Rs. 9,36,157 in 1893-94. The increase is due to the entertainment of additional establishment in the Calcutta Customs House to cope with the increased work arising from the passing of the Tariff Acts of 1894. The total net revenue of the year, including receipts other than duty, was Rs. 3,44,21,806, against Rs. 2,82,76,916 in 1893-94, and thus showed an improvement of 21 per cent.

4. Previous to the 10th March 1894, only arms and ammunition, liquors, mineral oils, opium, and salt were subject to the payment of import duty. As already stated, since that date and from the 27th December 1894, when cotton goods were made dutiable, all imported articles, with a few special exemptions, have been subjected to customs duty. As before, export duty is levied on rice and paddy. The collections of import and export duty at the different ports in the past two years are shown in the subjoined statement:—

Orissa ports	1,98,828	1,67,926
Narayanganj	......	......
Total ...	17,54,901	20,36,109

The total import duty collected rose from Rs. 2,72,58,821 in 1893-94 to Rs. 3,31,87,092, or by Rs. 59,28,271. The increase was mostly contributed by cotton duties (17 lakhs) which were levied only from the end of December 1894, and by receipts from other articles recently made dutiable (34 lakhs). The import trade of the Calcutta port will be noticed in detail later on. The receipts from import duty at Chittagong fell from Rs. 6,61,770 in the previous year to Rs. 6,19,736, the decrease being mostly under the head of kerosine oil (Rs. 37,868). There was practically no import of the oil, owing, it

is stated, to enormous supplies having been imported from America in 1893-94. There were no striking fluctuations in the import trade of the Orissa ports. The export duty on rice showed an increase at Calcutta and Chittagong, against a decrease of Rs. 30,902 at the Orissa ports, which is attributed to the low rates ruling at Calcutta during the year.

5. *Value of trade.*—The table below compares the value of the import and export trade of the province, both foreign and coasting, in the past two years under the three main heads of merchandise, treasure, and Government transactions:—

	Merchandise.		Treasure.		Government transactions.		Total.		Increase.	Decrease.
	1893-94.	1894-95.	1893-94.	1894-95.	1893-94.	1894-95.	1893-94.	1894-95.		
1	2	3	4	5	6	7	8	9	10	11
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
I.—Import trade—										
Foreign	29,19,97,309	26,64,66,662	1,83,63,817	1,08,29,075	1,20,86,951	1,41,64,098	32,33,48,077	29,14,59,835	.. ..	3,18,88,242
Coasting	5,65,06,241	6,30,49,055	58,20,683	24,01,924	10,10,868	8,26,289	6,33,37,792	6,62,77,268	29,39,476	...
Total ...	34,85,03,550	32,95,15,717	2,41,84,500	1,32,30,999	1,30,97,819	1,49,90,387	38,66,85,869	35,77,37,103	......	2,89,48,766
II.—Export trade—										
Foreign	41,96,91,497	46,01,17,416	29,27,088	84,80,649	1,06,910	3,78,338	42,27,25,495	46,89,76,403	4,62,50,908	....
Coasting	6,07,95,642	6,90,08,921	34,44,317	1,37,81,207	34,88,527	43,13,311	6,77,28,486	8,71,03,439	1,93,74,953	......
Total ...	48,04,87,139	52,91,26,337	63,71,405	2,22,61,856	35,95,437	46,91,649	49,04,53,981	55,60,79,843	6,56,25,861	.. ...
III.—Total trade of the Province.	82,89,90,689	85,86,42,054	3,05,55,905	3,54,92,855	1,75,93,256	1,96,82,036	87,71,39,850	91,38,16,945	3,66,77,095	...

The total value of the foreign imports of merchandise fell off by Rs. 2,55,30,647, or 8 per cent., entirely under the head of free goods, while the dutiable goods showed an improvement of Rs. 9,45,99,990, or nearly 277 per cent., owing to the transfer of several articles from the free to the dutiable list. In treasure there was again a falling off of Rs. 75,34,742 in consequence of smaller receipts of gold from Hong-Kong and of silver from the United Kingdom, owing to the imposition of a duty of 5 per cent. on the latter metal. In Government transactions there was an improvement of Rs. 11,77,147, as compared with the previous year, on account of larger imports of railway materials. The increase of Rs. 4,03,73,414 in the foreign export trade in merchandise is attributed to larger shipments of tea and jute to the United Kingdom. The foreign exports of treasure nearly trebled during the year, owing, it is stated, to heavy despatches of gold to the United Kingdom and silver to Ceylon. In the coasting trade, the improvement in the imports of Indian produce is attributed to larger receipts in the Calcutta port of cotton goods and salt from Bombay, and oil-seeds, castor and til, ground nuts, oils, raw cotton, cotton goods, turmeric, cocoanuts, grain and pepper from Madras; while the increase in the export trade is accounted for by the large shipments from the same port of rice and manufactured jute to Bombay, rice, hides and skins to Madras, betel-nuts to Burma, and grain to the Bengal outports.

6. *Trade of Calcutta with Foreign Countries.*—As usual, the bulk of the trade was carried on with the United Kingdom, but the proportion which this branch bears to the entire foreign trade of the port declined during the year from 59·63 per cent. in 1893-94 to 57·44 per cent. The imports of merchandise show a fall in value of Rs. 1,40,23,689, which was mainly due to a decline in the imports of cotton goods, while under the head of exports tea, jute, indigo, and rice showed a substantial increase. The United States occupies the second place with a percentage of 7·05 per cent. of the entire trade, against 5·91 in the previous year, but the imports declined in consequence of a fall in the price of kerosine oil. Larger shipments of jute, raw and manufactured, linseed, skins and hides, and dyeing materials caused a rise in the exports. Germany comes next with a percentage of 6·43, against 4·89 in the previous year. The increase under imports was due to larger import of woollen and cotton manufactures, refined sugar, liquors, and salt, while larger shipments of raw jute, hides, rice and indigo contributed to swell the export trade. Among the causes which tend to bring about this result may be reckoned the low freights from Germany to India, the low wages of German workmen, their superior general and technical education, and the comparative infrequency of strikes and trade disputes. It

seems also probable that the English Merchandise Marks Act, by directing attention to foreign sources of supply, has diverted to the continent a large mass of trade which was formerly carried on through London.

The Chinese trade shows a further slight decline, which is attributted to the war with Japan affecting the imports of treasure, copper, and other merchandise. The Straits Settlements maintain their position with a slightly higher percentage of 4·40 per cent., the decline in imports being more than counterbalanced by the rise in the value of opium exported. The trade with France fell from 2·94 per cent. in the previous year to 2·75, owing to a considerable decrease in the imports of silk and the exports of oil-seeds and wheat. Ceylon (2·60 per cent.) showed an improvement of 12 per cent., the increase being due to very large shipments of rice and to increased export of coal. In the Australian trade there was an increase of 18 per cent., mainly due to the rise of exports of manufactured jute from 63 to 90 lakhs. Mauritius showed an increase in imports, mostly in sugar, while exports decreased. There was a falling off in the value of both the import and export trade with Belgium, but the imports of iron rose owing, it is said, to the influence of low freights and a protective duty. The trade with Austria shows a substantial advance, which is most marked under imports of woollen goods and exports of raw jute.

7. *Shipping in Calcutta.*—The proportion of the total foreign trade carried through the Suez Canal rose from 70 per cent. in 1893-94 to 72 per cent. in the past year. The total shipping entering inwards and clearing outwards without touching at any other Indian ports and the aggregate tonnage in the past two years have been as follow :—

	1893-94.		1894-95.	
	Number.	Tonnage.	Number.	Tonnage.
1	2	3	4	5
Steam vessels	609	1,260,581	678	1,424,574
Sailing do.	312	574,409	321	533,788
Native crafts	28	5,113	26	3,855
Total ...	979	1,840,103	1,025	1,962,217

The decrease in the number of sailing vessels (21) and native craft (2) is amply counterbalanced by the increase in steam vessels (69). The trade with the United Kingdom shows a decrease of 11 sailing vessels, against an increase of 24 steam vessels, with United States there is a decline of 18 sailing vessels, and with other foreign countries of 10, while Germany shows a net increase of 34 vessels, 16 of which were steamers. On the whole, the past year was a favourable one, showing a net advance of 46 vessels and 122,114 tons.

8. *Imports into Calcutta.*—The total value of the imports, including treasure, but excluding Government transactions, into Calcutta from foreign countries, fell from Rs. 30,78,45,342 in the previous year to Rs. 27,44,43,275, or by 10·8 per cent. The decrease occurred both under merchandise (Rs. 2,58,67,325) and treasure (Rs. 75,34,742), the increase of Rs. 9,51,05,314 under dutiable goods being due merely to transfers. The total values of the principal articles of import in the past two years are shown below :—

	1893-94.	1894-95.
	Rs.	Rs.
Cotton goods	15,22,02,091	14,47,35,956
Twist and yarn	93,64,054	74,54,630
Metals	2,60,32,750	2,08,58,890
Mineral oil	1,85,27,067	1,00 01,981
Machinery (excluding those for railway)	99,95,554	95,18,775
Woollen goods	74,67,299	72,35,464
Salt	64,81,009	67,94,392
Liquors	46,49,907	49,23,576
Sugar	44,97,085	54,50,009
Hardware and cutlery	36,00,437	39,59,682

There was a marked falling off in the quantity of cotton goods and twist and yarn, owing to excessive imports in the previous year, fluctuations in exchange, general depression of trade in England, the competition of Bombay and Japan yarns, and the re-imposition of import duties, and the value of the goods imported declined by 5·8 per cent. The decrease of 19·8 per cent. in the total value of metals is attributed mainly to a fall of 96·9 per cent. in the receipts of unwrought copper. The trade in mineral oil underwent a remarkable decline (48 per cent.) on account of a great reduction in the imports of American oil, large stocks of which had accumulated at the close of the previous year. The imports of Russian oil from Batoum were slightly less than in 1893-94 and a little more than half of the amount imported in 1892-93. Machinery and mill work fell off by 5 per cent., while railway plant and rolling-stock rose by 50 per cent. Woollen goods show a decrease on the whole of 3 per cent., though the imports of shawls rose 27 per cent. The salt trade improved by 13·4 per cent. in comparison with 1893-94, and godowns had to be taken at the Kidderpore Dock in order to supplement the deficient storage room in the bonded warehouses at Sulkea. Ale, beer and porter increased by 8 per cent., while the imports of whisky rose by 13 per cent., a large proportion being of inferior quality. The decline of 8 per cent. in the trade in wines and liqueurs occurred under the heads of champagne, claret, port and sherry. The sugar trade improved by 29 per cent., in comparison with the previous year, owing to larger receipts from Germany, Mauritius, and Java, against decreases from Hong-Kong and the Straits Settlements. A rise of 10 per cent. occurred in the trade in hardware and cutlery, the principal increase being contributed by the United Kingdom, where the low value of iron is said to have enabled the manufacturers to reduce their prices. Amongst other articles of import, large decreases occurred in apparel (9 per cent.), umbrellas (38 per cent.), and agricultural implements (27 per cent.), while spices and provisions showed improvements of 29 and 8 per cent. respectively. The trade in English matches is said to be nearly extinct; and Swedish matches, shipped through Belgium and Germany, are beginning to lose ground through the competition of Japanese matches, which have more than trebled their imports during the past year and are now found in all the bazars.

9. *Calcutta exports.*—The total value of exports from Calcutta to foreign countries, including treasure, but excluding Government transactions, rose from Rs. 41,27,17,019 in 1893-94 to Rs. 45,80,59,114, showing an improvement of nearly 4½ crores, or 10·9 per cent. The following statement compares the value of the trade in the principal exports in the past two years:—

	1893-94.	1894-95.
	Rs.	Rs.
Jute, raw	7,92,97,248	9,89,89,311
„ gunny bags	2,82,27,268	3,13,00,321
Opium	4,84,06,059	5,29,68,740
Tea	6,22,28,418	7,11,57,590
Oil-seeds	4,68,36,289	3,50,31,068
Rice	3,09,76,521	3,67,87,929
Indigo	2,86,83,810	3,47,75,823
Hides and skins	2,43,60,735	2,72,63,795
Wheat	42,69,510	8,51,526
Raw cotton	76,30,439	43,15,840
Lac	95,21,007	1,39,57,703
Silk, raw	67,70,385	48,24,330

The decrease of 16 per cent. in the exports of raw jute in 1893-94 has been followed by an increase of 52 per cent. in the year under report. The shipments were the highest on record, the quality is said to have been good, and the entire export was taken up by the spinners. The improvement of 8 per cent. in the export of gunny bags was due to larger supplies being taken by the United Kingdom, United States, and Austria, against decreased shipments to Egypt, China, and the Straits Settlements. The increased value of the exports of opium was accompanied by a reduction of 8 per cent. in the quantity offered for sale. The exports of tea show an advance of 1·5 per cent., and are the highest yet recorded. The actual outturn of the crop was nearly three million pounds less than was originally estimated, and the average price in Calcutta stood at 9 annas and 3 pies per pound, against 8 annas and 2 pies in

1893-94. The exports of Indian tea to Australia have fallen off by 1½ million pounds, while the Ceylon exports to the same country show a slight increase. On the other hand, the exports to the United States nearly doubled, and those to Canada nearly trebled, while the demand from Turkey in Asia and Persia also increased. A substantial rise took place in the exports to London, and concurrently with this stocks in the home market had been reduced at the close of 1894, and the imports from China showed a decline of 21 per cent. Among oil-seeds, linseed, the principal article, exhibited a decrease of 18 per cent., in comparison with 1893-94, owing to smaller exports to the United Kingdom, Holland, and France, against larger shipments to Germany and the United States. The demand of the United Kingdom was supplied from other sources, while the decreased demand of France and Holland was due to the good crop in Europe. Poppy, rape and til, which are the other seeds exported, fell off. The exports of rice advanced by 22 per cent. owing to the good crop and the lower prices prevailing during the year. Ceylon, which is the principal market for Bengal rice, took only 11 per cent. more than in 1893-94, while the export to the United Kingdom, the next large consumer of rice, increased by 53 per cent The outturn of indigo during 1894 was greatly in excess of that of the previous year, and the exports rose by 40 per cent. Everywhere shipments were large, and the American demand rose by more than 100 per cent. Exports of raw hides increased by 12 per cent., and there were larger shipments to France, Germany, Italy, and the United States, against decreases to the United Kingdom and Austria. The exports of wheat declined by 77 per cent., and not a single shipment was made to Belgium, France, Germany, and Holland. Prices in the United Kingdom fell to the lowest level on record, and this cause has stopped on the Indian wheat trade. The exports of both raw cotton and raw silk fell off considerably, while lac improved by 39 per cent. in comparison with 1893-94. The crop was good, and the higher prices ruling in the market are said to have led to the opening up of new sources of supply.

10. *Subordinate ports.*—Chittagong shows a marked advance in the foreign trade, the total value of which increased from 90 lakhs in 1893-94 to more than a crore, or by 19 per cent. The import trade increased by 14 per cent., but the increase, as in the previous year, was due entirely to the requirements of the Assam-Bengal Railway. No kerosine oil was received in the port during the year under report, and the import of salt also fell off considerably, while there was a rise in the export of raw jute and rice. In the coasting trade imports improved owing to larger shipments of wooden sleepers for the railway above referred to, and of raw jute from Narayanganj, coal, teak, seeds grain, raw tobacco and sugar, while larger shipments of rice, jute, and tea affected the exports favourably. There were no imports or exports of treasure. The amount of customs duty collected during the year stood at Rs. 6,86,331, against Rs. 6,86,761 in 1893-94. The total value of the trade, both foreign and coasting, at the Orissa ports, as compared with 1893-94, rose at Balasore from Rs. 86,72,300 to Rs. 94,48,136, and at Puri from Rs. 2,84,292 to Rs. 3,73,238, while at Cuttack the value fell from Rs. 24,94,178 to Rs. 21,52,418. As usual, there was no foreign import trade at Puri and Balasore, while at Cuttack the trade declined both in imports and exports. The export of rice and paddy from Orissa declined at Balasore by Rs. 4,16,274 owing to the Mauritius demand falling off and ships not being available at reasonable rates. At the same time a good harvest in Khurda enabled Puri to increase its export of rice from Rs. 2,84,272 to Rs. 3,44,493, the bulk of which went to Mauritius, while the usual exports to Ceylon underwent a substantial decline. The coasting trade at Balasore advanced from Rs. 79,61,279 in the previous year to Rs. 91,53,469, at Cuttack from Rs. 87,117 to Rs. 1,32,111, and at Puri from Rs. 20 to Rs. 28,745. The total trade of Narayanganj, which is entirely carried on with the coast ports, dwindled from Rs. 72,49,960 to Rs. 67,14,087. The decrease occurred both in the import of kerosine oil and salt and in the export of rice and paddy. The customs duty on salt, which is the only duty-paying article imported into the port, fell from Rs. 2,04,856 in 1893-94 to Rs. 72,022, or 64 per cent. Salt is usually imported from Chittagong under bond, but as the price of salt ruled high at the latter port, salt was imported from Calcutta by rail and river. The supplies of kerosine oil received in 1893-94 were more than sufficient for all demands during the year, and no fresh oil was imported.

12. The Lieutenant-Governor's thanks are due to the Board of Revenue for their supervision of the Customs Department during the year, to Mr. Marriott for the diagrams referred to in paragraph 1, and to Mr. Skrine for the full and interesting report submitted by him. The names of the officers who are favourably noticed by the Board, with the remarks recorded, will be communicated to the Appointment Department.

By order of the Lieutenant-Governor of Bengal,

H. H. RISLEY,

Secretary to the Government of Bengal.

RESOLUTION ON THE STATISTICAL INFORMATION FURNISHED BY THE BOARD OF REVENUE REGARDING THE STAMP DEPARTMENT FOR THE YEAR 1894-95.

FINANCIAL DEPARTMENT—SEPARATE REVENUE—No. 487T.—F.

Darjeeling, the 19th September 1895.

RESOLUTION.

READ—

A memorandum, No. 741B., dated the 14th August 1895, from the Board of Revenue submitting statistical information regarding the Stamp Department for the year 1894-95.

The receipts, charges, and net revenue in 1894-95 under both the Indian Stamp Act I of 1879 and the Court-fees Act VII of 1870 were Rs. 1,66,94,504, Rs. 7,04,153, and Rs. 1,59,90,351, respectively, against Rs. 1,59,76,145, Rs. 6,71,859, and Rs. 1,53,04,286 in the preceding year. The increase in receipts occurred in both classes of stamps—judicial and non-judicial. The following table exhibits the receipts from both classes for the last ten years, with the charges and the net revenue. With the exception of a slight decline under the head of judicial stamps in 1888-89, the growth of the stamp revenue has been continuous, the net average annual increase amounting to Rs. 3,73,182:—

YEAR.	Judicial.	Non-judicial.	Total.	Charges.	Net revenue.	Increase in net revenue as compared with the previous year.
1	2	3	4	5	6	7
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
1885-86	96,82,780	35,75,275	1,32,58,055	6,26,348	1,26,31,707	..
1886-87	99,89,759	34,72,802	1,34,62,561	6,10,303	1,28,52,258	2,20,551
1887-88	1,02,64,782	35,51,253	1,38,16,035	6,16,077	1,31,99,958	3,47,700
1888-89	1,00,88,114	37,50,871	1,38,38,985	6,15,703	1,32,23,282	23,324
1889-90	1,03,48,831	38,88,948	1,42,37,779	6,31,144	1,36,06,635	3,83,353
1890-91	1,01,88,707	41,17,887	1,43,06,594	6,19,732	1,36,86,862	80,227
1891-92	1,09,50,619	41,49,842	1,51,00,461	5,82,602	1,45,17,859	8,30,997
1892-93	1,11,93,557	43,51,904	1,55,45,461	6,58,937	1,48,86,524	3,68,665
1893-94	1,14,98,551	44,77,594	1,59,76,145	6,71,859	1,53,04,286	4,17,762
1894-95	1,21,60,955	45,33,540	1,66,94,504	7,04,153	1,59,90,351	6,86,065
Average of 1885-86 to 1894-95 ...	1,06,36,665	39,86,993	1,46,23,658	6,33,685	1,39,89,973	3,73,182

2. According to the figures furnished by the Superintendent of Stamps, which will have to be reconciled with the final figures compiled by the Accountant-General, judicial stamps show an increase of Rs. 5,87,122, against Rs. 2,98,523 in 1893-94, the improvement being contributed by all classes of stamps, viz., adhesive and impressed court-fee stamps and stamps for copies.

The largest increases occurred in Calcutta (Rs. 1,88,584), Mymensingh (Rs. 83,137), Rajshahi (Rs. 74,748), Tippera (Rs. 58,555), Dacca (Rs. 52,472), Noakhali (Rs. 51,332), Muzaffarpur (Rs. 35,055), Backergunge (Rs. 30,956), and 24-Parganas (Rs. 30,472).

3. The increase of Rs. 59,203 in the sales of non-judicial stamps was shared by all classes of stamps, except foreign bill, hundi, and notarial stamps. The most marked improvement (Rs. 27,391) occurred in the case of impressed sheets, which are the most important of non-judicial stamps. Twenty-six districts participated in this improvement, the largest increase being observed in Bhagalpur (Rs. 24,486), where it is attributed to the renewal of bonds in respect of the heavy liabilities of the Banoli Estate. Impressed labels, which are in use only in Calcutta, show an increase of Rs. 10,773; share transfer stamps, Rs. 23,414; Advocate, Vakil, and Attorney stamps, Rs. 7,500; impressed one-anna stamps for cheques, &c., Rs. 5,568; and receipt stamps, Rs. 7,927. On the other hand, hundi stamps show a decrease of Rs. 18,499; foreign bill stamps, Rs. 4,670; and notarial stamps, Rs. 201. The causes that affected the sales of different kinds of stamps in different districts are given in the Board's memorandum, and need not be repeated here. The receipts from hundi stamps, which had shown a steady improvement in the previous four years, fell of suddenly during the year by Rs. 18,449, more than one-third of the decrease taking place in Dacca, where the failure of some jute and money-lending firms is said to have discredited hundis as a means of contracting loans. In other districts it is said the use of hundis for remittance has decreased because people prefer to send money by postal orders and bills payable on demand. These causes, however, which have been in operation for some years past, fail to account sufficiently for the sudden fall in the use of hundi stamps. The increase in the sale of receipt stamps is smaller than in the previous year, and twelve districts show a falling off, which is attributed to ordinary fluctuations.

4. The number of cases in which deficient stamp duty and penalty were levied by the Civil and Revenue Courts was 4,581 against 4,375 in 1893-94, and the amount of duty and penalty realised was Rs. 39,803 as compared with Rs. 37,897. Prosecutions for infringement of the provisions of the Act were instituted in 1,186 cases, against 710 in the previous year, and the Lieutenant-Governor trusts that the local officers will not relax their efforts in this direction. The fines imposed on the offenders amounted to Rs. 8,371, against Rs. 5,145, the amount of rewards paid to informers being Rs. 2,226 in 21 districts, against Rs. 1,455 in 14 districts in the previous year.

By order of the Lieutenant-Governor of Bengal,

H. H. RISLEY,

Secretary to the Government of Bengal.

FORM FOR APPLICATIONS FOR THE CONSTRUCTION OF TRAMWAYS IN BENGAL.

No. 705½R.

GOVERNMENT OF BENGAL—PUBLIC WORKS DEPARTMENT.

Railway.

Dated Darjeeling, the 17th September 1895.

RESOLUTION.

RESOLUTION.—Much inconvenience having hitherto been felt through the want of a suitable form for the submission of applications for concessions in connection with tramways in Bengal, His Honour the Lieutenant-Governor is pleased, with a view to ensure uniformity of practice, to issue the attached memorandum for the guidance of persons or syndicates desirous of submitting proposals for the construction of tramways and to order the adoption of the form X referred to therein for the submission of all applications for tramway concessions in Bengal.

2. Applications in the prescribed form should be submitted to the Local Government through the Commissioner in whose Division the proposed tramway will run.

ORDER.—Ordered that this Resolution and the memorandum and form attached thereto be communicated to the Municipal Department of this Government and to all Commissioners of Divisions, Superintending Engineers of Public Works Circles in Bengal, Inspectors of Works, Central and Eastern Circles and Bihar Division, and Executive Engineers, 1st and 2nd Calcutta and Calcutta Workshops Divisions.

Ordered also that this Resolution and the memorandum and form attached thereto, be published in the Supplement to the *Calcutta Gazette* for general information.

F. J. JOHNSTONE,

Secretary to the Government of Bengal.

Documents accompanying:

Memorandum for the guidance of persons or syndicates desirous of submitting proposals for the construction of tramways in Bengal, with form and appendix attached.

MEMORANDUM

For the guidance of persons or syndicates desirous of submitting proposals for the construction of Tramways in Bengal.

1. All applications for leave to construct a tramway in any part of Bengal are to be addressed to the Secretary to the Government of Bengal, Public Works Department.

2. All such applications shall be printed and shall be drawn up, as far as may be, in Form X attached hereto, and shall specify—

(*a*) the Company, person, or syndicate by whom the application is preferred; the proposed amount of capital, the number of shares, and the amount of each share;

(*b*) all the termini, together with the names of all the principal towns and villages from, through, into, or near which the tramway is intended to be constructed, as well as the names of each civil division and district to be traversed by the proposed alignment;

(*c*) the length so far as known of the proposed tramway;

(*d*) the gauge, the weight of rails, &c.;

(*e*) the motive power to be employed;

(*f*) the maximum tolls, rates, and fares proposed to be charged on the projected tramway;

(*g*) the proposals for working the tramway when constructed; and if any agreement is under contemplation, or has been provisionally arranged with any existing Railway or Tramway Administration under which the proposed line, when constructed, is to be leased out for working by such Administration, the exact nature and terms of such agreement;

(*h*) any further information that may be required to enable Government to thoroughly understand the scope of the proposals.

3. Every such application shall be accompanied by a map drawn to a scale of one mile to one inch, with the line of the proposed tramway delineated thereon, so as to show its general course and direction, and also by an etimate of the works proposed.

4. If the Local Government approves of the proposed tramway, provisional sanction will be given to the project, whereupon the applicants will proceed to prepare the usual surveys, maps, plans, &c., in accordance with the rules which apply to railway projects issued under the authority of the Government of India, of which copies may be obtained from the Superintendent, Government Printing, Calcutta, on payment, and to enter into the necessary agreements with the local authorities.

5. When ready, the plans and agreements should be deposited with the Secretary to the Government of Bengal in the Public Works Department accompanied by an application drawn up under clauses 3 and 4 of the Bengal Tramways Act, 1883, for an order authorizing the construction of the proposed tramway.

6. The Local Government in the Public Works Department will then draft the required order in consultation with the applicants and with the local authorities, and will submit the draft order to the Government of India for formal approval. When this approval is received, the order will be published in the *Calcutta Gazette* and communicated to the applicants and local authorities, thus empowering them to proceed with the construction of the tramway.

By order of the Lieutenant-Governor of Bengal,

F. J. JOHNSTONE,

Secretary to the Government of Bengal.

DARJEELING,

The 17th September 1895.

FORM X.

To accompany all applications for leave to construct a tramway in Bengal.

No.	Nature of particulars to be specified.	PARTICULARS.
1	2	3
1	The name of the Company, person, or persons by whom the application is preferred; the proposed amount of capital, the number of shares, and the amount of each share.	
2	The termini, together with the names of all the principal towns and villages from, in, through, or into, or near which the tramway is intended to be constructed.	*
3	The length as far as known of the proposed tramway.	
4	The gauge proposed and weight of rails, &c.	
5	The motive power to be employed.	
6	The maximum tolls, rates and fares intended to be charged on the proposed tramway.	†
7	Details of any agreement which may have been provisionally arranged, or which it is desired to enter into—(*i*) with the local authorities in connection with the construction of the tramway and (*ii*) with any Railway or Tramway Company for the working of it.	‡
8	Any further information that may be required to enable the Local Government to thoroughly understand the scope of the proposals.	

* Reference to an Appendix (*vide* Appendix A) may be here given, if necessary.
† Ditto ditto (ditto B) ditto ditto.
‡ Ditto ditto (ditto C) ditto ditto.

APPENDIX.

Alignment of proposed tramway.

Tormini of main line of proposed tramway ____________ and ____________.

Branches— (1) From ____________ on the main line to ____________
(2) From ____________ on the main line to ____________

Principal villages and towns and the districts through which the projected tramway will pass—

	Villages and Towns.	Districts.

XII.—CIVIL JUSTICE.

20. The following table compares the number of suits instituted and disposed of in each district in the years 1893 and 1894:—

Suits instituted.

District.	For money or moveables.		Under the rent law.		Title and other.		Total.	
	1893.	1894.	1893.	1894.	1893.	1894.	1893.	1894.
1	2	3	4	5	6	7	8	9
Dacca	29,386	30,432	5,735	5,891	2,963	3,105	38,084	39,428
Mymonsingh	27,961	26,270	7,680	7,970	3,815	5,072	39,456	39,312
Faridpur	16,834	13,699	9,304	8,319	1,554	1,416	27,692	23,434
Backergunge	10,845	10,692	19,167	17,979	1,690	1,746	31,711	30,417
Total ...	85,026	81,093	41,886	40,159	10,031	11,339	1,36,943	1,32,591

Suits disposed of.

District.	Money.		Rent.		Title.		Total.		Population.	Number of persons to a suit disposed of.	
	1893.	1894.	1893.	1894.	1893.	1894.	1893.	1894.		1893.	1894.
1	2	3	4	5	6	7	8	9	10	11	12
Dacca ...	20,333	30,845	5,903	5,877	2,808	3,239	38,044	39,961	24,20,656	63	61
Mymensingh ...	26,637	26,270	7,374	7,970	3,477	5,072	37,488	39,312	34,72,186	92	88
Faridpur ...	17,485	13,831	9,438	8,912	1,407	1,546	28,330	24,289	17,97,320	63	73
Backergunge ...	11,429	11,263	20,307	18,983	1,590	1,923	33,380	32,169	21,53,965	64	67
Total ..	84,884	82,209	43,082	41,742	9,282	11,780	1,37,248	1,35,731	98,44,127	71	72

As noted elsewhere, in the first half of the year high prices prevailed. The decrease in litigation in Faridpur in money and moveables confirms the view that the year has not been a prosperons one in that district. The small increase in the same class in Dacca is said to be due to the fact that creditors took advantage of the abundant harvest to realize their debts. It has not occurred to them to do this in the adjoining district of Faridpur. The most noticeable feature is the continued increase in title suits in Mymensingh. Compared with 1892 the increase is 79·1 per cent. As is shown below in section XV, the people also resort more freely than they did to the Criminal Courts in this district. Whereas in 1892 there were 1,030 people to each title suit instituted, the number is now 684 only.

For title cases only the proportion of population to a case is—

	1893.	1894.
Dacca	862	747
Mymensingh	998	684
Faridpur	1,277	1,162
Backergunge	1,354	1,120

So in title cases Mymensingh is our most litigious district, whereas generally it is the least litigious. It is suggested that civil disputes about land are no longer decided in the criminal courts as they used to be.

21. The following statement shows the number of cases disposed of in each munsifi:—

DISTRICT.	Munsifi.	Number of Munsifs.	Number of cases disposed of.	Average per Munsif.	REMARKS.
1	2	3	4	5	6
Dacca	Sadar ...	4	8,264	2,066	
	Narayanganj	1	2,048	2,048	
	Kaliganj ...	3	7,272	2,424	
	Munshiganj...	4	11,302	2,826	
	Manikganj ...	4	6,929	1,732	
Mymensingh	Sadar ...	2	4,786	2,393	
	Jamalpur ...	1	3,262	3,262	
	Iswarganj ...	1	3,052	3,052	
	Sherpur ...	1	1,582	1,582	
	Netrakona ...	3	8,973	2,991	
	Kishorganj ...	2	5,373	2,686	
	Bazitpur ...	2	3,954	1,977	
	Atia ..	2	5,891	2,945	
	Pingna ...	1	3,117	3,117	
	Additional Munsifs.	(a) 3	1,783	594	(a) These three munsifs were deputed to work at Iswarganj, Kishorganj, Jamalpur, Atia, and Pingna. One of them worked throughout the year, and two since November last only.
Faridpur	Sadar ...	(1) 2	3,023	2,015	
	Goalundo ...	2	3,666	1,833	
	Madaripur ...	(1) 3	4,521	2,260	(1) One additional munsif.
	Bhanga ...	(2) 4	6,850	1,457	(2) Two additional munsifs.
	Chikandi ...	(1) 3	6,008	2,002	
Backergunge	Sadar ...	5	12,696	2,539	
	Perojpur ...	4	5,267	1,317	
	Patuakhali ...	(b) 4	7,961	1,990	(b) One additional munsif for three months only.
	Bhola ...	2	5,485	2,742	
	Total ...	63	133,065	2,112	

In column 3 I have given the number of munsifs ordinarily employed. Apparently the work per munsif is much what it was in the previous year, although only 34 out of 63 now have Small Cause Court powers, against 42 in 1893.

So far as the number of cases is concerned, Barisal continues to be the heaviest munsifi in the Division. Next come Munshiganj and Netrakona, in spite of the transfer of Badla outpost to Kishorganj munsifi. Sherpur munsifi is the lightest. This place is only nine miles from Jamalpur, and the abolition of the munsifi has long been contemplated. If there were two munsifs permanently located at Jamalpur, probably an additional munsif would not, as now, be required. The average outturn per munsif at Pirojpur is extraordinarily low. It was low in 1893 too. The transfer of Badla outpost has much improved Kishorganj outturn. Bazitpur is still low.

The most remarkable feature in the administration of civil justice is the large number of changes in the office of munsif. The ordinary number of munsifs is 63, and there were 86 changes. In only 15 out of 63 cases was there no change. Changes in judicial officers are harassing to suitors and retard work.

22. The ratio of pending cases to cases disposed of in the munsifs' courts is shown in the following table:—

	1893.	1894.
Dacca	19·0	18·6
Mymensingh	24·7	18·1
Faridpur	13·0	12·9
Backergunge	12·5	12·3

There has been improvement in all districts, specially in Mymensingh, where there was much room for it.

The ratio for superior courts which do not exercise Small Cause Court powers are—

		1893.	1894.
Dacca	... ...	53·6	36·8
Mymensingh	... ...	61·7	67·02
Faridpur	... ...	87·5	38·4
Backergunge	... ...	51·3	38·05

Though Mymensingh is retrograde, there is great improvement on the whole.

For superior courts which exercise Small Cause Court powers, the percentage is—

		1893.	1894.
Faridpur	... ...	113·6	82·6
Backergunge	... ...	30·5	20·43

23. The proportion of contested cases remains very constant—17·2 per cent. this year, 18·8 per cent. in the previous year.

24. 15·3 per cent. of the witnesses examined were detained over two days by the District Judge, Subordinate Judges, and Small Cause Court Judges (not including munsifs), against 14·5 per cent. in the previous year.

The districts show strange variations:—

Dacca	... ...	13·9 per cent.
Mymensingh	... ...	20·5 „
Faridpur	... ...	22·0 „
Backergunge	... ...	12·09 „

For munsifs the percentage is lower, 9·8. Here, again, districts vary widely:—

Dacca	... ...	7·8 per cent.
Mymensingh	... ...	10·1 „
Faridpur	... ...	8·6 „
Backergunge	... ...	13·7 „

25. The following statement shows the result of appeals:—

District.	Regular appeals.						Appeals how disposed of.										Ratio per cent. of appeals confirmed to total disposed of.	
	Money.		Rent.		Title.		Confirmed.		Modified.		Reversed.		Otherwise.		Total.			
	1893.	1894.	1893.	1894.	1893.	1894.	1893.	1894.	1893.	1894.	1893.	1894.	1893.	1894.	1893.	1894.	1893.	1894.
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19
Dacca	168	140	355	236	374	263	502	337	153	69	129	139	113	94	897	639	55·9	52·7
Mymensingh	180	256	328	378	388	415	543	678	74	115	133	158	146	98	896	1,049	60·6	64·6
Faridpur	58	91	256	154	103	64	230	180	40	40	109	67	38	22	417	309	55·1	58·2
Backergunge	116	147	390	665	142	348	389	587	51	94	136	336	72	163	648	1,180	60·0	49·7
Total ...	522	634	1,329	1,453	1,007	1,090	1,664	1,782	318	318	507	700	309	377	2,858	3,177	58·2	56·6

Except in Mymensingh, those ratios indicate almost perversity on the part of the lower courts. In Backergunge both Mr. A. E. Staley and Babu Hari Krishna Chatterji, who between them disposed of 710 appeals, had a most unfortunate lot of munsifs to deal with, their percentages of confirmation being 42·66 and 45·61 only. On the other hand, Babu Krishna Chandra Chatterjee and Babu Bipradas Chatterjee, who tried 647 appeals between them in Mymensingh, were lucky in their lower courts, as they confirmed in 60·7 and 64·4 per cent. of cases respectively.

26. We have now 25 munsifs in the Division, 6 in Dacca, 7 in Mymensingh, 5 in Faridpur, and 7 in Backergunge, vested, under section 153 (*b*) of Act VIII of 1885, with the power to try rent-suits not exceeding Rs. 50 in value, without appeal. I am told defendants often plead fictitious questions of title in order to retain a right of appeal—pleas which munsifs no doubt refuse to accept. In my report for last year I mentioned I had consulted the landlords and had found them unanimously opposed to this reform.

XIII.—CRIME.

27. Detailed reports for each district were submitted to the Inspector-General of Police with this office letter No. 451J., dated 8th March last. The following is a short summary of those reports. According to the returns, crime is increasing. In 1889, 29,793 crimes were reported, in 1893, 37,850, and now 41,281. In other words, while in 1889 we had one crime to 330 persons, in 1894 we had one to 238 persons.

The increase is 38·5 per cent. in five years.

28. Excluding sanitary offences (serial 57) the number of cognizable cases reported has increased from 12,595 in 1893 to 15,341, or by 21·8 per cent.

Cognizable crime.

District.	1893.	1894.	Increase.	Percentage.	Persons to a crime.
1	2	3	4	5	6
Dacca	2,363	3,062	699	29·5	790
Mymensingh ...	5,736	6,942	1,206	21·0	500
Faridpur	2,402	2,542	140	5·8	707
Backergunge ...	2,094	2,795	701	33·4	770
Total ...	12,595	15,341	2,746	21·8	641

Including sanitary offences, the increase is 2,645 or 15·6 per cent.

Cognizable crime reported may be thus classified :—

Offences.	Year.			Increase as compared with 1893.
	1892.	1893.	1894.	
1	2	3	4	5
Against property ...	9,535	9,591	11,197	1,606
„ person	1,806	1,644	2,079	435
„ public tranquillity ...	609	670	796	126
Others	5,908	5,047	5,525	478
Total ...	17,858	16,952	19,597	2,645

Of these cases, 18,602 were returned as true against 16,281 in the previous year, giving an increase of 2,321 or 14·2 per cent.

The average price of rice in 1891-92 was 13 seers 14 chittacks to the rupee; in 1892-93 it was 11 seers $4\frac{3}{4}$ chitaks; in 1893-94 it was 11 seers $8\frac{3}{4}$ chitaks; in 1894-95 it was 14 seers $3\frac{1}{2}$ chitaks. In 1893 the average price was 11 seers $13\frac{1}{2}$ chitaks; in 1894 it has been 12 seers 13 chitaks. Where there are so few day-labourers, and where so large a proportion of the population is interested in the growth of the staple food, the effect of high prices on crime is somewhat mixed, but probably the above figures are a fair index to the condition of the people. In 1891, 1892, and 1893, with rising prices of rice, cognizable crime on the whole remained almost stationary; in 1894, with falling prices, it has risen enormously. In the face of this, to attribute increase of crime in 1894 to high prices, as is done by the Magistrates of Dacca and Backergunge, would seem at first sight absurd. But prices remained high up to September 1894. On the 1st of July the average price of rice for the Division was still 11 seers to the rupee. I have consulted the quarterly returns

Foreign trade.

3. The total value of the foreign trade during the year is stated to be Rs. 1,07,31,946, of which Rs. 27,62,862 is under imports. There is an increase in the value of this trade of Rs. 17,16,949, as compared with that of the previous year.

Coasting trade.

4. In the coasting trade both the exports and imports increased. The total trade was valued at Rs. 1,63,35,492 against Rs. 1,47,73,960 of last year, the increase amounting to Rs. 15,61,532. The principal items of increase are "Treasure" and "Railway materials," probably required for the Assam-Bengal Railway, and "Grain—Paddy," "Rice" and "Tea."

5. The principal articles of trade are exhibited in the following statement:—

			1893-94.	1894-95.
Exports ...	Jute ...	Tons	33,762	37,395
	Rice ...	"	8,455	37,335
	Tea ...	lbs	11,19,426	10,75,948
Imports ...	Salt ...	lbs	13,301	10,142
	Oil ...	Gals.	12,18,725	2,517
	Piece goods ...	Pieces	160	621
		lbs	423	......
		Yds	24,59,289	1,15,88,968

Port appliances.

6. The appliances of the port and the light-houses at Norman's Point and Kutubdea are reported to have been kept in good order during the year.

Earnings and expenditure of the *Gekko*.

7. The earnings of the steam-tug *Gekko*, maintained by the port, amounted to Rs. 15,125, whilst the expenditure on maintaining that vessel, exclusive of Rs. 16,294 for interest and sinking fund, aggregated Rs. 17,411. The net loss therefore was Rs. 2,286 against Rs. 8,495 in 1893-94. There was, however, a set-off to the extent of Rs. 5,000, being the estimated value of services performed for the port, for which no charge was made. Apparently the *Gekko* has now secured the whole of the towing work done in the Port.

Health of the shipping.

8. The health of the shipping was good compared with that of the previous year. Twenty-five seamen were admitted into the hospital against 30 in the year before. Of this number, two were relieved, and 23 were discharged as cured.

9. The state of the Pilotage Fund is shown in the subjoined table:—

	1893-94.			1894-95.		
	Rs.	A.	P.	Rs.	A.	P.
Opening balance of the year	3,962	7	6½	7,341	11	3½
Receipts during the year	14,842	11	3	16,599	0	0
Total ...	18,805	2	9½	23,940	11	3½
Expenditure during the year	11,463	7	6	9,050	6	5
Balance at the close of the year	7,341	11	3½	14,890	4	10½
Total ...	18,805	2	9½	23,940	11	3½

The working of the Pilot Service is stated to have been satisfactory. There were two slight accidents to ships under pilotage charge, but the pilots were not to blame for them.

By order of the Lieutenant-Governor of Bengal,

A. D. McARTHUR, *Lieut.-Col.*, R.E.,

Secretary to the Government of Bengal.

WEATHER AND CROP REPORT.

For the week ending the 23rd September, 1895.

Burdwan.—Rainfall at Burdwan 5·93. Weather seasonable. Good rain in Sadar and Raniganj and parts of Kalna has improved prospects of *aman* rice. Very little rain in Katwa. Condition of cattle good. Fodder and water sufficient. Common rice sells at an average price of 16 seers a rupee.

Midnapore.—Rainfall at Sadar 6·59. This heavy rain is expected to do a deal of good to the standing crops and help to prepare lands for the cold-weather crops. Water and fodder abundant. Rice selling from 14 seers per rupee at Ghatal to 24 seers per rupee at Contai.

24-Parganas.—Rainfall at Sadar 1·21. Weather hot. Prospects of *aman* somewhat improved by rainfall within the week. Transplantation completed. Harvesting of *aus* and jute continues. Health of cattle generally good. Fodder and water sufficient. Rice sells at—

	Srs.	c.	
Sadar	12 to 14	0	per rupee.
Barasat	15	0	
Basirhat	17	7	
Diamond Harbour	16	0	

Murshidabad.—Rainfall 1·69. Weather hot and cloudy. The recent rain has done much good to *aman* rice. Harvesting of *bhadoi* rice and jute going on. *Kalai* is being sown in some places. Sugarcane and mulberry doing well. Fodder sufficient. Common rice sells at 16 seers per rupee.

Khulna.—Rainfall at Khulna 4·92, Bagerhat 5·39, Satkhira 4·50. Weather hot and for a few days cloudy. Harvesting of *aus* and jute continues. The grain in the ear of the *aus* is not full. Transplantation of *aman* still going on in Satkhira. Fodder and drinking water sufficient. No cattle-disease. Prices of common rice:—

	Srs.	
Sadar	16 to 21	per rupee.
Bagerhat	19¼	
Satkhira	15	

Dinajpur.—Average rainfall 2·57. Weather seasonable. Standing crops good. Price of common rice 15 to 16 seers per rupee. No outbreak of cattle-disease, nor any complaint for fodder or drinking water.

Rangpur.—Average rainfall 1·14. Weather hot and cloudy. Prospects generally favourable. Transplantation of *aman* and steeping of jute going on. Rice selling from 12 to 14 seers per rupee. Fodder sufficient. Cattle-disease prevalent in some parts of the Nilphamari subdivision.

Pabna.—Rainfall 1·80. Weather cloudy and rainy. Rivers falling. Prospects of crops good. Common rice selling at Sadar 16 seers per rupee and at Sirajganj 14 seers per rupee. Jute at Sirajganj selling from Rs. 4-2 to Rs. 5-6 per maund.

Dacca.—Rainfall 2·27. Weather hot with rain at intervals. Harvesting of jute nearly completed. Prospects of *aman* favourable. Common rice sells at 18 seers per rupee. No cattle-disease. Fodder available.

Chittagong.—Rainfall 1·63. Weather hot. Harvesting of *aus* completed. Outturn estimated at 10 annas. Transplantation of *aman* still continues. Prospects generally fair. Water and fodder sufficient. Rice selling at 18 seers per rupee.

Patna.—Rainfall at Sadar 5·41. *Bhadoi* crops are being harvested. Prospects of paddy favourable. More rain wanted for the paddy crop in the Barh subdivision. Condition of cattle good. Fodder and water sufficient. Common rice selling from 18 to 20 seers per rupee.

Gaya.—Rainfall at Sadar 1·55. General rain has benefited rice crops greatly. *Bhadoi* harvest over. Common rice continues selling below average at 16 seers per rupee.

Champaran.—Rainfall at Motihari 0·00. *Bhadoi* harvested. Prospects of *aghani* good.

Darbhanga.—Rainfall at Sadar 1·65, Samastipur 1·69, Madhubani 2·95. Harvesting of *marua* and *makai* in progress. Common rice selling from 18 to 19¼ seers per rupee. Fodder and water sufficient.

Bhagalpur.—Rainfall at Sadar 3·48. Approach of the cold weather is being felt and morning is becoming cooler. Wind at times westerly. *Kurthi* and autumn indigo are being sown. Reaping of *bhadoi* almost completed with more than average outturn. Prospects of paddy as yet favourable. Common rice sells at 18 seers 15 chitaks per rupee. Fodder and water sufficient.

Purnea.—Rainfall 2·08. Transplantation of *aghani* finished. *Bhadoi* paddy and jute are being cut with fair outturn. Cattle-disease at Sadar and Gondwara outpost. Fodder and water sufficient. Common rice selling at Sadar 25 seers a rupee.

Cuttack.—Rainfall 6·37. Weather seasonable. *Beali* being harvested. *Sarad* doing well. Condition of cattle good. Fodder sufficient. Common rice sells at—

				Srs.	c.	
Cuttack	...	...	...	21	0	per rupee.
Jajpur	...	...	...	23	5	
Kendrapara	...	...	...	26	4	
Banki	...	...	...	25	0	

Hazaribagh.—Rainfall at Sadar 5·75, Giridi 3·95. Ample rain has fallen all over the district. Prospects of rice crops immensely improved. *Bhadoi* crops being reaped with good results everywhere. Ploughing for winter crops continues. Fodder abundant. Price of common rice at Sadar 18 seers and Giridi 14 seers per rupee.

General Summary.—There was general rain during the week, the falls being heavy in Orissa, Chota Nagpur and South-West Bengal. The winter rice crop has been generally benefited by the rain. The prospects in the Burdwan and Presidency Divisions, though still bad, have somewhat improved. The rain has also helped the preparation of lands for the cold-weather crops. *Aus* rice and jute are still being cut, and the harvesting of the *bhadoi* crops in Bihar and Chota Nagpur is in progress. Sugarcane is generally doing well. No cattle-disease is reported except from Rangpur and Purnea. The price of common rice is steady, but in some districts there has been a fall owing to the harvesting of the *aus* crop.

By order of the Lieutenant-Governor of Bengal.

REVENUE DEPARTMENT,
The 24th September, 1895.

C. E. BUCKLAND,
Secretary to the Government of Bengal.

Explanation.—... indicates that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns are wanting, the corresponding spaces in the total rainfall columns are left blank. With reference to the column of rainy days, the definition of a rainy day is when at least ·10 inch of rain has fallen

CALCUTTA, *the 24th September* 1895.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE WEEK ENDING, 8 A.M., SATURDAY THE 21st OF SEPTEMBER 1895.

THE chief feature of importance in the weather of the week has been the cyclonic storm which crossed the south-western districts about the middle of the week, and led, after a break of considerable length, to a renewal of monsoon weather over the whole province, and to heavy rain in the parts across which the area of lowest pressure passed.

During the early part of the week, while the depression was developing and moving slowly from Burmah, where the first signs of its formation appeared, fine weather, with very little rain, prevailed over the whole province, except in North Bengal, where showers were more frequent than in the other districts. On the 15th, the first day of the week, pressure was falling everywhere, moderately in Burmah and slowly elsewhere. The distribution was then very uniform over the province and the north of the Bay, and readings were below the normal by amounts varying from ·01 inch in Orissa to ·1 inch in the south of Burmah. A more important change was beginning over the south of the Bay, and to this change I think was due the ultimate strength of the storm when in the north-west angle of the Bay and the western districts. The change which probably advanced from the extreme south appeared as a steepening of the pressure gradients across the whole of the south of the Bay from the Tenasserim coast to the Madras coast. It was attended by a strong advance of monsoon winds and very heavy rainfall probably over the wide stretch of sea area between those two coasts, as Tavoy reported 5 inches and Cuddalore 3 inches on the 15th. There was, therefore, at the beginning of the week a shallow diffused low pressure area to the south-east of Bengal, and drifting westward, while from the south was coming a strong advance of monsoon winds due to some cause other than the depression. The moderate to slow fall of pressure continued on the 16th over the whole area. The shallow depression was over the north of the Bay, and the gradients were again steeper in the south, advancing slowly northwards. The heavy rain continued in the south of Burmah, most of the stations receiving from 2 to 4 inches. On the 17th pressure changes were very slight except in the south of Burmah, where there was a rapid rise. The depression was in almost the same position, but the steep gradients had closed up towards the north, and the two actions appeared from that date to combine. The depression concentrated, and from being wide and diffused it in a short time gave rise to a storm of considerable severity. This concentration was due not so much to falling pressure near the centre as to the rapid increase which became general over the area from the south of Burmah to the extreme north of the province. At the same time the energy conveyed to it by the inrush of monsoon winds from the south caused a deepening near the centre which was most apparent after the depression was inland.

On the 18th the centre was in the north-west angle of the Bay about equally distant from False Point and Saugor Island, and before 8 A.M. of the 19th it had crossed the coast line between Saugor Island and Balasore, probably at no great distance from the latter station. Owing to the quick development of the disturbance on the 18th and the steep gradients over the whole Bay, weather became stormy in the north-west angle. It also changed quickly over the province. From being fine with only occasional showers, cloudy rainy weather became general. As the storm moved over Chota Nagpur there was a rapid fall of pressure, and the depression deepened near the centre. Strong easterly winds prevailed in all districts except Orissa, and there was no loss of strength on the following day, as a gale of wind blew in Bihar after the area of lowest pressure had passed into the North-Western Provinces. The strongest winds recorded this season were at some of the extreme western stations of Bihar, and the higest average velocity for 24 hours was 42 miles an hour at Dehri.

From the 18th to the 20th rainy weather prevailed, the heaviest falls being in the western districts and at Darjeeling, where 12 inches fell in two days. The recovery was unusually quick. A rapid rise of pressure in the west on the 21st and a slow fall in the east gave a distribution of great uniformity over the whole area. The skies cleared and rainfall became light and scattered at all stations.

Pressure.—Changes were large while the depression was crossing the western districts, both the fall and subsequent rise amounting, near the path of the centre, to a quarter of an inch. In the eastern districts changes were generally small or moderate. Owing to the continued low pressure in the early part of the week means are below the normal everywhere by amounts varying from a few thousandths of inch to ·06 inch.

Temperature was from 3° to 4° above the normal at the beginning of the week, and though falling it remained relatively high till the 18th, when the disturbing effect of the depression became general. During the latter part of the week while the cloudy rainy weather lasted day temperatures were very low, and the mean daily temperatures were below the normal by between 1° and 6°. The means for the week are above the normal, except in Orissa, but the excess is small, except in Chota Nagpur, where it is 1°·1.

Rainfall.—As stated above, very little rain fell during the early part of the week, and during the latter half there was moderate rain in the east of the province and very heavy falls in the western districts. Orissa received on an average 4·42, Chota Nagpur 4·14,

Bihar 3·05, and South-West Bengal 2·76 inches. All these are above the corresponding normal amounts by between ·95 inch and 2·47 inches. In East Bengal the fall of 2·13 inches is practically normal, while in North Bengal it is only half the normal. In Assam only about a fifth of an inch fell.

The following table gives the summary of the temperature and rainfall data of each of the six meteorological divisions of the province for the week ending Saturday, the 21st of September 1895 :—

Meteorological Divisions.	Temperature.						Rainfall.									
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of month.		Since 16th May 1895.

	°/o
The mean relative humidity	87
The average relative humidity of the corresponding period for 24 years, Surveyor-General's Office	86
	Inches.
The total fall of rain from 15th to 21st September 1895	1·21
The average fall of the corresponding period for 24 years, Surveyor-General's Office	2·42
The total fall from 1st January to 21st September 1895	35·35
The average fall of the corresponding period for 24 years, Surveyor-General's Office	56·37

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograp[illegible] and from observations made at 6h., 10h., 16h., and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All t[illegible] thermometers are verified and the readings have been corrected to a standard constructed and verified at t[illegible] Kew Observatory. They are exposed under a thatched shed open at the sides and are suspended four fe[illegible] above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No. 8[illegible] formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed i[illegible] the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; g, gloomy; d, drizzling rain; p, passing temporary showers; t, thunder; <, lightning; ⌒ dew; lr, lightning reflection.

OFFICIAL PAPERS.

CONTENTS.

RESOLUTION ON THE ANNUAL GENERAL ADMINISTRATION REPORT OF THE CHITTAGONG DIVISION FOR THE YEAR 1894-95.

GENERAL DEPARTMENT.—MISCELLANEOUS—No. 307T.—G.

Darjeeling, the 30th September 1895.

RESOLUTION.

THE Lieutenant-Governor directs the publication of the Commissioner's Report on the General Administration of the Chittagong Division for the year 1894-95 for general information.

2. The subjects of special interest on which Mr. Oldham has made valuable remarks which should be studied by all officers appear to be as follows:—

Paragraphs 35 *to* 39, 89 *and* 90, *and* 188 *and* 189.—On the material condition of the people and the liability of the country or parts of it to famine.

Paragraphs 109 *and* 110.—On the reorganization of the village chaukidar.

Paragraphs 152 *to* 160.—Land acquisition cases - principles and results.

Paragraphs 162 *to* 173.—Management of wards' estates.

Paragraphs 174 *to* 178.—Excise as affected by local conditions of population and of geography.

Paragraphs 236 *to* 242.—Local Self-Government Institutions.

Paragraphs 253 *to* 260.—State of public feeling and the public press.

3. The Lieutenant-Governor does not concur in the views expressed by the Commissioner in paragraph 21 on the subject of the tours which Subdivisional Officers are required to make. Nor did Mr. Nolan's opinion on the same subject commend itself to His Honour, who has already in the Government Resolution on the Report of the Commissioner of the Presidency Division, called special attention to the value of tours by Subdivisional Officers, and the kind of subjects to which these inspections should be directed. These remarks may be read with Mr. Carlyle's instructions to his Subdivisional Officers, quoted in paragraph 12 of this Report, which seem judicious. It may be unnecessary in some subdivisions to require a tour of three months in the year, and long continuous tours are certainly to be deprecated; but the Subdivisional Officers should be frequently on the move, and every branch of the service throughout the subdivision should feel that it is liable to be visited and inspected by him at any time without notice.

By order of the Lieutenant-Governor of Bengal,

C. E. BUCKLAND,

Secretary to the Govt. of Bengal.

INDEX.

ANNUAL GENERAL ADMINISTRATION REPORT OF THE CHITTAGONG DIVISION FOR 1894-95.

No. 484M., dated Chittagong, the 29th June 1895.

From—W. B. OLDHAM, ESQ., C.I.E., Commissioner of the Chittagong Division,
To—The Secretary to the Government of Bengal, General Department.

I.—CHARGE.

(a) Division.
(b) Districts.
(c) Subdivisions.

I HAVE the honour to submit the General Administration Report for 1894-95 of the Chittagong Division. Mr. R. M. Waller, who succeeded me on the 25th February 1894, held uninterrupted charge of it from then till the 24th November 1894, when I relieved him. There has been no other interruption. The following District and Subdivisional Officers held charge for the periods against their names:—

DISTRICTS.	Subdivisions.	Officers.	For what period (both days inclusive).
1	2	3	4
Tippera ...	Sadar ...	R. W. Carlyle, Esq., C.S. ...	The whole year.
	Brahmanbaria	Babu Gobinda Chandra Basak	From 1st April 1894 to 1st June 1894.
		" Krishna Dayal Pramanic	" 2nd June 1894 to 31st March 1895.
	Chandpur ...	" Prokash Chandra Sinha	The whole year.
Noakhali ...	Sadar ...	S. K. Agasti, Esq. ...	Ditto.
	Fenny ...	Babu Bogala Prasanna Mozumdar.	Ditto.
Chittagong	Sadar ...	C. J. Stevenson-Moore, Esq., C.S.	From 1st April 1894 to 22nd April 1894.
		J. D. Anderson, Esq., C.S. ...	" 23rd April 1894 to 3rd August 1894, and from 5th November 1894 to 31st March 1895.
		C. G. H. Allen, Esq., C.S. ...	" 4th August 1894 to 4th November 1895.
	Cox's Bazar...	A. T. Fraser, Esq. ...	The whole year.

The frequent changes in the charge of the Chittagong district were managed so as to cause very slight administrative inconvenience. Both Messrs. Caspersz and Allen had held the office before. Both had been Joint-Magistrates of Chittagong, and the former as District and Sessions Judge, and the latter as Settlement Officer, had had experiences of the charge which were of much advantage to their administration as Magistrate-Collectors.

2. The charge of the political areas, the Chittagong Hill Tracts and the South Lushai Hills, will, with all other subjects connected with them, be separately dealt with in the political section.

II.—TOURS AND INSPECTIONS.

(a) Tour of Commissioner.

3. Mr. Waller was on tour for 41 days. In the rains he went to Rangamati and inspected all the offices there, and travelled up the Karnaphuli as far as the old border mart, Kasalong. In November he visited his former district, Noakhali, and inspected the offices at its head-quarters, and went on to Chandpur, where he inspected the subdivisional offices. The inspection memoranda and orders are the only notes left of these tours.

4. On the 10th December I left for five days to visit Cox's Bazar, where I inspected all the offices. This tour was made because of an outbreak of cholera which had carried off the Police Inspector and some well-known residents and created a panic. The Magistrate was in a distant part of the district, and I wished to see if the arrangements made for meeting the outbreak were adequate. Such visitations are rare at Cox's Bazar, and the usually gay little town wore a sombre appearance with disinfecting fires burning at each street corner, while the Mugs, who give it its bright aspect, cowered in their

houses. The arrangements made by the Assistant Surgeon to meet the epidemic were very complete, and it abated and soon disappeared. The people expressed much gratitude for my visit, during which I was able also to settle the question of the local madrassa, which was exciting much interest and about which they came to see me. Since the Lieutenant-Governor's visit to Cox's Bazar in 1893, and the notice taken by His Honour of this institution, efforts had been made by the authorities and residents to give it some stability as well as vitality, and had failed. Its supporters had resisted, but reluctantly assented to the Director of Public Instruction's proposal to merge it on the local English school and maintain it as a special class. The cholera panic had emptied the madrassa, and so made the solution of this question easier.

5. On the 15th December I started on my tour to the South Lushai Hills, and did not get back till the 12th January 1895. A separate report of this tour has been submitted. Rain fell till the 23rd December, and the wet marches and camps in the first part of the tour caused much sickness later on.

6. On the 20th January I left for Noakhali, and did not return to Chittagong till the night of the 16th March. Mr. Waller had inspected the Noakhali offices, and my visit was to confer with the Collector about the very troublesome state of affairs in his district connected with the acquisition of land for the Assam-Bengal Railway. But I was also anxious to renew my acquaintance with Mr. Agasti, an old colleague, and particularly desirous to learn the results of the first inspection of Noakhali ever made by a Lieutenant-Governor of Bengal. Sir Richard Temple had paid it a casual visit after the great cyclone of 1st November 1876, and no other Lieutenant-Governor, while in office, had been to the district till August 1894 (in my absence on furlough), when Sir Charles Elliott came there on inspection. From Noakhali I went on to Brahmanbaria, stopping for coal at Narayanganj, and taking the opportunity to have what for three years has been an annual meeting with the Commissioner of Dacca, with whom I have always notes to compare. At Brahmanbaria a large share of my time was given to the Municipality, with the result that the Commissioners at last assented to accept and pay for the services of an Assistant Surgeon, a question which has been under discussion since February 1892. They have since fulfilled their promise, and Brahmanbaria, with its 18,000 inhabitants, will no longer be remarkable by its supply of medical needs being represented by a dispensary under a Civil Hospital Assistant with an average attendance of 15 or 18 patients a day.

7. The state of the village watch, which, for this Division, is bad in the Brahmanbaria charge, also engaged my attention. Otherwise my office inspections were chiefly confined to the sub-treasury, and of these they were formal (by the catechism) and complete. I also met the two officers engaged in the settlement of pargana Sarail, with whom I had a good deal to do. By an arrangement made by the Board and assented to by Mr. Waller, these settlement proceedings are supervised by the Collector of Tippera under the Commissioner of the Presidency Division, and the Commissioner of Chittagong has nothing to do with them. Pargana Sarail, however, used to give us annually some 2,000 certificate cases, and from this part of the administration it is impossible for the Commissioner of Chittagong to hold aloof, while the matter is vital to the success of the operations in progress. The system of issuing certificates for pargana Sarail had been greatly limited when I was at Brahmanbaria in November 1893.

8. From Brahmanbaria I came straight to Chandpur on the 29th January, and went on by rail to Comilla next day, and arrived without any adventure worth note. But on the return journey, on the 22nd February, we were first run into by the engine which was to take us on, the collision knocking about and injuring everyone who was in the train, and throwing some of the occupants of open trucks out on to the rails, and later on we were turned, without any warning, on to an unprotected siding, and the engine was stopped only within a few feet of where the rails, and the bank on which they lie, ended. The result of two hours' delay was that the last 15 miles of the journey were made in a perfectly dark night over an unlighted line, and at a speed of over 20 miles an hour. These experiences are given because these journeys were memorable as the first over the Assam-Bengal Railway. When I had seen it last in February 1894, the bank was not finished and no rails had been anywhere laid.

9. At Comilla I stayed for nearly four weeks, my work much interfered with by fever from which the followers who had been with me on the Lushai tour equally suffered. In addition to the office and out-door inspections, I was able to inspect the volunteers and to do some work with them. Mr. Greer, who has left his mark on the Tippera district in many other ways, raised this half troop at Comilla just before his transfer to Darjeeling in July 1893, and its strength is undiminished and its members took keen interest in making themselves efficient.

10. From Comilla I came (by a circuit) to Calcutta, where I was summoned to the Investiture of the 7th March. The steamer for Chittagong had left the same morning, and this kept me in Calcutta for a week. My tour to Fenny, which I generally visit twice in the year, had been left for the last half of March, but fever recurred on my return to Chittagong, and I was unable to get to Fenny till the beginning of April, when I spent three days there, meeting Mr. Carlyle, who, like Mr. Greer in March 1892, came down to see me. A visit by the Magistrate of Tippera to Fenny is always worth his while, if only to see the contrast which the Noakhali chaukidars present to those of Tippera. A further reason for Mr. Greer's coming in 1892 was to ascertain why the Noakhali section of the Trunk Road was in such good order in contrast to the Tippera section; but Mr. Carlyle came by rail. I, too, travelled by rail (train and trolly) without adventure, and spent six hours at the two great bridges over the Fenny and the Mohari. The train in the Chittagong section was a heavy one, both going and coming, and fully a third of the line was over diversions at the bridging points. The speed, nevertheless, was some 30 miles an hour, sometimes more.

11. Thus, including this Fenny tour, which counts to the past season, Mr. Waller and I were absent from Chittagong for 134 days, of which 10 were spent by me in Calcutta, and I was at Chittagong for 37 days only in the year. Only one visit was paid to Comilla, where I generally spend ten days in the rains, and the time spent by Mr. Waller and me in Noakhali has fallen just short of the prescribed period.

(b) Tours of Collectors or Deputy Commissioners.

12. Mr. Carlyle gives the following account of his own and his subordinates' tours in Tippera. Ample as Mr. Carlyle's own tours were, the time spent on them would have been longer but for my illness at Comilla at the end of January and in February, when by his knowledge of the Chittagong district, of the Commissioner's office, and of frontier and Hill Tracts' affairs, Mr. Carlyle was able to give me much appreciated assistance in my own work:—

"I was on tour for 120 days during the year, of which 31 days were spent in Hill Tippera. I was on tour every month except October. I inspected the two subdivisional offices, police-stations, jails, sub-registry offices, municipalities, dispensaries, outstills, ganja shops, schools (occasionally), khas tahsil offices, important roads, settlement works, &c. In inspecting police-stations the registration of vital statistics and payment of chaukidars received my careful attention. I also paid special visits to some of the thanas, without previous notice, to see how chaukidars' parades were carried on. The greater portion of my time in May and June was occupied by enquiries regarding the distress caused by the floods of 1893, and distribution of relief and agricultural loans. In accordance with paragraph 3 of the Government Resolution on the General Administration Report of the Rajshahi Division for the year 1893-94, the following instructions were issued by me to the Subdivisional Officers:—

(1) They were to arrange their tours so as to interfere as little as possible with the hearing of judicial cases.

(2) When on tour they should inspect—

(a) All settlements under their control.

(b) All outstills and ganja shops.

(3) Enquire into income-tax cases requiring local enquiry, and at the same time make enquiries whether any one who should be taxed had been overlooked.

(4) Inspect thanas on Mondays or Tuesdays so as to be present at chaukidari parades, and on those occasions they should require the attendance of the panchayats with their accounts.
(5) Visit dispensaries, pounds, and schools.
(6) Enquire at post-offices regarding the sale of quinine.
(7) Note the state of roads and ferries over which they pass.

At the suggestion of the Commissioner, the panchayats' account, mortuary statistics and pounds formed the matters finally selected for special enquiry by the Subdivisional Officers during 1894-95."

The detailed notice of Mr. Carlyle's tour in Hill Tippera appears in the political section.

13. In Noakhali Mr. Agasti was on tour in every month except May, November, and December. He writes:—"I spent 128 days away from head-quarters. Excluding the days of arrival and departure, on which, as a rule, not much travelling was done, and also the few days of trip to Ichakhali and back to receive and see off His Honour and party and the Divisional Commissioner, and so on, the actual number is 105 days." He looked up a large number of bad characters. He made prolonged tours during the rainy season, to acquaint himself with every part of the district which had come recently under his charge, and he inspected the police-stations, khas mahal and sub-registrars' offices, schools, dispensaries, pounds, ferries, excise shops, and important roads. The subjects that engaged his attention were enquiries into bad-livelihood cases, the work of chaukidars and panchayats, vaccination, village sanitation, the condition of the peasantry, and the state of trade. In August he was for nearly a month engaged in inspecting the office of the land acquisition officer at Fenny. His cold weather tour was spent in visiting the islands Hatiya and Sandwip and some of the chars, where he enquired into settlement and survey operations, embankments and other matters, especially the arrangement of the steamer service of the Bengal Flotilla Company with the island of Sandwip, which he discussed with the agent who had come down for the purpose.

14. The Magistrate of Chittagong writes:—"Mr. Stevenson-Moore was on tour for three days. On the 15th April he rode to Raojan, returning to Chittagong on the 17th. During the interval he tried badmashi cases on the spot. I spent five days in July in inspecting at Patiya the thana, patshalas, khas tahsil and sub-registry offices. Mr. Allen was on tour for eight days in September, from the 6th to 13th. He left Chittagong for Cox's Bazar on the 5th, and reached Cox's Bazar on the 9th, encountering the contrary wind during the voyage. On the 13th he returned to Chittagong. The interval he spent in giving instructions to the Court of Wards' naib, khas tahsildar, Assistant Settlement Officer and Police Inspector, and in inspecting the khas mahal office, the sub-jail, the subdivisional office with the sub-treasury, the sub-registry and the settlement offices. He also made further arrangements with the khas tahsildar and the Assistant Settlement Officer for working the new settlement of the area known as Old Thana Ramu. Mr. Allen again spent three days on tour in September at Patiya, and while there inspected the settlement offices and held a meeting in which the matters relating to the constitution of the proposed Patiya union were discussed." Mr. Anderson began his tour on the 18th November and spent 13 days in the north of the district, visiting Sitakund and the lodging-houses there, and was engaged in inspecting thanas and outposts, Court of Wards' offices, schools, post-office, dispensaries, and sub-registry offices. He specially scrutinized vital statistics. In December he was on tour for 13 days. For eight days he was at Hathazari inspecting the local institutions and offices there and checking vital statistics, and three days he spent on the island of Kutubdia. In January he was 15 days on tour, chiefly in the Cox's Bazar subdivision. He spent eight days in February in Patiya on the usual inspections. In March seven days were spent in Satkania and Banskhali in the same way.

The District Officer of Chittagong's tour fell short of the minimum period by 17 days, chiefly because of frequent change of officers. Mr. Anderson explains that he was unable to give more than 54 days to touring, because he was constantly recalled by exigencies arising in the great office at head-quarters, the work of which was new to him.

15. In accordance with paragraph 3 of the Government Resolution on the General Administration Report of the Rajshahi Division for the preceding year, all District Officers gave instructions to their Subdivisional Officers regarding the objects of their tours, and the most compendious were those issued in Tippera, and described above. For Noakhali they were too detailed, minute, and obvious.

(c) Tours of Subdivisional Officers.

16. In Chittagong the Subdivisional Officer of Cox's Bazar was directed to pay special attention to panchayats and their accounts, to mortuary statistics and pounds. His accounts of the state of panchayats was satisfactory and interesting

17. In Brahmanbaria Babu Gobinda Chandra Basak was on tour for six days, and his successor, Babu Krishna Doyal Pramanik, for 101 days. In Chandpur Babu Prakash Chandra Sinha spent 128 days away from his head-quarters. He omitted to look after the pounds in his subdivision. Otherwise all matters requiring their attention were inspected by these officers. The most prominent special subjects were chaukidars, khas management, and, in Chandpur, local settlements. In Brahmanbaria, the Subdivisional Officer had also to look to the distribution of relief.

The second officer at Brahmanbaria, Babu Hemendra Lal Kastagir, spent nine days out of doors in miscellaneous revenue work.

18. In Noakhali the Subdivisional Officer of Fenny was on tour for 112 days, exclusive of his journeys to head-quarters to attend the reception of His Honour the Lieutenant-Governor, District Board's meeting, and the sale of excise shops. He was out every month, and made the usual inspections. He successfully exhorted his people about vaccination, and induced several of them to reserve tanks for drinking water. He made enquiries about income-tax assessments, illicit ganja and liquor from the hills, illicit manufacture of salt, gun licenses, movements of bad characters, besides the state of crops and of public health, and the relations of landlords and tenants.

19. In Cox's Bazar the Subdivisional Officer was on tour for 92 days. His judicial work while on tour was heavy, and his detailed inspections were almost wholly given to the working of panchayats and to excise matters.

20. The most interesting diaries were those of Babu Bagala Prasanna Mazumdar from Fenny, whose light judicial work enables him to assume the functions of the ruler of his charge more nearly than any other Subdivisional Officer. It, too, with its hills in the east and railway and great bridges under construction, and its various population, was the most interesting charge. Babu Krishna Doyal Pramanik's diaries were the most detailed and minute, and were those which evoked most action and order. The points which Mr. Frazer took up in Cox's Bazar were closely gone into and clearly described.

21. The inconvenience attending tours is felt most in the cases of Subdivisional Officers, and is inevitable under the existing orders. It is least felt in Brahmanbaria, where there has been a competent second officer for many years, and is lessened at the other subdivisions by the presence at them of Deputy or Sub-deputy Magistrates in the tour season. At Chandpur and Fenny this is a recent measure adopted to meet the requirements of the railway. Nevertheless, I do not think the advantages gained by Subdivisional Officers being compelled to be on tour for at least three months, counterbalance the disadvantages and expense and inconvenience to the public concerned with them, no matter how considerately their cases are arranged. In my Annual General Administration Report for the Burdwan district for 1886-87, I explained the same views, with the result that the period was curtailed from four months to three mouths; and I am in favour of some further modification of these orders. The Subdivisional Officers of Chandpur and Fenny are both natives of the respective districts to which they are posted, and cannot have much to learn about their charges. Their respective predecessors were natives of the immediate vicinities, and the officer at Fenny had held charge of it for eight years. Similar incidents must now-a-days be common elsewhere, but the main grounds for my views are more general. At one time the idea was often put forward that the Subdivisional Officer was the correlative of the District Officer, and was in Bengal the unit of administration. There are some non-regulation charges in which this is true, but in the Regulation Province it is becoming daily less

tenable, and I have, for regulation districts, always resisted it. A Subdivisional Officer is primarily a judicial officer stationed in the interior for the convenience of the administration and of the public, and for the same reasons some executive functions and powers were entrusted to him. These are yearly becoming more contracted, both under orders of Government and under the development of the judicial system. Thus, excise work and income-tax work have been centralized, so has settlement work if at all important. A Subdivisional Officer was always in name, and has finally in practice, been debarred from controlling the police enrolled under Act V of 1861, and now, in this Division, the control of the chaukidars has been taken from him. The judicial duties meanwhile have increased, and the due performance of these is the chief obstacle to extended tours. I think it would be sufficient to require them to visit once in the year every institution, except schools and post-offices, in their charges, by which the work of Government is carried on, as well as to hold the inspections required from them by the District Officer. In many cases this would not involve more than two months' absence in all from their head-quarters. As already said, I altogether except Subdivisional Officers in non-regulation tracts from these remarks. I would also except European officers who have so much to learn out of doors.

22. In Tippera, successive District Officers for many years have found it easy and advantageous to considerably exceed the prescribed touring period, and no complaints of inconvenience resulting have come to notice. In Noakhali, on the other hand, the minimum period has hitherto been barely attained. The District Officer's absence in the islands does cause inconvenience, but these tours to the islands are necessary and are insisted on by the Commissioner. In Chittagong the Magistrate and Collector's tours are restricted to the prescribed period, and often fail to attain it, and his absences are always short; but this is due to the exigencies of his own enormous office, and not to the demands of the public.

23. Appeals to the Commissioner of Chittagong are so few, and it is nearly always so easy to arrange for hearing them locally, that he could without much inconvenience be on tour for six months instead of four. I have been on tour in every month of the year except June, and my absences would have been longer but that hitherto I have been cut off from Tippera and Noakhali from March to November, unless by a circuit *viâ* Calcutta. The only capacities in which inconvenience from my absence is felt are those of Chief Customs Officer and of Chairman of the Port Commissioners. In the latter business is done personally, not by correspondence. The questions that arise in the former are unforeseen and urgent, and require long telegraphic correspondence. My Lushai tour this year did cause inconvenience, because by the Board's orders the papers in the important land acquisition case in Noakhali had to be sent to the Board in my absence, and I have never yet seen all the records, or been able to report the case in a complete form. It is the local practice before these tours to warn the Board and the Legal Remembrancer that routine work will be sent to them directly in the Commissioner's absence, and without his seeing it till his return. It is impossible to carry references on these tours, and the hill offices do not contain even books of reference. I also, in this tour, in ignorance of the new orders about the arrear collection department, the decentralization of contract contingencies, and respecting chaukidars, passed some erroneous orders, which in two cases afterward required reference to Government. The Lushai tour is inconvenient if made directly after an interruption to the threads of work caused by absence or otherwise.

(*d*) Inspections of district offices and treasuries.

(1) By Commissioner.

24. Mr. Waller inspected the Chittagong and Noakhali offices, and also the district treasuries at both places. I inspected the Magistrates' offices and the treasury at Comilla. The rest of the collectorate I generally inspect at my visit in the rains. I inspected the Lungleh offices and treasury.

(2) Collectors.

25. In Tippera the Collector inspected the treasury on the 13th July and in November 1894.

In Noakhali the treasury was inspected by the Collector in September 1894 and in March 1895.

In Chittagong the treasury was inspected only once within the year, and once again immediately after its close. Mr. Anderson reports that on his

return from camp in March he had so much office work to do that he was unable to inspect some of the offices within the year.

(e) Inspection of subdivisional offices and treasuries.

(1) By Commissioner.

26. Mr. Waller inspected the Rangamati offices and sub-treasury, and the office of the Bohmong's Circle at Rangamati. He also inspected the Chandpur offices and sub-treasury.

I inspected all the offices and the khas tahsili at Cox's Bazar, but did not use the form for the sub-treasury. At Brahmanbaria I did use it and closely inspected the account department, and had less time for the other offices.

At Fenny I did not use the form in inspecting the sub-treasury, but had to inspect it closely nevertheless, on the results of the Collector's use of the form just before. All other offices and institutions at Fenny were also inspected.

(2) Collectors.

27. In Tippera the Collector inspected the subdivisional offices and treasuries twice during the year. Brahmanbaria was inspected in June and February, and Chandpur in July and March.

In Noakhali the Fenny office and treasury were inspected in July and March.

In Chittagong the Cox's Bazar subdivisional office and treasury were inspected in September and January last.

III.—WEATHER AND CROPS.

28. The year was one of average and well distributed rainfall and of splendid crops. The rainfall was 102·99 against 125·75 the year before. I have this year excluded figures for the Chittagong Hill Tracts, since that region as little represents the weather and crops of any portion of the Division to be considered in that connection as do Hill Tippera and the South Lushai Hills.

29. In Tippera there was a heavy fall in May. The rains did not begin till the 2nd June, and continued till the beginning of November. The cold weather was unusually dry.

The floods of 1893 left layers of fertile soil which yielded fine crops. The showers in April and May helped the *aus* crop, which was over 17 annas against some 8 annas the year before. *Aman* was over 19 annas against 10 annas, and the jute crop 18 annas against some 10 annas in 1893. The dry cold weather affected pulses, chillies, and *boro* paddy, which were poor. There was a bumper betelnut crop, and it is important in the southern part of the district.

30. In Noakhali the rainfall was less than that of the year before by almost 28 inches, though 2 inches more than the average for the last four years. The crops, rice, jute, cocoanut and betelnuts were all on the bumper scale, and the year a very prosperous one.

31. In Chittagong the rainfall was less than in the year before by 34 inches. The *bhadoi* crop was average, but the *aman* was excellent. Pulses and similar crops, too, were better.

IV.—PUBLIC HEALTH.

32. The following table gives the registered mortality under the main heads:—

Prevailing diseases.	Tippera, population 1,782,935.				Noakhali, population 1,009,693.				Chittagong, population 1,290,167.			
	Number of deaths reported.		Deaths per mille.		Number of deaths reported.		Deaths per mille.		Number of deaths reported.		Deaths per mille.	
	1893.	1894.	1893.	1894.	1893.	1894.	1893.	1894.	1893.	1894.	1893.	1894
1	2	3	4	5	6	7	8	9	10	11	12	13
Cholera	7,206	3,892	...	...	5,682	3,110	...	...	705	2,335	..	...
Small-pox	152	89	...	...	58	225	...	...	105	61	.	
Fever	27,579	28,652	...	...	22,577	19,415	...	...	27,465	28,020	..	..
Bowel-complaints ...	362	380	...	...	207	180	...	...	576	663		...
Others	6,748	6,718	...	...	3,854	3,179	...	...	3,735	3,758	...	
Total ...	42,047	39,681	23·5	22·2	32,378	26,109	32·06	25·8	32,580	34,837	25·2	27

The year is said by all the Magistrates to have been an exceptionally healthy one.

In Tippera, though the figures are probably far from being accurate, it is also true, as the Magistrate remarks, that the mortality was much less than in 1893. Cholera broke out in an epidemic form in 1893-94 and continued up to April and May. Then it suddenly disappeared, and broke out afresh in November, locating itself in two thanas, where it continued in a virulent form till last May. It was imported by pilgrims, or received an access from them, after the Brahmaputra bathing festival in the beginning of last April.

The increase in the deaths from fever is attributed to the want of good drinking water aggravated by the dry cold weather of 1893-94, and to the unwholesome food which the poorer classes ate during the scarcity which lasted till July 1894.

Cholera and small-pox imported from Calcutta appeared in Comilla, but it was healthy nevertheless. It is fairly protected by vaccination.

The District Board spent Rs. 1,388 for sanitation in the re-excavation of a tank and the deepening of five channels.

The two municipalities spent just under Rs. 1,000 between them in masonry drains round a tank, in cleansing drains, in re-excavating and cleansing tanks, and on tank bathing-places and fencing. These are petty sums, but do not include the maintenance and reservation of drinking water tanks which are also carried on.

33. In Noakhali the figures under cholera, fever, bowel-complaints and other diseases show reduced mortality. A few cases of cholera happened in May and June, and from then till the end of November the district was practically free from it. The most unsatisfactory feature in the year's record is the increase of small-pox. There was one death in 1890, 27 in 1891, seven in 1892, 58 in 1893, and 225 in 1894. There were 3,000 vaccinations—a very small number compared with the birth-rate. The Magistrate, Mr. Agasti, insists on the accuracy of his figures, and certainly took much pains in verifying them and in keeping his chaukidars up to their work.

The District Board claim to have spent Rs. 10,335 on sanitary works, chiefly drainage and tank and canal clearing.

The little Municipality spent Rs. 107 on the embankment of a reserved tank, as suggested by the Deputy Sanitary Commissioner.

34. In Chittagong the Magistrate insists that the year was a particularly healthy one, and attributes the higher mortality shown to better reporting, as is always the case in epidemics of cholera. In the Chittagong Municipality the death-rate reported was under 21 per thousand, and the Magistrate says he has no reason for doubting the accuracy of these figures. No doubt it is by the health of this capital, which is sometimes very bad, that the health of the whole district is judged. The deaths from small-pox dropped from 105 to 61. There was an outbreak of cholera in Cox's Bazar in November, December, and January, and it spread thence to the Hill Tracts.

The Chittagong Municipality spent Rs. 440 in deepening its main drainage channel, Rs. 970 in cleaning minor drains, and Rs. 470 in repairing wells and springs.

The Cox's Bazar Municipality spent over Rs. 1,500 on its drainage. The direct expenditure of the District Board on sanitary works has not been given.

The unhealthy season in Chittagong and Noakhali is the two months' interval before the rains. It empties the schools and cripples the offices.

V.—MATERIAL CONDITION OF THE PEOPLE.

35. Hitherto this subject has been dismissed with a few congratulatory remarks, and in 1893 I wrote that, important as it was, none could be more lightly treated in this Division, which was that year excluded from the ordinary purview of the Famine Code. But after the floods and cyclone of the same year, private subscriptions aggregating Rs. 6,500, and contributions from the District Boards to the amount of Rs. 1,450, were expended in relieving the poor in Tippera and Noakhali, while last year relief works were opened by the Comilla and Brahmanbaria Local Boards, on which 4,451 persons found employment and Rs. 8,559 were distributed in gratuitous relief. His Highness the Maharaja

subscribed Rs. 2,871 of this sum, and the District Board and the Sarail estate gave the rest. The distress stopped in July, when an unusually fine crop of *aus* rice was harvested. Nearly Rs. 2,500 had been meanwhile advanced to 558 persons as agricultural loans.

These occurrences have given a rude shock to the preconceived ideas on the subject. Mr. Carlyle tells me that my dictum that the experience of over a century and a quarter showed that no need for famine relief might be apprehended, even in Tippera, in April and May, was a serious embarrassment to him when the call for some relief to the poor and helpless actually came. But an examination of the nature of this distress and comparisons with the results of scarcity elsewhere in India, show that there is little cause for anxiety and no need for the systematic maintenance of safeguards. The distress was caused by the floods of 1893, followed by the cyclone of that year, and then by the appearance of insect pests. It was much aggravated by the extent to which the cultivators, who of late years in Tippera have shown much speculative spirit in connection with jute, had depleted their food-stocks under the attractions of the high prices offered for rice earlier in 1893. Some of the rice exported to Burma actually came back to the Tippera markets. Because of their normal prosperity, there is no regular *mahajani* system in these districts, and the peasantry had not the alleviation which it affords in more precarious and impoverished parts of the Province. The result of these combined causes was that want of food was felt by women and children who had no men to look after them, and who usually subsist by begging or light household work. Mr. Carlyle writes that the difficulty of relieving this distress is great, "as the cases are scattered about a few in each village, and unless the distress assumes far larger proportions than was the case last year, relief should be given locally; and this, owing to local conditions, makes it practically impossible, in the case of women and children, to exact work for relief given. Spinning cotton, for instance, is an art with which most of the women are unacquainted and for which they have not the implements." He adds that if serious distress did recur it would be necessary to start poor-houses, both for men and women, at which work could be enforced. It would be impossible in the rains to provide earthwork for a large number of men in a country which is under water from the middle of June. For the smaller cultivators loans to be given by the District Board on the joint security of not less than 10 or 15 cultivators in a village, up to Rs. 100 or Rs. 150, would be the best relief.

36. So that the exclusion of Tippera from the purview of the Famine Code is further justified because the relief provisions of the Code could not be worked in it.

Mr. Carlyle also says that "the comparatively small class of labourers who hold little or no land, and weavers, were also much affected." But on this statement I can throw some side-lights not referred to by him. When I was at Brahmanbaria in November 1893, the head of the local mission, a clergyman much respected for his soundness of judgement and knowledge of the people, represented that the distress among the peasantry was extreme and should be relieved on a large scale, and that the sums entrusted to him for distribution in charitable relief were wholly inadequate. I pointed to the road and drain and canal clearing works in progress, for which the authorities had to import labour from the south of the district and from Noakhali, and said that acceptance of work on them would be a proof of need. The answer was that the Muhammadans of pargana Sarail would sooner die than engage in such menial labour, and to this I remember giving a hard reply. The statement, nevertheless, is as true as it is of the Feringis of Chittagong, of whom the same is often said, and the causes for this feeling of pride which are known in the latter case, are, I believe, similar. The Sarail Muhammadans are the descendents of the Nawab's soldiery. It is a coincidence that they exhibit the morose and gloomy puritanism referred to elsewhere as conspicuous on the Sylhet border.

But the weavers alluded to by Mr. Carlyle are under no such influence. They are Hindu *jogis*, and the caste, which was within the century a very numerous professional one, has taken generally to agriculture.

37. Again, I find from the report of the Director of Surveys that when this distress, as represented to me, was at its height, the survey party engaged on the Maharaja's estates touching and partly comprising the area of scarcity had

to import 300 coolies from Western Bengal for its ordinary field work. There was no decrease in the influx of labourers from Bihar and Oudh for agricultural labour in Tippera, and the railway which intersects the locality most affected still failed to attract local labour, though at its rates a full day's work will earn over six annas.

So the indications of prosperity among the lower order in Tippera are still the same. Their women do no out-door labour. They themselves select it, and though they can toil hard at work of their choice, like ploughing and sowing and reaping, a very great number of them will not engage in cutting and carrying earth, and they employ foreign labour to do this. Closely crowded though the population is, they never emigrate. They are so confident of their food-supply that they devote most of their land to jute, now the most important crop in the district, and since 1891 they have joined in the speculations which attend this produce.

38. I should have liked to have reproduced the remarks made by Mr. Agasti for Noakhali, but that this chapter has already far exceeded its usual length. He writes fully on the subject, and from his knowledge of the country his opinion on it is especially valuable. Nowhere else has he seen such prosperous people enjoying such an even distribution of wealth, and he says with the last good harvest they have completely recovered from the effects of the calamities of 1893, and are again able to freely indulge in their pastime of litigation. He has given a calculation by which he estimates that in an ordinary year the surplus rice exported gives close upon 100 lakhs of rupees to his small district, and the betel and cocoanut exports between 20 and 30 lakhs. His concluding remarks are—

"In certain respects Noakhali may be described as a model district. The people are non-criminal. They are all but total abstainers. They are law-abiding, and there are very few offences under the marriage laws, which so prominently characterise the Muhammadan population of Barisal and several other districts of East Bengal. The people are prosperous; their material wants are few and are easily satisfied. They are, however, ignorant, superstitious to a degree, wanting in the amenities of social life, and boorish." I think them genial folk compared with their neighbours in North Tippera. Mr. Gee, the Engineer on the Mohari and Fenny bridges, who is isolated in a part of the country where a European has been seldom seen, and who knows no Indian language, is treated by his rustic Muhammadan neighbours with the greatest courtesy and kindness, and other similar instances have come under my notice. The temperance of the people and their social morality are wholly attributable to the strictness of their religion.

39. Chittagong, with the most prosperous population in Bengal, enjoyed a good year. Wages continue their gradual rise. Chittagong is the only part of India known to me where cultivators are found holding land at a higher rent than its produce can possibly repay, like the examples which used to be so common in Ireland and are becoming so common in England.

VI.—EMIGRATION AND IMMIGRATION.

40. In Tippera a few fishermen as usual left for Sylhet and Mymensingh to fish, and people went to Hill Tippera in the cold weather and the rains for timber and other forest produce; but this is not emigration, and there is none.

41. Crowds of up-country men came to work on the Assam-Bengal Railway. During the harvest season a large number of reapers came from Dacca, Faridpur and Mymensingh.

42. From Noakhali there was the traditional exodus to Backergunge to cut paddy and to Akyab for daily wages or trade.

43. From Chittagong there was the usual migration to Arrakan in the winter season for harvest and mill work, and the wages so earned are believed to be the source from which tenants in Chittagong are often found paying for their fields' rents which are higher than the produce can bear.

VII.—PRICES OF FOOD AND LABOUR.

44 In Tippera, between September 1893 and July 1894, the price of rice went up to Rs. 5-8 per maund, and did not drop till much of the rice which it had sent away in this very interval came back to it from as far as

Akyab. Notwithstanding the scarcity, there was no perceptible cheapening of the labour rate or diminution in the numbers of immigrant labourers. During the latter part of last year, after the good harvest, the price came down to Re. 1-8 a maund.

Labour becomes dear during the harvests, when a common cooly receives Rs. 12 a month.

45. Noakhali did not share so fully in those fluctuations of prices, because its internal communications are bad and it could not export so fully. The present low prices have not been enjoyed in Noakhali for the last five years.

46. Chittagong shared the low prices following the bumper harvests, but the rates of labour continue slowly to rise under the influence of the railway.

It is said there was no change in the price of salt in each locality, but great differences between the prices in these localities came under notice, and in consequence salt began to come southwards from Narayanganj, which it has not done for several years.

VIII.—MANUFACTURES AND MINES.

47. There are no mines in the Division. A pearl fishery has recently been discovered off the south coast of Chittagong, and has caused some excitement. The pearls are said to be very valuable, and the great firm of Visram, Ibrahim and Company are among the competitors for the lease of the fishery. The case is under inquiry.

In Tippera there are no important manufactures. Brass utensils, bamboo baskets, pottery, rough agricultural tools and carpenters' work, coarse cloth and molasses are the only manufactures, and they are consumed locally.

The Elliott Artizan School has sent out one student from the blacksmiths' class and five from the carpenters with certificates of proficiency.

48. In Noakhali, earthen pots, bamboo mats, baskets, wooden seats and fishing-nets are manufactured for local use.

49. In Chittagong, ships are built, rice is milled, and tea and coffee are made. The quantity of tea exported was 1,075,948 lbs. against 111,942 lbs. the year before. On account of unseasonable rain and the absence of cold weather in January and February there was a short outturn in 10 out of 15 gardens that furnished returns. In quality the tea was superior to the outturn of last year. Messrs. Bullock Brothers and Company milled 8,150 tons of rice worth Rs. 58,000, against 1,320 tons, then valued at Rs. 22,300, the year before.

The milling season extends from November to April, and on an average 100 coolies are employed daily.

Six brigs or sloops were built against one in 1893-94. Coarse mats used for bedding are prepared in Chittagong from a reed known as *Patipata*, and are sometimes sent to Arakan and Rangoon for sale.

IX.—TRADE AND COMMERCE.

50. Writing in 1893, I said that nearly all the trade of the Division was focused at the ports either of Chittagong or Narayanganj. This is scarcely correct. The amount of trade carried on with Calcutta and with neighbouring districts in countless boats by the innumerable water-ways is enormous. The cart traffic, however fast it is developing, is inconsiderable and strictly local. How small it is can be seen from the fact that Brahmanbaria, a busy mart with a population of over 18,000 within its municipal area, does not possess a single cart, and that the whole Division has only a single road, that from Dacca to Chittagong, with a surface breadth of over 16 feet throughout.

51. Rice is the chief article of export, and in prosperous years the bulk of it doubtless comes to Chittagong, but any rise of prices in the deltaic districts diverts it by the far safer routes by which they can be reached. Though fleets of boats laden with rice come to Chittagong in the cold season, they can only do so, and must make the return journey, in the intervals between the spring tides. Off the Noakhali coast these make navigation dangerous even for a powerful steamer, so strong and high is the *bore*. Still more capricious are the exports of jute, which appear to depend altogether on the choice of freights offering at the time in Calcutta and Chittagong. The most constant export is cotton, an inconsiderable item, because Chittagong is

its nearest outlet. Equally great and apparently unaccountable are the fluctuations in the chief articles of import at Chittagong, salt and mineral oils, while piece-goods, which are probably the chief imports, do not pass through it at all. Thus Chittagong is a port of the most partial kind. Its statistics, varying unaccountably as they do, give no idea of the volume of the trade, only a partial idea of the character of the exports, and one still more partial of the character of the import trade. Considering that it is selected for the import and export of only four main articles of commerce, this was to be expected. Next to it in importance, and with a far greater variety of trade, is Chandpur, also a port. Then in order come Brahmanbaria on the Titas and Hajiganj on the Dakaitia in Tippera and Cox's Bazar in Chittagong, only approachable at certain seasons of the year. The trade registered shows not only the fluctuations at particular centres noticed, but sometimes great inequalities before the level is reached. When these refer to jute, the cause is speculation in which the jute cultivators have now begun to share. The same cause probably accounts for the fact that a great deal of the rice which in 1893 was sent from Tippera, Noakhali and Chittagong to Burma, came back from Burma to those districts. Last year salt was found to be cheaper by Re. 1 a maund in the north of the Noakhali district, which gets its supplies from Calcutta, than on the littoral within the salt limits, where salt is received from Chittagong, and the inequality lasted for a long time and perhaps continues, notwithstanding the facilities that have been given for import from the north by the establishment of new stations.

The following remarks notice the state of trade in each district, though the Chittagong statistics are the only figures available and, as explained, they are not as representative as those collected for the trade up the Karnaphuli, and noticed in the section on the Chittagong Hill Tracts.

Tippera.

52. Besides country boats, steamers on the Cachar and Sylhet lines touch at several marts; but the daily steamer service between Chandpur and Hajiganj has been given up, as it did not pay. There are several roads, but carts are only used in the interior in the dry weather.

The chief exports are jute, rice, betelnuts, dried-fish, hides, mustard-seed sesamum, canes, and cocoanuts. The last jute outturn is estimated at 18 annas, and that of rice at close on 20 annas. Several trading firms at Narayanganj have opened jute depôts and sent agents to the principal marts to make purchases. There are numerous middlemen between the cultivators and jute merchants. The cultivators also frequently take their produce direct to Narayanganj. The price of jute during the year ranged from Rs. 3-8 to Rs. 5 per maund.

Rice comes next to jute. This is exported, both husked and unhusked, to Calcutta, Dacca* (for Chittagong), Faridpur and Mymensingh. During the first few months of the year, when scarcity prevailed and the price ruled as high as Rs. 4-8 a maund, paddy and rice were imported.

* The rice for Chittagong is loaded in brigs at Narayanganj.

Next come betelnuts, which are abundant in the south of the district. The principal places of business for dried-fish are Chutalpur and Bhulakut. Hilsa fish is salted on the banks of the Megna.

European piece-goods brought from Calcutta or Dacca are the largest imports.

Country-made cloth of fine quality used by the wealthy classes is still imported in small quantities from Dacca and Mymensingh, but the cheaper machine-made fabric is fast replacing it. Firewood, timber, building materials such as bamboo, canes, &c., as well as cotton, are imported from Hill Tippera. A large quantity of cotton goes to Dacca and Narayanganj.

Oil, tobacco, pulses, brass utensils, sugar, salt and fancy goods are brought from Dacca and Narayanganj and distributed all over the district.

Under this section I quote the Magistrate's notice of the establishment of a novel kind of speculative association: "Death and marriage associations have sprung up in the subdivision of Brahmanbaria in imitation of life assurance companies. Subscribers to these associations are required to register their names on payment of an admission fee which varies according to the class of subscription. A death or marriage fee is required on the death of any member.

or the marriage of any one named by one. Seventy-five per cent. of the sums so collected are paid to the nominee of the member who dies or to the boy or girl who is married, as the case may be, and 25 per cent. is retained by the company. The admission fees are divided amongst the directors or managers."

Noakhali.

53. In Noakhali the principal exports are rice, betelnuts, cocoanuts, eggs and mustard oil. The eggs are exported to Chittagong and go on to Burma. Cotton from Hill Tippera is also exported.

Cloths made by local weavers are still used by the lower classes. Noakhali was a great weaving emporium, and the East India Company had a factory at Lakhipur. There is a steamer service between Barisal and Noakhali, which imported 59,149 maunds of miscellaneous goods against 42,666 maunds the year before. The service is not used for exports. Raipur Hát, formerly the chief mart in the district, now much decreased by the silting up of the Dakaitia, is still the chief place for export of betelnuts. Sonapur and Lakhipur are also places of extensive trade in betelnuts and cocoanuts.

Bhowaniganj is the centre of the import trade from Narayanganj and other places. The principal rice marts are Chaomoni, Basu's Hát, Sahebar Hát, and Nadona.

The Collector gives a calculation to show that 60 lakhs maunds of the entire produce of paddy, representing about 70 lakhs in value, were available for export last year, and that in an ordinary year with a higher level of prices the value would be 100 lakhs of rupees. The prices of rice last year throughout the Division were the lowest for the decade.

The imports of Noakhali are of the same character as in Tippera, but more than half the salt comes from Chittagong. Neither Magistrates have noticed kerosine oil. The whole of it seems to come from Chittagong for both districts. Owing to the silting up of channels, the internal communications of the Noakhali main land are very defective. They will be noticed under the proper head. It is their state which accounts for the inequalities in the prices of salt.

Chittagong.

54. The table below shows the number and tonnage of foreign vessels last year. The increase was due to larger shipments of jute and rice following the fine harvests.

	Number of vessels.			Tonnage.		
	Entered.	Cleared.	Total.	Entered.	Cleared.	Total.
1	2	3	4	5	6	7
1893-94	34	15	49	32,844	26,694	59,538
1894-95	39	23	62	52,066	34,189	86,255
	+5	+8	+13	+19,222	+7,495	+26,717

The interportal trade is illustrated by the table below. The number of vessels was less, but the tonnage was much greater. The British India Steam Navigation Company have begun to use larger steamers for the coasting trade.

	Number of Vessels.			Tonnage.			Remarks.
	Entered.	Cleared.	Total.	Entered.	Cleared.	Total.	
1	2	3	4	5	6	7	8
1893-94 ...	626	617	1,243	202,030	208,885	410,915	
1894-95 ...	595	563	1,158	210,834	216,390	427,224	
	—31	—54	—85	+8,804	+7,505	+16,309	

The appended statement shows the value of the sea-borne traffic. The net increase of Rs. 17,16,949 in the foreign trade is shared by paddy, rice, jute, the class "all other articles" (covering a shipment of bone-meal), and large quantities of railway materials.

The increase of Rs. 15,61,532 in interportal trade is accounted for chiefly by paddy and rice sent to different parts of India including Calcutta.

	VALUE OF TRADE WITH—					
	Foreign ports.	British ports in other Presidencies.	British ports within the Presidency.	Indian ports not British.	Total of columns 3, 4 and 5.	Grand Total viz., of columns 2 and 6.
1	2	3	4	5	6	7
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
1893-94 ...	90,14,997	16,47,317	1,31,22,473	4,170	1,47,73,960	2,37,88,957
1894-95 ...	1,07,31,946	34,48,177	1,27,97,074	90,241	1,63,35,492	2,70,67,438
	+17,16,949	+18,00,860	−3,25,399	+86,071	+15,61,532	+32,78,481

55. The details of exports to foreign markets are given in a statement appended. There was a net increase in value of over 13 lakhs of rupees or 2·5 per cent.

The increase in the export of "all other articles" was a cargo of bone-meal. The decrease in the exportation of tea was due to larger shipments to Calcutta. That is, the local attempts to dispense with agency and to trade directly with Australia have broken down. Tobacco shipments advanced by 2,174 lbs., while the value decreased by Rs. 65. The cause is unknown to me. This produce is very choice. Its larger production apparently cheapened it. For full reference I append two tables showing the foreign and interportal exports and imports in detail. They are too bulky to exhibit in the text.

56. The interportal exports are shown in these statements.

The item of Rs. 5,634 worth of feathers, chiefly kingfishers', is alluded to in my remarks about the working of the Arms Act. I deplore this traffic and the unnecessary facilities given for it. The hill cotton harvest was a poor one. The increase in metal is attributed to copper sent to be recoined.

Hides and skins were less plentiful because there was no outbreak of fatal disease among cattle. The exports of kerosine oil and salt fell off because Narayanganj drew largely from Calcutta. This is our stereotyped explanation, and is hazarded because we can give no other. In some years the Chittagong petroleum goes as far as Cachar. These fluctuations always appear. The local demand for specie to pay for rice and paddy explains the decrease in the exports of treasure. The decrease in the export of provisions is attributed to the decline in the export of eggs to Rangoon, and the figures indicate how great this traffic is. The famous Chittagong and Noakhali fowls, as well as ducks, are also exported on an extensive scale to Burma. There was no decrease in the local supply, and I am in ignorance of what diminished the Burma demand, or reduced the prices given there.

57. As regards the details of imports from foreign markets, the increases under "drugs and medicines" and "hardware and cutlery" are accounted for by the requirements of the Assam-Bengal Railway, the materials for which also appear.

The decrease in "salt and oils" will be separately noticed. The decrease in "metal" is attributed to the fact that the Assam-Bengal Railway obtained the bulk of their requirements the year before.

Interportal imports.—Cotton twist and yarn, paddy, hardware and cutlery, gunny-bags, railway materials, seeds, sugar, wood and treasure show a large advance.

The increase in cotton twist and yarn is noticeable and seems to indicate stimulation in local manufacture, but I have no precise information. A large quantity of paddy was brought back from Akyab early in the year when prices got so high as already noticed. The increase under hardware and cutlery may again be attributed, directly and indirectly, to the railway. More gunny-bags were required for the paddy and rice exported in such increased quantities. The railway materials and wood explain themselves. The increase under seeds and sugar was due to local failures in these comparatively insignificant local

productions. The increase under treasure represents rupees wanted to pay for the abundant rice and paddy exported.

The decrease in jute was due, I presume, to Calcutta offering better terms: we cannot say. Under provisions the decrease was chiefly under ghee and flour. Raw silk is only used by the Mugs of Cox's Bazar for manufacture into cloths, and the decrease is attributed to machine-made articles taking their place. Considering how few these Mugs are, it is very large. A large importation of chillies the year before explains the decrease in spices.

58. Kerosine oil, salt, rice, paddy and jute are specially treated. The annual accounts of the sea-borne trade issued by the Collector of Customs, Calcutta, were received after this section had been written, but the figures have been collated.

Imports of kerosine oil.

59. The details of the import of kerosine oil are given below:—

	1893-94.		1894-95.	
1	2		3	
	Gals.	Rs.	Gals.	Rs.
From United Kingdom ...	110	13	...	...
„ United States ...	1,218,026	4,72,029	...	...
Total ...	1,218,136	4,72,042	...	...
„ Bombay ...	...	...	...	...
„ Madras Ports ...	...	...	...	...
„ Burma ...	...	..	83	30
„ Bengal ...	18,609	8,292	17,268	7,815
Total ...	18,609	8,292	17,351	7,845
GRAND TOTAL ...	1,236,744	4,80,334	17,351	7,845

The only explanation I can give for these figures is that the imports of 1893-94 overstocked the market. But it is also said that the difficulty of getting return freights from Chittagong keeps off foreign mineral oils. The import from other ports of Bengal also declined. The water routes for its distribution from Calcutta are far safer than those from Chittagong. The terrors of the Megna's mouth, where several brigs, not to count smaller boats, are annually lost, are very real. The force of the spring tides is terrific, and the tracks vary every season.

60. *Imports of salt.*

		1893-94.		1894-95.	
1		2	3	4	5
From United Kingdom	Tons ...	13,301	...	10,142	...
	Maunds ...	3,62,083	3,45,455	2,76,088	255,066
„ other countries	Tons ...	...	...	...	...
	Maunds ...	...	...	...	...
Total	Tons ...	13,301	...	10,142	2,55,066
	Maunds ...	3,62,083	3,45,455	2,76,088	
From Madras Ports	Tons ...	...	...	...	...
	Maunds ...	...	1	...	1
„ Burma	Tons ...	...	...	...	...
	Maunds ...	...	...	...	...
„ Bengal	Tons ...	...	...	110	...
	Maunds ...	...	...	2,994	9,310
„ Cutch	Tons ...	...	...	...	...
	Maunds ...	...	...	...	...
Total	Tons ...	...	..	110	...
	Maunds ...	...	1	2,994	9,311
GRAND TOTAL	Tons ...	13,301	...	10,252	...
	Maunds ...	3,62,083	3,45,456	2,79,082	2,64,377

The stereotyped explanations for such fluctuations are large stocks and short shipments to Narayanganj. It has been noticed that Calcutta salt brought *viâ* Chandpur to the north of Noakhali was Re. 1 a maund cheaper than Chittagong salt on its sea and river face, and this accounts for a recurrence of imports from Narayanganj after several years cessation.

61. *Exports of rice and paddy.*

	1893-94.		1894-95.	
1	2	3	4	5
	Cwt.	Rs.	Cwt.	Rs.
To United Kingdom	...	...	10,018	25,500
To Eastern Coast of Africa ...	...	...	...	...
,, Mauritius	77,301	4,10,926	90,740	3,69,408
,, West Indies	20,625	98,595	140,212	6,70,792
,, Ceylon	...	...	15,685	55,881
,, other foreign countries ...	...	...	4,275	16,606
Total ...	97,926	5,09,521	260,930	11,38,187
To Bombay	17,458	1,10,722	57,092	2,49,646
,, Madras Ports	7,399	24,292	329,561	9,18'856
,, Burma	17	114	12	84
,, Bengal—All ports	39,751	1,66,358	70,258	2,52,403
,, Indian Ports not British ...	...	...	38,830	88,991
Total ..	64,625	3,01,486	495,753	15,09,980
GRAND TOTAL ...	162,551	8,11,007	756,683	26,48,167

The fine harvests of 1894, both of summer and winter rice, explain these figures for last year. The local merchants say that their rice was more in demand on the Malabar coast and Bombay than that usually taken there from False Point and Balasore, both because this port was easier of access and the market lower.

62. *Exports of Jute.*

	1893-94.		1894-95.	
1	2	3	4	5
Foreign.	Cwt.	Rs.	Cwt.	Rs.
United Kingdom	615,168	53,46,618	537,407	47,87,108

The outturn of the year was exceptionally good, but the causes which influence shippers in choosing between Chittagong and Calcutta are not accurately known to us, and those we hear of, such as reasons connected with the Kidderpore Docks, seem intricate and remote..

The main heads of the foreign trade of Chittagong are illustrated above and show an improvement of over 17 lakhs. As already explained, the only factors which we know of with certainty are the fine outturn of rice and jute, and the existence and requirements of the Assam-Bengal Railway. Nothing illustrates more clearly what I have said about the partial character of Chittagong as a port than the fact that notwithstanding an expansion of trade to the value of some 33 lakhs of rupees, and in the face of a new Tariff Act greatly enhancing the customs duties, the customs revenue actually decreased by Rs. 430, because there was no room for more salt and more kerosine oil.

64. The following are the figures for the distinctive local forest products:—

Distinctive forest produce.

Interportal.

	1893-94.		1894-95.	
	Quantity.	Value.	Quantity.	Value.
1	2	3	4	5
		Rs.		Rs.
Gurjan oil ...	Gals. 501	420	Gals. 3,211	4,023
Chal mugra	Cwt. 3½	84	Cwt. 7	152
India rubber	...	...	...	...
Ivory	lbs. 2,039	12,999	lbs. 700	4,451
	...	13,503	...	8,626

The supply of rubber has ceased because all trees within reach have been tapped and spoiled, and we cannot adopt conservancy measures in the vast solitudes of the Lushai country where the trees are found. The increase of gurjan oil is capricious. I expected a decrease because the indiscriminate tapping of garjan trees is no longer permitted in the Chittagong district. The decrease in ivory shows that the measures taken in the Hill Tracts to check the misappropriation of that article there have borne some fruit.

65. The figures for the last two years are before me, but the Collector of Customs, under whose supervision they are collected, warns me that no reliance can be placed on their accuracy. When he reports them to the Statistical Department in July, he supplements his reports with information from the local traders which has not yet been collected. The system of inter local boat traffic registration at Chittagong is described in the section for statistical enquiries. I notice the main heads as follows:—

Inter local boat traffic registered at Chittagong.

66. Rice, husked and unhusked, is of course by far the most important of these; yet the quantity registered for 1893-94 is under two lakhs of maunds, and for last year there are no figures yet. As rice was not imported for local consumption in Chittagong last year, the customs figures already given include the whole imports. The largest item in the return is cocoanuts, of which 33,51,190 maunds are returned for last year, against 20,03,820 maunds the year before. Hides are shown as 79,706 maunds last year and 65,800 maunds the year before. The inaccuracy of the figures is exposed by those given for raw cotton, viz., only 1,004 maunds last year. Yet, as the section on the Chittagong Hill Tracts shows, Mr. Murray registered 4,711,132 lbs., or 57,253 maunds, as having gone down the Karnaphuli, and the whole of this must have passed the registering station.

Imports.

Another large item is poultry, of which nearly 27,000 head were imported for export to Burma in both years, the quantities scarcely fluctuating. But eggs, which the Customs returns and district reports show to be so extensively exported from Chittagong, are not noticed at all. They should appear among the imports at this registering station. Vegetables, spices, and betelnuts figure largely, but in nothing like the amount of the true figures. Timber is a considerable item, but that which interests me most in the whole list is firewood. Over 86,000 maunds are returned for last year and some 50,000 for the year before. These figures are probably far below the mark. The point is that the quantity is very considerable, and that the whole of it comes from the Sundarbans south of the Sungoo, and is the property of Government, and, except for a few eight-anna permits, is taken for nothing and sold. These Sundarbans are now

under settlement as a reserved forest. No forest is so profitable, none so easy to conserve, since it is not inhabited, is not exposed to fire or cattle, and in it every trespasser leaves a track.

Exports.

67. The figures for these must in several cases cross those for imports. Thus, cocoanuts are so shown in large quantities; so is cotton, and so on. Foreign piece-goods appear among the exports only to the value of Rs. 7,27,114 in 1893-94 and Rs. 4,24,619 last year. These figures are far under the mark. I see none which bear an appearance of correctness, while those for salt and oils, for which we have statistics, are manifestly wrong. I am conscious that, coming as I do for the first time to the examination of these figures, I am only struck with their inaccuracy. The steps for further improving or dealing with the present system of registration will be discussed separately.

Port of Chittagong.

68. The term of office of the Port Commissioners expired last year, and in June all were re-elected and re-appointed without change. They held 11 ordinary and one special meetings, and the average attendance was nearly 60, not 5 per cent., as stated in the last report.

69. The most important matter connected with the port is the arrangements to be made for landing and shipping merchandise when the railway is opened. Practically there are no facilities at present, no wharves, and no cranes. The railway authorities were anxious to obtain the entire business and to lay out some 15 lakhs in providing the requisite facilities. The financial position of the Port Commissioners prohibited their taking any action, and the matter has been taken out of their hands by Government. The Government of India have negatived the railway's proposals, and decided that the duty of providing facilities and of managing them is one for the Port Commissioners alone, and the wharves and jetties are to be erected by them when funds can be found. Meanwhile the Assam-Bengal Railway have been permitted to erect temporary jetties for landing railway materials only, and these the Port Commissioners will be entitled to resume whenever they are in a position to pay for them. Hitherto the practice has been to allow private firms to erect jetties on condition that they would be removed if so required, without any claim for compensation, and further permissions under this practice were given last year.

70. Of the loan due by the Port Trust to Government, Rs. 16,294-14-6 were paid in July last, and the balance on the 31st March 1895 stood at Rs. 1,66,580-1-6.

71. The Port Commissioners repeated the grant of Rs. 500 to the Sailors' Resort, the working of which has continued to receive approval. They continued to levy hospital port dues on vessels of all classes. Rupees 7,280-9-9 were so realized and Rs. 5,666-7-10 disbursed. The closing balance of this fund was Rs. 3,222-4 against an opening balance of Rs. 1,608-2-1.

Shipping.

72. Altogether 39 vessels, British Indian and German, with an aggregate tonnage of 52,066 tons, from foreign ports entered the port, against 15 of 20,589 tons in aggregate the year before. More vessels were chartered for the rice trade, which greatly increased, and also for jute.

Fewer British Indian vessels arrived from Ceylon and the Maldive Islands. Twenty-three vessels of the same classes, representing 34,189 tons burden, cleared for foreign ports, against 15, with 26,694, tons, the year before.

Five hundred and ninety-five vessels, representing 210,834 tons burden, from home ports entered the port, against 626 of 202,031 tons the year before. The fluctuations in figures are wholly attributed to the larger steamers now employed in the coasting trade. Similarly, 563 vessels of 216,390 tons burden cleared for home ports, against 617 of 208,885 tons the year before.

Four thousand seven hundred and fifteen *balam* boats, representing 63,428 tons burden in aggregate, paid port dues at the rate of one anna per ton, against 2,894 boats of 41,745 tons the year before. The increase was due to the great rice harvest of the year and the extensive exportations.

Twenty-three vessels cleared for foreign ports, against 15 the year before. The total tonnage was 34,189 against 26,694. Eleven of these were loaded with rice and 12 with jute. The year before there were 4 with rice and 11 with jute.

Repairs of Port equipments.

73. The sadar ghát jetty was scraped and scaled down and given two coats of coal-tar. There are 18 feet 6 inches of water at the T head at low water in ordinary spring tides. The pontoon double moorings jetty was hauled up and painted and given two coats of coal-tar. The Bar and channel buoys were overhauled and examined. Some repairs to the plating of the buoys were successfully done by local workmen, under the superintendence of the driver of the *Gekko*, and the cost of freight to and from Calcutta was thus saved. Mooring buoys have been carefully looked after, and scaled and tarred when possible. The whole of the moorings had to be lifted and relaid by the steamer *Gekko* owing to the erosion of the western bank and extension of the sands on the eastern side. The moorings are now in good workable order and in efficient condition; but it is necessary to obtain some new mooring buoys, chains and anchors to give increased mooring accommodation and to have spare materials for contingencies. The Dolphin buoy off Kutubdia was brought up and repaired. The South Patch buoy, which was placed to mark this most dangerous shoal, broke adrift in December 1894, and a temporary buoy made of casks and bamboos, standing about 25 feet out of water, was put up. River marks are now under repairs and the tide gauges have been painted and repaired. The Juldi tide gauge was lifted and its position was rectified and the flagstaff there was painted and rigging set up. The Patanga beacon has been painted and a new triangle fixed on top of the mast-head.

State of the river.

74. Great changes have taken place in the river. As reported last year, the bank eastward is extending very rapidly. On the eastern foreshore the bank has been much cut away. The *char* continues to form. The river on the eastern bank has deepened and the anchorage has so improved that salt vessels drawing 20 to 21 feet can now discharge there. The sands that formed off the double moorings have washed down some 200 yards, giving more swing room for big vessels. Great changes have also taken place in the river tracks and have kept the S. L. *Active* frequently engaged in taking soundings. The outer Bar sandbank continues to grow up and is extending a long way eastwards, and is barely covered now with 13 feet 6 inches rise of tide, while grass has commenced to grow in places on it. This island has improved the track over the outer Bar owing to its narrowing the entrance and causing more rush of tide.

The port tug.

75. The steam-tug *Gekko* is said to have rendered very valuable service to the port during the year under report, having lifted and shifted all the moorings in the river, done all the coast buoy work, and taken down all stores to the light-houses. She gave valuable help to the S. S. *Endeavour*, which got on shore when swinging in the river. The *Gekko* has had the entire towage of the port during the year, but has not yet earned a satisfactory return. She went down to Akyab in July last, and towed out of that port seven Chittagong owned brigs which were weather bound there owing to the south-west monsoon having set in. For this service she earned Rs. 3,500. The vessel was docked in the British India Steam Navigation Company dry dock at Calcutta in March last, and had her engines and boiler overhauled and all defects made good. This steamer has given no trouble when working as a tug. Her fire and salvage pumps are also in good working order. Her total earnings were Rs. 15,125, and the total outlay on her, including repayment of debt, Rs. 32,085-8-1.

Health of the shipping.

76. The health of the shipping was fair throughout the year. Twenty-five patients against 30 the year before were admitted into the hospital. Two of them were relieved and 23 were discharged. There was a great decrease in crime connected with the shipping—a result which the Commissioners attribute to the good working of the Sailors' Resort which they subsidise.

Light-houses.

77. The light-houses at Norman's Point and Kutubdia were in good order, and no complaint about them was received last year.

Port finances.

78. The receipts of the Port fund were Rs. 99,928-8-8 against disbursements amounting to Rs. 85,086-0-3. The opening and closing balances were respectively Rs. 52,291-10-7 and Rs. 70,134-3-0.

79. The Port Commissioners manage the Pilot Service for Government.

Local Pilot Service.

Altogether 97 steamers and 94 sailing vessels were piloted in and out during the year. There were two accidents, but the pilots were not to blame. The receipts from pilotage fees were Rs. 16,599 against Rs. 14,842 the year before, and the expenditure was Rs. 9,050-6-5 against Rs. 11,463-7-6. The opening and closing balances were Rs. 7,341-11-3½ and Rs. 14,890-4-10½ respectively. The increased receipts were due to more vessels entering the port, and the reduced expenditure was due to the retirement of the senior pilot who used to get Rs. 200 a month, and to a lower rate of percentage on earnings. The value of stores issued to the cutter at the pilot station for 1891-92 and 1892-93 were all included in the figures for 1893-94, and increased the disbursements for that year. This fund, which used to be in deficit, is now in a satisfactory state.

X.—ADMINISTRATIVE CHANGES.

80. The following local arrangements were made:—In Tippera the Matlab outpost was raised to the status of an independent police-station, and a Joint Sub-Registrar's office was opened at Bancharampur. The Farashganj outpost in Noakhali was reduced to a police beat with one head-constable and four constables. The munsifi at Begamganj was transferred to the head-quarters of the district after the offices were burnt down. Four new sub-registry offices were opened. In Chittagong, three outposts were reduced to beat houses. A new registration office was opened. The zamindari line from Anwara to Parki was abolished, and 20 new pounds were established. New telegraph offices were opened at Sitakund, Mirsorai, Hajiganj and Chandpur.

In May 1894, the Board of Revenue placed the Sarail settlement under the Commissioner of the Presidency Division with the Collector of Tippera subordinate to him in respect of it. Mr. Waller assented to this arrangement, to which I might have demurred through dislike of losing the part services of an officer and the control of a matter with which I am otherwise in close contact in the Certificate Department. Mr. Carlyle, however, recommended it, and the method of working it followed by Mr. Westmacott and him has certainly saved time and trouble. The incident is not without local precedent, as the Commissioner of the Dacca Division has powers of control over the Tippera and Noakhali *Diaras*, though he has not exercised it in my incumbency. The best feature of the change is its showing that executive jurisdictions can be readily modified to suit temporary exigencies, and need not be adhered to at the expense of a roundabout procedure.

81. The demarcation by the Forest Department of the Ramgarh Sitakund forest reserve with an area of 130 square miles is proceeding hand in hand with the departmental conservancy, and is producing a number of objections and complaints which were not evoked by the preliminary proceedings. Most are from owners of herds of buffaloes who used to enjoy free grazing for which they will now have to pay. They were not inhabitants of the forest area. For the other 11 areas covering about 900 square miles selected as reserves, the forest settlement proceedings are in progress.

82. In 1893 I proposed to make the Island Tum-Madhab, off the Noakhali coast, a reserved forest. It is actually a Sundarban forest, and fuel is exported from it in large quantities to the main land by wood-cutters who pay no dues. The Forest Department have not yet been able to examine this proposal on the ground. Meanwhile annual grazing settlements are concluded for the island, and cultivation is not allowed.

Orders were received last year to constitute some of the Unions provided for by the Local Self-Government Act in each regulation district of the Division. Noakhali and the Chittagong districts have no Local Boards, so the orders were withdrawn or suspended in respect to them. Meanwhile steps have been taken to form Local Boards in Noakhali, and there is every probability of some Unions being started in that district from the 1st April 1896. Five of these Unions have been formed in Tippera—two under the Brahmanbaria, two under the Chandpur, and one under the Comilla Local Boards. Their formation was part of last year's working. Their constitution started in the current year.

XI.—STATISTICAL ENQUIRIES.

83. The statistics locally collected are those for births and deaths, for the three kinds of palm which produce *tari*, for the river-borne trade of the Karnaphuli in the interior, for the trade which enters it by boats from the sea, and of course for the Chittagong Custom House and Port. Tide and flood readings for the Nadona canal project in Noakhali were taken for the last four years, and the information now collected has sufficed for a decision on this project which is referred to elsewhere. The Gunti floods in Tippera are similarly under observation, and new gauges have been established with a view to the ultimate treatment of this river's troublesome and dangerous embankments, part of which has been already removed and part lowered.

84. The system of registering the sea-borne boat trade at Chittagong was started in 1875. The local merchants remonstrated against it at the time, as the Noakhali channels cannot be navigated with safety in the spring tides, the boats have to come and return in the intervals between them, and any delay at Chittagong would be injurious. These representations were acceded to, and the statistics taken are admittedly very rough and formed by estimate, and are collected by a single muharrir. They represent only the character of the trade, scarcely its volume. Their collection was transferred to the Customs Department, which reported the figures direct to the Secretariat, and I must confess that the system has in consequence escaped the notice of the other local authorities for many years past. Last year's results are noticed in chapter IX of this report.

85. The Magistrate of Noakhali claims much accuracy for his vital statistics. The action of the chaukidars in this matter was closely supervised by all Magistrates and Subdivisional Officers. Mr. Anderson in Chittagong brought to notice in his tour diaries the extraordinarily low rate of births registered in August and September. This was set down to bad reporting in the height of the rains, but police-station after police-station showed precisely corresponding results, and on enquiry the same state of things is found in Noakhali. From Tippera information has not been furnished. Harvesters leave Chittagong and Noakhali in large numbers in November, but the decrease in the birth-rate noticed in August and September is in Noakhali half the average for each month in the year, and in Chittagong considerably more.

XII.—CIVIL JUSTICE.

86. Details of the work of this department are given in the prescribed statements. None of the District Judges have favoured me with any remarks in forwarding them.

There was a great increase in the number of suits all round, and in Noakhali it was as much as 25 per cent. Rent suits advanced from 32,269 to 34,443, and were a little above 10,000 in each district, and title suits increased by about 500.

The title suits chiefly referred to mortgages, and the increases in them were connected with the high prices and scarcity which was felt from September 1893 to July 1894.

The reaction which followed the fine harvest is said to have accounted for the great stimulus to litigation, "the pastime of the people." With heavier work the rate of disposing of it became slower and the proportion of arrears has increased, though the number of cases disposed of and of witnesses examined greatly increased.

87. The increased litigation in Chittagong is somewhat of a surprise, as the stamp revenue has fallen off, and this has been attributed by me to the settlement having disposed of so many disputes, and this can be said with certainty of the Cox's Bazar sub-division, which contains the settled area and also accounts for nearly the whole decrease in stamp revenue. The great commercial activity which prevailed in Chittagong for the last six months of the year must have been attended with increased litigation.

88. A good deal is seen of the working of the Civil Justice Department in this Division, because of the traditional practice which has prevailed in Chittagong for many years of suing Government with or without reason, without any attempt to apply in the first instance to the authority concerned

for redress. In only one of the many scores of cases that have thus passed through my hands has cause been found for serious complaint of its treatment in the Civil Court.

XIII.—CRIME.

89. The Division as hitherto was distinguished by a very low crime rate, while the proportion of serious crime, so far as cognizable cases denote it, was only about 29 per cent. to non-cognizable cases in 1894, against the provincial average of over 53 per cent. for 1893. Yet the people are said to be the most litigious in India. So far from being mild, apathetic and unenterprizing, they are mostly of Aryan race, have the hot-headed character which distinguishes the populations of the tidal districts, and give a class of hardy and daring mariners and laborious reclaimers and clearers. No ordinary observer would say that they were distinguished for their virtue. Their independence of mien, and the readiness with which they assert themselves, have often been noticed. But they have some strong law-abiding characteristics. They are wonderfully temperate, and the bulk of them are strictly religious. Finally, no class among them is driven to crime by the pressure of want. It is generally true of them that no member of the community lives by stealing.

The crime to which by temperament they would be most disposed is rioting in agrarian disputes. The local circumstance that Government is the owner of so many of the riparian properties subject to new accretions has the largest influence in repressing this form of lawlessness, and the fact should never be lost sight of in proposals for disposing of these *chars* and islands.

Their temperance is due to the Ferazi tenets which most of them profess and follow. The same cause ought logically to militate against their being law-abiding, and it does so to a large extent which will be noticed. The law-abiding spirit is manifested in those extraneous matters which do not concern the social habits and mutual obligations of a village community within itself, and is due very much to history, tradition and habit. They have always had their external affairs managed for them by others, and have acquiesced in such management.

90. But the code of morality which their religion enforces, and the mutual obligations referred to depending on it, the Ferazis are prepared to enforce, and do enforce even by the penalty of death. Their neighbours of different religion have caught the spirit and follow this example, though they rarely can act with results which so entirely defy detection as is the case with the Ferazi communities. So that undetected murders, which the perpetrators doubtless consider judicial executions, are the most striking features in the crime of the Division. They are hardest to detect in Tippera, where the Ferazi creed is most strictly followed. Further south, though still professed, its observance is relaxed. The people are more genial and pleasure-loving, and show the vices which are seldom seen in the north. Mr. Carlyle, who used to notice the hospitable and courteous demeanour of the Chittagong Muhammadans, is struck by the dour character and morose and surly mien of their co-religionists of the same race of the Sylhet border. Very recently in Tippera a village ruffian who had become obnoxious to all his neighbours was decapitated and his body was thrown into the jungle, where it was found 15 days after. The police could plainly see that the whole village was concerned in the crime, and could be certain even of the actual perpetrators, and yet were unable to obtain evidence on which to make a single arrest.

91. The invariable attendants of such a system are terrorists, extortioners, and black-mailers, who threaten, as it suits them, the vengeance or the action of these village tribunals, or the interference of the constituted authorities, or lawless reprisals of their own, the most practicable of which is incendiarism. Such persons almost form a class in Tippera and Noakhali, and are the bad characters against whom most of the operations for bad livelihood are directed.

From people so accustomed to take the law into their own hands, the authorities can expect little assistance in the case of offences against the State. So the prevalence of coining in all three districts has attracted attention and seems to be on the increase, though no large seizure has been made. In one case in Tippera last year, 154 false four-anna pieces, which had just been manufactured, were seized. If the rupee appreciates so much that it will be

profitable to illicitly coin it of pure silver, this form of crime will need the utmost vigilance in these districts where the people are acquainted with it already in a grosser and more palpably fraudulent shape.

92. Next to terrorism and black-mailing, the most prevalent serious crime is incendiarism. So common is it, that to threaten a man that his house will burn is regarded as an ordinary angry expression. The threat is even used by school-boys, openly or by anonymous letter, and in two cases it was carried out. It was given to the Executive Engineer, Assam-Bengal Railway, at Fenny, by letter, and was carried out.

93. A standing local cause which swells the crime returns is the inclusion of a large part of the Division in the Salt Law limits. For the first time last year, special measures were tried in Noakhali to see if, as had always been alleged, there were really no breaches of the law. Some 40 detections and convictions were the result. A special cause in Chittagong is the forest conservancy, first adopted in 1892. Cases of taking forest produce were treated as thefts till March 1894, since when they have been treated as criminal trespass.

94. The presence of so many foreign coolies on the Assam-Bengal Railway has naturally had an effect on the figures for all three districts, for burglaries and thefts. It speaks much for the strength of the religious influences to which I have referred, that the distress which was felt in Tippera till July last had no such result. I noticed this in connection with the floods of 1893. In Noakhali the Magistrate, I believe quite correctly, attributes a decrease in non-cognizable crime, that is, in the luxury of cheap litigation, to the same cause, and a subsequent increase to the fine harvest which followed.

95. The other breach of law which has attracted most attention is the smuggling of excise opium to Burma. This must be very remunerative, and, as the Chapter on Excise will show, must be conducted on a very large scale. There were only four important seizures. Two of them were noticeable because the consignment was advised by telegraph, and under the rules the telegrams were reported to the Magistrate.

96. The following table gives the cognizable and non-cognizable crime of the last two years, and shows their incidence. The fluctuations have been generally explained by the foregoing remarks:—

Districts.	Cognizable.		Increase.	Decrease.	Non-cognizable crime.		Increase.	Decrease.	Total crime.		Population.	Incidence.	
	1893.	1894.			1893.	1894.			1893.	1894.		1893.	1894.
1	2	3	4	5	6	7	8	9	10	11	12	13	14
												Case. Persons.	Case. Persons.
Tippera ...	19	2,285	300	...	6,080	6,536	...	400	8,921	8,821	1,782,935	1 to 199	1 to 202

Total ...	4,820	5,145	325	...	13,122	12,719	...	403	17,942	17,864	4,082,795	1 to 227	1 to 228

Three cases of dacoity were reported in Tippera, but only one was accepted as true. It was a dacoity of the regular type carried out by masked men with torches. The police wholly failed to detect the criminals. There were no dacoities elswhere. Cases of riot were fewer in all districts. In Tippera there were thirteen cases of murder and eleven of culpable homicide, in Noakhali only one murder and five cases of homicide, and in Chittagong seven murders and five homicides. The number of perpetrators detected and convicted in all districts was remarkably small.

XIV.—POLICE.

97. The remarks made last year on the police by the Commissioner of the Rajshahi Division touch a wide question. While agreeing with what Mr. Nolan has written, I would lay special stress on the comparative character of his observations. There seems to be nothing obscure or, apart from financial considerations, perplexing about the little progress in improvement made by the police in the last thirty years. No doubt bad traditions have the greatest effect; but there is an instance of another great department in which they were equally powerful, but ceased to operate when it was reformed.

When I first began to be acquainted with our administration in the interior, there was no great department of Government more open to obloquy than that of Civil Justice in the mufassal. Its state was the same as when, 11 years before, it had most to do with exciting the Sonthal rebellion, and two years later had much to do with the revolt in Bhojpur. There is no department in which the change has been so complete.

98. The model for the new police taken when it was inaugurated in Madras was the Irish constabulary. But that force continues to attract the very pick of the peasantry and of the artizans, in intelligence as well as physique, and the differences between the rates of pay of its rank and file and its officers are comparatively small.

99. The commonest reproach against the new police in the first ten years of its existence was, in the Lower Provinces, that it was ruffianly and corrupt. The rule about local enlistments was not, I believe, then in force, and it contained many members of the disbanded police battalions. It was more military in character than it is now, and was certainly more efficient. The reproach which could most justly be cast on it now is that it is feeble and rather corrupt. All the causes for its feebleness are not unsatisfactory. The most prominent are that the people have made so much progress in the knowledge of their rights and in material prosperity. Thus, in Chittagong the lascars as a class are far superior to the police in physique and intelligence, as are the wharfmen, warehouse labourers and boatmen.

100. There was no new feature in the working of the police last year. Out of 21 cases of murder, the perpetrators in only two were brought to conviction. In the three cases of dacoity no grounds for prosecution in the one pronounced to be true, or against the informants in the two believed to be false, were obtained. On the other hand the police were very successful in coining cases and offences against the Salt Law, and in all three districts deserve commendation for their vigilance in having preventive measures taken when riots and affrays were probable or imminent.

101. The table below shows their distribution:—

Name of District.	Number of Police.	Population.	Proportion of Police to population.		
1	2	3	4		
			Policeman.		Persons.
Tippera ...	338	1,782,935	1	to	5,274
Noakhali ...	280	1,009,693	1	to	3,606
Chittagong ...	481	1,290,167	1	to	2,682
Total ...	1,099	4,082,795	1	to	3,715

These variations are chiefly due to physical differences. Tippera is a single expanse of cultivation (and population), and is a compact area. Chittagong is a long straggling district intersected by hill ranges and woods and wastes. Thus, there are 21 stations and outposts in Chittagong, and only 14 in Tippera. In Noakhali there are the islands.

The railway has a special police force for guard and escort duties in each of the three districts. Its total strength is 83. This is the poorest section of the local force, and has given anything but satisfaction. The railway authorities would have been better advised in entertaining guards of their own, as officers of the Public Works Department do.

102. Tippera was the only district which had to use special constables or additional (punitive) police. Ten of the former were enrolled in a village on the Assam-Bengal Railway for the protection of the railway employés. The measure which was adopted before the receipt of recent Government orders on the subject was successful. The punitive police were employed at Sonachar, a notorious area of agrarian disturbance, which in consequence is undergoing a detailed survey and settlement.

103. In Noakhali the Farashganj outpost, abolished on the recommendation of the Police Redistribution Committee, was kept up as a police beat with

one head-constable and four constables. There was no other change of this kind anywhere. There was no case of torture or similar misconduct by the police in Tippera and Noakhali. In the Tippera case of 1893, in which the High Court made unfavourable comments, a departmental enquiry was held under the orders of Government. The sub-Inspector concerned was exonerated by the Magistrate, but dismissed by my predecessor. The Magistrate informs me that he has been reinstated as a head-constable.

104. In Chittagong a sub-Inspector, a head-constable, and a constable were accused of having beaten and illegally detained for more than 24 hours a chaukidar suspected of having been concerned in a case of murder.

The accused were finally exculpated after a prolonged enquiry held under the Sessions Judge's direction and supervision.

105. The following figures of police work indicate improvement all round; but in the face of them is the fact that in scarcely a case of difficulty and importance were the police successful. The Noakhali police have recently had great success and been signally rewarded in a difficult and important case of murder and another of coining, but these belong to the current year's history:—

DISTRICT.	Number of cases enquired into by police.		Number of cases disposed of by Magistrate.		Number of cases in which conviction was obtained.		Percentage of cases in which conviction was obtained to cases disposed of.		REMARKS.
	1893.	1894.	1893.	1894.	1893.	1894.	1893.	1894.	
1	2	3	4	5	6	7	8	9	10
Tippera ...	1,293	1,387	790	850	582	645	73·6	75·8	
Noakhali ...	785	777	475	531	374	432	78·7	81·3	
Chittagong ...	1,604	1,321	1,114	902	934	776	83·8	86·03	

It is reported from Chittagong that the employment of Court sub-Inspector as public prosecutor, especially in cases of rioting, unlawful assembly and burglary, was very successful.

In very few cases have the Sessions Judges made unfavourable comments on the conduct of the police, and the fact and the nature of the remarks made seem to illustrate what has been said about their feebleness. I describe all the instances. In a trial for murder the Sessions Judge of Tippera disbelieved the case for the prosecution and recorded: "But in this instance, as in so many others, the police jumped at a hasty conclusion and caught eagerly at an easy solution of a difficult case in the so-called confession of a wretched, unfriended cripple." Mr. Waller, however, examined the case and justified the police. In a murder case in Chittagong, the accused was a relative of the Government Pleader, and the evidence disclosed ill-feeling between him and the police. The Judge acquitted the accused and recorded: "It is a matter of serious consideration whether the police and the public prosecutor can work together in the face of the ill-feeling that admittedly exists." The case was reported to the Inspector-General of Police, and the Police sub-Inspector most concerned was transferred from the district. He was the best Police officer in Chittagong, but there is no one whose opinion would carry more weight in a matter of the sort, or who knows the district so well and has served in so many capacities in it, as Mr. Caspersz. In another murder case in Chittagong the Judge remarked that the genuine first information had not been produced. The Magistrate held an enquiry and found that there had been a mistake, though it was not serious or intentional. This closes the list of these judicial comments.

106. The amount of work thrown on the police by service of warrants has come prominently to notice since the amalgamation of the process-serving establishments. Tippera and Noakhali were always conspicuous for the bad attendance in them on criminal processes. So many cases are compromised or fall through that witnesses have got into the habit of anticipating these results, and deciding for themselves whether their attendance is wanted or not. The

question of whether the Courts should more frequently vindicate themselves has been often discussed, and dropped solely because of the great pressure on the magisterial staff in the years 1891 and 1892. Now that this has lessened, the Magistrates have promised to notice those cases in which summons has been disregarded, even though the case has finally come to nothing. In order to be able to take progress in this new action, I record some figures showing the existing state of things.

NAME OF DISTRICT.	Number of warrants against accused.	Number of warrants against witnesses.	TOTAL.
1	2	3	4
Tippera	1,026	543	1,569
Noakhali	783	995	1,778
Chittagong	736	796	1,532
Total ...	2,545	2,334	4,879

107. In Chittagong, though the attendance is bad, the circumstances are different. Such defaulters can get away when they like, to river or sea, or to the hills, or to Arracan. But the Magistrate of Chittagong's attention has been drawn to the figures below:—

NAME OF DISTRICT.	Number of prosecutions instituted for evading service of summons.	Number of cases ending in conviction.
1	2	3
Tippera	57	42
Noakhali	6	5
Chittagong	9	7

Town chaukidars.

108. The system of town chaukidars was before its introduction looked on with disfavour from this Division. There are now town chaukidars in Comilla, Brahmanbaria and Sudharam, and they have done, on the whole, decidedly well. They will be soon tried in Cox's Bazar and Chittagong, though necessarily at very high rates of pay for men of this class.

Rural Police.

109. The Chaukidari Act is now believed to be in force in every village in the regulation part of this Division. Till last year it had not been applied to the villages in pargana Dulai in Tippera. All Magistrates have paid great attention to the recent orders passed under it by Government, and to the suggestions made for its proper working. The chief feature of these orders is the status which they recognise for the panchayats and the duties expected from them; and the efforts of District Officers have to be directed to bringing up the local facts to the level which the orders take as existing or anticipate. The chief difficulty probably is the absence of some substantial *quid pro quo*. In Tippera, for instance, where the state of the chaukidars is the weakest point in the administration, there is scarcely a panchayat which does not receive its appointment and discharge its duties with reluctance. This feeling is connected with the state of the chaukidars, who are the most inefficient in the Division and the most irregularly paid. Nowhere else have coercive measures to be taken on such

a scale. In one thana I found coercion had to be used in 70 per cent. of the cases. Mr. Carlyle's special attention is engaged in the matter, and he hopes to begin an improvement by a liberal administration of the reward system. In Chittagong, on the other hand, appointments to the panchayat are highly valued, and removal from them is nearly always the subject of an appeal to the Commissioner. I noticed from the diaries and detailed inspections noted in them of Magistrates on tour in Chittagong that they found chaukidars paid with unexpected punctuality, and creditable attempts made to keep up the village accounts, which, though nearly always defective in some detail, nevertheless represented and were good evidence of the state of affairs they were intended to record. Progress in this direction has been rapid in Chittagong. I have no doubt that it is due to Mr. Slack, who in 1892, following Mr. Carlyle's suggestion, enlisted the services of the panchayats in carrying out his and Mr. Carlyle's scheme for the conservancy of the village woods and wastes which are the property of Government, and entrusted them with the distribution of permits for fuel and jungle produce. Thus they feel themselves to be parts of the administration and to have an important influence in their villages. The feeling must spread in time to Noakhali and Tippera, though there are no such palpable means for accelerating it. The Noakhali chaukidars have long been the best in the Division, with so high a status that they were clearly able to dominate the hitherto feeble and rather reluctant panchayats, and it is the state of the latter which in Noakhali most demands attention. Mr. Bose's system of referring criminal complaints to them for enquiry is still followed, but, as I anticipated, is not so popular as when it was started and the novelty made the gratuitous labour a pleasure. Besides, the unpaid duties have increased, and, particularly in Noakhali and Tippera, the verification of the chaukidars' accounts by the responsible member of the panchayat at the police-station is insisted on.

110. A good deal has been done in Tippera and Noakhali in the direction of grouping chaukidars under picked members of the body, who will receive higher pay and in this Division be styled dafadars. Mr. Anderson, the Magistrate of Chittagong, wishes to group his panchayats, not his chaukidars. I have not got details of his scheme, but it indicates how prominent panchayats have become in Chittagong and how they dominate the chaukidars. The chaukidars' growing independence of the panchayats elsewhere is a matter often complained of.

From Tippera I have no further details. It was at Brahmanbaria that I found coercion had to be resorted to in 70 per cent. of the cases, after 15 days' grace too, and that this was habitual. The matter is receiving special attention. In Noakhali, on the other hand, Mr. Agasti, the Magistrate, can boast that on the 31st January last no chaukidar's pay for 1894 was in arrear. There are 1,996 of them, and 414 were punished last year and 31 rewarded, at an outlay of Rs. 142-1-6. The Magistrate of Chittagong spent Rs. 153 in such rewards, but gives no details.

111. The state of the Chaukidari Reward Fund is shown below, including opening balances:—

	Credited.	Disbursements.	Balance.
	Rs. A. P.	Rs. A. P.	Rs. A. P.
Tippera ...	768 6 11	95 0 0	673 6 11
Noakhali ...	420 0 0	154 0 0	266 0 0
Chittagong ...	1,835 10 0	153 0 0	1,682 10 0

Arms Act.

112. A glance at the working of the Arms Act is appropriate in the police section. There are 4,379 guns, all registered and marked with metal numbered plates which cost the owner from 3 to 5 annas in a population of a little over four millions. There is one licensed gun to every 942 of the people, men, women and children, or one such gun to about every 180 male adults. In no part of the Division are these arms required for protection against men, and in very few villages for protection against beasts. In fact the only free licenses which any Magistrate has seen fit to grant are half-a-dozen in the islands of Noakhali. These guns are used for sport, or by men who collect and sell feathers and destroy beautiful and useful birds for the purpose. Since the 1st January last facilities have

been given for renewing licenses which will make doing so a very easy matter, so it must be acknowledged that the luxury is enjoyed cheaply; yet the complaints about the tyranny of the Arms Act are made by the middle classes as freely as ever, and none of them seem to be aware that if any European officer takes his gun home he must pay to the British inland revenue £3, the equivalent of over Rs. 50, if he wishes to shoot a snipe before he can lawfully enjoy that privilege. There could be no such complaints, and there would be much profit to the administration and the country, were the possession and use of arms in India similarly regulated with the present exception for free licenses in appropriate cases maintained, and of course with all race distinctions abolished.

There were only 53 convictions last year under the Act, nearly all for failure to renew licenses. In Tippera there were only 10, and the stringent measures taken by Mr. Greer to bring the working of the Act in that district into order have borne fruit. Yet there are 1,882 licensed guns in Tippera, a district where dangerous wild animals are now unknown. In Noakhali 22 licenses were cancelled against 3 the year before, and in Chittagong 29 against 1. This was because the Magistrate disarmed a whole village where a licensed gun had been used in a homicide case. In all the very few criminal cases in which firearms were concerned they were licensed.

XV.—CRIMINAL JUSTICE.

113. The statement below summarizes the prescribed statements which are appended, and compares the whole work of the year, and the staff by which and the rate at which it was done, with the statistics of 1893:—

Stipendiary Magistrates.

DISTRICT.	Number of Magistrates.	Number of cases disposed of.	Number pending at close of year.	Number of persons convicted.	Number acquitted.	Number of witnesses examined.	Number of those in column 7 who were detained more than two days.	Ratio per cent. of witnesses detained over two days to total number examined.	Number of appeals decided by Magistrate or District Judge.	Ratio per cent. of decisions confirmed in appeal to total appealed.	Average number of cases disposed of per officer.	Average number of witnesses examined per case disposed of.
1	2	3	4	5	6	7	8	9	10	11	12	13
Tippera	9¾	3,158	60	2,901	1,768	18,172	245	1·3	490	78·1	323·8	5·7

Single Honorary Magistrates, and Benches counting as single Magistrates.

DISTRICT.	2	3	4	5	6	7	8	9	10	11	12	13
Tippera	9¾	618	11	330	421	2,172	118	5·4	42	57·1	63·3	3·5
Noakhali	1	411	4	142	346	705	85	12·0	...	...	411	1·7
Chittagong	1½	398	24	163	452	770	165	21·4	13	61·5	227·4	1·9
Total for 1894 ...	12¼	1,427	39	635	1,219	3,647	368	10·09	55	58·1	114·1	2·5
Total for 1893 ...	14¼	1,393	53	672	1,071	3,848	309	8·04	64	67·1	96·06	2·7

The average duration of cases in Tippera improved from 10·3 days in 1893 to 9·9. In Noakhali, the dilatoriness of two Magistrates and the slowness of the Bench made these figures 18·4 in 1893 and they were 17·1 last year. In Chittagong the average rose from 9·7 to 13·9 days. The Magistrate explains that "there was no Joint-Magistrate for the greater part of the year. During October and November there was practically one first class Magistrate at head-quarters, who, again, had no power to try cases under section 110, Criminal Procedure Code, some of which had in consequence to be postponed for two or three months. Mr. Swinden, the Subdivisional Officer of Cox's Bazar, at the beginning of the year was ill and had to go on leave; for a time there was no first class Magistrate in that subdivision." Chittagong has always been particularly liable to causes for delay of this kind.

114. In Tippera the territorial system has been followed since the orders permitting it were received in 1893. In Noakhali the Magistrate professes not

to follow it, but it is virtually followed, because there are Magistrates with original jurisdiction in the islands Hatia and Sandwip. In Chittagong it was started in 1893, and then under misapprehension discontinued, and has now been resumed.

Nine thousand four hundred and twenty-seven cases with 13,464 persons were disposed of against 9,091 cases with 13,199 persons the year before. The Honorary Magistrates, singly or on benches, tried 1,427, or a little above 15 per cent., and the average for each honorary court was 114·1 cases with 2·5 witnesses for each. The figures for 1893 were 96·06 cases with 2·7 witnesses.

Result of prosecutions.

115. The percentage of convictions by Honorary Courts was 34·2 against 38·5 in 1893. It is far higher in Tippera than in Noakhali and Chittagong, because the chief bench in Tippera has original jurisdiction. The percentages of convictions by the paid staff show remarkable differences. They are for Tippera 62·1, for Noakhali 38·4, and for Chittagong 50·7. The percentage for Noakhali in 1893 was 39·2.

The bad results for Noakhali are almost wholly due to the proceedings of the third class Magistrate who has for the last two years been stationed in Sandwip. Last year, for 630 cases in which he issued processes, and which involved some 800 persons, only 84 convictions were obtained. I had to point out that his proceedings were likely to demoralise the islanders, among whom he had been stationed to give cheap and speedy justice and not to foster litigation. I therefore directed that in every case in which immediate action was not obviously required and the complainant was well-to-do and the local Civil Court could give a remedy, he was to refuse the complaint and refer the maker of it to the experienced Magistrates on the main land. It was this Magistrate whose delays chiefly contributed to the other bad results shown for Noakhali, but a superior officer cannot be spared for Sandwip.

Result of appeals.

116. I have often referred to the excellence of the bench at Noakhali, and the fact that there were no appeals from it, notwithstanding all the cases disposed of by it, testifies to the satisfaction which it gives. The same remarks have been made and again apply to the judicial work of Mr. Warden, the Marine Magistrate at Chittagong. Some bad figures for Noakhali refer to an attempt to use an old Sub-Deputy Collector as a Sub-Deputy Magistrate.

Result of sessions trials.

117. The average success obtained in the Sessions Courts was 64·4 against 73·7 the year before. There was a drop in all the districts, chiefly in Tippera and Noakhali. The Magistrate of Tippera thinks that the falling off was due to a change in the Sessions Judge and not to a lower standard of work. In Noakhali, though the total percentage was much lower than in 1893-94, police cases at the Sessions succeeded in a percentage of 72·2, the best since 1890.

Detention of witnesses.

118. Out of 37,606 witnesses examined by Stipendiary Magistrates, 1,364 or 3·6 per cent. were detained above two days, against 3·8 per cent. the year before. In Tippera the percentage rose from ·9 to 1·3, and in Chittagong from 5·8 to 7, while in Noakhali it dropped from 6·5 to 4·6. In Tippera the highest percentage was only 5·8. It was 14·1 in Noakhali, and in one case in Chittagong it was 62·5. This was when a Magistrate had to examine eight witnesses, of whom five had to be detained for over two days. These exceptional cases spoil what otherwise would be a satisfactory record.

119. Honorary Magistrates examined altogether 3,647 witnesses, and detained 368 of them for more than two days, about 10 per cent. against 8·04 the year before. This percentage in Chittagong went up from 17·4 to 21·4 before Honorary Magistrates. In Tippera it was a little over 5, and for Noakhali 12·0. The lowest percentage is shown by the Brahmanbaria bench, which out of 775 witnesses detained only seven for over two days.

120. In Chittagong both the bench and the Honorary Magistrate who sits alone returned a percentage of over 20. The year before it was 21·4 for the Bench, but only 3·4 for the single Magistrate, Babu Nityananda Rai.

Remands.

121. The statement below gives the details:—

District.	Class of Magistrates.	Number of A cases sent up during the year, including those pending from preceding year.	Number disposed of on first day.	Number postponed. Once.	Twice.	Thrice.	Four times.	Five times.	Six times.	Over six times.	Number pending at close of the year.	Ratio per cent. of A cases remanded six times and more to A form cases disposed of.
1	2	3	4	5	6	7	8	9	10	11	12	13
Tippera ...	Stipendiary ...	690	201	190	125	84	37	18	8	10	17	2·6
Noakhali ...	Stipendiary ...	402	128	89	82	48	17	12	5	4	17	2·3
Chittagong ...	Stipendiary ...	753	428	134	65	42	21	17	12	9	25	2·8
	Total Stipendiary for the Division.	1,845	757	413	272	174	75	47	25	23	59	2·6
Tippera ...	Honorary ...	2	...	1	1	...	...	...	...	...	1	...
Noakhali ...	Honorary ...	3	1	1	...	...	...	...	...	...	...	...
Chittagong ...	Honorary ...	23	5	6	...	...	1	4	...	2	5	11·1
	Total Honorary for the Division.	28	6	8	1	...	1	4	...	2	6	9·
	Total Stipendiary	1,845	757	418	272	174	75	47	25	23	59	2·6
	Total Honorary ...	28	6	8	1	...	1	4	...	2	6	9·
	Divisional Total. 1894 ...	1,873	763	421	273	174	76	51	25	25	65	2·7
	Divisional Total. 1893 ...	2,100	764	458	388	202	122	46	25	22	73	2·3

Of 1,878 police A form cases for disposal, 763 or 40·7 per cent. were disposed of on the first day, against 36·3 per cent. the year before. The percentage of cases remanded six times and over for the Division is 2·7 against 2·3 for 1893. The figures fluctuated in all districts. The highest percentage in Tippera was 6·4 and in Noakhali 6·7, but in Chittagong it was 16·6 in consequence of the state of the files and transfers and illness of four Magistrates. Honorary Magistrates tried among them only 28 police A form cases, six of which were disposed of at the first hearing, and two were remanded six times and over.

Honorary Magistrates and the constitution of Benches.

122. In Tippera 30 Honorary Magistrates, eight of whom are empowered to sit singly, tried cases. Two exercise first class, four second class, and two third class powers. There are three benches vested with second class powers. That at Comilla has original jurisdiction for a radius of five miles including the town.

123. In Noakhali the single independent bench at head-quarters exercising first class and summary powers, comprises 17 Honorary Magistrates, and the work done by it does not fall very short of that done by the 30 Honorary Magistrates or 11 Honorary Courts in Tippera.

124. In Chittagong there were 25 Honorary Magistrates, one of whom, with first class powers, sits singly. The rest sit on the bench at head-quarters. Some of these Magistrates have first class, other second class, and the majority third class powers, and the powers of the bench vary accordingly.

Attendance of Honorary Magistrates.

125. The statement below compares the attendance of Honorary Magistrates for the past two years:—

Districts.	Subdivisions.	Number of times the Honorary Magistrates were asked to attend.	Number of times the Honorary Magistrates actually attended.	Number of times the Honorary Magistrates were absent—		
				With leave.	Without leave.	Total.

Noakhali ...	Sadar Subdivision	401	297	72	32	104
	Fenny	...	...	...	...	...
	Total ...	401	297	72	32	104
Chittagong ...	Sadar Subdivision	499	545	87	115	202
	Cox's Bazar	...	...	...	...	...
	Total ...	499	545	87	115	202
	Total for 1894 ...	1,720	1,367	314	289	603
	Total for 1893 ...	1,465	1,226	172	323	495

The percentage of attendance to calls in Chittagong is above 100, because no calls have been shown against the Magistrate, who sits singly, though the number of his sittings has been recorded. Leaving aside his 125 sittings, the percentage drops to 84·1, the highest figure for the Division.

The percentage in Noakhali was 74 and in Tippera 64. The extreme cases of bad attendance in Tippera are those of one Magistrate who did not attend once though cited 24 times, another who attended 7 times for 47 citations, and a third who came only once though invited 12 times. These cases are, or have been, under notice.

126. In Noakhali one Magistrate attended only once in response to 15 calls, but he has now left the district for good.

127. In Chittagong I see that one Magistrate, who did not attend once during the year, was never invited to do so. The treatment of the roster was not intelligent, but it and the executive work of the Honorary Magistrates have now been made a gazetted officer's charge.

128. I reproduce the remarks made by the District Officers on the work done and help given by the Honorary Magistrates.

Mr. Carlyle, Magistrate of Tippera, writes that they did very useful work, and he proposes to vest a large number of them with power to sit singly as the best solution of the difficulty felt as regards making over cases to them which have taken some time to try. The solution recommended by me is to give the bench a local area, say a radius of five miles, which the Comilla bench has. He condemns, however, the present system as regards the difficulty of getting rid of Honorary Magistrates who merely care for the position and do not wish to work, and thinks it would be a great improvement if their appointments were only for a term of years.

129. Mr. Agasti, Magistrate of Noakhali, in bringing to notice that the Bench there disposed of 411 cases against 269 the year before, says that the large increase is owing to his having arranged the sittings for four times in the week instead of twice as was the case hitherto, and thus the bench rendered substantial assistance to the administration. As a rule, petty cases of disputes about land, simple assaults, cases under the Cattle Trespass Act and the like, were made over to the bench for disposal. He has been trying to make the Bench Magistrates do work of a more important kind by making over more important cases to them, but acknowledges the difficulties described in Mr. Forbes' report last year for the Patna Division to be a serious bar. He does not approve of the idea of Honorary Magistrates being appointed for a term of years. The post has not much attraction for pleaders, who are the most important members,

and the limitation of the term of service would be followed by a considerable defection of that body. The best way of getting good and substantial service from Honorary Magistrates is to appoint Special Magistrates with power to sit singly.

130. In Chittagong, the single Honorary Magistrate empowered to try cases while sitting alone, was vested with the powers of a first class Magistrate in August last, and the District Officer now proposes to give him some important cases to deal with. The work hitherto given to the Honorary Magistrates in Chittagong was for the most part the kind of cases which were bound to be compromised or to come to nothing. I myself see no reason why the Chittagong Bench should not have original jurisdiction for the town and a radius of five miles, as the Comilla Bench has; but successive Magistrates have opposed the proposal. I will repeat it to Mr. Anderson, who has made no suggestions for improving the efficiency of his bench.

131. As regards the five-years' plan, I agree with Mr. Agasti. These appointments carry privileges as well as distinction. In many cases an Honorary Magistrate as such will have earned his rest and idleness. There need be no limit to their numbers. There would be no crowd of candidates eager and qualified to succeed as the terms of office expire. There is, I conceive, no difficulty in procuring the resignation of or "superseding" (the English expression in such cases) unpaid Magistrates who accepted office, as it were, under false pretences.

Fines.

132. The power of remission which Commissioners used to exercise is now held by District Officers also. The impositions and realizations keep their ordinary proportions in the three districts, but last year no district succeeded in realizing a share of the outstandings, which exceeded the amount imposed in the year. The balance, owing to local circumstances and facilities for evasion, must always be greatest in Chittagong, and will probably increase because attention has been drawn there to the inadequacy of some fines imposed in opium cases. Young Magistrates have been frequently impressed with the injudiciousness of their action in inflicting fines which proved to be unrealizable, and this has led to these inadequate sentences. In opium cases the measure of the fine must plainly be the gravity of the offence and not the Magistrate's estimate of the probability of realization and the gravity of the offence generally depends upon the amount smuggled or the means used for smuggling.

XVI.—REGISTRATION OF DEEDS.

133. The work and popularity of this department continue to increase rapidly.

In Tippera there was an increase of 3,604 deeds registered, attributed to the reduction of the minimum *ad valorem* fee from 12 annas to 8 annas, and to the extensive settlement operations in progress, but chiefly to the distress that prevailed from September 1893 to July 1894.

The receipts were small compared with the increase of registrations, because of the reduction of the *ad valorem* fees which took effect three months after the year began. Expenditure increased under commission and establishment allowances. The Magistrate adds the following particulars:—

Four hundred and thirty-six deeds were refused against 395 the year before, and 54 appeals and 108 applications were preferred against orders of refusal. There were 18 prosecutions and 23 persons were tried, 12 of whom were convicted, seven for false statements, three for personation, and two for disobedience of summons. The sub-registrars have to report to the Magistrate (Registrar) every case in which execution is denied. An enquiry is then held by a Magistrate, and, if there is evidence, one or other of the parties is prosecuted either for falsely denying execution or for presenting a false document. This procedure is far from general elsewhere.

There were 1,760 searches against 1,519 the year before, owing to two distinct applications having been prescribed for search in the indexes and registers. Eighty-one deeds were impounded by sub-registrars against 69 the year before. Five deeds were discredited by the Civil Court during the year on grounds not connected with registration.

Rupees 295-14 were realized as landlords' fees on 224 deeds registered under the Tenancy Act.

The office building at Comilla does not supply sufficient accommodation. The records placed on the racks are well arranged and classified, but those heaped on the floor remain in confusion. The condition of the records is unsatisfactory, and delay is unavoidable in searches and issuing copies.

A joint sub-registry office was opened at Bancharampur in the Brahmanbaria subdivision. The head office registered more deeds and the new office 1,436 in addition. Mr. Carlyle inspected all the rural sub-registrars' offices.

134. In Noakhali there was an increase of 4,872 deeds or 8·8 per cent., attributed both to the bad harvest of 1893 and the growing popularity of the department. Four new joint offices were opened, and the Magistrate thinks more offices are still required. He has not given the details supplied by Mr. Carlyle, but the Noakhali tour diaries showed that registration offices were closely inspected, and in one instance I had to advise more discretion being used in this respect.

135. In Chittagong there was an increase of 4,716 deeds registered. The total receipts dropped from Rs. 64,289 to Rs. 63,830, owing to reduction of the *ad valorem* fee from 12 annas to 8 annas. One new office was opened last year. This work is said to be particularly well done in Chittagong, where I have inspected a great many of the offices.

XVII.—CONDITION OF THE DIVISION AS REGARDS LAND AND THE LAND REVENUE ADMINISTRATION.

136. The percentages of collections of land revenue in the last two years were—

	Tippera.	Noakhali.	Chittagong.
1893-94 ...	96·90	96·46	96·28
1894-95 ...	97·48	97·36	96·95

Noakhali failed to reach the standard prescribed for temporarily-settled estates because the farmers of Nulchira withheld payment of balances due from them pending settlement of their coparcenary disputes. Tippera again failed for both private and Government estates under direct management.

The balances at the end of the year are compared in the table below according to the classes prescribed by Government:—

CLASS.	Balances in 1893-94.	Balances in 1894-95.	Percentage of balances in 1893-94.	Percentage of balances in 1894-95.
1	2	3	4	5
	Rs.	Rs.		
I ...	7,906	7,936	·40	·41
II ...	9,667	7,145	8·69	6·48
III ...	53,555	56,493	8·09	8·32
Total ...	71,128	71,574	2·63	2·62

Redemption of land revenue.

137. Only two estates with an aggregate revenue of annas 14-3 were redeemed in the district of Chittagong during the year, on payment of 25 times the annual Government revenue.

Payment of land revenue by postal money-orders.

138. The following figures show how the system of payment of revenue and cesses by money-orders has worked :—

District.	Number of money-orders received.		Amount of revenue sent by money-order.		Number of money-orders under objection or reference.	
	1893-94.	1894-95.	1893-94.	1894-95.	1893-94.	1894-95.
1	2	3	4	5	6	7
			Rs.	Rs.		
Tippera ...	2,670	2,888	51,431	68,744	...	32
Noakhali ...	913	232	4,472	3,479	...	...
Chittagong ...	25,904	26,212	1,11,673	1,10,052	...	268
Total ...	29,487	29,332	1,67,576	1,82,275	...	300

There has been a reaction against this system in Noakhali, attributed to proprietors preferring to pay their dues through their agents at head-quarters, and to personal payments being considered safer than by postal drafts. In Noakhali the system never had any great vogue.

139. The following figures show the payment of rent by money-orders:—

District.	Number of orders.		Amount covered by them.		Number refused by landlords.	
	1893-94.	1894-95.	1893-94.	1894-95.	1893-94.	1894-95.
1	2	3	4	5	6	7
			Rs.	Rs.		
Tippera ...	1,224	1,538	18,643	23,143	347	273
Noakhali ...	1,278	3,142	18,350	39,162	343	325
Chittagong ...	4,587	4,929	23,136	29,483	...	...
Total ...	7,089	9,609	60,129	91,788	690	598

Mr. Carlyle, for Tippera, says that the increase in the number of money-orders represents strained relations with landlords, who generally dislike this system as weakening their influence with the raiyats. The great and sudden increased resort to it in Noakhali is not accounted for, nor are any special circumstances calculated to stimulate it known of. Though Chittagong shows no refusals, the remittances had to be deposited in 61 cases for want of particulars.

Working of the Sale Law.

140. Nine hundred and sixty-nine estates or shares of estates became liable to sale, and 238 were actually sold, 222 in Chittagong alone, against 298 in 1893-94. One thousand five hundred and seventy-eight tenures were notified for sale in Chittagong and 424 were sold. Twenty-seven of them were purchased by Government. In Noakhali 19 tenures were sold against 6 in 1893-94, and three of these were bought in by Government. In Tippera two estates were purchased by Government. Nine estates or shares of estates were sold

in Tippera and seven in Noakhali. There were 26 appeals to the Commissioner against sales. In two the sales were annulled, and three cases were recommended to be annulled under section 26 of Act XI of 1859, on the ground of hardship. All these five cases were in Chittagong, and were of the pettiest kind, the amounts involved being generally a few annas. The character of the mistakes made was some slip in repeating the large fractional numbers which describe these petty estates. On the whole the operation of the Sale Law was lighter than it has been for several years.

Working of the Public Demand Recovery Act.

141. The following comparative statement exhibits the work in the certificate department:—

District.	Cases instituted.			Cases disposed of.		
	1892-93.	1893-94.	1894-95.	1892-93.	1893-94.	1894-95.
1	2	3	4	5	6	7
Tippera	3,231	3,929	3,085	3,583	2,800	3,426
Noakhali	1,002	1,219	1,754	1,198	994	1,820
Chittagong	8,612	9,123	10,276	9,080	9,189	10,430
Total ...	12,845	14,271	15,115	13,861	12,983	15,676

There was considerable fluctuation in the different classes, resulting in a gross increase which arose after the leniency shown in the preceding year, which was a bad one for rent-payers. The cases were very simple, as is shown by the rate of disposals. The cases which hang longest are those of the Court of Wards in Tippera, and their numbers were greatly reduced.

Road and Public Works Cesses.

142. The total collections were Rs. 5,62,529 out of a demand of Rs. 6,05,271. The percentages attained by each district were—

	Arrear.	Current.
1. Tippera	90·5	88·6
2. Noakhali	92·36	93·27
3. Chittagong	98·88	92·37

Though the current collections were below the standard, they improved. They exclude collections made in the period of grace after the year closed. In Tippera the short collections are due to the effects of the period from September 1893 to July 1894 and the indebtedness it left, recovery from which is not helped by the present low prices.

In 66 cases in Tippera, 92 in Noakhali, and 1,928 in Chittagong, the costs incurred for recovering these cesses greatly exceeded the original demand, the excess being more than double the demands in Tippera and Chittagong. In Tippera only was the power of remission exercised, and to a very small extent.

Land registration.

143. In Tippera with 593 applications filed, the ratio of mutations to original registration was 5·17 per cent. against 4·1 in 1893-94. Noakhali had 506 cases and a ratio of 6·36 per cent. against 5·73 the year before. In Chittagong 9,546 applications were filed during the year against 6,861 the year before, and the ratio was 5·77 per cent. against 4·2 in 1893-94. This great department in Chittagong is managed by two Sub-Deputy Collectors, and a sum of Rs. 14,540 was expended on it against Rs 13,091 in 1893-94.

These percentages I expect represent a very fairly full compliance with the law. In Noakhali it is the practice to overhaul estates for which during the past 10 years there have been no applications, and to bring defaulters sharply to account. In Chittagong no stimulus is required. The increase of course indicates the progress of the settlement and its near completion.

Miscellaneous and sanitary work of improvement in Government estates.

144. The following statement is for the miscellaneous and sanitary improvements in Government estates:—

DISTRICT.	Gross demand of Government estates.	On miscellaneous improvement.	Sanitary improvement.	Total of columns 3 & 4.
1	2	3	4	5
	Rs.	Rs.	Rs.	Rs
Tippera	86,500	709	...	709
Noakhali	93,500	1,000	1,463	2,463
Chittagong	4,44,900	2,125	8,001	10,126
Total ...	6,24,900	3,834	9,464	13,298

The miscellaneous improvements were constructing and repairing roads, houses for tahsilis, cutcherries, planting trees, and park gardening. The sanitary improvements were excavation, re-excavation and fencing of tanks, construction and clearing of wells, laying water-pipes for good drinking water in Chittagong, and filling up holes and hollows at Fenny.

Nothing was expended on sanitary improvements in Tippera, as no opening was found. The estates are nearly all riparian and are well drained, and have the Megna for drinking water.

Survey and Settlement.

145. In Tippera eight temporarily-settled estates (six the property of Government and two the property of individuals) and five permanently-settled private estates were dealt with under the provision of Chapter X of the Bengal Tenancy Act. Five of the former class were surveyed in 1893-94 and the rest, with an area of 1,948 acres, last year. The whole work was done by the district staff by plane-table. Record-writing in three of those estates, covering 9,203 acres and 11,419 plots, was completed in 1893-94, and it was finished in the remaining five estates with 2,458 acres and 4,926 plots last year.

Of the five permanently-settled estates, two are composed of three villages of pargana Gangamandal with an area of 1·08 square mile. One village with 340 plots was cadastrally surveyed in December 1894, and the final attestation was finished in March 1895. The other two villages had been previously surveyed, and the attestation was completed after the close of the year. The survey of these two estates was made by the professional survey party under the Special Settlement Officer of Chakla Roshnabad. Of the remaining three estates, estate Shonar Char was surveyed last year under the supervision of the district settlement Deputy Collector, and the *khanapuri* work completed. The total area surveyed was 890 acres in seven villages. Palpara was surveyed by the professional party, and is under the Special Settlement Officer of Roshnabad. The survey and record writing were finished in 1893-94. The attestation was completed in 1894-95.

The fifth private permanently-settled estate is the Maharaja of Hill Tippera's great Chakla Roshnabad. Its cadastral survey has been completed. The record-writing was completed at the end of the last field season. Attestation for 70,403 plots with 16,155 tenants was finished up to the close of March 1895. Preliminary attestation has also been completed for 32,735 plots in advance of final attestation. The settlement work in this estate is proceeding, I believe, steadily and accurately, if somewhat slowly, but it would be money thrown away if the work were not done with the utmost care. Up to now the difficulty of the Maharaja's agents, notwithstanding the exertions of Mr. McMinn, his manager, has been to keep up with the present rate of progress. Next year the work to be done will be easier, and they should be able to do a great deal in the way of preparation before the next field season.

146. In Sarail, revisions of the settlement are still in progress under the Commissioner of the Presidency Division. It is said that generally there is little difficulty in coming to terms with the tenantry when once they can be got

hold of, but the difficulty is to get them to attend. This is the difficulty in all settlements in Tippera, and it is often a bad sign if they are conducted with an apparent absence of friction. This has been conspicuously the case in Sarail as well as in Singhargaon, a Government estate similarly settled in 1892.

147. In Noakhali an aggregate area of 20,018 acres, or nearly 33¼ square miles of char land belonging to Government, were surveyed during the year at a total cost of Rs. 2,180-12-2. The survey of one private estate was also completed during the year. The operations were wholly non-professional.

148. The area to be surveyed in Chittagong had been shown as finished, but a supplemental survey of the scattered tracts of thatching-grass within it was undertaken, and their aggregate area turned out to be no less than 56·30 square miles. The cost of the operation was Rs. 2,010.

149. In Tippera, nine settlement cases were disposed of during the year, and the settlement of eight petty estates under the regulation are close on completion. In the eight temporarily-settled estates, the survey of which had been completed as stated above, attestation was completed in five with 36 villages, 9,713 acres and 12,204 plots, and is nearly completed in the rest. In three of these estates tenants' rents and status were determined, and the Collector writes that the work will soon be finished in the other five estates.

150. In Noakhali 38 cases were disposed of during the year, in 34 of which summary settlements were effected. One was struck off the file, and in three regular settlements were conducted. These settlements resulted in a gross decrease of revenue amounting to Rs. 2,250-9-9, notwithstanding large increases in several cases. Diluvion was the chief cause, but speculation in one case was a prominent factor. The attestation of one private estate was finished during the year and the status of tenants determined. In another the final records were published after completion of attestation, determination of status of tenants, and settlements of fair rents, &c.

151. In Chittagong the attestation of four villages in the Moiskhal island, with an area of 19·37 square miles, was finished during the year, and the *mahal milan*, or reconcilement of areas, was completed in 391 out of 1,033 villages. The rents of 50,750 tenants were settled at Rs. 5,18,165. Draft records were published for 304 permanently settled and 192 noabad villages, and final records for 218 villages in permanently settled estates and for 63 villages of the noabad mahals. The cost incurred during the year was Rs. 1,37,849-9, and the total expenditure up to 31st March 1895 has been Rs. 10,66,178. Meanwhile the completed settlement of Old Thana Ramu is working well. The tenants are satisfied. The talukdars complain that the labour of management and its cost have been extended, the cesses which they have to pay been increased (not in rate of course, but in amount), while their margin of profits has been reduced.

152. The following is a brief account of what has been done for the acquisition of land for the railway up to the close of 1894-95:—

In Tippera two Deputy Collectors have been employed. Both commenced their work in the latter part of 1892-93. One of them, Babu Ganga Charan Chatterji, is in charge of 65 miles, 47 miles of the third railway division from Comilla to Chandpur, and the Tippera section of the second railway division, 18 miles in length, from Laksam to the Noakhali border. The other, Babu Rasik Lal Sen, has the fourth railway division from Comilla to Sylhet, a length of 40·33 miles. Babu Ashutosh Sarcar, Deputy Collector, was first given the second railway division, which covered 35 miles, 17 in Noakhali and 18 in Tippera. The 18 miles in Tippera were transferred in April 1894 to Babu Ganga Charan Chatterji. In Chittagong one Deputy Collector has been employed since November 1892. The length of the line in this district is 45 miles besides two miles of port line and a very large quantity of land for offices and brick-fields and diversions. Another officer has, since the close of the year, been deputed to help him.

The average rate of compensation per mile for the Tippera district cannot be given accurately, as the whole area has not been acquired. In the third 39 miles were fully acquired up to 31st March 1895, and in the fourth 22 miles. The amounts of compensation for these were Rs. 2,27,994 90,711, giving an average per mile of Rs. 5,846 and Rs. 4,577 respec- average rate paid per acre is Rs. 163-4. In Noakhali the average

rate per mile is Rs. 6,937 against Rs. 3,000 originally estimated. In Chittagong the rate of compensation paid per mile is about Rs. 8,611 on an average. The amount of compensation paid in Tippera up to 31st March 1895 was Rs. 4,87,739-9-2, and Rs. 1,50,604-5-7 remained to be paid because either the persons entitled to payment were absent, or there were disputes about apportionment. The compensation paid in Noakhali up to the close of the year was Rs. 93,977, and Rs. 24,601 were unpaid. For Chittagong Rs. 3,62,256 had been paid up to the end of March.

Basis of calculation.

153. In Tippera the proprietary interest, including the interest of intermediate tenure-holders, was valued at 12 to 20 years' purchase of the net profits, the number of years varying according to the high or low rate of rent paid. Tenants' interest was valued at Rs. 3 to Rs. 50 per bigha according to the character of the land and the locality. For tanks where the parties interested or some of them have to excavate a fresh tank for the one taken up, the cost of excavation less the cost of re-excavation is being given. Where the tank is in good order and need not be replaced, the value of its fishery plus the value of land as waste land is given. Where the tank is overgrown with weeds and is unfit for use, it is valued as waste land. For houses, where the occupants agreed to remove their houses, only the cost of removal was paid. Where the occupants did not so agree, the cost of construction of the house, less the cost of repairs, was paid.

154. In Noakhali the proprietors' interest in land was valued at 16 to 20 years' purchase of the annual income. Talukdars were paid at 15 years' purchase. Dar-talukdars and tapadars at 10 years on their respective annual incomes. The occupancy raiyats in one pargana were paid at the rate of Rs. 30 to Rs. 35 per bigha according to circumstances, and those in two other parganas at Rs. 7 to Rs. 14 per bigha. In the two remaining parganas the raiyats were treated as tenants-at-will and did not get any compensation. Tanks have been valued at Rs. 2 to Rs. 3 per thousand cubic feet of excavation, according to their condition.

155. In Chittagong, where interests are of a different kind, the plan is to pay the proprietors from 6 to 8 annas share of the compensation, and the tenants from 8 to 10 annas. In the case of lakhiraj and taraf lands the compensation is calculated at 20 years' purchase of the gross rental of the land, minus the Government revenue and collection charges at 10 per cent., and at 10 years' purchase of the rental, subject to the same deduction in the case of noabad lands.

156. In Tippera 5,712 cases were disposed of up to the end of March 1895 under sections 11, 18, and 30 of the Land Acquisition Act, and 782 cases were pending. In 3,629 cases final reports have been prepared, and in 2,560 cases they are pending. In the third division the results are working out below the estimate. In the fourth they exceed it slightly, I believe because this line has been taken more to the east through high homestead land instead of open fields. In the Tippera section of the second division the results coincide generally with the estimate.

157. In Noakhali 1,371 cases were disposed of up to the close of the year and five were pending. The work was finally finished on the 2nd June. The original project estimate has been greatly exceeded, but I know of no such causes as existed in railway divisions 1 and 4, where the line was taken from open field to homestead lands.

158. In Chittagong 3,182 cases were disposed of under sections 11, 18, and 30 up to the end of March 1895, leaving 3,068 pending. In 1,874 cases final reports have been prepared and in 4,376 cases this remained to be done.

159. At the close of the year there were 644 acres still under proceedings in Tippera, 15 in Noakhali, and 1,909 in Chittagong.

160. The third railway division from Chandpur to Comilla was looked on as the most difficult and important section of this work, and the estimate for it was highest. It was entrusted to the most competent officer of his class then in the division. The results have entirely satisfied the local officers. As far as can be now said, the final cost will be under the estimates. In addition to his original work, some two-thirds of the second railway division were added to the charge of this officer, Babu Ganga Charan Chatterji. Apparently the cost of the thickly-populated bazar areas at Chandpur and Hajiganj, the two chief marts in

Tippera, of the smaller bazar Chitosi, and of the marshy land known as the little Fenny swamps, was over-estimated, and he has been able in consequence to keep nearer the project estimates, which have been so enormously exceeded elsewhere. The work on the fourth railway division has also been satisfactory, though not so rapid. The alignment was considerably diverted to the east both in it and the first division, which is in Chittagong. The original alignment was through open fields. The diversions took a long line of homestead lands and so gained a better bank at a considerable increase of cost for the land. On the Noakhali section in the second railway division there were also diversions, but the character of the country was the same as, or very little different from, that under the original alignment. The work on this section has been in the highest degree unsatisfactory, though the division from the first was the easiest on the line, and as soon as attention was drawn to the state of the work on it, over one-half of it was made over to another officer. The whole matter is the subject of a separate case.

In Chittagong the work was too heavy for the officer in charge and his staff from the first. A specially selected officer of marked ability was chosen for it, but after a short experience of it he managed to get transferred. The work about the town and port of Chittagong proved very difficult, in the latter case chiefly because of the strength and wealth of the firms and merchants who had to be dealt with, and the reluctance of some of them to move at any cost, much less at a reasonable cost. There will be a good deal of litigation—that is, of conflict on references to the Civil Court—in this section. But the chief obstacle to the conclusion of the work in this division was that the survey and settlement papers had to be used and the proceedings adapted to their records. The reasons are too technical to be given here. The settlement papers were still unattested, nor had the settlement process of reconciling areas been carried out with respect to them when they had to be used. None of the local officers have seen the estimates for this Chittagong division, and do not know what the rough mileage cost was calculated at.

Training of young civilians in survey and settlement work.

161. Mr. J. G. Cumming, who has charge of the great Roshnabad settlement, is a very young civilian. His predecessor was a junior statutory civilian, Mr. Barada Charan Mitter.

In Noakhali there was no such officer.

In Chittagong the Settlement Officer thinks that the Assistant Collector, Mr. Keran Chandra De, has received sufficient instruction in settlement and survey work. Mr. Emerson the last Joint Assistant, was out in camp with the Settlement Officer for over a month. There was no opportunity for teaching him survey work.

XVIII.—WARDS' AND ATTACHED ESTATES.

162. There are no attached estates. There is no estate under the Court of Wards in Tippera, that of the weak-minded proprietor Sayyid Basarat Ali Chaudhuri, which used to be so managed till 1887, being still under the District Judge. There has been something like agitation to get it restored to the Court of Wards, but as long as the estate is thoroughly solvent, the Government revenue paid, the tenantry contented, the management competent, and the proprietor's income suitable to his rank, there is no sufficient reason for yielding to this agitation, because the Judge has not time for the minute details and scrutiny and systematic working which the Court of Wards would carry out. The movement has arisen because the proprietor's son, who was the nominal manager, has shown the same mental tendency as his father, and has had to resign. The family is said to be the oldest Muhammadan house east of the Megna, and this accounts for the interest taken in its fortunes.

163. In Noakhali there is a compact little patni estate with a gross rental of Rs. 631, known as Pana Miah's, by whom it was left as a trust to be managed by the Collector with the proceeds given to education. It is managed with perfect regularity, and the tenants, who are never in arrear, are never interfered with.

164. There has been no change in the position of the three wards' estates in Noakhali, and the remarks on them which I recorded for last year's report are strictly applicable. The report represented me as writing that Girinda Chandra

Majumdar's was the most unsatisfactory of them all. I wrote that it was the most satisfactory (the wrong editing was in this office). By taking charge of it we have, though its state allowed us to do nothing else, kept the tenants together and saved the helpless proprietor from mendicancy or death.

165. The Lieutenant-Governor, when at Noakhali, noticed that his orders of 1891, which required the maintenance of a list of the improvements to be taken up in each ward's estate, had not been observed there. The fact that the Collector was a new incumbent doubtless accounted for this omission, which had been the subject of much correspondence, not being explained to His Honour. In Girinda Chandra Majumdar's estate we are barely able to maintain the family and to stave off the debts in the hope of carrying out our scheme for final liquidation some time about 1910. In Bhubanjoy Shaha's estate the Board have finally pronounced that since no work of improvement is practicable we are to say so, and to give up our attempts to show subscriptions to schools, a dispensary and other public objects, as improvements. Mr. Waller's description of this estate, given in last year's report from his recollection of it as Collector of Noakhali, explains why no work of improvement is practicable. He refers to it as a low money-lending and shop-keeping business, with landed interests so fractional as to include even shares in raiyats' holdings, and "a shamefully false rent roll." Nevertheless a tank was dug last year at a cost of Rs. 500 out of the funds of this estate, and it will belong in part to and partly benefit this estate, but we cannot expect to recover any share of the cost from any of the other proprietors or beneficiaries, and would not be legally justified in repeating an improvement so situated. The estate can and will contribute as heretofore to works and objects of public benefit, but this expenditure does not appear as improvements, even when given to roads which are used by the tenantry. In the Courjon estate the work of improvement contemplated by us was a survey and settlement of the portion of the estate which lies in Sandwip. It would have absorbed all available funds. Since it was proposed a new debt of Rs. 20,000 has been contracted, and the Collector now says he will have great difficulty in meeting this, when under the terms of the loan its payment becomes due. With these double obligations to face, the list of other improvement framed for this estate is a small one. Moreover it is only held by us on sufferance, as it were, from day to day. Rupees 1,012 were spent from it on three tanks and a dam last year.

166. Reviewing my own attitude in regard to the Courjon and Bhubanjoy estates for the last four years, I may say that it has been one of continued opposition to the management and even to the Collectors. The Manager's chief object, next to securing the collections, is to increase the income of these estates, and this can only be done by buying in other landed interests and by enhancing rents whenever opportunity allows. The commonest is when a taluk or other tenure is bought at a forced sale, and all incumbrances are voided. Considering the circumstances of these estates it is no part of the Collector's or my duty to seize every available opportunity for enhancing the rents, or, as a matter of course, to engage in resettlements because those to which we have succeeded are technically voided. Nor is it a convincing argument that the tenants are willing to pay the increase demanded. The tenants are not free agents. The general rates of rent are already high and approach to those of Chittagong, which are the highest in the Province, and often greater than the land itself can possibly bear, and I constantly have received and refused proposals to embark in doubtful litigation with the object of securing enhancements.

167. Bhubanjoy Shaha, who is now 91, has begun again his attempts at interference with and criticism of our management. He recently wrote me two letters which, from his point of view, were exceedingly astute and relevant. To the last I replied, telling him plainly that if he was dissatisfied with us we should be only too glad if he resumed charge of his estate himself. Its credit balance is now over Rs. 8,000.

168. The current demand, rent and cesses, for these three Noakhali estates was Rs. 94,700, of which Rs. 65,514, or 69·1 per cent., were collected last year. The total collections were Rs. 98,369 or 69·7 per cent. in the whole demand, including arrears. This percentage the year before was 74·9, though it was a bad agricultural year.

169. It is pleasant to turn to the Chittagong estates which are now 10 in number, the little estate belonging to the Mong Chief in the hills having been released in 1894, and that of Latifa Khatun from the 1st April 1895. The estates that remain are still found in fragments all over the district, and though two of them now have a rent-roll of over Rs. 50,000, not one of them possesses a single entire village. Thus, their management, which is so creditable and most popular, is a great aid also to the local administration, and it has just enabled us to feel ourselves the exact effects of the settlement concluded in the south of the district. The rent-roll of one estate has been brought up by it to over Rs. 50,000. The incomes of all, and their dues to Government, have been increased, and some of these changes the Manager and Collector are disposed to complain of.

170. The largest of them is that called Raj Kishan Banerji, and it represents the locally historic estate Taraf Jaynagar, or the legitimate part of Taraf Joynarain Ghosal. Though its rent-roll is over Rs. 50,000, and the charges for its management only 4·9 per cent., the other charges are so heavy that it has been unable to expend any appreciable sum in improvements—a fact which has evoked the unfavourable notice of Government. A margin for them could only be obtained by reducing the proprietors' allowances, which are high. One of them is an aged widow lady, and it is for her sake only and at her prayer that the management is retained. Next in size comes the estate called Magan Das Rai. The proprietors are now all of full age. The estate was to have been released this year on the youngest of them attaining his majority, but he, like his brothers, is of weak intellect. The District Judge has granted a certificate of incompetency to the family, and the estate is retained for an indefinite period under the Court of Wards, and I have favoured the arrangement. Just after the orders for it were passed, the two younger imbecile proprietors were married, a fact which was only known when their mother applied for the marriage expenses. These marriages I have so far pronounced to be clandestine. The debt on this estate has been at last finally cleared. With the release of Latifa Khatun's estate there is no ward's estate in Chittagong now in debt.

171. It was with no small relief that we received orders for the release of this last. It came under the Court of Wards in 1890, against the advice of all the local officers, and solely because of the pressure put on the Board of Revenue of that day by the District Judge, who in fact used a power which he had under the Act of 1874, but which was taken from him by that of 1879. The same tactics have been resorted to since, and on the example of Latifa Khatun's case have been strenuously resisted. We never succeeded in ascertaining what the debts of the estate were, though they were always pressing and always heavy. The ward's adult son anticipated the rents and remained practically in possession of over half the property. She has now composed her differences with him, and on this ground sought the release of the estate. Its last act before release was to default for the Government revenue.

172. The Chakma Chief's property in the plains is one of the Chittagong estates. Its surplus funds are managed by the Commissioner. A very small portion could be spared for improvements, as the Chakma Raja's family residence at Rajanagar, on the edge of the hills, was falling into ruins. Its restoration, which cost over Rs. 5,000, has now been completely effected, but absorbed all the surplus.

173. The other estates spent liberally on improvements. The most important and expensive works were the restoration and maintenance of the sea-dykes, which benefit not only the estates, but their neighbours. The entire sum spent by Wards' estates in Chittagong on improvements was Rs. 6,599, very unequally shared. The whole sum spent by them on public objects, such as schools, dispensaries, and medical aid in the interior, was Rs. 333. The average percentage of the cost of their management was 8·7, varying from 4·9 on estate Rajkissen Banarji to 13·8 for that of Ram Ratan Tewari. Their whole current demand, rent and cesses, was Rs. 2,89,518, of which 89·7 per cent. was realized. The whole demand claimed was Rs. 3,62,596, of which 80·3 per cent. was realized. The General Manager was, as before, Rai Kailas Chandra Das Bahadur, to whom is due the credit for the efficiency and great popularity of this department. As in every year hitherto, applications to be taken under it had again to be refused.

The statement below gives the figures to which these remarks refer.

Expenditure on works of improvement in the Wards' Estates in this Division during the year 1894-95.

Names of estates.	Gross income as shown in return No. XXXI, for calculating rates.	EXPENDITURE.										Net income, columns 3 to 14.	Expenditure on works of improvements.	REMARKS.

XIX.—EXCISE.

174. With puritan Musalmans as its preponderating population, excise is a comparatively insignificant item of administration in this Division. Its most important item is opium, the bulk of which is surreptitiously taken from Chittagong to Arakan, and it is plain that Fenny in Noakhali began last year to be used as a depôt for this traffic. Next to opium comes ganja. Experience elsewhere has shown that when the use of intoxicants comes under social or religious reprobation, ganja is most in vogue with those who secretly break or elude these restrictions, and the figures indicate that this is the case in Tippera, where the bann against such stimulants is strongest. Country spirit is the chief article of open consumption, and its use is confined to the aboriginals and lower classes of Hindus, and the foreign labourers who come for private or for public work. So inconsiderable is its production and consumption that it has never been worth while to work a system of central distilleries in the Chittagong Division. Its fluctuations are chiefly due to the progress of the railway and to speculation attending thereon. In 1893 the opening was thought a large one and the bids were high. The scarcity which followed in September of that year and continued till July last accounts for the re-action in Tippera, and the corresponding figures for the other two districts show how severely this latter cause was felt in Tippera.

175. In Hill Tippera and the Chittagong Hill Tracts there is no excise, and the long and wild line of border affords full facilities for the importation of country spirit made in those territories. I agree with the Magistrates in thinking that no such systematic smuggling is carried on, and that the few cases detected represent a fair proportion of those which actually take place. The up-country consumers are too temporary in their residence, too pinned to the work on which they are engaged, and too little stationary to be able to devise such a system. For other consumers there is no large or general demand.

176. The fluctuations in the opium revenue of Chittagong have always been great and have been looked on as accountable; but this need not be, when we know that they depend on the success or failure of a trade which is contraband. A glance at the map and the long estuary of the Naf river, and the narrow tongue of woodland and hills which separates it from the sea, shows that there is a practicable frontier of nigh 60 miles between the Chittagong district and Burma, which it is impossible to guard. In the section on crime

some cases have been given which show the boldness and ingenuity with which this system of smuggling is pursued. The opium has all been excised in Bengal. In Fenny the examination of the accounts of two rival shops disclosed receipts far in excess of the amounts accounted for or the balances in store, and as in a season of brisk exportations like the last, the Fenny boats with rice go as far as Arakan, it could be surmised with certainty that the opium unaccounted for had taken this route. Though there were 16 convictions followed by some exemplary punishments for this offence in Chittagong last year, the trade is so profitable and, with a little caution, so safe, that no effect as a real deterrent can be expected from them. This traffic probably keeps pace with the exportations of rice by open boats to Cox's Bazar and to Teknaf.

177. Tari is produced in all three districts, but is little used as a stimulant or intoxicant. Regarding the system of counting and registering tari-producing trees which is attempted to be pursued, Mr. Carlyle from Tippera offers the following remarks :—" I think Government should make up its mind either to exempt trees altogether in districts where it ('tari') is mainly used, as here, for the manufacture of *goor*, or else tax all trees. I believe in some cases, at all events, people here take out licenses, not because they intend to sell tari, but because they are liable to suspicion if they tap trees for which they have no license, and they prefer paying the fee to running the chance of molestation." I lay no particular stress on these observations in the connection in which they are made, but I believe them to be correct, and think that they illustrate what I have said elsewhere about the law-abiding habits of the Tippera people, who in regulating their social concerns are so ready to take the law into their own hands.

Salt.

178. The figures reported this year show an increased rate of consumption all round, which is claimed as the result of greater activity and vigilance. The minimum standard of consumption we look for within the salt limits is five seers of excised salt per head of the population per annum. Notwithstanding the great increase which must have taken place in the population since 1891 on the littoral, where it was increasing fastest, the rate of consumption last year rose to $5\frac{1}{2}$ seers per head of the population recorded in 1891. There was much more activity in Noakhali, where the tradition that illicit manufacture of salt was practically impossible was broken down. It is now said to be only possible in the dry season. In Chittagong the results were ordinary, but the rewards distributed were very scanty. When there was great difficulty in providing for these rewards, which till 1893 were met from our contract funds, they used to be very liberal in Chittagong. There is no such difficulty now, and the District Officer's attention has been drawn to the point.

XX.—STAMPS.

179. The table below shows the fluctuations of revenue under the two general heads non-judicial stamps and court-fees :—

Revenue derived from sale of stamps.

Name of District.	Non-judicial stamps.		Court-fee stamps.		Total of both kinds of stamps.			
	1893-94.	1894-95.	1893-94.	1894-95.	1893-94.	1894-95.	Increase.	Decrease.
1	2	3	4	5	6	7	8	9
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Tippera ...	1,22,677	1,34,029	4,07,046	4,65,601	5,29,723	5,99,630	69,907	...
Noakhali ...	75,976	82,539	2,57,937	3,09,269	3,33,913	3,91,808	57,895	...
Chittagong ...	1,14,626	1,09,979	3,64,515	3,64,583	4,79,141	4,74,562	...	4,579
Total ...	3,13,279	3,26,547	10,29,498	11,39,453	13,42,777	14,66,000	1,27,802	4,579
						Net ...	1,23,223	

Under impressed sheets, non-judicial, there was an increase of Rs. 16,940 in Tippera and Noakhali and a decrease of Rs. 5,058 in Chittagong. The increase in Tippera is attributed to the results of the distress up to July, and in Noakhali to the good harvest and the opening of new registration offices. All these causes are factors, but results in Tippera have not coincided with those of the other districts for some years. The decrease in Chittagong is attributed by the Collector to fewer large transactions, but I have little doubt that it is chiefly owing to the near conclusion, and conclusion in a large area, of the settlement proceedings, which have also operated to make disputes fewer and to decrease the consumption of judicial stamps.

In receipt stamps there was an increase of Rs. 1,342, which is attributed to the strict supervision of the income-tax assessors, but I believe it to be wholly due to the presence and progress of work on the Assam-Bengal Railway.

The revenue from judicial stamps shows an increase of Rs. 1,09,887 in Tippera and Noakhali, attributed to increased litigation after the good harvest and the reaction which followed it; while Chittagong, where much the same cause operated, shows a decrease of Rs. 32. The causes for this check in revenue I have referred to above. In Cox's Bazar subdivision, in which lies the area recently settled, the decrease under court-fees was Rs. 3,713.

The amount of duty and penalty realized by civil courts increased, but there was a decrease in the number of other cases that came before Collectors.

It is noteworthy in this connection that Chittagong is the only district in which I have seen proceedings under Chapter III-A of the Court-fees Act taken. In Chittagong such cases are very common.

XXI.—INCOME-TAX.

180. The receipts decreased by Rs. 5,266 owing to the transfer of the tax on the Assam-Bengal Railway employés to Shillong. This affected all the districts. The balance of tax at the close of the year was only Rs. 20; Rs. 10 in Tippera and Rs. 10 in Chittagong. In Tippera 13 warrants were issued against five the year before. In Noakhali their number dropped from 159 to 65. In Chittagong there were none. The year before there were 19. There were four sales in Noakhali against ten the year before, and none in the other districts. Three hundred and eleven objections were filed, of which 219 were rejected. For the Division the percentage of successful objections was 29·5. In Tippera it was 31·8 against 44·4 in 1893-94, in Noakhali 25 against 33·6, and in Chittagong 30·3 against 31·3. The percentage of charge for collection stands at 8·1 against 4·5 for the Province in 1893-94. This is very high, and now that the railway will soon open, I think there might be two assessors for the Division, one with the Chittagong district and each thana area of Noakhali and Tippera intersected by the railway or lying east of the main line; the other, who would travel chiefly by boat, for the rest of Tippera and Noakhali.

In Noakhali a shop-keeper was tried and convicted for showing false accounts. The genuine books were found concealed in the house of a neighbour.

181. There is nothing new to report on the state of public feeling about this tax. The Collector of Noakhali's resort to coercion for the last two years has been on a much larger scale than elsewhere, and the matter is under notice; but meanwhile I quote his opinion that the tax is disliked by those who have to pay it, but is collected without much friction. In Noakhali, a purely agricultural district, it touches one out of 793 persons.

XXII.—MONETARY TRANSACTIONS.

182. The monetary transactions are by cash, currency notes, postal money-orders, transfer receipts, supply bills, and hundis. The last were rarely used, but last year appeared in some numbers with the great increase of trade in Chittagong. The movements of treasure to and from Chittagong are, as the section of trade shows, important, following not only the purchases of rice and jute, but the expenditure in the South Lushai Hills. The other districts receive currency notes for the purposes of private remittances, and send away their surplus silver to Dacca, Calcutta, or Chittagong.

183. In Tippera the total number of revenue and general money orders was 2,888 and 1,009 against 2,670 and 663 the year before. Currency notes

for Rs. 2,65,190 were received from Calcutta and the public, and notes worth Rs. 2,63,935 were issued.

A few remittance transfer receipts were granted to Government officials for pubic purposes, and to the public at a premium for payments of land revenue and cesses. The premium on them was only Rs. 60. That on supply bills was Rs. 652-4. Only three large estates used them. Rupees 26-14 represent the hundi stamps issued during the year.

The total receipts at the Comilla treasury were Rs. 47,08,308, and at the two sub-treasuries Rs. 7,91,494 and Rs. 8,26,439. These remit their surpluses to Dacca, not to Comilla.

184. In Noakhali the total treasury receipts were Rs. 30,13,958, and Rs. 15,75,000 were remitted to Dacca and Chittagong, besides the considerable amounts which had to be sent to Fenny for the requirements of the Assam-Bengal Railway.

In Noakhali the curious demand for half-pice continues, and Rs. 1,050 worth had to be obtained. Elsewhere these coins accumulate and are returned to Calcutta.

185. In Tippera and Noakhali there is no general use of currency notes. In Chittagong the issues of currency notes amounted to Rs. 7,96,030, though Rs. 2,75,925 worth of these were returned to the reserve treasury. The value of these received from the public was Rs. 5,13,370. Rs. 1,50,000 in silver were received from Dacca, Rs. 1,00,000 from Noakhali, and Rs. 3,00,000 from Tippera.

XXIII.—RAILWAYS AND OTHER PUBLIC WORKS.

186. The Assam-Bengal Railway, from Chittagong to Chandpur, will be opened in the course of the year. The rail head of the main line is now beyond the north boundary of this Division. The line to Chandpur is practicable for through trains at the time of writing this report, but interruptions may be expected in the rains because of the newness of the bank. Some bridges have still to be completed, and the line to be lifted from the working diversions. Work has been slowest in the Chittagong section because of the labour difficulty; the rains of March 1894, which spoiled a great quantity of bricks; and an outbreak of sickness in that year.

187. The chief obstacles in the line were the estuaries of the Fenny and Mohari, which are crossed by two bridges of nearly equal span just above their junction. These bridges are called temporary, but will probably last for ten years. They are aerial looking structures, made of iron piles and of considerable beauty. Their construction proved to be easier than was expected. The greatest difficulty was the violence of the spring tides, and there were at first several accidents from large boats being allowed to drift against the piles. The steersmen have now learned to be careful, and can shoot the openings without difficulty. The other large bridges are those over the Gumti and Titas in Tippera.

188. The cost to Government of providing the land for this work is noticed in the Land Revenue section. The results of its contact with the villagers have been less troublesome than was to have been expected. The most serious was the attack on an Assistant Engineer by the sullen Ferazis of the north of Tippera in 1893, when he nearly lost his life, which his assailants meant to take. This was because of a diversion on to homestead lands. The commonest cause of collision is trespass on the line and tethering cattle on the bank, and in a recent case near Chittagong the railway servant concerned was killed. The prompt and adequate action taken in both cases had far-reaching effects, but the collisions arising about cattle are frequent, and I regret to hear the line is not to be fenced. The people cannot understand why they may not use the open road as a path, while the impounding of their cattle for grazing on what they regard as a mere piece of waste land is believed by them to be the merest spite, or the oppression of railway underlings for purposes of extortion. They will no doubt learn in time, but not without much trouble which the fencing would save.

189. The drainage question as affected by the railway has only come to notice in a very favourable way in one instance. Near Fenny the line runs for

over two miles over what was the Kalidaha swamp, and the earth to make the bank would have had to be railed from both ends, but that Mr. Gee, the local Engineer, whose happy relations with his Muhammadan neighbours are referred to elsewhere, bethought himself of emptying the marsh. This was not so obviously practicable a measure as might appear, because the site of the drain lay two miles away from the line, far remote from the railway's operations, and the work was so heavy that its actual cost, done departmentally, was Rs. 2,000. Nevertheless, Mr. Gee, who, as noticed, is not acquainted with any vernacular, secured assent from the owners concerned to his carrying it out, and did so. The swamp was drained in the dry season, and the bank, with proper openings, was made. In the rains the silt-laden water of the Mohari rushed through the cut, and when it receded left the bed of the swamp considerably raised by layers of rich silt. In February and March 1892 and 1893 I had been over this swamp, always in water, often waist deep. Last April I found the area wholly dry and raised, with no signs even of marsh, and with every foot of it under cultivation. There is no prospect of its relapsing.

The greatest headway given for bridges over minor streams is 12 feet. This will not affect the Chittagong and Noakhali sections of the line, but was the subject of remonstrance from jute merchants for Tippera, as the high pooped boats locally used will have to unship their rudders as well as their masts in order to pass.

190. So far the only accompaniments of this civilizing and educating agency have been a great increase in the local excise revenue and a considerable increase in burglaries and thefts, both due to the foreign labour imported to construct it. These remarks are, of course, not made with any serious disparagement, but I confess to apprehending some very undesirable consequences from the line, notwithstanding all its advantages. Though the Magistrate of Noakhali says that the people in his charge are without social amenities, and are superstitious and boorish, he can also say that they are strictly temperate, free from crime, law-abiding, distinguished for their conjugal morality, and extraordinarily prosperous. The Arcadian state no doubt rests upon ignorance, but I altogether deny that our idea of its existence in this case also rests upon our ignorance of the peoples' doings and ways.

191. When the Mohari and Fenny bridges were being built, the idea so often manifested throughout India, that their erection demanded human sacrifices, preferably of infants, was conceived by the villagers, Muhammadan as well as others, and the Executive Engineer, Mr. Digby, had once a narrow escape of being mobbed in consequence. This notion may be, as it were, in the soil or in the air, but in this case it was most likely imported by the up-country or Ganjami workmen.

192. The only public buildings in progress are the erection of a quadruple munsifi and of an upper-story to the jail at Comilla, both near completion, and the conversion of the Noakhali dispensary into a masonry building. The regrettable omission from this list of the central hospital in Chittagong is noticed in the section on dispensaries.

XXIV.—COMMUNICATIONS.

193. The most important communications at present are the natural waterways, and next to them the line of inland channels, partly natural, partly artificial, of Chittagong. From this standpoint the project for the Nadona canal in Noakhali is discussed.

194. It has often been noticed how inconsiderable the cart traffic of the Division is, and how narrow is the distinction between the scheduled and the village roads. The importance of these last has always been recognized, even though they are only means for shoulder-borne traffic and for giving the people access to the markets and the law courts which they so much frequent. So the figures for the mileage and expenditure on these roads last year are given:—

	Mileage.	Expenditure in 1894-95.
		Rs.
Tippera village roads	196	18,426
Noakhali " "	123	16,028
Chittagong " " ... estimate	300	actual 15,000

The rate per mile is high. All these roads are high banks with frequent temporary bridges.

195. The work on the scheduled roads was almost wholly maintenance. The three districts are now busy with plans for railway feeders, and in Tippera and Noakhali these are ready. The Chittagong District Board at first demurred to undertake the work, and this accounts for their backwardness. In Chittagong these roads can only be short approaches from the sea on one side and the ranges on the other. None of the hill passes are practicable for carts. The Inspector of Works says, and I agree with him, that to make even these short lengths of roads the District Board should give up or change the character of some of the works now maintained. The southern system of roads, for instance, was constructed to suit cart traffic which has never come.

196. All the districts are served by steamer companies, and Tippera and Noakhali give subsidies which frequently change as experimental services are opened or abandoned. The island of Hatia is well served, but it has been found impossible to maintain the service for Sandwip for want of anything like a port or landing place or anchorage. The steamer *Chaffinch* (with me on board) was as nearly as possible lost off Sandwip in November 1893. She touched a sharp shelf in the bank at high tide, could not be got off, and as the tide receded, would have fallen over, had she not been propped on the sea-side with palm trees. The great difficulty is in landing passengers in stormy weather at any time, or in ordinary spring tides. Chittagong has been worst off as regards steamer service, as by compact between the British India Steam Navigation Company and the Asiatic Steam Company their boats leave Calcutta on the same day.

197. The Nadona Canal project in Noakhali is, by improving and extending an old channel which intersects the main land of the district, to put the town of Sudharam in direct communication with the river Dakaita in Tippera between the marts of Hajiganj and Chitosi. For the last four years observations have been taken and recorded, and in May last the Chief Engineer had materials sufficient for his decision. He pronounced that there were no engineering difficulties about the work, but that it would cost Rs. 60,000, and its maintenance would probably cost Rs. 3,000 annually. It was for the District Board to consider if it was worth such an outlay. To my entire surprise, the District Board, which for over five years has been reflecting and acting on the popular feeling on the subject, at once abandoned the project.

In doing this, I have little doubt that they were influenced by the prospects of opening a steam tramway from Sudharam to Fenny, which they had warmly taken up at the time. If Government gave the road (which has a uniform surface breadth of less than 16 feet), the Assam-Bengal Railway Administration would make this tramway for three lakhs of rupees, except for the important bridges (a very appreciable exception). But they would require two lakhs of rupees a year to work and maintain it. The project is out of the question at present.

If the Chief Engineer meant—and I am not sure that he did so mean—to discourage the Nadona project, his opinion was not given in view of the following considerations :—It intersects Noakhali from south to north, where communication is so defective that in the north the price of salt is cheaper by Re. 1 a maund than in the south. The canal would debouch on the Dakaita, between the river-side marts Hajiganj and Chitosi, which are now railway stations on the railway from Chittagong to Chandpur.

To me it is not a matter of doubt for a moment that if the project cost a lakh, and its maintenance Rs. 10,000 annually, it would be well worth undertaking, now that it has been pronounced to be free from engineering difficulties. Under the Canals Act power could be given to levy tolls on it, which would go far to recoup the maintenance charges, as in the case of the Chittagong canals. Moreover the District Board have the money and more than enough.

The Magistrate, under whose guidance the project was rejected, now tells me that he accepts these views, and that the popular feeling for the scheme is as strong as ever, so I hope to see it revived.

A further discouragement was the attitude of the Tippera District Board in the matter. The south bank of the Dakaita is under them, and their share in the project would cost some Rs. 5,000; but they said they had no concern

with it. Similarly, a road from Chandpur to Noakhali would have greatly shortened the mail route. The mails now go round by Comilla, and the circuit to Noakhali is nearly 100 miles. The Noakhali District Board made their section of this road, and the Tippera District Board have, I find, now failed or refused to make the very short section under them. The Tippera District Board is by no means generally disposed to take the parochial views of which I still accuse the Chittagong District Board; and had the negociations with it been properly managed and held through the Commissioner, they would, I feel sure, have succeeded.

198. The following figures show the expenditure on tree planting:—

	Rs.
Tippera	1,166
Noakhali	1,012
Chittagong	1,314

In the Chittagong Hill Tracts, where the roads pass for miles through unbroken forest and every glade and opening is welcome, I have stopped this expenditure till the Assistant Commissioner is able to find trees which kill all undergrowth beneath and round them. In Tippera in past years it was conducted with so little discrimination that several of the trees then planted have to be cut down because they are dangerous obstructions. The Magistrates in whose hands this branch of work, which is not engineering, is best managed, ought to try and make a good avenue of the Dacca-Chittagong road, the only broad road in the Division, and one of which all of them have a share.

199. The Chittagong District Board have just completed their road, which fills the gap that existed for several years in the important road towards Mandalay.

XXV.—WORKING OF THE LODGING-HOUSE ACT.

200. The Lodging-house Act is only in force from Barahkund, three miles on the south of Sitakund in Chittagong, to Labanakhya, the same distance to the north of it on the Dacca road. Pilgrims take up their quarters at Sitakund. The year was inauspicious, and the gathering of pilgrims small and variously estimated at 3,000 and 4,000. Rupees 562-2 were spent on conservancy, and the balance of the fund was Rs. 6,187-13 at the close of the year. The expenditure for the whole of it was provided for long ago in constructing three water reservoirs, and the work is in progress, but there was great delay in acquiring the land. There was one death from cholera, and no other appearance of disease.

XXVI.—EDUCATION.

201. The good attendance at schools shown in this Division is due to two connected causes. One is the prevalence of Islam, which leaves the numbers of those castes and tribes who, for their degraded state, are excluded even from the village schools, a very small proportion of the population. The other is the prevalence of Koran schools, notwithstanding that so many of these are strictly private and excluded from the returns, or of schools which are scarcely more than Koran schools. However much professional educationalists may decry these, they are instruments of training. They enforce discipline and regularity, fix the attention and exercise the minds of the pupils if only in learning by rote, and this is the process by which are laid the foundations of that religiousness in the people which has been elsewhere noticed. The state of education in each district is separately described.

202. In Tippera it was much affected in its humble forms by the high prices, scarcity, and distress which prevailed till July. There was a loss of 387 schools and 2,700 pupils in the institutions teaching the departmental standard. The private schools for indigenous instruction decreased by 270 and their pupils by 3,899.

Including the indigenous schools, 60,532 boys and 6,316 girls attended school, and the percentage of boys of school-going age at school was accordingly 44·2 and of girls 4·8 against 48·5 and 5·4 the year before.

203. The total expenditure on education was Rs. 1,98,331, of which Rs. 16,012 were paid from provincial revenues, Rs. 41,969 from the district fund, and Rs. 900 from municipal funds. Private contributions made up the balance.

The figures include the charges for inspection and for contingencies, and therefore differ from those given in the statement. The number of high schools was unchanged, and all except the zilla school showed improved attendance. All these schools were successful at the last entrance examination, and altogether 48 boys passed against 30 the year before.

204. Three middle English schools were closed while the middle vernacular schools remained stationary. Of 77 schools under these classes, 11 English and 17 vernacular schools were aided by the District Board, 29 vernacular schools by the Department of Public Instruction, and the rest were unaided. Of 340 boys who competed, 195 passed, 20 with English certificates. Only 158 had passed the year before, but 27 of them got English certificates.

205. The upper primary schools gained 12 schools and 579 pupils and the lower primary schools lost 363 schools and 3,295 pupils. The best among the upper primary schools and the lower primary schools in backward localities got stipends. The rest were on the payment-by-results system. From the funds at the disposal of the Magistrate, 28 primary schools in Government estates and municipalities were maintained. Of 377 boys sent up, 162 passed the upper primary examination against 141 the year before, and 774 passed the lower primary against 836 boys the year before.

206. There was a loss of 35 girls' schools and 553 girl pupils. There were 6,316 girls at schools, including those reading in boys' schools, against 7,087 the year before. Three hundred and seven of these schools received aid from the primary grant in stipends and rewards. For the Faizannessa Girls' School at Comilla this monthly subsidy was Rs. 40. One girl from this school passed the upper primary examination. Of 47 girls who appeared, 36 passed the lower primary, and two of them carried off scholarships. Twenty-two girls were successful the year before and the girls took five scholarships.

207. The eight special schools are six guru-training classes attached to middle schools, the Comilla Madrassa, and the Elliott Artizan School at Comilla.

The Elliott Artizan School had 30 pupils on its rolls against 29 in the preceding year—18 in the carpenter, 5 in the blacksmith, and 7 in the tinsmith class. Its receipts during the year were Rs. 5,677 derived from the following sources:—

Provincial revenue for the—	Rs.
Tinsmith's class	800
District funds	2,130
Subscriptions	1,230
Sale proceeds of articles manufactured	1,517
Total ...	5,677

The expenditure was Rs. 5,334 including Rs. 349 laid out in tools and plant and Rs. 1,741 in materials. Rupees 343 were at credit of the school at the end of the year, besides outstanding bills amounting to about Rs. 500. One blacksmith's pupil and five carpenter's pupils received certificates of proficiency. The first has obtained employment on the Assam-Bengal Railway. Of the last, four have opened business on their own account, and the fifth is employed in the school. The school is affiliated to the Sibpur Engineering College, the Principal of which visited the institution twice during the year.

208. Owing to the loss of Koran schools the number of Muhammadan boys at school fell from 47,655 to 41,761, and the percentage of them to pupils of all denominations from 64·8 to 62·4. Five passed the entrance examination, 48 the middle, 75 the upper primary, and 282 the lower primary examination, at which 6 Muhammadan girls also passed.

209. In Noakhali 101 additional public schools with 5,872 pupils are shown. Private schools increased by 60 and their pupils by 1,387. These apparently are the Koran schools which Mr. Bose excluded the year before,

and which, in my opinion, should not be excluded. The number of high schools was unchanged. The zilla school at the last entrance examination passed 4 in the first division, 6 in the second, and 1 in the third division, out of 12 candidates, against 5, 4 and 2 out of the same number of candidates the year before.

210. The number of middle English schools was unchanged, but the pupils increased by 149. Of 55 candidates, 41 passed the middle examination. Middle vernacular schools decreased by 1, but the pupils increased by 29. Of 145 candidates, 77 passed the middle examination.

211. Upper primary schools decreased by seven, but their pupils increased by 118. Lower primary schools increased by 110 and their pupils by 5,445. Of 178 sent up, 91 passed the upper primary, and out of 965 candidates 439 passed the lower primary examinations.

212. The number of girls' schools increased by two and the pupils by 100. Including the girls reading in boys' schools, there were 5,410 girls at schools, against 3,657 the year before. One girl passed the upper primary and eight the lower primary examination.

213. The technical school at Noakhali was closed at the beginning of the year. The Board have awarded two scholarships of the value of Rs. 10 each, tenable for five years at the Sibpur Engineering College, and one of the same value tenable for two years at the Calcutta Arts School.

214. The number of Muhammadan pupils increased from 37,457 to 42,942. The increase was shared by all classes of schools except the high English and the upper primary schools for girls. The percentage of Muhammadan pupils on the total number was 76·2. Some *maktabs* were subsidised by the District Board to encourage Muhammadan education. Two passed the entrance, 26 the middle, 68 the upper primary, and 420 the lower primary examination last year.

215. In Chittagong, counting private schools with those teaching the departmental standard, there was an increase of 164 schools and of 7,103 pupils. Of these 136 schools with 4,895 pupils were private institutions. Altogether 55,734 boys and 4,793 girls were at school, and the percentage of boys of school-going age attending schools was 60·3 or 3 in 5, and of girls 4·7 or 1 in 21, and on an average there was one school to every 1¼ square mile.

216. There were five high schools, four in the town and one in the interior, with 30 fewer pupils than in 1893-94. Thirty-four passed the last entrance examination out of 88 candidates, against 24 out of 93 candidates the year before.

217. Middle English schools increased by two and middle vernacular schools by four. Nine of the 12 middle English schools and 38 of the middle vernacular schools are aided. Two hundred and two out of 295 candidates passed the middle scholarship examination, against 134 out of 242 the year before.

218. Upper primary schools increased by 13 schools with 868 pupils, and lower primaries by 99 schools with 3,255 pupils. Two hundred and thirty seven boys out of 477 who appeared passed the upper primary examination, and 842 out of 1,220 the lower primary. The year before the figures were 194 out of 394 and 539 out of 1,042 respectively.

219. Girls' schools increased by 22 with 331 pupils. Including those girls who read in boys' schools, 3,226 girls were at school against 2,528 the year before. One of the schools is a middle vernacular receiving a grant-in-aid.

Two out of three girls who appeared for it passed the middle vernacular examination, 11 out of 16 passed the lower primary, and none the upper. The year before, 3 passed the upper primary and 17 the lower, and none competed for the middle vernacular.

220. The seven special schools in Chittagong are the local training school for vernacular teachers, three guru training classes attached to middle schools, and three madrassas. The training school had 36 pupils against 39 the year before. Of the three madrassas, that at Cox's Bazar has at the close of the year been amalgamated with the middle school there, in which it is represented by a special class. This matter is noticed under the section on "Tours." The madrassa at Chittagong had 624 pupils against 572 the year before. It was

permitted last year to teach up to the entrance standard, and 6 candidates appeared, but all failed. The other madrassa is also at Chitagong, but is private.

221. The Chittagong madrassa has a considerable local endowment besides the support it receives from the Mohsin Fund. It is supervised by a Committee, of which the Commissioner and District Magistrate are President and Vice-President, and the District Judge a member. The Superintendent, Maulvi Zulfiquar Ali, who brought it to its present flourishing condition, was superannuated in January 1895, and succeeded by a younger incumbent. The pressure on the space has now become inconvenient, while with the opening of an entrance class the institution is more popular than ever. So the Committee propose to raise the fees. An additional reason for doing so is the contraction of the Mohsin Fund by the recent conversions of Government loans.

222. The collegiate school has had rather an unlucky year, but is nevertheless the standard educational institution in the Division. The project for its hostel has been sanctioned at a cost of Rs. 4,572, of which all but Rs. 500, which the District Board contributes, will be met by subscriptions and surplus funds already in hand. Babu Abinash Chandra Chatterji, the Principal, was the originator of this scheme, which has been so successfully carried out. The madrassa with its new entrance class will henceforward be a rival to the collegiate school.

223. There was a total increase of 5,103 Muhammadan pupils in the public and private schools. In the former the percentage to the total number was 58. Three passed the entrance examination, 36 the middle, 51 the upper primary, and 297 the lower primary examination, against 3, 19, 39 and 150 the year before. They secured 2 middle, 2 upper primary, and 7 lower primary scholarships.

224. The completion of Babu Abinash Chandra Chatterji's scheme for a hostel in connection with the collegiate school would save the normal school there from a continuance of my attacks on it, had I not been converted by a perusal of the remarks in the Director of Public Instruction's last report on this subject. The only remark left to me to make is that the site and building enjoyed by this normal school, both of which we coveted for other educational objects, are exceedingly fine ones for an institution which fulfils the object explained by the Director.

I also read with interest and profit his remarks upon middle schools, which have often been the subject of slighting reference in the reports from this Division. But while I wanted absolutely to end the Chittagong Normal School and to take possession of its premises, my feeling towards these middle schools was much what those of an executive officer must be towards juries and municipalities when he complains of their inefficiency or graver faults, while he acknowledges that they cannot be for many weighty reasons superseded.

225. In Chittagong students and school-boys maintain their good character for their conduct out of school. The same can be said of the very numerous pupils at Comilla, where four or five years ago their reputation was not good. At Noakhali, Fenny, and Brahmanbaria the conduct of the school-boys has given rise to complaint in some instances and anxiety in others.

XXVII.—DISPENSARIES, &c.

226. The statement shows the working of, and the progress made in, this department, in which Tippera still holds the long lead first given to it by Mr. Greer in 1890 and 1891. Including the Faizunnissa Zanana Hospital it now has 18 dispensaries, 12 representing Mr. Greer's system of a local guarantee and the aid of the District Board, two in municipalities, two maintained by the Dacca Nawab, one by pargana Sarail, and one by Raja Binay Krishna Deb in pargana Gungamadal. This last is not under Government supervision and does not appear in the statement. Allowing for all differences of population, the extent to which medical relief is both made available and given in Tippera is more than twice as great as in Noakhali and Chittagong, while the rate at which this extent increases in Tippera still keeps ahead of the rate of progress in the other districts, solely because the start was better and its basis so much more comprehensive.

227. The improvement of the Brahmanbaria dispensary, which is now under an Assistant Surgeon, is noticed in the section on tours.

228. In Noakhali the dispensary at Sudharam has shown an improvement which may be imitated in the interior. It is now to have a good masonry building. I found the dispensary at Fenny, on the state of which I had often animadverted, decidedly improved. At Fenny, certainly, one cause of bad progress was the leaning either to homœopathy or the Ayurvedic system of all the local leaders, and this seems to have affected the district in other places.

229. In Chittagong, too, the increased attendance at the Chittagong hospital under Dr. R. D. Murray and Assistant Surgeon Hari Mohan Sen has been accompanied by similar developments in the interior.

230. By far the most prevalent class of diseases treated at these institutions is skin-disease in various forms, indicating, I am told, not only the amphibious habits of the people, but the extent to which fish is an article of diet—a fact which largely enters into the question when there is a scarcity or great dearness of cereals.

231. Two matters mar what would be a satisfactory report. One is the failure so far of the Faizunnissa Hospital at Comilla. The Civil Surgeon (Surgeon-Captain Rogers), writing of it, says:—"I cannot speak hopefully. As a refuge for *parda-nashin* women it has proved so far ineffective. No doubt the main inducements, viz., personal influence and popularity, have been wanting owing to changes in the lady doctor, but I fear it will take much time before the institution is fully appreciated." So the fact that it was founded by a Muhammadan lady of title has had no influence.

232. The second disappointment is that, at the time of writing, nothing has been done towards the construction of the Central Hospital at Chittagong, for which Rs. 75,000 have been provided and are available. This scheme was given a practicable shape by Sir Charles Elliott at his visit to Chittagong in 1893; it has since received his help in getting through the difficulties which beset it, and the plan of the main building was finally given by him in January last. Mr. Good, the Port Officer and Chairman of the Municipality, whose idea it first was, has done all in his power to help progress. First there was a hitch about the plans, those for the subsidiary buildings having been mislaid when the plan first submitted of the main building was condemned. Then no contractor of repute could be found to undertake the work, and the District Board were unwilling to add to the departmental labours of their hard-worked engineer. At their June meeting they have at last decided to undertake it departmentally.

233. A different subject for regret in connection with the dispensary system is that noticed by the Magistrate of Tippera, that the respectable classes, though eager to use the dispensaries and to get medicines free for which they could well afford to pay, are very unwilling to subscribe. In Brahmanbaria not a single member of the class subscribes. In Comilla one used to, and has withdrawn. In Europe this abuse is stringently checked, and at least in Tippera it is quite time to have some rules on the subject. There are no such rules in the Dispensary Manual.

XXVIII.—LIBRARIES.

234. When Mr. Skrine was Magistrate of Tippera he acted as the Maharaja's agent in founding a public library at Comilla, called after His Highness the Birchandra Public Library. It continues to flourish. Books worth over Rs. 200 were purchased last year. It is still managed by a committee of which the Magistrate is the chairman, and keeps its reserved fund of Rs. 2,000 in the Savings Bank.

The Magistrate of Noakhali casually mentions that "there is one public library in the district." I have to receive information about this institution. It is not the school or office library, which are separately mentioned. The Magistrate says that there is also a library attached to the Sanskrit Tol, but this, too, is something new. There is no public library in Chittagong.

XXIX.—MUSEUMS.

235. There are no museums.

XXX.—LOCAL SELF-GOVERNMENT INSTITUTIONS.

236. The terms have in these reports a technical and restricted meaning. It is, or very soon will be, time to include under them the village panchayats which are so rapidly rising in importance. It will be interesting to compare the work done by the unions formed, and about to be formed, in Tippera and Noakhali, with the work of the groups of panchayats which the Magistrate of Chittagong has to constitute. The working of Honorary Courts, too, comes in one aspect under this head.

237. The three District Boards are again eulogised by the respective Magistrates. Though the majority of the members are Hindu, the Muhammadan population of this Division is, as has often been noticed, accustomed to this kind of stewardship. In such circumstances there is no falseness of position attending membership; there are no claims to be, or posings as, representatives; and no sneers against the holders of the posts as upstarts.
